Certain forms of our wild life become menaced from time to time for one reason or another, and when such a danger threatens we must get down to the root of the evil and eradicate it quickly if we may hope to have that species preserved for posterity.

To begin with, the buffalo, as a wild living thing, is gone. The antelope, while remaining with us, in certain sections, is sadly decreasing and is doomed as the next wild American animal to follow in the footsteps of the bison. The moose, the monarch of the woods, owing to his great size and the ease with which he may be killed, is destined to disappear from the hills as the antelope has from the plains. This beautiful animal is sure to begin his downward career soon if we are not careful. It is true, he has held up wonderfully—both East and West—in the East because he has been very well cared for and protected (as protection goes, for after all, such estimates are only by comparison) and in the Northwest because of superior numbers. But we fear this condition will not be with us long, according to reports that come from the North.

We have it from the most authentic and reliable source that a most serious menace to the life of the moose family has cropped out in some parts of our Northern moose-land. It relates to the killing of cow moose. Of course, bull moose are not fit to eat after the middle of September, until spring. During that period the cow is the sought-after animal by the natives of the North for winter meat. Therefore, only cow meat is offered for sale for human consumption during the fall and winter months. If a bull is brought in the meat is sold for fox or dog feed.

In the winter-time these noble animals, driven down by the deep snow, seek the lower elevations, just as the elk of Wyoming do, and frequently gather around lakes, in sloughs and coulees, where they are found in considerable numbers, and hunted without much effort on the part of the natives. Sometimes the hunter will watch the traveling herds for hours before he is able to see the object of his search—a cow. As many as 25 or even 50 bulls may pass before he gets a shot at a cow. These hunters openly admit that they are after cow meat, and in expressing their feelings to one another over their "hard luck" it is a common thing to hear them say after returning, "Lots of moose, but all bulls;" or, "I watched them coming and going all day, but no cows;" or, "We hunted for cows all day, then killed a bull for dog feed and came in."

The keynote for big game protection and propagation is: Don't kill off the females. It is bad enough to illegally kill bulls out of season, but it would result in a catastrophe for the moose family if this habit of killing cows for winter meat were long allowed to continue. It MUST be stopped, and immediately. The humanitarians, the naturalists, the sportsmen, the protectors of our wild life will not permit this reckless pillaging of the American moose to go further. There are laws prohibiting such a practice; therefore, a full enforcement of the laws is all that is required to put a stop to this poaching.

While the law permits natives and prospectors in faraway sections to kill either sex at any time of the year to sustain human life, it does not permit the slaughtering of bull moose out of season for fox bait, or the protected cow for the purpose of barter at trading posts, where good stocks of supplies can be had.

SAVE OUR NATIONAL FORESTS

(By G. M. Homans, State Forester, California.)

Our experience in California has shown that thousands of people seek health and recreation in our mountains in pursuit of the game and fish, which continue to be abundant, due to the excellent work accomplished by the Fish and Game Commission.

Last year the fire damage in this State was in excess of half a million dollars. Most of the fires were preventable, and unfortunately many of them, there is reason to believe, can be traced to the thoughtlessness of the hunter and the camper. Of course, no one contends that such people are sportsmen; nevertheless, when one leaves his camp-fire, which later destroys necessities of war—whether it be grain, range or timber—he brings discredit upon hunters and campers as a class, with the result that from year to year we find more "No shooting!" and "No trespass!" signs placed about our favorite hunting and camping places. In my judgment, the time is coming, unless a very aggressive campaign is waged against those interested in the proper pursuit of game, when many additional areas will be closed to the hunter.

Each hunter and camper going into the woods must be sure to extinguish his camp-fire before his departure, clear the ground of all inflammable material for some distance before making camp, and exercise proper precaution in disposing of burning tobacco and matches. Even though some fires may be charged to the hunter unjustly, it becomes all the more his duty to assist in waging a vigorous campaign for the prevention of fires if he is to continue having the privilege of shooting on land not now closed to him.

SELECTING A SHOOTING DOG

Two twin-factors must be considered in selecting a shooting dog. One is the breed and the other is the sex.

In the matter of breed the shooter can decide for himself after comparing the merits of the most popular species. For the young sportsman the pointer and the Laverack English-setter are splendid companions. Either one of these breeds will do splendid work with less scientific handling than is usually required to gain the same desirable results in other strains and breeds.

The modern Laverack is a good natured and responsive dog and one that is quick to point. The Gordon setters are also suitable for the inexperienced shooter. While the characteristics of the Gordons are considered as rather self-willed, they are by no means wild to range and are very sure on single birds in heavy cover.

Both the Laverack and Gordon have the unmistakable evidence of class in their appearance which denotes well bred dogs. When picking a puppy before weaning time the amateur should select the fattest one and with a color that suits.

The fat pup may not necessarily be the largest one, but is more likely to be vigorous and aggressive. This rule is good as a rule can be, but there are of course exceptions because many an undersized and unprepossessing puppy sometimes becomes the crackerjack dog in the field.

Things to Remember

In the matter of size, choose the medium, neither very large dogs or very small ones carry the best qualities of the breed. The normal is usually the best dog.

The male dog is usually the best. The female usually shows best in early work, is quicker, but the male dog trains up better and develops the finest head.

In active training a dog should be fed on a manufactured biscuit the last week of the work to put him in the best possible condition. Give the biscuit in the morning and solid, raw and lean beef in the evening.

To keep a dog in good condition some kind of a dip to destroy fleas and prevent mange is essential. The favorite solution—liked because it does not hurt the eyes, is a solution of lye and sulphur.

This is made by dissolving a box of extra strong or concentrated lye and into the water is stirred four pounds of sulphur over a fire. This mixture is diluted with about a barrel of water and is ready to use. It keeps well until used up and the dog can be soused in a tub of this solution head and all without harm.

HUNTING MOUNTAIN LIONS

Although mountain lions are, unfortunately for the deer, found occasionally in most of our western national parks, they are rarely seen. There is no more timid, even cowardly, brute in America. Your lion, which is really the panther of our eastern wilderness, has his home in the most retired rocky fastness of his neighborhood and sulks abroad chiefly at night. His purpose is to play safe. He rarely takes a chance with animals capable of fighting back, and never with man. He leaps upon the unsuspecting deer from behind or from a high rock or low tree. His special fondness for kids and fawns is suspected to originate in their helplessnes rather than the tenderness and delicacy of their flesh.

Becaue he is a large brute with a good appetite and likes his meat quite fresh, the lion is exceedingly destructive. He returns to his kill only while the meat remains sweet. Then he kills again. Often, when deer are plentiful, he kills wantonly for the love of killing.

Late last winter two lions were shot near Hospital Rock in the Sequoia National Park. "They had killed several deer," writes Superintendent Walter Fry, in reporting the shooting, "and about all that was necessary was to watch the carcasses and shoot when opportunity afforded. The female lion was killed the second day and the male the fourth day. There were several hundred deer in the herd when the lions attacked them, but the following day they left the country and did not appear again in the vicinity of Hospital Rock for about two weeks. The lions killed in one night many more deer than they were able to eat."

But lions are not usually so easily shot. They are best got in the winter when they may be trailed by dogs to their lairs in the far places. Mountain lions, lynxes, wolves, coyotes, and foxes only are killed in our national parks, and these only because of their predatory habits.

A REMARKABLE PERFORMANCE

Shooting at the Golden Gate Gun Club of San Francisco, on July 21st, Mr. Walter Cooley brought himself most prominently into the limelight by scoring 49 x 50 targets in the regular club event, and then topping that off by running two ties of 25 targets each at 20 yards rise. It is very doubtful if such a feat has ever been recorded on these difficult grounds. Mr. Cooley shot his "old reliable" single barrel Parker gun.

MUD HENS A DELICIOUS DISH

Besides the almost inexhaustible supply of blackbirds there is another fine but much neglected food bird little known, but to which much prejudice is attached, states George Neale of the fish and game commission. It is the common coot known as the mudhen, water hen and various other names.

In Louisiana, Flordia and other of the southern states it is known as poule d'eau, "and where it is highly esteemed and since the demand for them has become so great, are now becoming rare."

They are not so difficult to approach as our ducks. A person can nearly always walk or row a boat within gunshot of them. They generally flock up so that many can be secured with a load of No. 6 shot. They are as fastidious or particular in their feeding habits and even more so than wild ducks. The strong flavor noted by some people who have eaten them but once and may not have properly prepared them, has condemned them, but that is the very quality that is particularly enticing to the epicure when properly prepared and served. The writer of this frequently hunts this bird for food and not for sport. They make a most delectable dish prepared in the following manner.

Draw the entrails from the birds as soon after being killed as possible; skin them, saving but the legs and breast. Do not soak them in water over night as many direct. It removes all the flavor and makes them insipid and tasteless and is the principal reason these birds are condemned. Wash them in salt water to remove the blood, roll them in flour or cracker crumbs, fry them sufficiently to brown them only in a little grease or olive oil. Have prepared a kettle or saucepan in which is browned a little salt pork, chopped onion, garlic, two bay leaves and any seasoning that may be desired. Put the browned birds into this, season with pepper and salt, celery salt and cover with water and cook slowly. When tender add a spoon of Worcestershire sauce and a little white or sherry wine. After eating this you will understand the necessity of placing a closed season on any of our waterfowl when cooked in this manner, especially the now despised but little known poule d'eau.

These birds are protected by the federal laws and laws of this State, but may be killed in the same season as any other waterfowl. As is the case with blackbirds, farmers and rice growers welcome hunters who will kill these birds, as they are very destructive to rice, but care must be exercised that persons hunting them must not trespass on the rice fields owing to the damage that may be done.

LORENSON AND CLARK ARE HIGH GUNS

A West Coast trapshooter has led in the amateur trapshooting averages all season. First it was O. N. Ford of San Jose, Cal.; then Frank Troeh, of Vancouver, Wash., and for the past three months H. G. Lorensen of Newman, Cal., has topped the list. Lorenson has an average of .9712 on 2050 targets; Troeh, who is second, has a .9709 average on 5895 targets. O. N. Ford of San Jose, Cal., is tenth on the list with an average of .9597 on 8520 targets, a most wonderful performance.

Homer Clark, of Alton, Ill., the professional champion for the last three months has topped the pros. He has an average of better than .97. Rush Razee, of Curtis, Neb., is the only other professional with a .97 average.

WORLD'S RECORD AT FLY CASTING

With an average cast of 184 3-5 feet, A. Jay Marsh, of the Newark Bait and Fly Casting Club, on September 20 bettered the world's record for the quarter ounce bait casting event for distance at the annual tournament of the Anglers' Club of New York, at the big lake in Central Park. The former mark of 174 feet was made by Benjamin Flegel at the national fly casting tournament, Chicago, in 1914.

Mr. Marsh scored against cross winds and heavy rains, which made it extremely difficult for any but a master angler to control his line. Despite the adverse conditions the Newark champion not only set up a new standard for the competition, but made the wonderful cast of 193 feet in his third try.

ALL-AMERICA FIELD TRIAL RESULTS

The English setter, Candy Kid, owned by C. E. Duffield, of Tulsa, Okla., handled by George Payton, of Michigan City, Miss, won the All-American chicken championship stake, which was concluded September 7. The stake is open for all field trial setters and pointers which have been placed in recognized trials. The stake had 20 starters, composed of winners from all parts of the United States and Canada.

The win gives its owner the absolute ownership of the handsome $1,000 Dr. Rowe Memorial Cup.

The two setters battled for one hour and 40 minutes, but at the end Candy Kid made a great finish by securing a brilliant find of chickens. This heat was run during midday, when the weather was very warm, hence it is all the more meritorious.

FOOD FROM THE FOREST

"Guard against waste of wild meat" should be the slogan of every hunter this year. All edible portions of the animal killed should be utilized.

Do not let wild game be an added luxury; let it takes the place of your market meat. No more game than can be eaten should be killed. Do not let your desire to tell a big story when you reach home lead you to shoot everything in sight. Good sportsmen will observe these conservation suggestions in addition to the game laws.

Careful preparation of game for the table also will prevent waste. As a rule, game is preferred cooked rare rather than well done. Venison steak should be sprinkled well with salt and paprika, if desired, and cooked quickly. Serve immediately on a very hot platter. Venison steak requires at least three minutes longer to broil than beefsteak. When broiled it should be sprinkled well with salt and paprika, and put over a dish of hot water to stand a while before serving. With venison steak serve a tart jelly, such as that made of currants or sour grapes, to which vinegar and spices have been added.

Rabbit is most delicious when roasted. After cleaning well, stuff body of the game with a dressing of salt pork, minced onion, and crumbs well seasoned with pepper and salt. The body is then sewed up and roasted one hour. A few thin slices of pork are necessary in the roasting pan to supply fat. Rabbit meat is almost entirely lean. A gravy made in the pan after the rabbit has been removed adds to the finish of the dish. Rabbit stew is also delicious.

Wild birds are usually roasted in the same manner as domestic fowl. Since they lack fat they require careful basting to prevent drying out of the meat. Squirrels are cooked in much the same way as rabbit. Squirrel pie prepared in the same manner as chicken pie is a special favorite among most lovers of wild game.

AMATEURS MAKE THE BIG SCORES

Amateur trapshooting champions in winning the State titles made better scores than the professional champions. Amateur championsnips were decided in 45 States and the professional title was shot for in 40 States. Thirty-four amateurs broke 97 targets or better to win, while only 14 professionals were able to break 97 or better.

These statistics furnish a comparison of the scores that won the titles:

Score	Amateur	Professional
100	2	2
99	10	3
98	8	3
97	14	6
96	1	5
95	4	10
94	2	1
93	3	2
92	0	1
91	1	1
90	0	1
under 90	0	5

These figures would indicate that the high-class amateur trap shooter is just a shade better than the high class professional. There was a time when the professional trapshooter had it all over the amateur —but that was in the long ago.

EYES OF DEEP-SEA FISH

The eyes of deep-sea fish are very varied; some have neither eyes nor sight; others have greatly enlarged eyeballs, so as to catch the least glimpse of light. Their eyes tend either to disappear or to be unusually efficient; but since no sunlight can penetrate to any great depth and it is probably quite dark beyond a depth of some 200 fathoms, of what use can eyes be?

Fish have been captured at a depth of nearly 3,000 fathoms, where there must be not only absolute stillness, but also total darkness, except for the fact that some of these deep-sea creatures, are phosphorescent and therefore luminous. This fact was first ascertained in the Challenger expedition. Since then, Mr. Alcock, of the Indian marine survey, has found that some deep-sea crustaceans have a similar power, one large prawn quite lighting up a bucketful of water in which it was placed. Fish with large eyes have therefore a better chance of finding food, but they cannot wholly depend on sight, since some have quite abandoned all attempts to see.

Some, again, have luminous organs on their head or body or tail, which are under their control, so that they can actually throw light at pleasure on their prey, or extinguish it in times of danger. Thus the angler, among others, attracts its prey by means of these colored lures of phosphorescent lights. It has been well said that these "vast profounds of the deep have become a sort of almshouse or asylum, whereunto antiquated forms have retired and amid the changeless environment have dwelt for ages unaltered."

ELK AS A SPARRING PARTNER

The popular idea of fighting deer pictures them with locked horns. Elk, however, fight erect on their hind legs, their heads thrown back. In this position they stab viciously at each other with their sharp front hoofs. It is a very human way of fighting. These sparring contests often develop high skill.

Mr. S. N. Leek, who lives just south of the Yellowstone National Park boundary and in sight of the lordly Teton Mountains which some day will be included in the national park, has spent many years among the great herds of elk which swarm back and forth between the Jackson Hole country and the safe refuge of the park wilderness. His adventures as a photographer are many and interesting.

Here is an extract from a recent letter:

"To get the photographs of fighting elk was both interesting and tiresome. After they were fed hay, I would stop the sleigh in as good a position as possible. Then I would set up the camera within a few feet of the sleigh, draw the dark slide, set the shutter and, bulb in hand, await what might happen.

"The elk, before they rear up, usually hold their heads high in the air and make a peculiar clicking snapping noise with their mouth, which at the time is held partly open so that their tusks will show. On hearing this noise, the camera is instantly swung in that direction. If the brewing storm proves to be more than a quarrel, the two animals rear in the air together and slug at each other with their fore feet. The object of each seems to be to strike the other on the lower jaw. For this reason each holds its head as far from the other's fore feet as possible.

"Blows are landed that sound as if struck with sledge hammers. Each bout is only a few seconds duration; the vanquished lights on his fore feet, running to escape the cruel thrust that is sure to be delivered with lighting quickness.

"Sometimes the wait is long between each scrap; then it most usually ends in a clicking noise. The fight is nearly always in a dense bunch of elk where no picture worth while can be secured. Hours of constant watching often results in no exposure; or several exposures may be made during the time without a single picture.

"While it is aggravating to spend several days without results, nevertheless, it gives a splendid chance to study the animals. Elk cows fight the same as the bulls, and cows will fight bulls and very often whip them. Once I saw a cow knock a bull over backwards completely out; one of her hard fore feet reached his lower jaw. Another time I saw a horn knocked off; it went whirling ten feet in the air, while the bull that lost it went away holding his head as some people do when they have had a tooth pulled."

ALKALI RESPONSIBLE FOR EPIDEMIC AMONG DUCKS

The United States Bureau of Biological Survey has announced definitely, as it did tentatively some months since, that the annual losses from disease of hundreds of thousands of wild ducks in the Salt Lake Valley, Utah, which since 1910 has puzzled sportsmen and others interested in water fowl, are due to alkali poisoning.

Remedial measures suggested are the supplying of fresh water or the driving out of ducks from areas in which they are likely to obtain alkali in harmful quantities. It is announced that recoveries of ducks treated, principally by the fresh water method, were proved to be permanent by aluminum bands placed on the legs of approximately 1,000, which were cured and released. Returns have been received from 170 of these birds. Valuable information as to the lines of flight pursued by water fowl during their migration also has been obtained from these records. The wide range of these birds is shown by the fact that individuals banded in Utah have been recovered on the Pacific coast, the Mexican border, the eastern edge of the Great Plains and southern Saskatchewan in Canada.

Sportsmen and others who chance to kill banded birds are asked to send immediately to the Bureau of Biological Survey, Washington, D. C., full details as to the number of the band, together with the date and place of capture.

"EASY MONEY"

Two young Irishmen in a Canadian regiment were going into the trenches for the first time, and their captain promised them five shillings each for every German they killed.

Pat lay down to rest while Mick performed the duty of watching. Pat had not lain long when he was awakened by Mick shouting:

"They're comin'! They're comin'!"

"Who's comin'?" shouts Pat.

"The Germans," replies Mick.

"How many are there?"

"About fifty thousand."

"Begorra," shouts Pat, jumping up and grabbing his rifle, "our fortune's made!"

CATTLE AT THE LIVE STOCK SHOW

Miss Rialto II will also be one of the feature attractions of the live-stock show. Miss Rialto is a cow. She is several times a blue ribbon winner and just now boasts a title of Grand Champion female, this honor having been bestowed upon her last week at the Utah State Fair in Salt Lake City. Miss Rialto II is a very outstanding heifer and is unquestionably destined to make a success in the show ring this fall and winter, since prior to her most recent honors she was adjudged junior and grand champion at the Wyoming State Fair. This Grand Champion is another of the fancy registered Hereford cattle soon to be enroute to San Francisco to the big stock show.

In this herd also are Wyoming Price, a fine two-year-old bull who was in first class, and also made single champion bull at the recent Utah show. Other prize winners are Bonnie Laddie, a yearling bull; New Era II, who won first prize and Rossman Gold Dust who won second prize; Miss Date is another of the prize winners. Perfect Maid and Miss Dale also Lady Fairfax II are among these cattle to be shown here and which are the property of the Hereford Corporation of Wyoming, located at Cheyenne, of which Raymond S. Husted is the manager. According to Manager Husted, the owners of this famous herd of registered Herefords have spared no effort or expense in making their herd the best in the country. The present champions are offered in proof of this.

The construction of the livestock quarters which are the largest ever presented in the United States under canvas, covers the five and one-half acre tract at Twelfth and Market streets.

EXHIBITORS AT THE CALIFORNIA INTERNATIONAL LIVE STOCK SHOW

Thomas I Miller, Los Angeles—Short horn, 13 cattle stalls.

Kerin Co. Land Co., Bakersfield, Cal.—carload steers.

A. Buckland & Son, Fresno, Cal—Poland-China, 5 pens Poland-China.

J. Henry Meyer, Watsonville, Cal—Ayrshires, 14 stalls cattle.

Alexander & Kellogg, Suisun, Cal.—Milking Shorthorn, 15 stalls cattle.

John S. Painter & Sons, Roggen, Colo.—Herefords, 9 stalls cattle.

Maxwell Miller Cattle Co., Steamboat Steamboat Springs, Colo.—Shorthorn, 14 stalls cattle.

E. B. McFarland, San Mateo, Cal.—Ayrshires, 17 stalls cattle.

Geo. M. York, Modesto, Cal.—Berkshires, 1 pen swine.

J. H. Rosseter, Burke, Cal.—Shorthorns, 3 stalls cattle.

J. H. Rosseter, Burke, Cal.—Thoroughbred, 3 stalls horses.

Hereford Corp. of Wyo., Cheyenne, Wyo.—Hereford, 13 stalls cattle.

Hereford Corp. of Wyo., Cheyenne, Wyo.—6 stalls nurse cows.

H. M. Barngrover, San Jose, Cal.—Hereford, 13 stalls cattle.

S. C. Thompson, Concord, Cal.—Arabian, 4 box stalls horses|

Calla Grove Farm, Manteca, Cal.—Guernsey, 1 double stall cattle. Hampshire, 4 pens sheep.

Congdon & Battles, Yakima, Wash.—Angus, 20 stalls cattle.

Ormondale Co., Redwood City, Cal.—Shorthorn, 12 stalls cattle; 4 stalls nurse cows.

Pacheco Cattle Co., Hollister, Cal.—Shorthorn, 12 stalls cattle; 4 stalls nurse cows; 1 carload steers.

W. D. Duke, Likely, Cal.—Shorthorn, 1 stall cattle.

A. J. Welch, Redwood City, Cal.—Guernsey, 20 stalls cattle.

R. J. Fox, Lyons, Ore.—Shropshire, 4 pens sheep; Poland-China, 5 pens swine.

Ruby & Bowers, Davis, Cal.—Percheron Belgian Shire Clyde, 41 stalls horses.

J. A. Bunting, Mission San Jose, Cal.—Hereford, 8 stalls cattle.

Fred M. Johnson, Napa, Cal.—Duroc-Jersey, 5 pens swine.

Roselawn Stock Farm, Woodland, Cal.—Shorthorn, 5 double stalls cattle.

A. B. Humphrey, Escalon, Cal.—Guernsey, 10 stalls cattle.

Roselawn Stock Farm, Woodland, Cal.—Shorthorn, 4 stalls nurse cows.

A. B. Humphrey, Escalon, Cal.—Berkshire, 3 pens swine.

W. J. Higdon, Tulare, Cal.—Holstein, 14 stalls cattle.

Bishop Bros., San Ramon, Cal.—Shropshire, 11 pens sheep.

J. H. Cazier & Son, Wells, Nev.—Hereford, 23 stalls cattle; 4 stalls nurse cows.

Dr. A. E. Graham, Montague, Cal.—Shire, 1 stall horses.

Chas. Rule, Jenner, Cal.,—Hereford, 7 stalls cattle.

Natomario Rancho, Sandercock Land Co., Sacramento, Cal.—Berkshire, 5 pens swine.

Western Meat Co., City—1 carload sheep; 1 carload steers; 1 carload hogs; 1 stall cattle.

Harvey M. Berglund, Dixon, Cal.—Duroc-Jersey, 2 pens swine.

U. C. Berkeley, Cal.—Percheron, 4 stalls cattle; Shorthorn, Hereford, Angus, Jersey, 14 stalls cattle; Milch, 1 pen goats; Shropshire, Hampshire, Southdown, Romney, Rambouil, 12 pens sheep; Berkshire, 4 pens swine.

L. D. Smith, Berkeley, Cal—Guernsey, 16 stalls cattle.

Curtice Land Co., Calgary, Alta.—Hereford, 12 stalls cattle.

Thos. B. Dibblee, Sta. Barbara, Cal.—Clydesdale, 1 box stall horses; Clydesdale, 4 stalls horses; Shorthorn, 12 stalls cattle;5 stalls nurse cows.

C. T. Thompson, Bishop, Cal.—Duroc-Jersey, 4 pens swine.

Guy H. Miller, Modesto, Cal.—Jersey, 14 stalls cattle.

Hopland Stock Farm, Hopland, Cal.—Shorthorn, 10 stalls cattle; 4 stalls nurse cows.

Easton & Ward, Diablo, Cal.—Shire, 14 stalls horses.

Ellenwood & Ramsey, Red Bluff, Cal.—Corriedale, 4 pens sheep.

Palo Alto Stock Farm, Palo Alto, Cal.—Holstein and Guernsey, 12 stalls cattle.

Jack London Ranch, Mrs. Eliza Shepard, Glen Ellen, Cal., Shorthorn, 9 stalls cattle.

A. L. Bassett, Hanford, Cal.—Poland-China, 4 pens swine.

J. B. & J. E. Thorp, Lockeford, Cal.—Jersey and Duroc-Jersey, 16 stalls, 6 pens.

T. S. Glide, Davis, Cal.— Shorthorn, 8 double stalls cattle; 4 stalls nurse cows.

L. A. Hall, San Jose, Cal.—Percheron, 4 single stalls horses; 1 box stall horses.

Jersey Queen Farm, L. J. Belnap & Sons, San Jose, Cal.—Holstein, 20 stalls cattle.

Thomas Harrison, Glen Ellen, Cal.—Milking Shorthorn, 11 stalls cattle; 2 stalls nurse cows.

M. Bassett, Hanford, Cal.—Poland-China, 6 pens swine; 2 carloads swine.

Alexander D. McCarty, City—Poland-China, 2 pens swine.

R. F. Holmes, Modesto, Cal.—Holstein, 6 stalls cattle.

J. Ridegaray, Fresno, Cal.—Rambouillet, 2 pens sheep.

J. G. Hubbard, Monroe, Ore.—South-Down, 4 pens; Lincoln, 3 pens, Hampshire 5, Sheep, 12 pens.

W. B. Carpenter, Red Bluff, Cal.—Berkshire, 4 pens swine.

H. P. Slocum & Sons, Willows, Cal.—Duroc-Jersey, 12 pens swine.

W. H. Manis, Willows, Cal.—Durocs, 1 pen.

C. W. Scott, Glen, Cal.—Durocs, 2 pens.

C. W. Smith, Willows, Cal.—Durocs, with Slocum.

A. B. Cook, Townsend, Montana—Herefords, 15 stalls cattle.

Conejo Ranch, H. H. Braly, Newbury Park Cal.—Duroc-Jersey, 6 pens; Hampshire, 8 pens.

GOVERNMENT AID TO SUPPRESS TUBERCULOSIS

The 1919 agricultural appropriation bill just passed by Congress contains an item expected to be of great importance in the Federal and State campaign to eradicate tuberculosis among cattle and swine. It provides that the Federal Government shall pay indemnity to owners whose cattle are slaughtered because they have been found infected with tuberculosis.

The Department of Agriculture is to pay one-third of the difference between the appraised value of the cattle and the salvage value of the slaughtered animals, provided that the State, county or municipality in which the cattle are owned and kept is co-operating in the tuberculosis work and pays at least an equal amount to the owner. In no case is the Federal Government to pay more to the owner than is paid by the State, county or municipality. No payment by the Federal Government is to be more than $25 for any grade animal nor more than $50 for any pure-bred animal, and no payment is to be made unless the owner has complied with all quarantine regulations.

This provision is expected to remove much of the opposition among cattle owners that has hindered tuberculosis eradication work. Through it the Federal Government, the State, county or municipal governments and the owners of cattle will share in the loss resulting from slaughtering infected animals for the protection of other animals not infected.

Another important development expected to hasten tuberculosis eradication was the unanimous adoption by breeders and live-stock sanitarians of national reputation of regulations for accrediting pure-bred herds of cattle. This action, taken last December, marked the coordination of efforts of individuals and the State and Federal governments for the suppression of Tuberculosis in pure-bred animals.

On July 1, the Department issued its first list of herds officially accredited as free from tuberculosis. The herds numbered on that date approximately 240. The list also named herds that had passed one successful test. They must pass another annual test successfully before being placed on the accredited list.

The annual loss from tuberculosis among cattle and hogs is reckoned at $40,000,000 in the United States. The Federal campaign to eradicate the disease is of comparatively recent beginning. It has been divided into three well-defined projects. The first project is the eradication of tuberculosis from individual herds of pure-bred cattle; the second is the eradication of cattle tuberculosis from circumscribed areas; the third is the eradication of tuberculosis among swine.

It is estimatel by officials in close touch with the available records that 15 per cent of pure-bred cattle in this country are affected with tuberculosis. In grade cattle and swine the percentage of infection is gradually increasing as shown by post mortem records in establishments where meat inspection is maintained. Infected animals are not only dangerous to other animals but may transmit the disease to mankind through milk and flesh.

Increased demand for milk following curtailment of brewing in the United States is a probable development in the nation's food situation during the coming year.

Not only has consumption of milk increased in private homes, but many saloons have been converted into lunch rooms and ice cream parlors. These establishments have become new outlets for milk and its numerous products. The large increase in buttermilk consumption is explained by its mild acidity, which seems to allay the alcoholic craving.

Much emphasis has been placed on hog raising, especially during the war, when the demand for cured meats is so strong. This is right and no one who is at all familiar with the needs of our country for meat would underestimate the importance of pork. Hogs increase faster than cattle, they are more economical feeders than cattle. Consequently farmers who have not the pasture and grass for beef should raise a few hogs every year. Besides less expense in land, buildings, etc., is required for raising pork than for beef.

NOTHING BUT GOOD RESULTS.
Have used GOMBAULT'S CAUSTIC BALSAM for more than 20 years. It is the best blister I have ever tried I have used it in hundreds of cases with best results. It is perfectly safe for the most inexperienced person to use. This is the largest breeding establishment of trotting horses in the world, and use your blister often.—W. H. RAYMOND, Prop. Belmont Park Stock Farm, Belmont Park, Mont.

USED 10 YEARS SUCCESSFULLY.
I have used GOMBAULT'S CAUSTIC BALSAM for ten years; have been very successful in curing curb, ringbone, capped hock and knee, bad ankles, rheumatism, and almost every cause of lameness in horses. Have a stable of forty head, mostly track and speedway horses, and certainly can recommend it.—C. C. CHANEY, Training Stables, 990 Jennings Street, New York City.

Sole Agents for the United States and Canada.

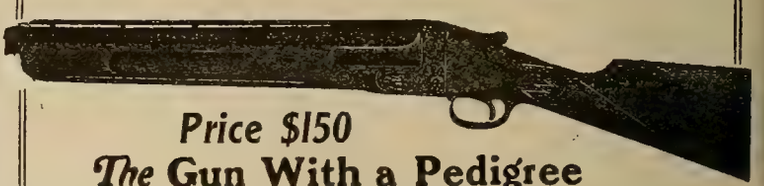
loaded with Infallible or "E.C." Smokeless Shotgun Powder is a combination that is hard to equal.

When you buy shells do not simply ask for them by name. Specify in addition that they must be loaded with

HERCULES
Smokeless Shotgun
POWDERS
INFALLIBLE "E.C."



Remember,—both ends of the shell are important to you. The base tells you whether or not it is your favorite brand; the top wad, whether or not it is loaded with Infallible or "E.C." Any one of the fourteen standard shells shown at the left may be bought loaded with these powders.

The powder that you shoot should be Hercules. It is always dependable. It is always uniform in quality, always gives high velocity, even patterns, and light recoil.

The next time that you buy shells be sure to specify a Hercules Powder, Infallible or "E.C."

The Gun With a Pedigree

The Greatest Scores Ever Recorded Were Made With
Parker Guns

Mr. L. S. German made the highest official yearly average ever recorded with his Parker Gun, scoring 6137x6285=97.64%.

At San Jose, Cal., May 19th, Mr. Orval Overall won THE CHAMPIONSHIP OF CALIFORNIA-NEVADA, scoring 44x50 targets with his double Parker Gun.

At same place, May 22d, Mr. Harry Ogilvie won the INTERSTATE CALIFORNIA-NEVADA HANDICAP, scoring 97x100 at 20 yards with his single barrel Parker, and Mr. Len. Hawxhurst won the Professional Championship, scoring 94x100 with same kind of gun.

At Los Angeles, Cal., May 28th and 29th, Mr. Ed. Garrett made the highest aggregate score on the Preliminary and Pacific Coast Handicaps, scoring 187x200 at 18 and 19 yards, with his single barrel Parker, and Mr. Len. Hawxhurst at same place won Second Professional Average, scoring 381x400 targets with same make and kind of gun.

The Grand American Handicap has been won nine times with Parkers.

If interested in small bore double shot guns, please write for New booklet which will be sent free, giving valuable information on this subject.

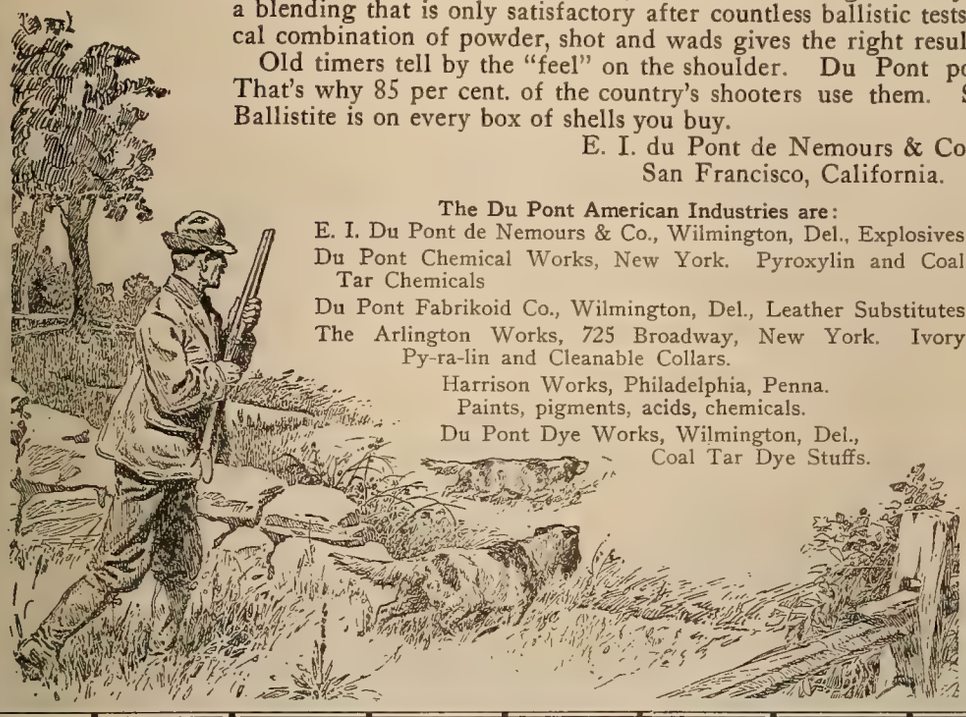
Velocity Counts

Velocity means speed—speed means penetration—speed properly controlled means pattern. These are important features in the shooting qualities of shotgun shells.



DU PONT Sporting Powders

Dupont—Ballistite—Schultze

as loaded in the shells you buy represent the blending of many different batches of Powder—a blending that is only satisfactory after countless ballistic tests have proved that every practical combination of powder, shot and wads gives the right results.

Old timers tell by the "feel" on the shoulder. Du Pont powders have the "right feel." That's why 85 per cent. of the country's shooters use them. See that the name Dupont or Ballistite is on every box of shells you buy.

WETPROOF Steel Lined Shotshells

Sportsmen throughout the country were quick to welcome Remington U M C Steel Lined Speed Shells—ARROW and NITRO CLUB—treated with the patented WETPROOF process that **seals them against wet.**

Not only is the paper shell case so treated but the crimp and top wad are WETPROOFED as well, thus closing all crevices and insuring the sportsman against soft crimps and swollen shells.

The steel lining gives more speed and better pattern—greater force behind the load.

Just ask your dealer for "Arrow" or "Nitro Club"—
they're both Wetproof and Steel Lined.

Nothing illustrates better, how the world moves in circles and how those things and institutions which were the principal activities yesterday, but are less popular today may become the idol of the public tomorrow, than the case of the revival of interest and enthusiasm in breeding and racing horses.

The gradual decline of interest in the noble art of horse raising and both running and trotting races, while due to several causes, probably in the main, was the result of the advent of the motor car and the adoption of this form of locomotion and pleasure to the detriment of the splendid sport which was a feature of city and country life in America not so many years ago.

What ever the cause, the fact remains that this splendid industry did suffer a decline, which was responsible for the closing of many of America's finest stock farms and the gradual loss of interest in the horse by the breeders, fanciers and general public.

With this in view, it is gratifying to know that there is now a distinct and healthy revival of interest in horse raising all over the land, and that California, where some of the finest animals of previous decades have been bred and raced, is participating in this revival along with other sections of the country.

The "Breeder and Sportsman," which for thirty-six years has championed the horse breeding industry and truly represented the West in racing events, stock shows and all gatherings where the interests of raisers of pedigreed stock of all kinds were taken care of, has consistently championed all movements for the elevation of these industries and for the placing of all sports connected with them on a high and clean cut basis. With this record to stand upon, the publishers note with keen satisfaction the recent revival of interest in high-bred horses, and in livestock and in the activities connected with same, and they will do everything in their power to help keep those interested in these lines informed and to champion all legitimate plans and movements to build up the business connected therewith.

A fitting answer was given to those extremists who kept shouting that the day of the horse was over, by the records of the horse during the war which has just passed. In situations where motor trucks were found inadequate to meet the transportation demands, it was the horse, which stepped into the breach and kept the wheels of the war machine moving. In scout work, in patrol work and in carrying couriers over sections impassable to either the automobile or motorcycle, the horse and sometimes the mule, performed the service, asking neither glory nor reward for the work which was set before them. In our words of praise for everything and every one connected with the wonderful victory just achieved, don't let us forget that the horse did his share on every battle front and did it well.

Send in any news and notes regarding the horse and high bred stock industries which may come under your observation. If you secure photographs which you believe will be of interest to the horse loving public, kindly send them in for publication and we will gladly run same with proper credit. The more news and notes we have regarding the movements and changes in horse breeding circles and amongst the stockmen, the more information we can disseminate to our readers up and down the coast and in all the various lands where the "Breeder and Sportsman" circulates.

A plan is now on foot, fostered by the northern associations which are the Northwestern Livestock Association of Lewiston, Idaho, and the Pacific International Livestock Exposition at Portland, to establish a circuit of these cities for annual shows. The California International Livestock Show of San Francisco has been invited to complete the trio. The events are planned to take place first at Lewiston, then Portland, and then San Francisco, whence the exhibitors may ship direct to the Royal Livestock Show at Kansas City and the International at Chicago.

LIVESTOCK SHOW POSTPONED UNTIL FEBRUARY, 1919

The California International Livestock Show which was to have been held originally on Nov. 2nd to 10th, and which was deferred until Nov. 16th to 24th, was officially refused permission to open its doors on that date by the State Board of Health because of the general ban placed upon all public gatherings, on account of the epidemic of Spanish influenza.

The efforts of the California International Livestock Show Corporation, of which Edgar J. De Pue is president and Joseph E. Painter, manager, to make this the first big livestock and horse show held in San Francisco a success, deserve the highest commendation, and the adverse circumstances which forced them to postpone their opening dates twice, can not be in any way laid at their doors.

The benefit which California in general and San Francisco in particular will derive from having a yearly exhibition like the Livestock and Horse Show held here, are many. The stimulus to breeders of high grade cattle, hogs, sheep and blooded horses, which will follow the holding of these exhibitions, will greatly enhance the material value of this industry in the state.

According to Edgar J. De Pue, chairman of the executive board of the California International Livestock Corporation, in view of the present health conditions to hold the livestock show would not have been possible and a more remote date, following the other big livestock shows at Kansas City and Chicago, has been set which will more than redouble the entries of the country's pure bred stock.

Manager Joseph E. Painter will visit the eastern shows for the purpose of interesting noted eastern breeders in the California International Livestock Show.

In a letter to the exhibitors of the show, explaining the reasons why the exhibition had been postponed, Manager Painter said:

"After using our best efforts to maintain our show dates and protect our exhibitors, we are now notified by the health authorities that they will not permit us to open our show on November 16th. This is very much of a disappointment to us and we know it will also cause our exhibitors inconveniences and undoubtedly unnecessary expense. This, however, though unfortunate, is unavoidable.

Our Board of Directors have decided the only wise course is to postpone the opening of the California International Livestock Show until Feb. 8, 1919. This will follow the Denver show two weeks and result in making our show bigger and greater than ever. By that time the influenza should be entirely eradicated, the war undoubtedly ended, and the distressing labor conditions greatly relieved.

All animals eligible to compete in the 1918 classification of ages will likewise be entitled to retain the same classification in our show for Feb. 8, 1919. This will permit us to reopen our entry lists which will remain open for changes and additional entries until Monday, January 20th, 1919. We hope, however, you will allow your entries to stand with such changes as may be necessary.

We shall have a larger and better show in consequence of this imperative postponement. We shall have more time and opportunity, both of which we have needed for securing exhibits from the largest and most important breeders in the country. The livestock show here will be twice the size that it would have been had we opened next week.

If the Royal Livestock Show at Kansas City, the great Hereford show, opens according to its present schedule, November 16, I shall visit that show and also the Chicago, and if it too keeps to its original date of December 9."

Lewiston and Portland shows, now scheduled to open November 26 and December 9, respectively, have not as yet been changed.

With peace declared and the influenza under control, indications point to the most successful livestock and horse show during the week of February 9, 1919, ever held on the Pacific Coast.

Chas. W. Paine, secretary of the California Agricultural Society and of the State Stallion Registration Board, in the preface of the annual report of the Registration Board makes the following good argument: "From any viewpoint, the future of the draft horse seems assured, and farmers and breeders will have lost a golden opportunity in not breeding every available mare to a good sound draft stallion at this time. The draft horse is the finest type of horse, and the draft mare has a double capacity. She is a self-respecting motor power and contrary to the tractors, she is self-repairing to a very appreciable degree. Fuel power for the horse can be raised on the farm, while that of the tractor must be purchased on the outside."

Prince Loree 2.05¼ is the leading aged money-winning trotter of 1918 with the sum of $14,790. June Red 2.05¼ ranks second to him, with a total of $13,380. Chilcoot 2:04¼ is third with $11,285.

Tom Murphy's winnings for the year total $104,843¼. This beats all records except that which he established in 1915, when he rolled up the sum of $128,400.

It is only necessary to glance at the summaries day after day of races held on the Kentucky or on other eastern tracks, to find among the winning horses many bred in California or directly over the border line in Nevada. Among the winning owners are names of prominent California gentlemen, who maintain stables the year around just for the love of the thoroughbred and to keep the thoroughbred interest alive and support the game irrespective of any monetary considerations. Horse racing carried along on the present high plane that prevails in Kentucky and the east is undoubtedly the sport of kings, and is deserving of all the support it receives.

Numbered among successful Californians who have campaigned high class stables in the East this year is J. H. Rossiter, president of the Grace Steamship line, and one of San Francisco's prominent leaders in commercial, social and club life. Passing Showers from his barn won a classical fixture in New York, and it is rumored that quite a cleanup was made on the filly's victory.

Geo. Strait, who was handling the horses in training for Mr. Rossiter, has turned them over to Chas. Casey and come to California with the consignment of high-class brood mares, recently purchased from John E. Madden, and will take charge of Mr. Rossiter's breeding establishment known as Wikiup Ranch, situated near Santa Rosa, California.

It is such men as Mr. Rossiter, who have the future breeding of horses in place of the gambling feature deeply planted in their makeup, that has so successfully put racing on such a solid standing as it is now through Kentucky and the East.

There could be named at random a number of moneyed men, such as Mr. Rossiter, Chas. Clarke, Geo. Wingfield, A. B. Spreckels, A. K. Macomber, Edward Cebrian, J. H. Porter, "Rod" MacKenzie, Col. Eaton, Chas. T. Boots, Senator Nealon, Walter Dupee and many others who are carrying on big establishments at a big expense each year just to keep up the breeding of King Horse. These gentlemen are ready to lend a helping hand and their influence to revive racing in California.

In the old days when "Lucky" Baldwin, Jos. Cairn Simpson, J. B. Haggin, Theo. Winters and the boys of "Forty-nine" shipped thoroughbreds over the hump, bred right here at home, they always returned with the bacon, and to this very day the names of Flambeau, Racine, Emperor Norfolk, El Rio Rey, Geraldine, Yo Tambien, Guido, and hundreds of others are music to the ear of every true lover of the thoroughbred.

SIRE OF CENTURY'S BREEDING

(By W. H. Gocher)

As Peter the Great has proved the greatest sire of racing speed that the world has ever seen, everything pertaining to him or his ancestors is of interest. Also as it has been shown recently that a portion of his pedigree as it now appears in the American Trotting Register is bogus, every item throwing any light on same is valued highly by those who have seen or heard of the sire of Mabel Trask, Miss Harris M., Hollyrood Bob, Chestnut Peter and a host of others.

Peter the Great was got by Pilot Medium, while his dam Santos was sired by Grand Sentinel, out of Shadow, formerly Lady Duncan, by Octoroon. It is stated in the Trotting Register that his third dam was Swallow, by Joe Hooker, out of a mare by the Sam Johnson horse. The Joe Hooker cross should be struck out. The following are all of the known facts in regard to the dam of Shadow: She was named Dixie, not Swallow, as stated in the Register, and was owned by Benjamin Gill, who is still living in Clarksville, Tenn. Dixie was sired by a black saddle horse called Creole that was owned by Colonel Sam Johnson of that town. Creole was foaled in the spring of 1862. His dam was brought to Tennessee by a soldier in Scott's Louisiana Cavalry. This command was organized in the fall of 1861 and left Louisiana by steamer in October. It sailed up the Mississippi river to Memphis, where it landed and marched to Bowling Green or Russellville, Ky. In February, 1862, it was ordered to support Ford Donaldson on the Cumberland river. Grant took the fort, however, before they arrived, and the company bivouacked on the old fair grounds at Clarksville, Tenn. At that time a soldier in the command had a bay mare that was heavy with foal. He traded her to a blacksmith who lived near the fair grounds. This mare foaled a black colt which was purchased as a three-year-old by Colonel Sam Johnson. He called him Creole and used him as a saddle horse. This horse sired Dixie, which in time became the property of Dr. Greenfield of Guthrie, Ky. He mated her with Octoroon and got the black mare Lady Duncan, afterwards known as Shadow. The sire of Creole was a black dock tailed pacing horse that was taken to Louisiana from northern New York, by John Aikenhead. This horse was known locally as the Aikenhead horse and it is stated that he paced a mile below 2:30 over a track at New Orleans. This is the end of the trail of Peter the Great's pedigree at present, although there is no doubt but that the breeding of the Aikenhead horse could be traced if anyone is willing to go to the trouble and expense of visiting the descendants of Aikenhead in Louisiana and going from there to northern New York, where he resided prior to the Civil War.

Thoroughbred Matters

Commander J. K. L. Ross, the Canadian millionaire owner of the champion two-year-old Billy Kelly, Cudgel and a score more keen performers, recently had a $10,000 stable built inside the Laurel track. Guy Bedwell, who trains for Commander Ross, got his early schooling in the racing game right here in California, as also did Walter Jennings and "Daggie" Smith, who are now handling valuable stables for multi-millionaires on the Eastern tracks.

The record breaking performance of Roamer at Saratoga Springs, N. Y., on August 21, when he ran a mile with 110 pounds up in 1:34 4-5, recalls the fact that the running record for this distance was once held by Charter Oak Park, Hartford, Conn., it being made on Sept. 2, 1875, by the Lexington gelding Kadi, when he won the second heat of a race at catch weights in 1:41¼. He is supposed to have carried about 90 pounds. His time also stood at the top of the list until Ten Broeck with 110 pounds up ran his mile against time at Louisville, Ky., on May 24, 1877, in 1:39¾. In 1890, when Salvator ran in 1:35½ over the straight course at Monmouth Park, it was supposed that the record was made for all time. Roamer, however, reduced it over an oval course and it is not even the top figure, as the world's record for a mile is 1:33 1-5, held by the English horse Caimen. It was made over the Lingfield course, but has never been accepted as official.

John Hachmeister, general manager of the Latonia Jockey Club, has issued a handsome stake book for the $50,000 Latonia Champion Stakes of 1919 and 1920 that is undoubtedly the most pretentious publication of the kind ever issued in connection with any particular race in the history of racing. It is being mailed to nominators of the 431 thoroughbreds named for the 1919 event and also to all those who contributed to the total of 342 named for the 1920 stakes. These nominators are scattered all over the world, many entries being received in France, England, Ireland and other foreign countries.

The worth of St. Frusquin's daughters as brood mares is becoming more apparent every day. The Oaks winner Rosedrop is the dam of Triple Crown and Newmarket Gold Cup winner Gainsborough, and Sweet Briar is the dam of the 1918 American three-year-old champion, Sun Briar. Please remember St. Frusquin is of Blacklock descent, his dam Isabel by the Matchem sire Plebeian, and his grandam Parma by Parmesan, Herod.

At Martinez the other day a German rancher was arrested by Under Sheriff William Veale and charged with poisoning neighbor's livestock. A blooded horse valued at $1,000 was the first victim, being killed by phosphorus poisoning. Later a cow was beaten to death. Both acts, the officers claimed, were committed by the German.

Mr. A. K. Macomber and Mr. H. P. Renshaw have leased from Chas. T. Boots the Elmwood Farm, famous as the home of Brutus. All of the Macomber stallions and brood mares have been sent to Elmwood and his other horses that are in training to Belmont Park. Mr. Boots whose love for the thoroughbred horse is not exceeded, is not altogether retiring from the breeding business; he keeps his stallion Borgia, brother to Lucretia Borgia, and several brood mares on the farm.

On November 1st the opening day of the fall meeting at Pimlico course, Baltimore, Commander J. K. L. Ross of Canada purchased War Pennant (by Jim Gaffney-Maltha), War Marvel (by Spanish Prince-My Dolly), two good three-year-olds and Motor Cop (by Uncle-Xarco), one of the best two year olds in the Macomber barn. Of course War Pennant is the star of the lot, and if a separate price had been named for him, it undoubtedly would have been far more than the price of $25,000 that Mr. Hildreth paid for Cirrus to Harry Payne Whitney or that of $27,500 which Commander Ross gave for Billy Kelly. This is a big sum for three horses at the end of the racing season, but it is stated he got a bargain.

In accord with popular feeling among horsemen and turf powers, the Saratoga Association has decided to make the rich Travers Stakes for 1920 for colts and fillies exclusively. The entries for the Saratoga fixtures will close on November 27. With the exception of the change of conditions in the Travers, all the other stakes will remain the same, including the added money values and guarantees. The Futurity for 1921 will close January 3, 1919, and as last year will have a guaranteed value of $30,000. The seven stakes of the Saratoga Association, which will close November 27, are the United States Hotel ($10,000), Grand Union Hotel ($10,000), Hopeful ($30,000), Spinaway ($7,500), Grab Bag Handicap ($4,000), Travers ($12,500), and Alabama ($10,000).

MATERNAL GRANDSIRES

Since last we gave this most interesting table showing how stallions have come out so far through the successful efforts of their daughters' progeny this season, several changes have taken place, the most important being that Gallinule has displaced St. Frusquin of the lead, thanks to the victories of Bombproof, Prince Chimay, The Panther, and others. Only those whose aggregate is $10,000 or over are given below, and all racing which has taken place in the United Kingdom this season is included, with the exception of the meeting in Ireland this week. The figures are compiled from those which have appeared in the English and Irish "Racing Calendars."

	Winners	Races	Amt.
Gallinule by Isonomy out of Moorhen by Hermit	24	31½	$81,450
St. Frusquin by St. Simon out of Isabel by Plebeian	8	13	78,355
Ayrshire by Hampton out of Atalanta by Galopin	10	16	26,015
Desmond by St. Simon out of L'Abbesse de Jouarre by Trappist	11	16	25,645
Spearmint by Carbine out of Maid of the Mint by Minting	4	7	24,595
Isinglass by Isonomy out of Dead Lock by Wenlock	16	19	22,550
Loved One by Sea Saw out of Pilgrimage by The Earl or The Palmer	3	3	21,465
Lesterlin by Gallinule out of Milliora by Arbitrator	4	8	19,760
Orme by Ormonde out of Angelica by Galopin	7	10	19,910
Persimmon by St. Simon out of Perdita II. by Hampton	12	18	16,690
Donovan by Galopin out of Mowerina by Scottish Chief	3	6	16,500
Sainfoin by Springfield out of Sanda by Wenlock	7	12½	15,545
Eager by Enthusiast out of Greeba by Melton	7	12	15,490
Torpoint by Trenton out of Doncaster Beauty by Sheen	1	3	14,070
William the Third by St. Simon out of Gravity by Wisdom	4	5	13,150
Best Man by Ormonde or Melton out of Wedlock by Wenlock	1	1	12,670
Polymelus by Cyllene out of Maid Marian by Hampton	2	6	11,895
Velasquez by Donovan out of Vista by Macaroni	4	6	11,870
Americus by Emperor of Norfolk out of Clara D. by Glenelg	3	6	11,500
Cyllene by Bona Vista out of Arcadia by Isonomy	7	9	10,860
Lactantius by Petrarch out of Koumiss by Macaroni	2	2	10,285
Wildflower by Gallinule out of Tragedy by Ben Battle	4	5	10,175

BIG PRICES AT AUCTION FOR THOROUGHBREDS

The following are a few of the big prices paid for thoroughbreds at the Paddock, Newmarket, England, during the early October sales:

YEARLINGS

	Guineas
Chestnut colt by Neil Gow out of May Lily by Mauvezin .....(Lord Sefton)	220
Bay colt by Sunstar out of Fringilla by Goldfinch .....(Lord Glanely)	360
Brown filly by Simon Square out of Mountain Daisy by Ayrshire.....(Mr. W. Black)	300
Brown filly by Black Jester out of Bright by Sundridge .....(Lord Glanely)	2300
Bay filly by Sunstar out of Glass Doll by Isinglass .....(Major Hermon-Hodge)	2600
Brown colt by Black Jester out of Lady Brilliant by Sundridge .....(Lord Glanely)	230
Little Boy, br c by Poor Boy out of My Dame by Littleton .....(Captain Dewhurst)	1100
Chestnut filly by Polymelus out of Queen's Holiday by Royal Hampton.....(Mr. Dawson Waugh)	1000
Chestnut colt by Irishman out of Proserpine by Chittabob.....(Mr. J. W. Larnach)	200
Cabyria, b yearling f by Prince Palatine out of Carina II. by Spearmint.....(Vicomte de Fontarce)	520
Chestnut colt-foal by Sunstar out of Alnmouth by Gallinule .....(L. Robinson)	700
Bay or brown colt-foal by Sunstar out of Mira II. by Llangwm .....(Lord Glanely)	610
Bay colt-foal by Bayardo out of Cyanin by Cyllene .....(Mrs. Rudd)	1000
Bay filly-foal by Cicero out of Simony by Common .....(Mr. Weston)	910
Bay filly-foal by Sunstar out of Sly Lassie by Forfarshire .....(Mrs. Rudd)	260
Bay colt by Kennymore out of Quick by Cherry Tree .....(Lord Penrhyn)	500
Brown filly, 2 yrs. by Lemberg out of Delagoa Bay by Bay Ronald.....(Mr. E. Moore)	250
Bay filly, 2 yrs. by Lemberg out of White May by Jeddah.....(Mr. J. Day)	310
Sly Mary (1914), b m by Forfarshire out of Sly Lady by Flying Fox; covered by Willonyx .....(Mr. F. C. Baird)	105
Bayete (1906), b m by Bay Ronald out of Child's Nun by Childwick; covered by Willonyx .....(Sir Hugo FitzHerbert)	230
Marcigny (1908), b m by Marco out of St. Aldegonde by St. Simon; covered by Willonyx .....(Mr. T. Gow)	170
Excelita (1914), br m by Dick Ronald out of Excellence by Gallinule; covered by Willonyx .....(Sir A. Bailey)	3500

WORLD'S RICHEST RACE

The Latonia Championship Stakes for 1919 is a race of one and three-quarter miles for three-year-olds of that season. Its gross value is estimated at the princely sum of $50,000, of which $15,000 is directly contributed by the Latonia Jockey Club in the form of added money. It is estimated that the race will be worth something like $40,000 to the winner, in addition to a gold cup valued at $1,000, a gift from the Thoroughbred Horse Association, by private subscription of certain of its members. The remaining $10,000 is to go to the second, third and fourth horses and to the nominators of the first three horses. The race is to be strictly without penalties and allowances, the conditions providing that colts and geldings shall carry 122 pounds and fillies 119 pounds. It is a race in which the champion three-year-old of the season will not be asked to make any concessions to inferior opposition and therefore is one that puts a premium upon the breeding of high-class thoroughbreds.

Among the notable American two-year-olds of this season that still remain eligible for this great race are P. A. Clark's Dunboyne, winner of the Futurity at Belmont Park last month, and J. W. McClelland's Eternal, winner of the Hopeful Stakes at Saratoga in August. The Futurity and the Hopeful are the richest of American stakes for two-year-olds. Other eligibles for the Latonia Championship Stakes of 1919 that have been racing with distinction in the juvenile contests of this season include E. R. Bradley's Batter Cake, S. C. Hildreth's Lord Brighton, R. E. Carman's The Boy, W. R. Coe's Uncle's Lassie and Star Realm, H. H. Hewitt's Sam Reh, George W. Loft's Fleeing Sheik, W. M. Jeffords' Star Hampton, H. K. Knapp's Elfin Queen, A. K. Macomber's War Pennant, J. W. McClelland's The Wanderer, Edward B. McLean's Uncle White, Henry A. Porter's High Time and My Friend (besides the highly tried colt, Pride of India, which has not yet raced); Harry Payne Whitney's Cresson, Pigeon-Wing and Stickling, and Williams Bros.' Linden, to say nothing of numerous lesser lights of the present juvenile division, some of which may develop into shining lights of the turf when the stretching out of the distances over which they will race as three-year-olds may bring to light latent qualities of stamina, the existence of which is not now suspected.

Stake of 1920 Has Changes

Except for an increase in the amount of money going to the first four horses and their nominators, the conditions for the second running of this notable race in 1920 follow closely the lines of the original provisions. A change has been made in the method and amounts of the preliminary payments in connection with nominations for the race. Captain A. B. Hancock of the Claiborne Stud, Paris, Ky., is the principal nominator, with twenty-nine nominations. Other American breeders especially well represented among the 342 nominations received for the race include the following:

Breeders	Nominations
J. O. Keene	17
H. P. Whitney	16
A. K. Macomber	13
H. T. Oxnard	14
E. R. Bradley	10
T. M. Murphy	10
J. B. Respess	10
G. J. Long	9
William Woodward	9
J. N. Camden	8
Edward Cebrian	8
A. Belmont	7
H. P. Headley	7
J. E. Madden	7
G. D. Widener	6
C. W. Moore	6
W. S. Kilmer	5
R. F. Carman	5
G. A. Cochran	5

Foreign Owners Nominate

The principal foreign nominators included Sir Mark Sykes of the famous Sledmore Stud in England, who named twelve; Sir Alec Black of Great Grimsby, England, who named eight; Sir John Robinson of Nolts, England, who named five; M. Cheri Halbronn, noted French breeder; Jefferson Davis Cohn, an American who maintains a breeding establishment in France; Russell Swanwick of the Royal Agricultural Stud, England; Patrick Clarke of the Balreask Stud Farm in Ireland; the Marchiones Conyngham, Slane Castle Ireland; John A. Dawson, Newmarket, England; D. M. Gant, London, England; J. B. Joel, London, England; J. H. H. Peard, London, England; Captain E. Tanner, Newmarket, England, and Robert Whitworth, Halifax, England.

Another notable innovation in connection with the progressive policies now being carried into effect by the Latonia Jockey Club management is that coincident with the barring of the Latonia Derby to geldings next season and the increase in the value of that notable race for three-year-olds to something like $30,000, the breeders of the first three horses in that important event will share in the prize money to the extent of $500 to first, $200 to second and $100 to third. Except in the Futurity and similar events, no such provision has ever been made for the encouragement of American breeders.

RACING DAYS OF NORFOLK RECALLED

On the old Rancho del Rio down the Sacramento River in the Sutterville Hills district, is a tablet that keeps alive the name of Norfolk, one of the finest race horses America has ever known.

Postmaster Thomas Fox remembers the history of Norfolk and tells some interesting stories about him.

Along about 1863, the race horse Lodi was the undefeated champion of California, and although many attempts had been made, not a horse in the country seemed to be able to beat him.

So Theodore Winters went East, determined to find an animal capable of outrunning the undefeated horse. He finalliy had offered to him by R. A. Alexander in Kentucky two animals, half brothers whose sire was the famous Lexington. Norfolk was one of these horses.

Winters was undecided, but he eventually agreed with Alexander that whichever one should win out in a mile and a half race, he would take with him to California and use as a challenger for Lodi.

Norfolk was the winner, and Winters prepared to return. Nothing, however, had been said about the price until then, but Alexander had often boasted to his friends that he would some day sell a colt from Lexington for more than he had paid for the sire itself.

When Alexander told Winters this, the latter asked what the price for Lexington had been and having been told that it was $15,000, he said: "All right, I'll give you more than that for Norfolk—we'll make it $15,001."

Alexander agreed to the bargain, and Norfolk went back to California with Winters, and as events proved he was the horse destined to defeat Lodi.

The first race to be run by the two horses took place on the old Ocean House Course in San Francisco, on the 23rd of May, 1864. Lodi was then a five year old, and the backers of the famous horse, sired by the equally famous Yorkshire, were anxious to see what would be the outcome when Norfolk, sired by the blind Lexington, for whom Alexander had paid $15,000, raced.

Dick Havey rode Norfolk and Gilpatrick rode Lodi in two-mile heats. Betting was 10 to 7 on Norfolk. A heavy gale blew over the track as the race started, and the very winds seemed to race with the two animals as they flew around the course. Norfolk ran a dead heat in 3:43 1-5; won the second in 3:42 3-5 and the third in 3:51 4-5.

The second race was run in the same year, September 18th, in Sacramento, for a purse of $1,000. Havey rode Norfolk again in two-mile heats, and Wilbur Pierce rode Lodi. Norfolk won both heats. the first in 3:37 3-5 and the second in 3:38½. And it is believed that Norfolk could have run the heat in 3:35 had he been forced.

The third race, however, is the one that is remembered most clearly in the minds of the old-timers, who loved the track. A few days after the second race, on the 23rd, Norfolk and Lodi met again for the third and last time on the old race track in this city. An enormous crowd turned out, the day was good and the track perfect.

The heats were three miles this time, the riders the same as in the second race. Only Lodi had a quarter crack of the hoof and was lame. The first heat Norfolk won in 5:27½, the second in 5:29½. When the end came Lodi was hard put. His hoof was covered with blood, but he came on trying his best, for so wonderful is the spirit of the thoroughbred that however badly beaten he may be, he never gives up, but strains his last effort to reach the horse that is in front of him.

But Norfolk was the hero of the day. He established a record for three-mile heats that has never been broken. The best previous time was 5:28 flat by Brown Dick, a three-year-old in New Orleans.

When Norfolk was retired, undefeated, Winters took the horse to his ranch in Yolo county, where the town of Winters now is, and when he moved from there Norfolk went with him to Sutterville Hills. There the wonderful animal stayed until his death.

Norfolk was not only a fine racer but an animal of great intelligence. When his trainer, a man of the name of Marsh, who always slept right in the stall with him, would fail to wake up in the morning, Norfolk reached over and pulled the blankets off of him. This trainer, Norfolk and a dog were inseparable companions and always a happy family.

Alfred G. Folger, of the People's Savings Bank, was Norfolk's exercise boy in those days, and he, too, remembers many incidents that added to Norfolk's fame.

Norfolk had many famous descendants and some of them were superior race horses. Golden Maid, who won the Irish Derby last year, was a descendant of the undefeated champion. It is estimated that Norfolk's progeny won in purses over $600,000, and the annals of the turf are filled with names of horses sired by Norfolk.

When the time came to destroy the horse—he was old and infirm, not a person on the ranch could be found who was willing to do the deed. Some one went out on the road, picked up a sorry looking tramp, and offered him $20 to do away with the animal.

The tramp went to the stall and a few minutes later came out again. In answer to his question, the owner confessed that the tramp's surmise was correct and the horse was Norfolk.

Then the fellow said: "I haven't eaten for two days, but I'd rather not eat for twenty than to buy my food with the money taken for killing that wonderful animal."

Norfolk's time had to come, though, and now only the headstone which Tom Fox re-established about a year ago, remains to mark his grave. but his memory will live forever in the annals of the turf.—Sacramento Bee.

Mr. Fox bred and owned Irish Queen (dam of Senings Park). He also bred and owned her dam, Maid of Fermoy, and owned her grandam, City Girl. Mr. Fox bred and owned a number of good horses in days gone by.—Thoroughbred Record.

MY FIRST ENGLISH DERBY

Written for The Breeder & Sportsman
(By Lavengro)

Can anyone imagine at this time a horse called Kaiser being made favorite for the English Derby; or for that matter for any reputable kind of a race in any part of the world? And yet that was the situation at Tattersalls'—the Wall St. of English sport—when my recollections of horse-racing begin.

It was back in the early 70's—I forgot the exact date, but 1872 or 1873, I think—and I was a youngster living in the center of a sporting community whose idol just then was Freddie Archer, a "native son" of the locality, who was winning his spurs in sensational fashion, though not yet through with his apprenticeship to Matthew Dawson, the famous trainer whose daughter Archer afterwards married; her death at the time of the birth of their first baby being generally regarded as a contributory cause of the great jockey's premature and tragic end.

The atmosphere of horse-racing prevaded the business in which I chanced to be engaged in what was then considered the somewhat exclusive, not to say aristocratic, position of office boy. The sons of the boss were all "sports," the chief accountant pretty generally making a book with their patronage as his chief support.

Sporting surroundings naturally made for sporting companionship, and amongst what were little more than boy chums I became acquainted with a lad, then acting as groom for a local horse breeder, who had been twice turned down as a jockey on account of rheumatic fever following attempts to train down to the weight of a Derby rider's requirements.

He had been engaged by his stable to ride Doncaster for that year's Derby, he told me, and after twice breaking down in health was finally compelled to give up the game. What impressed me most about the fellow was his conviction that Doncaster—a hundred to one outsider—was going to win. I was greatly interested, but laughed as I listened, for all my people in the office were sure there was only one horse in the race—the Kaiser, a hot and almost universal favorite.

When Derby Day arrived there was much more excitement than work in that particular office. "Well, kid, what's going to win today?" was the first question put to me by the head of the office staff; this treating me as something of an oracle being by reason of the fact that when sent to the local postoffice for the afternoon mail I was frequently able to take with me the latest results from the course; there being no evening newspapers in those days and the only information a special wire to the leading hotel of the town, a considerable distance away.

"Doncaster!" I promptly and confidently replied.

A fairly heavy desk book, fortunately not too accurately aimed at my head, was my only reward for the well intended tip.

Around four o'clock in the afternoon, as the custom was, with leather satchel strapped across my shoulder I was dispatched to the postoffice with special instructions to find out if a telegram had been received and, if so, what information it gave as to the result of the great race. I obtained the information readily enough, though it was supposed to be strictly private and for the use of the hotel I have mentioned exclusiveiy. "Doncaster first; Kaiser and Marie Stewart dead heat for second place," the postmaster whispered as he handed out my bag of letters. How I laughed! Of course if I had been a man I should have cursed because I had not backed such a splendid lead. But I was only a boy, and even office boys in those days had precious little in the shape of money at their disposal for gambling or any other purpose.

When I conveyed the information to the waiting group back at the office I put on my most serious demeanor though it was impossible to keep a straight countenance for any length of time. However, it mattered little how I looked or what I said. One and all refused point blank to believe a word I had to say. One moment I was a lying imp, the next the object of alternate blandishments and threats. Finally, finding it impossible to extract any other kind of story from me, the oldest of the three sons of the boss—a former captain in the merchant marine—ordered me to Hades and strode off to the hotel to get more satisfactory news.

He returned later with sufficiently weighty confirmation of my report. Doncaster had won and had started at 66 to 1 against; and for weeks afterwards the great anxiety of my superiors (?) (in the office as well as in sporting experience) was to learn the source of my information.

ENFORCED BREEDING IN OLDEN TIMES

The dearth of horses in England, due to the demands of the war and an inevitable consequence of the limitation of racing, has set some interested writers to delving into the methods adopted for dealing with a similar condition in the distant past. One has come across the provisions made in the time of Henry VIII., when the falling off in the breeding of horses was so pronounced that legislation was imperatively demanded to arrest it. The preamble of the act referred to, while deploring the fact, proceeds thus:

"The great decay of the generation and breeding of good and swift and strong horses, which heretofore have been bred in this Realme to the great defense, profit and common commoditie of the same, and now remembering the like breed of horses is sorely diminished and decayed."

The act of 1537 itself provides as follows:

"The King's Highness, with Lord Spiritual and Temporall and the Commons in this present Parliament assembled, and by the authority of the same, hath ordained, enacted and established that every person and persons, as well as spiritual and temporall, of what estate, degree of condition soever he or they be, which at this present time or at any time hereafter shall have any Parke or ground enclosed with a hedge, ditch, wall or pale wherein any deere, or at any time hereafter shall have any Parke or grounds, so enclosed wherein any deere is or shall be usually kept for game, containing the quantity of one mile in compass:

"That every such owner of such Parke or ground being his own land, and every farmer of such Parke or ground being letten to Farme, from the 1st Day of May in the year of our Lord, 1537, shall keep for every such Parke or ground being enclosed as aforesaid two mares, not spaied, apt and able to beare foals, each of them to the altitude or height of thirteen 'handsfuls' at the least, upon paine of forfeiture of 40 shillings for every month lacking the said mares contrary to this act."

HANDICAPPING MAIDENS

Pilot has a very pertinent article in the last Sydney "Referee" about handicappers handicapping maidens on thir track showing, and he hits the nail squarely on the top when he states that it is grossly unfair. He does not for a minute think that a horse that is making its first public appearance should be let in at the minimum; far from it, such an animal should be put in the middle of the handicap, and if there are several green 'uns in the race they should all go on the same mark, with the usual allowance made for sex. Also no handicapper has any right to put a few pounds extra on an animal because a particularly capable trainer is handling it. A weight adjuster's business is to work on form, not on trainers.

The war has just ended. British officers predict heavy exportation of horses to Europe and believe that at least a million will be exported in the next five years. Rugged drafty horses weighing from 1400 to 2000 pounds are wanted, preference to be given to the heavier sorts.

ED CORRIGAN REPORTED BROKE

In the days of the Bay District, Ingleside and Tanforan race tracks, Ed Corrigan was a spectacular figure and one of the greatest powers in the racing game in this country. Along in the early nineties, starting with a modest capital, he soon run it into hundreds of thousands and became a big factor in the racing world. In 1902 Corrigan's fortune was estimated around the five million mark, a tremendous sum in those days. In 1903 he was an influential member of the Western Jockey Club, but in a moment of anger he withdrew from that organization and started what was known familiarly as "Corrigan's Outlaw Club," and then there began a fight to the finish between the Western and the Corrigan outfit. This cost him a sizeable part of his fortune, but he might have recovered had not the legislators of Ohio, Indiana, Illinois, Missouri, Tennessee and Louisiana prohibited betting on all the tracks in those states. He had several millions tied up in race tracks which had become useless as tracks and of comparatively little value for other purposes, also an immense stable of horses and a big breeding farm, representing an outlay of nearly a million of dollars more. He was forced to sell all of his holdings and was left with only a few hundreds of thousands of dollars which through hard luck soon evaporated. Corrigan was a man of strong personality and numbered friends by the legion. He was dominating in his manner and made many enemies. He was generous and gave away thousands of dollars to needy friends and spent money recklessly to whip his enemies in a fair fight, in fact he delighted in a fight, but was never accused of underhandedness or unfairness. His many friends and even his enemies cannot fail to remember his good qualities and all will regret the misfortune that has overtaken him in his old age.

Notes and News

The Arizona State Fair and Race Meeting at Phoenix has been postponed to the first week in December, on account of the Spanish influenza, by which time it is expected all danger from the epidemic will be over. There are very few places in the United States, where a State Fair and race meeting would be possible in the month of December.

The sympathy of all horsemen will be extended to Secretary W. H. Gocher, of the National Trotting Association whose son William died at the base hospital at Camp Johnson, Jacksonville, Florida on October 11th. Young Gocher was expecting at the time he was taken ill to be sent shortly with his regiment to France. His name will be enrolled among the heroes, who, without having a chance to fight for his country, nevertheless gave their lives for it. His father was with him at the time of his death.

J. Elmo Montgomery has consigned to the Old Glory Sale at New York, November 18th to 23rd, and shipped on the 9th instant, Hal Logan 2:05¼, John Logan, Rosa Logan, Alice Logan, Marshall Logan, Caroline, Electric Forbes and Tennessee Bill. S. H. Cowell shipped with the same consignment John Mack 2:07¼, Albaloma 2:08¼ and Mountain Dee. Ben Corbett Jr. 2:09¼ was shipped at the same time.

Lou Dillon, 1:58½, the trotting queen, is the only broodmare now owned by C. K. G. Billings. She will be mated with Lee Axworthy, 1:58¼, next spring. Her previous consorts have been John A. McKerron, 2:04½, Bingen, 2:06¼, Atlantic Express, 2:07¾, and The Harvester, 2:01, she now being with foal to the latter stallion.

E. D. Dunn of San Francisco, who has spent the last four months in Lexington, is about to return to his home in California for the winter and has placed in the training stable of William Owings his bay mare, Virginia Humbug, by Cochato, dam Baroness Maid, by Baron Wilkes, and her yearling bay filly by Manrico. This mare won the two-year-old Panama-Pacific Futurity for trotters in 1915 and has never been raced or worked since.

F. W. Perkins' mare Minnie Bond by The Bondsman, dam Minnequa, 2:12, foaled a handsome filly by Peter McKlyo on July 6th. Mr. Perkins has great expectations for this filly both from her looks and breeding.

During the meeting at Poughkeepsie, Ben Walker pulled out the family Bible and announced that he was fifty-eight years old. When the figures were reported to Ed Geers, he stated that he was very anxious to see the man who kept the record of the Indiana branch of the Walker family as Ben was a man full grown when he made his first trip into the northern states forty-one years ago.

A unique incident occurred in an open handicap for twenty-five pounds at a trotting meeting in Dublin, Ireland, on July 22 last. In the final Terry and Lord Drogheda trotted a dead heat in 2:41. As the owners would not divide the stakes the pair were again sent over the course and made another dead heat in 2:41¾. This did not improve matters any so the pair trotted another mile which was also declared a tie in 2:42¾. The owners then agreed to divide, after having placed on record the first triple dead heat performance in light harness racing.

The fifteenth annual Alberta Winter Fair will be held at Victoria Park, Calgary, December 10th to the 13th under the auspices of the Alberta and Dominion Department of Agriculture.

On Friday, October 11th, next to the last day of the Riverside Fair, the attendance was record-breaking, running up to 14,000. The Fair was one of the most successful ever held in that part of the state everything passing off splendidly with big exhibits of all kinds. The live stock exhibit was a special attraction and the racing high class.

Secretary Eberhart reports that no action will be taken in regard to the Fair and Race Meeting in 1919, at Fresno, Cal., until the meeting of the Board this Spring. It is probable that the Fair and Race Meeting in Fresno next year will be one of the main events of the kind on the Coast.

The Board of Review of the National Trotting Association will hold the regular Fall meeting on December 3rd at the Murray Hill Hotel, New York. Communication for consideration at the meeting must be forwarded to the Secretary not later than November 19, and all parties who desire that their cases should be acted on at the Spring meeting should immediately notify the Secretary to that effect.

THE GRAND CIRCUIT OF 1918

By W. H. Gocher

The eleven members of the Grand Circuit in 1918 gave fifteen meetings, which covered a period of seventeen weeks, and distributed $459,337.33 in premiums. Two hundred and fifty races were contested, 146 of them being for trotters and 104 for pacers. One thousand and forty-six horses started in the trotting races and 647 in the events for pacers, 452 heats being required to find the winners in the former and 339 in the latter.

Of the horses that made the trip from North Randall to Atlanta, Directur J. is entitled to first place. He was started in fourteen races of which he won eleven, was second in two, and third in one, while at Lexington he acquired a winrace of 2:01½, showing that he had more speed at the end of the campaign than when it opened. June Red and the four-year-old filly Ante Guy divided the honors in the second division. Each of them took the word in thirteen races of which June Red won eight and Ante Guy seven, while the latter defeated the Red Medium mare on their last appearance at Atlanta. June Red won her first race at the North Randall inaugural meeting and continued in front of her fields until she met Chilcoot in the Massachusetts at Readville and Charter Oak Purse at Hartford, as well as Prince Loree in the Empire State Purse at Syracuse. She also won again at Columbus and Atlanta, where she took the word in two events.

Ante Guy made her first start in July at North Randall, where she was unplaced to Binland in 2:05¾ in the race in which the Transylvania winner defeated Hollyrood Kate. Her next appearance was at Toledo, where she won two races, and followed them by another victory at Columbus. Alma Forbes defeated her in 2:06¾ at the second North Randall meeting, that event being the only one credited to the daughter of J. Malcolm Forbes out of thirteen starts. When Chilcoot pulled up lame at Hartford, Ante Guy was made the stake horse of the Murphy stable and after finishing second to Prince Loree in the $10,000 events at Syracuse and Columbus, she caught the Prince McKinney gelding in the Buckeye Purse and defeated him in 2:04¼. She also repeated the performance at Lexington, where she won the Walnut Hall Cup, breezing in 2:03½, and followed it with two victories at Atlanta. Ante Guy is the best four year old race mare that has appeared on the turf since Joan, the winner of the Walnut Hall Cup and Transylvania in 1910, and when making this statement I do not overlook the claims of Miss Bertha Dillon and the four races in which she started in 1918, her returns showing two thirds, a second and a win in which she trotted in 2:02½. As a consistent performer, Ante Guy is entitled to a place beside Directum and Peter Volo, the best pair of four year olds that ever took the word.

Billy Jackson and Royal Mac each made twelve starts on the trip down the line, the Royal McKinney gelding's only victory being recorded at Columbus, where he defeated Binland in the mud, but was in turn beaten by him in the Transylvania at Lexington in the fastest four-heat race on record. Billy Jackson scored his first victory by winning at Syracuse. He also showed in front again at Columbus the following week in 2:04¼ and followed it by two wins at Lexington.

Oro Fino won six out of eleven starts, his winrace of 2:03¾ being made at Syracuse where he defeated his stable companion, Budlight. Selah Baird also made eleven starts of which she won three, was second in three and third in five. Of the others that took the word in eleven events, The Royal Knight won at North Randall, Philadelphia and Poughkeepsie, while Lu Princeton, the sturdy battler of the year, in addition to winning eight of his engagements reduced the two-heat stallion race record to 2:02¼, 2:02½, and the three-heat stallion race record to 2:02, 2:04¾, 2:02¼ on his last appearance at Atlanta.

Miss Harris M., in addition to winning six of her nine races, reduced her record to 1:58¼, the fastest heat paced in 1918. She also divided the honors with Single G. at Toledo in pacing the fastest three-heat race on record, it being the only one in which each mile was finished below two minutes, while at Syracuse she placed the track record at two minutes.

The colt races proved the most attractive feature in the Grand Circuit this year. At the opening meeting Hollyrood Bob startled the turf world by winning from Chestnut Peter in 2:04¾ and while he had only a few engagements, the defeated colt swept into the king row, winning at Kalamazoo in 2:11¼, Toledo in 2:07¼, Columbus in 2:05¼, where he defeated Selka, Peter Vonia and The Divorcee, the National Stallion Stake at North Randall in 2:05¾, and at Philadelphia in 2:08¾. At Poughkeepsie he was defeated by The Divorcee after winning a heat in 2:05¾ and at Readville by Nella Dillon after he showed in front in the second heat in 2:05¼. After this race he was retired on account of lameness and David Guy, who had won against aged horses at North Randall, as well as the Matron Stake at Philadelphia in 2:05¾, and an open class at Poughkeepsie, took up the gage of battle. He won his engagement at Hartford and was second to Hollyrood Bob at Syracuse. His next start was at Columbus, where he defeated Nella Dillon in 2:05¾, and finished second to Peter June after winning a heat in 2:05½. As he was too lame to start in the Kentucky Futurity, Petrex took his place and in the deciding heat forced Nella Dillon out in 2:05¼. This splendid daughter of Peter the Great and Extasy also made six other starts during the season, her card for the campaign showing that she won three firsts, three seconds and a third, all of them except one being against aged horses.

While the three year old trotters of 1918 were very high class, the two year olds proved an ordinary lot with the exception of the marvelous filly Periscope that showed a half in 1:01 in a race at Columbus, Princess Etawah and Brusiloff, all three of which were developed by Ben White. The returns show that Periscope and Brusiloff each won four out of six starts and that Princess Etawah had two placed to her credit, one of them being the two year old division of the Kentucky Futurity.

Of the other horses that made the campaign, Ima Jay won four out of eight starts. St. Frisco also made a similiar showing and trotted a heat at Philadelphia in 2:01¾, the four-year-old filly Miss Bertha Dillon forcing him out, and also defeating him and Mable Trask at Readville where she reduced Bertha McGuire's four year old record for fillies from 2:04¼ to 2:02½. Single G. also won four out of seven starts in the Grand Circuit and reduced the half-mile track record of the world to 2:01 during the Iowa State Fair at Des Moines. Belle Alcantara has six firsts and a second to her credit for seven starts in the western end of the Grand Circuit. The Problem won all of his five starts and pulled up with a winrace of 2:04¼ while Binland's returns present four victories and a third for five engagements as well as a winrace of 2:03¾ which he made in the Transylvania. Nella Dillon, the Kentucky Futurity winner, also made five starts of which she won three and in two of which she trotted in 2:05¼.

As all the members of the Grand Circuit, except Toledo and Columbus, raced on the three heat plan, the average rate of speed was very low except at meetings where the weather was unfavorable. In the matter of extreme speed, Miss Harris M., Single G. and William were the only pacers credited with miles below two minutes in 1918. The fastest miles trotted was the 2:01¾ of Mable Trask at Toledo, the 2:01¾ of St. Frisco at Philadelphia and the 2:02 of Lu Princeton at Atlanta.

STOCKTON NEWS

(Special Correspondence)

I visited the race track Saturday and found everything quiet. The prospects, I am informed, are excellent for the coming spring. Mr. H. W. Williams is very unfortunate. He had a number of animals in training last year, and a fire caused by the carelessness of men from the steriff's office destroyed sixteen good stalls and burned up one trotter with 2:10 trials, a quantity of harness and a bike belonging to Mr. Williams. He sued for $1,500 damages. The supervisors, who own the track, refused to pay him. The court decided they were not liable as they had no control over the track. Mr. Williams had bargained to sell one or both of his trotters, Kate Bingen and White Stockings, to Charley Silva, but Kate took the grippe and that was off, and he is down with the "flu," but not seriously sick. If he survives his illness he will have several horses in training next spring, including Kate Bingen. She has trotted heats inside of 2:11, and several parties want to buy her, having seen her work out at the Sacramento fair.

Farmer Bunch is now happy, as he is in the employ of the supervisors attending to the aviation field. The entire acreage is now sown to blue grass and the aviation commander is in control. Bunch is in charge of the race track also, and it is in fine condition, good even as a winter track.

Chet Jones, son of C. J. Jones of Leta J. fame, will bring in a string of colts for training. M. Henry, who has charge of Irving's horses, will return from Sacramento.

Since the closing of the Pleasanton track, Charles Durfee with the Borden string, and Chadbourne want to come to Stockton to train, but Durfee fears there are no suitable stalls. There have been two fires, destroying quite a number of stalls, and nothing has been done by way of improvment since Shippee died, and they are in bad condition, many of them not rain proof. If the supervisors would spend $500 they could be put in fair condition, but there comes the rub. Of the five supervisors, one only, George French, has any interest in racing. While Jones was alive they gave him a certain amount through the spring and summer to keep the track in condition. Jones was a "brother-in-law" of French. Now, perhaps, the nephew may have some influence with his uncle. The automobilists, over 3,000 in this county, among them are hundreds of farmers who now never pull reins over a horse, are clamoring for good roads. They are the moneyed men and in listenng to them the supervisors have not much money for a race track, together with their other heavy expenses.

.SCOTT LINKHOUR.

PETER THE GREAT'S PEDIGREE

Now that Peter the Great has proved the greatest sire of light harness racing speed in the world, the censors of the American Trotting Register Association should take up his pedigree and cut out the bogus crosses. There is nothing that can be said or done that will tarnish his reputation, but the public should know the facts in regard to his grandam Shadow. She was registered by S. A. Browne, who purchased her under the name of Lady Duncan after she trotted a trial in 2:33 at Nashville, Tenn., in Volume 3 of the American Trotting Register as follows:

Shadow, black mare, foaled 1870, got by Dr. Greenfield's pacing horse Saddlerville; dam Swallow, by Joe Hooker, son of Mambrino Chief; grandam by the Sam Johnson horse that was foaled in Tennessee and burned up before his speed was developed. She showed a fast trial as a five-year-old. Bred in Tennessee, owned by S. A. Browne, Pentwater, Mich. This mare was formerly called Lady Duncan.

S. A. Browne started this mare in four races in Michigan in 1875 as Lady Duncan. On June 10 she was distanced at Grand Rapids in 2:27¼ by Mazo Manie. On July 24 she was unplaced to Frank Reeves in 2:38 at Saginaw, while on September 1 she was again unplaced at Battle Creek, Mich., in a race won by Friday. Her last appearance was at Saginaw, where she was defeated by Dr. Lewis in 2:36½. The following spring this mare, the tap root in the pedigree of the greatest sire in the world, was mated with a horse called Combination and produced a colt called Boyd Pantland. She then produced Silene 2:29¾, Sir Knight 2:23¾, Suzerain 2:29½, all of which were by Grand Sentinel. A filly named Engleshade by Empire followed, and then in 1887 another mating with Grand Sentinel resulted in Santos, the dam of the marvelous horse Peter the Great. By this time the word Octoroon was also inserted in the pedigree of Shadow, formerly Lady Duncan, it appearing in Volume 7 of the American Trotting Register as follows:

Shadow, black mare, foaled 1870, by Saddlerville (Octoroon); dam Swallow, by Joe Hooker 185, etc.

If the American Trotting Register Association can find any evidence among the documents purchased from John H. Wallace in 1891 to show that Shadow was out of a mare called Swallow by Joe Hooker, it should be given to the public with the name of the man who bred Swallow, as all that is known to date is that Dr. Greenfield of Guthrie, Ky., bred a mare to a horse called Octoroon and the produce was the black filly Lady Duncan which, after passing through several hands, became the property of W. M. Duncan of Nashville, Tenn., and was sold by him in 1875 to S. A. Browne.

The breeding of the Sam Johnson horse is unknown. It is known, however, that he was foaled near Nashville in the spring of 1862, his dam having been brought there heavy in foal with Scott's Louisiana cavalry which was operating against the Union Army. The date of his birth and the fact that Shadow was foaled at Guthrie, Ky., in 1870, make the alleged pedigree of her dam which has been called Swallow impossible. Being foaled in 1862, the Sam Johnson horse could not be used in the stud before 1864, when he was two years old. This would bring his first crop of foals in 1865. The earliest possible date that a filly from this crop could be bred to Joe Hooker would be in 1867, and in order to accomplish this she must have been shipped to Lexington, Ky., as that horse was foaled near that city and remained there until he died July 5, 1875. If this mating was made, and it is very doubtful, the foal would be dropped in 1868, and would be only one year old when Dr. Greenfield bred the dam of Shadow to Octoroon. It does not require any investigating to show that the accepted pedigree is impossible.

Under the present rules the pedigree of Octoroon would also be placed in the unknown list as even such a Morgan enthusiast as Joseph Battell placed the brand of doubt upon it when he published that he was said to be by Comet, a son of Chittenden County Morgan, dam by Drennon, grandam by Bulrush Morgan. All that is positively known about Octoroon is that R. P. Madison of Guthrie, Ky., went to Louisville in 1862 or 63 and while there purchased a dark chestnut horse that is supposed to have the pedigree as given by Mr. Battell, although the name of the breeder is unknown as well as the name of the party from whom Madison purchased the horse.

So far as Octoroon is concerned, he stands as a starting point in the maternal line of Peter the Great, while his recognized value as a sire of racing speed begins and ends with the produce of Shadow as well as Ella Hopkins, the dam of Mattie H. 2:11¼, Geneva S. 2:19¼, and Quinine 2:28¼, and Gray Sally, the dam of the pacer William M. Singerly 2:16½. Ed Geers also says that he saw Madison with Octoroon at the Nashville fair in the early seventies and that while it was in progress he won three races with him, one as a trotter, the other as a racker and the third over hurdles, although the horse rushed through instead of jumping over them. At that time Octoroon must have been from fifteen to seventeen years old.

The following is the pedigree of Peter the Great as established by published evidence: Bay horse, foaled 1895 by Pilot Medium, dam Santos by Grand Sentinel; grandam Shadow by Octoroon.

Peter the Great is also a member of what might be termed a one-horse sire family. Happy Medium, his grand sire, was the only colt produced by Princess, the old rival of Flora Temple. He was in the stud for many years and got hundreds of colts, but of all of them Pilot Medium, a cripple, was the only one to establish a reputation as a sire of speed. Pilot Medium was seventeen years old when he died in 1896. He got many foals but of all his sons Peter the Great is the only one that can be considered a sire of speed. Peter the Great is now twenty-three years old and has sired more foals than any trotting stallion that ever lived with the possible exception of Rysdyk's Hambletonian. Still none of his sons have as yet given evidence of continuing the uniform speed getting qualities of their sire. A large number of his get have shown conclusively that they were as good or even better race horses than their sire, which is saying considerable, as he was not only a winner as a colt but also as a mature horse in the best of company. It should also be added that his reputation as a sire was made by sheer force of merit. While at the Forbes Farm near Boston he was neglected and finally rejected after becoming a confirmed stall walker. J. Malcolm Forbes, his owner, was also so thoroughly disgusted with him that after the horse was sold at auction for $5,000, he stated that the purchaser had his sympathy.

The change to Kentucky with freedom in a large paddock made Peter the Great forget his faults, while the known blood lines in his pedigree proved a peerless outcross for the Wilkes and Mambrino strains with which the trotting stock in the blue grass region was saturated when he arrived at Lexington. His range of values is also of interest. As a four-year-old he was sold at private sale for $20,000, as an eight-year-old at public auction for $5,000, and at twenty-one at private sale for $50,000.

THE RIVALS

Mabel Trask and St. Frisco are the most evenly matched pair of trotters that were ever seen on the turf. Both of them carry race records of 2:01¾ and while the number of victories are in favor of the mare, it now looks as though Geers' horse has the best of the argument and is very apt to step a heat in two minutes or better in the free-for-all at Hartford on Labor Day. In order to bring these trotters together again at Charter Oak Park, the Connecticut Fair Association offered a $2500 purse and while Miss Bertha Dillon declined the battle, Cox came forward with a second Richmond in Lu Princeton, the stout battler that won in 2:02¼ and 2:02¾ at North Randall. These three great trotters present a peculiar study for those who are interested in the whims of stars from prima donnas to game chickens. St. Frisco is a plain every-day body in the horse world. His bump of curiosity is well developed but as soon as he familiarizes himself with his surroundings he never shows a disposition to make a rough house as long as he gets what is coming to him in the way of hay and oats and a few carrots. Lu Princeton is so lazy that he will not move out of his tracks unless ordered and sometimes persuaded to do so with an application of the whip. He trots all of his races under protest and never breaks away flying until he is satisfied that everyone is ready for business. In the stable his only worry is a constant fear that the man with the feed box will fail to come early and often. If he was not owned by a rich man, he would eat him out of house and home. On the other hand Mabel Trask is as demure and polite as the horse kind can be and while as wilful as a spoiled child, those in control of her make it a point to see that she is not crossed in anything so long as it does not interfere with her racing. When being jogged if she stops to look around a minute or two, no one disturbs her until she is ready to move on. Also when being trained or raced she is treated differently from other horses. Instead of being tied both ways or walked she is turned loose in the box stall as soon as she comes in from the track and allowed to eat all the hay she wants or to take a drink if she feels so disposed. Her groom also manages to take care of her physical wants as she moves about in the stall and when the race or work is over instead of having an empty stomach, she is ready to have a snooze as soon as she has cooled out.

R. D. Mayes has recently purchased from W. A. Beard, Napa, Cal., the 10 year old bay trotting mare Lady Owens, by Nutwood Wilkes, dam Record Searcher, by Searchlight; 2nd dam Zeeta Carter, by Director; 3rd dam Lida W., by Nutwood 600; 4th dam by Geo. M. Patchen Jr.; 5th dam by Williamson's Belmont. This mare originally came from the Nutwood Stock Farm and is to be used by Mr. Mayes as a brood mare.

Mr. C. W. Bowers of Davis will send 37 head of Belgians, Clydes, Percherons, hackneys, saddle horses and jacks to the Liberty Fair at Los Angeles, which is scheduled to open November 21st. Ruby & Bowers are shipping a carload of big show horses from Portland to the same destination.

CHILCOOT

(By W. H. Gocher.)

After Chilcoot had won the $10,000 Charter Oak Purse, Thos. W. Murphy stated that he would not be started again this season. He has a bowed tendon that bothers him and an effort will be made during the winter months to get him in trim for another campaign in 1919. Since the Grand Circuit opened, Chilcoot took the word in eight races of which he won five and was second in three. At the first North Randall meeting he won in 2:06½ while in Kalamazoo he finished second to Wilkes Brewer in 2:05½ and June Red Defeated him at Toledo in a three in five heat race after he won a heat in 2:05¾. His fastest race was trotted at Columbus where he won in 2:09¼, 2:04¼, 2:04¼ from Heir Reaper. Chilcoot was not started at the second North Randall meeting. He was, however, one of Murphy's nine winners at Philadelphia and he again finished second to June Red at Poughkeepsie. At that time he was very lame. Still he came through in front at Readville in the $5000 Massachusetts and at Hartford in the $10,000 Charter Oak Purse. Chilcoot is six years old. He is a Walnut Hill Farm product and comes honestly by his speed and gameness as he is by San Francisco out of Chimes Girl, a daughter of Chimes and the Wood's Hambletonian mare Minnequa Maid which also produced the great race mare Nightingale 2:08, that won the Charter Oak Purse in 1891 to high wheel sulky, after a nine heat battle with Little Albert, Abbie V., Realman, Prodigal, Miss Alice and Frank N. Ed Geers in his "Experience With the Trotters and Pacers," stated that as a test of speed, gameness and endurance, the Charter Oak of 1891 will go down in turf history as the most remarkable event ever trotted. This, however, was not only the great race that was placed to the credit of Nightingale as at Chillicothe, Ohio, she won after a six heat contest with Little Albert, Ryland T., Charleston and Lakewood Prince in 2:12. In 1893 Nightingale also won another seven heat race at Buffalo defeating Alix and Greenleaf and also placed the three mile record of the world at 6:55½ where it still stands. In 1894 Nightingale won again at Buffalo at two miles from Greenlander in 4:36½, the world's race record for the distance, while in 1895 she continued her wonderful career by defeating Azote and Klamath at Fresno, Cal., in February. After coming east she won at Fort Wayne, Ind. in 2:10 and at Terre Haute in 2:08, her record, defeating Onoqua, Dandy Jim, David B., and Anderson's Nightingale. Nightingale's color was a trifle darker than Chilcoot's, but as a typical light harness performer endowed with speed, gameness and endurance Chilcoot presents the same characteristics as the stout hearted daughter of Mambrino King and Minnequa Maid that was one of the turf world stars in the nineties, when the Village Farm stable kept the Hamlins and Buffalo, N. Y. constantly before the public.

ACCLIMATIZATION

Dr. M. M. Leach of Lexington, Kentucky, who is an authority and has been in nearly every country on the globe, has the following to say on acclimatization: "Despite the performances of such good thoroughbred horses as Hourless, Star Hawk, Omar Khayyam, Sun Briar and Johren, I am of the opinion that the importation of thoroughbreds for racing tests as now carried on does not pay, although from a breeder's standpoint, the evidence of turf history is proof that the numerous importations of the past few seasons will, beyond question, be of material assistance in improving the standard of excellence of future generations of American bred blood stock. The importation of horses destined for racing purposes cannot be made to pay unless certain set rules are followed. The bugbear of acclimatization stands ever ready to foil the best laid plans. On my first visit to Australia, in charge of some thirty head of horses, I knew little of the process of acclimatization. Our horses on arrival in Melbourne were taken to the farm and quarantined for one month, as required by Australian law. I thought that after a short period of rest the horses could be put into active training. I was more than astonished to learn that the owners had no intention of again placing the horses in training for a long time. I was told that two years must elapse before these horses became thoroughly acclimatized. After a sojourn of nearly two years in the Antipodes I found that even a longer period was necessary for a complete acclimatization."

A SAFE INVESTMENT

If your neighbor has a horse that is blemished and after two or three weeks of faithful treatment you see this same horse sound and in the best of spirits, doesn't it make you feel guilty to see your own horse "Down and Out" and you making no effort to relieve him?

This is the case with many horse owners. If they see a puff or bunch developing on their horses, instead of starting treatment immediately with a good, reliable liniment, they let it go, thinking that Nature will take care of it. The result in many cases is that the horse gets so bad that he is useless.

When using any kind of a liniment the first thing to be considered is, "Is it safe?" ABSORBINE is perfectly safe and harmless and is composed of the best ingredients that can be purchased. A pamphlet of interest to horse owners will be sent to anyone upon request. If your case requires special directions or there is some point not made perfectly clear in the pamphlet, the manufacturers are always glad to take the matter up and suggest line of treatment for each individual case.

ABSORBINE $2.50 a bottle, at druggists or postpaid.

W. F. YOUNG, P.D.F.
54 Temple St., Springfield, Mass.

A LETTER FROM C. A. HARRISON

Seattle, Nov. 1, 1918.

Editor Breeder and Sportsman,
San Francisco, Cal.

Dear Sir:

On reading your issue of Oct. 1st I note that the Breeder was suspended for 90 days for lack of support and while I may not have much voice in horse affairs I will say that your statement is a lamentable one because The Breeder and Sportsman has many years before I ever saw it and my first acquaintance was in 1888, was published and was at all times considered a high class Horse Journal. A paper that at all times commanded the respect of all intelligent owners and fanciers of both harness horses and thoroughbred horses and was well supported, but of late years I noticed a falling off of the support of harness horse men. To me this is all wrong on the part of harness men and all other horse men for the reason that San Francisco is the largest city on the Pacific Coast, gateway to the Antipodes, to the Philippines, to China and Japan and also to the Panama Canal.

Next reason we horsemen of the Great West can surely support one horse paper and if the standard bred horsemen of California will just wake up and think a little they will say I am right and they will not only renew subscriptions but they will each and all make a drive for the upbuilding and preservation of The Breeder and Sportsman. Yes, and then some harness horsemen should begin to brush up the many elegantly bred stallions that are rotting in corrals for want of support because their owners are dying of dry rot as horsemen.

Yes the owner of the many well bred standard mares which are eating a little grass and packing a paunch full of worms about should get all these mares up, feed them—yes on that $36.00 a ton hay— and breed all the good mares to the nearest and best bred standard stallion available. Yes, and go further. Insist that the State renew all the stallion Futurities and nominate even more, and when the foals come register every living one of them, because standard bred registry is an abstract of the animal so recorded. Yes, and Mr. Horseman and Mr. Farmer, unless you awaken now you will be a sorry lot in forgetting your horses or the horses you are about forgetting your birthright. California, the once home of so many great horsemen, so many great breeders, so many world's champions, to be going back on either standard bred or thoroughbred horses is to me deplorable, and I now say that when the war is over Californians who own first class animals, I mean standard bred mares and stallions and registered thoroughbreds of first class blood lines and soundness, speed manners and conformation, will reap a harvest, while the near-horseman who quit when things looked dark will be sorry. To those men who say it can't be done till betting comes back, I say they are wrong for if betting was back today the same rogues who killed the goose laying the golden egg would kill it again.

This is a time when the horse business wants real men to stay interested and I say again and without fear or asking favor, that every horseman, young or old or middle aged, rich and poor, should support The Breeder and Sportsman and also talk Horse talk, County Fairs and Race Meetings in season and out of season.

C. A. HARRISON.

At the Toledo meeting last July in itinerant Italian appeared with the usual equipment of hand-organ and monkey, and secretary Al Saunders, of Philadelphia and Poughkeepsie, suggested that, with the assistance of Walter Cox and Tommy Murphy he would undertake to collect funds for the Red Cross. The trainers unhesitatingly acquiesced, Walter strapping the instrument around his shoulders, and Tommy taking charge of the "monk." Most vigorously did Walter grind out tunes while the "monk" took to "Murf" like they had been pals for years. The stretch was paraded and a veritable uproar greeted the two famous trainers. Mr. Saunders, assisted by Irwin Gleason, Will Fitch and Eli Krutch, passed through the crowd and collected several hundred dollars for the cause. Meantime, the Dago's eyes were bulging out from the sight of so much cash "You coma long with me," he suggested to the trainers. "We getta de mon." The "monk," too, was beside himself with glee, and with great difficulty was persuaded to share with Tommy the coins tossed his way.

- - -

Enough has been seen during the last day or two, if seldom before during the present war, of the need of cavalry horses to enable us to settle the Huns, and in the circumstances it is sheer nonsense to talk about putting a luxury tax on race horses. They are not a luxury, but an absolute necessity, if we are to keep the small nations free from the menace of the Boche Junkers. Had we and our Allies more cavalry at our disposal since the enemy got themselves into Gen. Foch's "pocket" the great majority of the Germans in all probability would now be prisoners of war.

DIXON HORSE NEWS

(Special Correspondence)

Copy of the October number of The Breeder and Sportsman received and I am pleased to note you are to continue publishing same and try to make it a weekly as soon as conditions warrant.

As regards horse news it might be of interest to say that J. Elmo Montgomery has leased the Dixon one-half mile track and is now located here with Jim Logan and the entire Logan family.

As no doubt you know Mr. R. D. Mayes purchased from Mr. Elliot the dam of Mable Trask, had her sent to Peter the Great and bred and now has her here in Dixon apparently safe in foal.

Miss Nutonia is due to foal late in January or the first of February. It is also reported that Fred Chadbourne and Jas. Sutherland expect to locate here shortly to take over Mayes horses for the races in 1919—a suckling by Jim Logan, Leta by Diablo, a suckling by The Anvil, Madaline Marshall by Demonis, two three-year-olds by Jim Logan, Verna McKinney and El Paso—what they intend doing with Boncres I can't say. He came home here with Miss Nutonia and Deitles, four-year-old trotter Elloretta D., somewhat lame.

I have three horses at the track being handled by Louis Carrillo. The seven-year-old trotting horse, Healani 56150, by Locock, 2:05¼, dam Queen Derby, 2:06¼, by Chas. Derby, second dam Addie Ash by Indianapolis, has worked nicely this summer after 14 months without a harness on worked the fourth heat in 2:26, half in 1:09, with very little work as we used him to harrow and float the track.

A three-year-old trotting gelding by Canlear Gale 2:08¼ (half hobbles) dam Bernice Marshall by Oyhee, second dam Bertha. This colt has a nice way of going and handles himself like he will amount to something. Has been the fourth heat in 2:22, half in 1:08. A two-year-old roan filly by Alton, dam Helen Kelley (the dam of Graustark) by Bonnie McK., second dam Birdie by Jay Bird. This filly has worked the fourth heat in 2:17 2-5, a half in 1:05 2-5, one-quarter in 32 seconds and likes the game. Is a powerful animal and always ready to move.

At the time these horses worked this track it was several seconds slow owing to its dusty condition and not enough horses here to pack the dirt after being springled. On a good mile track they all could have cut several seconds off their time.

When Spring work opens up we no doubt will have a good many visitors here to see horses worked and if nothing unforseen happens no doubt there will be from 20 to 30 horses worked here in the Spring.

Woodland and Pleasanton being closed up no doubt others will show up later providing accommodations can be furnished.

Again hoping you success upon your re-publishing The Breeder and Sportsman is the wish of

Yours truly,
WM. M. FERGUSON.

LONG DISTANCE RACES IN EARLY TIMES

Particulars are given of the feat performed by the galloway Tom Thumb, in 1829, which seem to be fairly authentic. He was matched to trot 100 miles in 10 hours 30 minutes, and actually got to the end of his long journey in 10 hours 7 minutes. "The horse," the account runs, "was driven by the groom, who weighed about ten stone. The match cart, made in America, was one of the lighest we have seen, not more than 198 pounds. . . . The horse was unseemly in his aspect, rough in his coat, and at first sight slouching in his gait. He had four good legs, however, and a brightness in his eye which led connoisseurs to think there was something more than common in his qualities. Two watches having been regularly timed by the umpires were now produced and were started at the same instant and with them the horse. We must here pay a compliment to the excellent plans of Mr. England, who, having been appointed referee, rode the whole of the match before the other in a gig, having been supplied with excellent relays of horses for the purpose. . . . A stable was prepared close to the five-mile post, into which Tom Thumb was taken at the end of every twenty miles. Gruel was his only food, but he occasionally took a snap of hay, and never once showed a disinclination to food." The first 20 miles were covered in 1 hour 59 min., the second in 1 hour 59 min., the third in 1 hour 58 min., the fourth in 1 hour 42 min., and the fifth in 1 hour 52 min., while the stoppages occupied 37 min., a total of 10 hours 7 min. The same authority tells of a match between two American bred trotters which took place on the road between Chesterford and Newmarket over a distance of 34 miles, which the winner, Rattler, covered in 2 hours 18 min. 56 sec.—and died two days later!

The noted California matron, Cora Wickersham, by Junio 2:22, although twenty-two years old, produced a bay colt this year by Best Policy (son of Allerton 2:09¼ and Exine 2:18¼, by Expedition 2:15¾), which owner J. L. Bulloch, of Tulare, Cal., has nominated in all the eastern futurities. Cora Wickersham is the dam of Athasham 2:09¼, Donasham 2:09¾, Nogi 2:10½, Kinneysham, 3, 2:13½, and Matawan, 3, 2:17¼.

THE DRAFT HORSE SITUATION

(Special Correspondence)

A good many farmers have been a bit discouraged over inability to sell horses just when they want to. You know, men who are impatient think there should always be a good cash market for anything they have to sell, at the moment they want to sell it. These are the fellows who have sacrificed their wheat at a discount rather than to borrow money and wait a few months till railroads and elevators could handle their product. The world is full of such fellows, and just now some of them are knocking good horses. It is refreshing, therefore, to have such a statement as the following, which I recently received from Peter Wagner of West Butte, Mont., when he called at our office. Wagner is a practical ranchman who has made a comfortable fortune in the live stock game. His comments were substantially as follows:

"I believe good draft horses, especially good Percherons, are the best buy a farmer or ranchman can make right now. We are short on feed, and I have no more than I absolutely need to carry through the horses and cattle I now have; but if I had the feed available or could purchase it, I should buy 1000 head of the best young draft horses I could get.

"What wealth I have obtained has been by going contrary to the road most men follow. In 1893, when no one wanted horses, I went into Southern Iowa and bought seven carloads of good grade Percheron mares. I did not buy any that weighed less than 1600 pounds, and they were good, clean, well-shaped mares. I paid from $50 to $90 per head for them, and they cost me an average of $65 per head on the farms where I bought them. The same kind of mares are today bringing from $175 to $225 per head, yet farmers are now grumbling about low prices. They don't know what low prices are.

"I shipped these mares to Tyndall, S. D., and sold them at approximately $400 per pair. In nearly every case I had to take small horses in as part of the purchase price, but I go money enough to boot to pay the original cost of the big mares, leave me a good profit, and I had the plugs left over. I then shipped all these plugs up to the northwestern corner of the State, where the farmers lacked horses and money, and sold them on time. Practically every man paid up eventually, so that I cleared some money for my work.

"About the time that I distributed these seven carloads of mares around Tyndall, and took their inferior horses away, an Illinois horseman traded several good Percheron stallions to men in that locality. He took land for these stallions and sent some very good horses into the neighborhood.

"The resulting improvement in the horses of that vicinity was almost beyond belief. I was back there about fifteen years afterward, and in walking down the street one Saturday afternoon I remarked to Dr. Hamlin of Tyndall that I had never seen so many good, big, grade Percheron teams in any locality. He told me then that the improvement dated back to 1893, when I brought in seven carloads of good mares, and the good sires were brought in. He also said that horse buyers came to Tyndall from all parts of the United States, and that single geldings had been sold direct from the plow for prices as high as $425 per head.

"History repeats itself. Today foreign countries are almost stripped of horses suitable for farm work. All European countries will want horses as soon as ships are available to take them over. Good, big drafters are bringing from $800 to $1000 apiece in Great Britain and in France, $600 is the lowest price for even a common sized chunk. The American consul's report from Stockholm, Sweden, in August, states that the German military commission had recently bought 250 horses at 3400 crowns each, Swedish money, which means that they paid $1741.21 per head for them.

"The United States is the only nation with any surplus of big horses. I know Russia does not have them for I lived there for twenty-one years and know Russia as only a native of that country can.

"Some men fear the influence of the tractor on the horse market. As a practical farmer, with long years of experience in the West, I know they will not displace the horse. Don't fret about them. While my chief interests have been in cattle, I have sold $27,000 worth of horses off the range since 1911, have twice as many horses left as I ever had, and my horses have made me more clear profit, proportionately to numbers, than my cattle.

"My advice to my friends is to get rid of their inferior horses, and to put in all the good ones they can handle now. Don't sacrifice a single good drafter, and go in debt, if necessary, to put your teams on a first-class basis now while horses are relatively cheap.

"The time to buy is when the average man is discouraged and wants to sell. You can never go wrong on that plan."

I give you the comments of this practical, old Russian ranchman, who has achieved success in the West and whose son will soon be on the fighting line in France, as he gave them to me. Use them. If you can not use in full, take extracts from his comments. They will stiffen the courage of some faint hearts, and encourage others to rebuild their horse stocks while the opportunity is open.

WAYNE DINSMORE.

ANDY WELCH

By W. H. Gocher

Andy Welch was one of the most unique characters ever seen on the trotting turf. While he was Irish to the finger tips, he was born on the Island of Jersey in the English Channel and came to America with the balance of the family as a small boy. Hartford, Conn., was selected as the stopping place and like many a motherless lad, Andy grew up on the streets. While peddling papers and shining shoes in the vicinity of the old City Hotel and Gold street he also had ample opportunity to see more green cloth tables than school books.

His start in life was made in a gambling room when a jewelry salesman staked him to a stock that he soon disposed of at a profit. He also followed that business for a time but the fairy wand of chance caught his fancy although he soon abandoned the spinning wheel with the nimble marble for work in the open. This led him to the trotting tracks, Charter Oak Park being one of the first he ever saw, and as soon as he put up his board as a bookmaker it did not take him very long to extend his operations to the leading courses of the country.

While a betting man, Andy Welch was like the big Boston boy, John L. Sullivan, "always on the level." In the thirty odd years that he was connected with light harness racing as a layer of odds, horse owner or manager of race meetings, no one could ever point to a shady transaction that Andy Welch was connected with. He saw the cheaters come and go and while at times a few stung him for a big play on a fishy looking heat, he usually was clever enough to place it in the auctions before the tickets were cashed.

In 1887 during the Grand Circuit meeting at Utica, N. Y., Andy Welch made his first good investment in a trotter when he purchased Atlantic from R. W. Davis of West Williamsfield, Ohio. The sale was closed after the races and as the Ohio farmer refused to take a check, it kept Welch busy to find sufficient currency. When he did it was all in bills of small denominations. That however, did not make any difference with Davis and rolling them up in a newspaper he started for the race track with the bundle under his arm. The next morning Welch learned that he sat up all night in a box stall recountng the money by the light of a lantern.

Welch turned Atlantic over to James Goldsmith. He won six out of seven races with him that fall. Goldsmith also had the horse ready to start down the line of the Grand Circuit the next summer when Welch sent him to an Italian. The amount which he received for Atlantic together with what he won on him put Andy Welch in easy street. He then began buying and selling trotters as well as making book and while he owned several, one of them being the colt trotter Wild Rake which he sold to William Rockefeller, his next good winner and possibly his best one was the chestnut mare Star Lily. He picked her out of a Michigan trainer's stable in 1889 and within a month landed a ton of money with her when she won the $10,000 Flower City Stake at Rochester, N. Y.

W. B. Fasig, who was a splendid judge of trotters, always said that Andy Welch could watch a heat from a chair and after it was over know more about what was going on than half of the drivers in the race. He also gave Fasig a sample of this in 1896 when the latter was racing Rifle. Prior to the meeting at Cleveland Welch told Fasig that Rifle would win. Fasig said that he did not have a chance but Welch backed him just the same After Rifle won, defeating such good horses as Lily Young, Angelus, Franklin, Bryson and eight others, Fasig asked Andy what he knew and Welch replied: "You started him in the 2:17 class. Two weeks ago you started him in the 2:12 class at Saginaw, Mich., where he finished second to Bravado in 2:11½ over a slow track. I figured that none of the horses in the race at Cleveland could do that and to show I was right Rifle won the fifth heat in 2:11¾ and came back in 2:12¼."

Very few knew that Andy Welch gave Fasig his first boost in the sale business. He had been holding sales at Cleveland but was unable to get many outside consignments. Finally he booked one from California but at the last moment the consignor refused to ship unless he was guaranteed a certain amount. Fasig didn't know which way to turn until he thought of Andy Welch. He wired him and in a few hours he received a reply to draw on him for the amount required. The guarantee was never called for but it put Fasig on the up-grade in the sale business.

One day Andy Welch said that the first time he entered Charter Oak Park he crawled under the gate. In 1891 he was warned off the course for shouting at the judges while they were discussing a decision in the Charter Oak Purse that was won by Hamlin's Nightingale and in 1897 he owned it. Later on he purchased Oakley Park near Cincinnati, Ohio, and gave Grand Circuit meetings at that city and in Hartford. His first jolt came with the purchase of Readville Park in Boston. When those who agreed to go in with him stepped aside he shouldered the whole of it in order to make his word good and even then he would have come out all right if he had not renewed the $50,000 Handicap. This made him a borrower while for the first time in his life he was called upon to pay interest. Up to that time he did not know what it was.

So long as Andy Welch confined his operations to speculation, the balance remained in his favor but when his restless disposition and lightning-like change of ideas were applied to the management of a race track and its upkeep, the bills were rather large. All of them were paid, however, and if it had not been for the depression in real estate values on account of the war, the balance would still have been in his favor when his spirit went out with the tide at Winthrop, Mass., last year.

As he mingled with men on the race tracks or in the hotels, Andy Welch's subtle wit and sparkling repartee made him a conspicuous figure. He could always be found in an argument and while Andy was sure to differ with you on any subject from the weather to the next presidential election, no one ever heard him try to strengthen his argument by offering to make a bet. That was confined to the race track where if he happened to get a jolt, he would open the back of his watch, take a peep at a bunch of shamrocks which he picked from a bank near Blarney Castle in Ireland, and chalk up the odds for the next heat.

ONE ADVANTAGE OF THE THREE-HEAT SYSTEM

If the three-heat system of racing never did anything else to command itself to the favor of owners and trainers, the fact that it compels a wider and more equitable distribution of the money would be enough to win a place for it in popular regard. The conditions under which, not so very long ago, a few stables were able to carry off by far the larger share of the winnings every year, leaving nothing but the husks for the majority, were not conducive to a very deep or sustained interest in the sport, but happily they have been changed by the introduction of the three-heat system. It will be recalled that in times past it was an ordinary thing for a horse to win $25,000 or $30,000 in one season, and the record has gone above $50,000, but the past season the largest amount won by a trotter was $15,535, and by a pacer a little more than $13,000. For the first time in more than a decade the sum won by the leading winner is this year less than $20,000, while far more horses than ever before had shared in the distribution of the purses. It is proper that this should be so for, as a matter of general policy, it is better to have the many satisfied than the few enriched.—Trotter and Pacer.

"HORSEMEN'S PROTECTIVE ASSOCIATION"

The following letter has been received from Magnus Flaws, the popular presiding judge who officiated at the Panama-Pacific International Exposition's big race meeting in San Francisco in 1915. Copies have been sent out to horsemen and others interested, inviting them to attend the meeting in Chicago on December 18th:

Chicago, November 1, 1918.

If you want to race horses for profit instead of for fun only, there is just one remedy, and that is for owners and drivers to "get together" and demand it.

"The Fourteen Points"

1. No more racing for the horsemen's money.
2. No more entrance money unless it is added to the purse.
3. No deduction from money winners.
4. No more declaring off when there is one horse ready to start.
5. No more penalizing of a good horse by "splitting" the purse.
6. No more 5 per cent to enter and 5 per cent from money winners.
7. No more entertaining the public without fair compensation.
8. No more "robbery" by draymen.
9. No more "robbery" by feedmen.
10. No more "robbery" and inconveniences by railroads.
11. No more leaky and unsafe stalls.
12. No more penalizing by parent trotting associations without representation.
13. No more drunken grooms and drivers.
14. No more unorganized sport.

If you want to enforce these demands and others equally important let's form an organization strong enough to do it, as have the thoroughbred horsemen.

The popularity of harness racing is such that it should be and is paid for at the gate and we simply want to help associations make it the best American sport, with the horsemen being commensurately recompensed.

A meeting for preliminary organization will be held at the Stock Yard Inn, Wednesday, December 18th, at 10:00 o'clock a. m., the week of the Chicago sale and we want you there, or let us know that you will support the proposition.

This invitation is sent at the request of hundreds of drivers and owners I met at twelve different meetings in six different States this summer.

Very truly yours,

MAGNUS FLAWS.

Easton 2:06½, champion three-year-old trotting gelding is by The Tramp, son of Jaybird out of Ruth B by the Bondsman. He distinguished himself by winning against aged horses twice in one week on the Grand Circuit meeting at Atlanta, Ga., and has demonstrated himself to be a sturdy and consistent performer by racing and winning through the entire four months circuit.

ANGEL VISITS

(By W. H. Gocher)

It is like an angel's visit when a cheap one makes good on the turf, still there has been a number of them among the trotters and pacers, although as a rule they cost considerable before they are ready to take the word. But even as Campbell remarked, these visits are "few and far between", they are always welcome, as was evidenced by the waves of applause which swept through the grand stand at North Randall during the recent Grand Circuit meeting, when Prince Loree won the Tavern Stake with four horses valued at over $25,000 struggling behind him. Prince Loree was bred to be a race horse, as his sire, Prince McKinney, is a son of McKinney, out of that splendid Baron Wilkes mare Esctacy, that had a trotting record of 2:11½ and a pacing record of 2:10½, while his dam Deloree 2:09¼, was by the good race horse Delmarch, out of Hindee, a daughter of the champion stallion Allerton and Eloree 2:08¼, by Axtell, another champion that sold for $105,000.

Prince Loree was selected for a stake colt, but after failing to make good was, together with Lee Axworthy, traded for the trotter Sir Thomas Lipton. While Andrews was preparing Lee Axworthy for a career during which he defeated Peter Scott and Peter Volo, and reduced the stallion record to 1:58¼, Prince Loree fell by the wayside and finally met with an accident which resulted in him being sold at auction for $50. A. C. Pennock bought him and by careful nursing put him on his feet again. He was then sold to Captain Shaw, who drove him in 2:07¼ to wagon last year, and now Prince Loree is tabbed as a Grand Circuit winner with a record of 2:06¼.

The sudden change in Prince Loree's value recalls the greatest find in light harness racing, the celebrated plough horse, Captain Lewis. He flashed across the turf sky in 1882, winning ten races out of ten starts, the first one being made within thirty days after he was pulling a plough on his breeder's farm, and four of them at Grand Circuit meetings. In the spring of that year Colonel Parsons of Rochester, N. Y., was buying barley at Geneva, N. Y. A farmer drove up with a load and after selling it told the Colonel that the nigh horse "could go some". The Colonel took a little drive behind him but decided not to buy the country trotter at $175. A few weeks later A. H. Tower of Lyons, N. Y., gave $300 for him to use in his livery stable. After driving him a few times he found that he had a fast trotter. He started him in two races at a local meeting and won both of them. After this showing Captain Lewis was sent to Rochester and Horace Brown employed to drive him. Brown started him at Olean, N. Y., where he showed so well that Colonel Parsons, who refused to buy him for $175, purchased him in partnership with Bert Sheldon for $5,250, and started him on his trip down the line, his first race in Grand Circuit company being at Buffalo, while the other starts were at Utica, Hartford and Springfield.

Of all the cheap horses that made good on the turf, the pacer Little Brown Jug is entitled to the pennant, as he not only proved a good race horse but also attracted attention to the Hal family, which in addition to contributing a shoal of winners from Tennessee, also gave to the world Star Pointer, the first horse to pace a mile below two minutes. Geers, when relating his experiences with the trotters and pacers, tells how O. N. Fry of Morestown, Tenn., induced the owner of the John Netherland mare Lizzie (name unknown and possibly colored like the breeder of the great race mare Sweet Marie 2:02), to mate her with Tom Hal by offering to give him $50 for the foal when a year old, which was the amount he claimed that he could get for a mule. Fry lived up to his agreement, although he hesitated when he saw the colt, and after keeping him a year sold to a colored man for $75 to do farm work. Finally Fry had to take him back in exchange for a $60 account. This was in 1878, and the following season Little Brown Jug was racing and in 1881 he reduced the world's record to 2:11¾. Brown Hal, the sire of Star Pointer, was his brother.

While Robert J. was favored with better surroundings than Little Brown Jug, his breeder gave him away after shipping him back from a Cleveland sale where he was unable to find anyone who would make a bid on the little knee sprung gelding. The name of the new owner was Champ Brown of Williamsport, Pa., and he named the colt Robert J., after his breeder, Robert J. Walker, and while he bred many other horses this was the only one to find a place in the turf hall of fame. After a little training Brown started off to the races with Robert J. During the meeting at Fleetwood Park in New York City, Geers saw him perform and persuaded C. J. Hamlin to buy him. He made the name of Robert J. a household word, while thousands of people all over the United States had the pleasure of seeing him perform in as splendid a series of races as were ever placed to the credit of any horse and during which he cut the world's record from 2:04 to 2:01½.

The above are only a few of the noted light harness performers that were sold for a trifle before they were developed. Flora Temple, Goldsmith Maid, Majolica, Jay-Eye-See, Maud S., Lucy and scores of others could be added to this list that had practically no market value until the skill of the trainer put the "guinea stamp" on their rating as racing prospects.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Sportsmen's Row

A marlin swordfish weighing 148 pounds was taken after thirty-two minutes angling by James W. Jump of Los Angeles. The fish leaped clear out of the water thirty-two times.

It is said that there are more dogs to the square mile in Scotland than in any other country in the world. In some families each member has his own particular pet. Yet Scotland is a sheep growing country, and where would you ever find a shepherd without a dog to help him herd, to drive off interlopers and for companionship. Some legislators in this country, though, are forever demanding the scalp of the dog on the ground that he is ruinous to the sheep industry.

A. K. Fisher, of the United States Biological Survey, states that the decrease in game in this country between 1885 and 1910 was more than 80 per cent.

John Dean Henry, the Elkhart (Ind.) barber who won the Grand American Trapshooting Handicap and became famous over night, is through calling "next." He has sold his business.

What is good for the country is good for the man. Try trapshooting.

There was a boy of 9 years, a girl of 17 and a man of 79 in the Grand American Trapshooting Handicap. Truly it is the sport for all ages.

Trapshooting one of these days will be a big feature at county fairs, and one of these days, too, the fair grounds in the majority of places will be the home of the gun club.

The Executive Committee appointed to operate the affairs of the Interstate Trapshooting Association for the ensuing year is constituted as follows: J. Leonard Clark chairman, New York, N. Y.; E. R. Galvin, Wilmington, Del.; F. G. Drew, New Haven, Conn.; F. E. D. Keplinger, Cincinnati, O.; Elmer E. Shaner, Pittsburgh, Pa.

The open season for quail and rabbits began Friday, November 15th, and lasts until January 31st, 1919. From all reports the quail shooting should be exceptionally good throughout the state, as the conditions were favorable for nesting and big broods resulted. The limit on quail is 15 a day or 30 a week, and limit on cotton tail and brush wood rabbits is 15 a day. The limit on mountain quail is 10 a day and 20 a week.

O. N. Ford has traveled over 15,000 miles and shot in 17 states and parts of Canada this year, making a record that is likely to stand for quite a while. He shot at 9470 targets in registered competitions and 2700 in unregistered meets, making the highest record of any amateur at the number of targets shot at in the world. He broke 12,170 targets during the year, making an average of 96.35, and scored 75 runs of from 50 to 201 targets straight. Frank Troeh of Vancouver, Wash., won the championship of this year, shooting at less than one-half the number of targets that Ford shot at and it may be considered that Ford's performance was the greater exhibition of skill and endurance.

The Remington UMC Company has within the present year turned out over one billion Springfield .30 calibre cartridges. This has been done at its Bridgeport ammunition plant. No such productions of such small arms ammunitions has been previously recorded. In addition to the Springfield .30 calibre cartridges the company has turned out .30 calibre Krag cartridges, .45 calibre automatic pistol cartridges and .38 calibre revolver cartridges, besides vast quantities of other kinds of cartridges for machine guns, automatic rifles and a tremendous amount of commercial ammunitions.

H. Lorensen of Newman, Cal., one of the brightest stars in the trapshooting firmament, enlisted and passed his examination for the air service at the front. He began to be prominent as a trapshooter along in 1914, and ever since has rapidly forged to the front until he is now in the foremost rank. In 1915 he tied with O. N. Ford in a state championship event at the California-Nevada state tournament held on the grounds of the Golden Gate Gun Club, both contestants shattering 95 out of 100 birds, but Foster Couts of San Diego carried off the championship by breaking 96 birds, just one more than Lorensen or Ford. In 1917 Lorensen was at the top in first or second place in every tournament in which he participated, closing a successful season with .9606 per cent on .2400 target. Last May at the Vernon shoot he made the marvelous run of 345 straight.

PINTAIL DUCKS IN HAILSTORM

On October 20, 1918, I was hunting ducks on the Rio Grande, south of Las Lunas, N. M.. I was sitting in my blind on a sandbar with some dead ducks set out as decoys, when a very severe hailstorm set in. During the thick of the storm I discovered that a flock of about forty pintail ducks had settled in my decoys not twenty yards distant. Each bird was facing toward the storm, and each had his head and bill pointed almost vertically into the air. The flock presented a very strange appearance, and I was puzzled for a moment as to the meaning of their strange posture. Then it dawned on me what they were doing. In a normal position the hailstones would have hurt their sensitive bills but pointed up vertically the bill presented a negligible surface from which the hailstones would naturally be deflected. The correctness of this explanation was later proven by the fact that a normal position was resumed as soon as the hail changed into a slow rain.

Has any other observer ever noted a similar performance in this or other species of ducks or in other birds?

ALDO LEOPOLD,
Albuquerque (N. M.) Game Protective Ass'n.

MISSISSIPPI CHANNEL CAT

The fighting channel catfish of the Mississippi River. Holden in his book on "Big Game Fish of the United States" ignores the channel cat as a game fish. The male is a real caretaker and defender of their young, guarding their nests and eggs, which are usually covered with a layer of stones. Unlike the bass and pickerel, the catfish are non-cannibalistic, protecting instead of lunching upon their offspring. The Silurida family of catfish are really a table delicacy. They were named after the night prowling felines on account of their long barbels or feelers about their mouths, resembling the whiskers of a cat. Heads are large with a wide mouth, eyes are very small, they are covered with a smooth scaleless, slippery skin. The Mississippi River produces specimens four to six feet in length weighing 50 to 125 pounds. Usually caught in bait nets by fishermen, and they command top price on the fish market as food. The small channel or silver catfish, known to fishermen as "fiddlers" or "musicians" must not be confused with "horned pouts" or "bull heads." Egypt has a catfish which swims in reverse position, the belly upward; when alarmed they immediately revert to their normal position to escape more rapidly.

Immediately above the little city of Keithsburg, Ill., a railroad bridge had been constructed across the Mississippi River. Wing dams had been run out from both main shores, forcing the water through a limited channel under the draw span, creating a rapid current below the bridge, a deep channel which was a mecca for catfish of all sizes. Handlining was a favorite fishing pastime at this point. With my friend O. H. Lloyd, we had fine success landing "fiddlers," our combination bait of liver and chicken intestines was seductive. Our heavy line was finally assailed, a quiet jerk, a steady pull and we set the hook. The fight was on. This silvered beauty showed his towing strength; our anchor up, he rushed us down stream; a sudden turn, we held the taut line. He sulked and sounded. A stiff pull on the line again started acrobatic performances. The game fishing qualities demonstrated by this fish leads me to insist upon their being classed game. Worn to a frazzle, we brought him to the side of our boat and cuddled a gaff hook into his floating ribs. Our efforts netted us 52 pounds of excellent fighting fish meat.—Tom Marshall.

TRUFFLE HUNTING DOGS

In the little village of Winterslow, near Salisbury, England, a truffle hunting business has been handed down from father to son for the last two hundred years. The dogs used are of Spanish descent, apparently having a strain of poodle in them. Owing to inbreeding the race is now nearly extinct. Truffles are in season during October, November, December and January; curiously enough, during the same time as game, for the seasoning of which these underground fungi are greatly sought. They will grow only in certain spots which are invariably near to beech trees, it being thought that the loam made by the falling leaves specially suits them. As soon as the truffle becomes ripe it gives off a scent, which especially trained dogs immediately detect, and when located they at once start to dig up the fungus. Once a dog starts to dig, it may be taken for granted that it is found; the dog never makes a mistake. After finding, the dog is given a small piece of bread as a reward, and it invariably looks for this. Truffles, like mushrooms, need warm summer and rain in order to insure a good season.—American Field.

CALIFORNIA GAME LAWS

Open Seasons:

Male deer (except spike bucks), in districts 1, 23, 24, 25, and 26.....Aug. 15-Oct. 14
In districts 2 and 3.....Aug. 1-Sept. 14
In district 4 .....Sept. 1-Sept. 30
Bear (black, brown).....Nov. 1-Mar. 1
Cottontail and bush rabbits, mountain, valley, desert quail (see exception)..Nov. 15-Jan. 31
Exception: Mountain quail, districts 1, 23, 24, 25, and 26.....Sept. 1-Nov. 30
Tree squirrel .....Sept. 1-Dec. 31
Grouse .....Sept. 15-Oct. 14
Sage hen (except in district 4 no open season) .....Aug. 15-Sept. 30
Dove (except in district 1, Sept. 1-Oct. 31) .....Sept. 1-Nov. 30
Duck, goose, brant, Wilson snipe or jacksnipe, coot, gallinule.....Oct. 16-Jan. 31

No open season: Doe, spike buck, fawn, elk, antelope, sheep, pheasant, introduced quail or partridge, turkey, rail, plover, yellowlegs.

Hunting licenses:[2] Non-resident, $10; alien, $25; resident, $1; veterans of Civil War, free of charge. Issued by commissioners and county clerks. Unlawful to hunt in inclosure of another without permission of owner.

Bag limits and possession: Two deer, 12 tree squirrels a season; 15 cottontail or bush rabbits a day or 30 a week; 4 grouse a day or 8 a week; 4 sage hens a day or 8 a week; 10 mountain quail a day or 20 a week; 15 valley or desert quail a day or 30 a week; 15 Wilson snipe or jacksnipe a day or 30 a week; 15 mourning doves a day; 25 ducks and 8 geese a day or 50 a week combined; 8 honkers or black sea brant a day or 24 a week.

Possession in excess of weekly limit prohibited. Persons killing deer must retain in possession during open season and 10 days thereafter the skin and the portion of head bearing horns.

Sale: Sale of deer meat and hides and all game birds prohibited.

Hides of deer lawfully killed when duly tagged under affidavit (fee 25 cents) may be sold August 1-December 31. Cottontail and bush rabbits may be sold. Domesticated reindeer may be imported and sold under regulations of fish and game commission.

Districts: Of the 53 fish and game districts created under the act of 1917, four (1, 2, 3, 4) are properly hunting districts; 23, 24, 25, and 26 are fishing districts, but are open to hunting; the other 45 are fishing districts or fish and game refuges.

District 1 comprises the northern part of the State, the Sierras, and the east half of the Sacramento and San Joaquin Valleys, including all counties not included in districts 2, 3, and 4.

District 2 comprises that part of the state south of Humboldt and Tehama counties west of the Sacramento river and north of San Francisco, including the counties of Mendocino, Glenn, Colusa, Yolo, Solano, Napa, Lake and Marin.

District 3 counties the region around the southern portion of San Francisco Bay and the coast counties south of the Golden Gate as far as Ventura, including the counties of Contra Costa, Alameda, Santa Clara, San Francisco, Santa Cruz, Monterey, San Luis Obispo, Santa Barbara, Ventura; also San Benito and the west half of San Joaquin, Stanislaus, Merced, Fresno, and Kern counties.

District 4 comprises the counties in southern California, namely, Los Angeles, Orange, Riverside, San Diego, Imperial, San Bernardino, and also Inyo and Mono.

Districts 23, 24, 25, and 26, all located in District No. 1, are as follows:

District 23 comprises the drainage area of Lake Tahoe and the Truckee River in the counties of Placer and Eldorado.

District 24 comprises the drainage area of Silver, Twin, Blue, Meadow, and Wood Lakes in the counties of Alpine and Amador.

District 25 comprises the drainage area of Lake Almanor in the counties of Plumas and Lassen.

District 26 comprises Sixty Lake Basin, part of Rae Lake, and to the south fork of Woods Creek, in Fresno county.

[2]California: Fishing licenses required of persons 18 years of age and over: Non-resident or alien, $3; resident, $1.

Export: Export of all protected game prohibited, except for scientific or propagating purposes. All shipment by parcel post prohibited.

BOY SCOUTS' RIFLE CLUBS

The Hartford (Conn.) Boy Scouts' Rifle Club was organized October 5 at the Hartford Gun Club. Alderman C. C. Hawkins was elected president of the rifle club; H. F. Buck, secretary; L. Pratt, treasurer and Ralph Hill, captain. The club will be coached by expert riflemen of the Hartford Gun Club.

The War Department at Washington has taken an active interest in promotinig rifle clubs among the Boy Scouts in the United States and a series of matches between clubs in all of the large cities will be arranged. The clubs will conduct shooting matches in their own club rooms and will wire the results to the War Department, after which medals will be awarded to the clubs having the highest average. The Government will supply the scouts with rifles, targets and ammunition.

GAME FARMING FOR RETURNED SOLDIERS

At the recent annual meeting of the International Association of Fish and Game Commissioners, held in New York City, a resolution was adopted calling on the Federal Government to acquire by purchase, when necessary, suitable tracts of land in every State, to be devoted to game farming by returned injured soldiers and sailors, "to the end that wild land in the future may be made to yield its maximum food supply and advantages of recreation and health to the nation."

The resolution was based on a suggestion made by Mr. Theodore Roualt, game commissioner of New Mexico. It has been brought to the attention of Mr. Franklin K. Lane, Secretary of the Interior, by President Burnham of this association, as the former has already announced a comprehensive scheme for locating returned soldiers on public lands and otherwise, which he hopes to have adopted by Congress. In his letter to the secretary, Mr. Burnham says in part:

"The game propagation movement has already attained a position of importance in this country. Certain kinds of game animals, such as the Virginia deer and elk and certain kinds of game birds, such as the ringneck pheasant and mallard duck, can be raised in captivity with perfect success, both physically and financially. Many of the States have passed laws which are favorable to the industry. The National Government has recognized it in the Canadian treaty enabling act, which permits the taking and propagation of migratory game birds under suitable regulations. A very considerable percentage of our boys at the front are sportsmen (it is estimated that at the start of the war there were 5,000,000 game shooters in this country) and many such men would have a natural inclination for game propagation. Such a business would help maintain sport and would augment the food supply of the country."

Game farming does not involve too heavy exercise for men slightly incapacitated and, in normal times, it contains the possibilities of a comfortable living for an intelligent, energetic man.

It is somewhat unfortunate that the term "wild lands" was used in the resolution, for such areas are wholly unfit for rearing most species of game in captivity. On the contrary, what is required is highly arable lands suited to general cropping. This does not invalidate Mr. Roualt's proposal, however, as it is understood to be Secretary Lane's intention to put soldiers on lands that are fully prepared and equipped for cultivation.

Mr. Burnham has requested an interview with the secretary, in order to explain the project fully, and it is probable that a conference will be held in Washington within a short time. The secretary has already evidenced a lively interest in the suggestion.

TROEH AND CLARK LEAD IN AVERAGES

Frank M. Troeh, of Vancouver, Wash., the fellow who shoots at the clay targets with a $15 gun that has been used for 20 years, is now on top in the race for high average amateur among the trapshooters. Troeh has averaged .9711 on more than 6000 targets.

Troeh this season has won the doubles championship of the United States and Canada, the singles trapshooting championship of Washington and the International trapshooting championship. Present indications are that he will be high average amateur. Troeh's performances this year have been remarkable. Troeh is the only amateur above 97 per cent.

Homer Clark leads the professionals with .9752. Clark is the professional champion. Rush Razee, the great Nebraska shot, has an even 97 per cent. O. N. Ford has shot at more targets than any other shooter—8870.

HUNTING BIG GAME IN AFRICA

Shooting big game by the ton is the privilege of the sportsman who goes to Africa for his hunting.

W. A. Mougey, of Cleveland, Ohio, who returned some time ago from a big game hunt in the African wilds, surely obtained his fair share of sport. In the N'Gobi Country, West Africa, five degrees south of the equator, where the mercury hits the 114 mark, Mr. Mougey shot an elephant with his .35-caliber high power side action sporting rifle. This animal charged the party. The first shot brought him down, but two more bullets in the same place were necessary to finish him up. The elephant weighed over four tons and was about a year and seven months old. Mr. Mougey brought the skull back with him and ultimately sent it to one of the Cleveland museums.

Hunting in Africa is not the comparatively easy sport known to those who live in the temporate zones. Intense heat with great humidity, tropical diseases, insects, pests, limited food and water supply, wild beasts and often savage men tend to make the hunter's life a precious one. In spite of the many hardships and dangers of African sport, a large number of men prior to the European war, were accustomed to seek recreation among the African wilds each year. Many sections of Africa have been brought under civilizing influences within the past few years, and especially under British and French rule conditions for hunting have been made much more livable and agreeable, due to admirable methods of colonial administration.

THE FLIGHT OF GAME BIRDS

While there is considerable variation in the speed of flight of game birds, the table below may be taken as the most accurate approximation of the comparative speed at which the better known wild birds fly.

The crow may be taken as an example of the slower flying bird, with a rate of 35 to 55 feet a second, and with an average speed of 45 miles an hour, while many species of hawks attain a remarkable fast speed of 200 feet a second.

Here is the table showing the average speed in flight.

Bird	Feet per second	Average
Quail	65 to 85	75
Ruffled Grouse	60 to 90	75
Snipe	50 to 70	65
Wood Duck	70 to 90	80
Canada Geese	100 to 120	110
Red Head	110 to 130	120
Canvasback	130 to 160	145
Mallard	55 to 90	75
Teal	120 to 140	130

It may be said that if ducks are scared they can reach maximum speed at will, and this sprinting flight is usually what the gunner has to make allowance for.

On the other hand many wild fowl are jumped and killed while hovering over decoys and moving slowly, and birds like snipe and quail are often killed before they have attained full speed.

Upland birds are not often shot while passing the gun at right angles, but going straight away, quartering or twisting.

WAR TO DEATH AGAINST CROWS

In connection with a campaign in the interests of food conservation and the protection of insectivorous and game birds, the largest of all American powder companies plans to conduct during 1919 a national crow shooting contest. Appropriate state and national prizes will be offered for those who kill the largest number of these destructive birds.

The crow is one of the greatest destroyers of bird life on this continent. It is an arch enemy of game birds and crops. The Pennsylvania Game Commission believes that each crow destroys more wild life annually than any fox, weasel, wildcat, mink or human hunter.

During the first several weeks of their existence, the young of game birds and of perching birds are fed on animal food, chiefly in the form of insects, and each will consume daily an amount equal to its own weight.

A young crow while in the nest will consume an amount of food equal to three or four times its own weight and only a small part of this food consists of insects. Most of it is made up of the eggs or the young of other birds which, if left alive would be of benefit in the protection of crops.

In addition to the harm done in destroying useful birds, crows spread contagion and infectious diseases, such as foot and mouth disease.

Crow shooting is a fascinating as well as a useful sport. What can be accomplished when the sport is properly organized is illustrated by the activities of the "Crow Shooters and Would-be Crow Shooters" of Canton, South Dakota. Each year they hold a crow hunt. In the last two hunts a total of 158 shooters took part and a total of 516 crows were killed.

SHOOTERS MAKE FORTUNES IN OIL

Professional trapshooters who tour Kansas and adjoining States had been bothered by the promoters of oil wells for days and days, until, finally, the Trapshooters' Oil Company was formed in El Dorado, Kan., with a capitalization of $100,000. On August 11, 1916, a lease of 80 acres was secured in the Towanda oil fields. So far so good.

The original investors put up about $100 each. One or two put up an extra $100. All of the investors were trapshooters, amateur or professional—hence the name of the company. The fellows who put up $200 each are said to have cleaned up in the neighborhood of a million dollars each.

The trapshooters "just took a chance" when they went into the oil business. The idea of becoming wealthy was furthest from their thoughts. You can vividly imagine their surprise when announcement was made after the first well was tapped that thousands of barrels had been lost before the flow could be checked. This well has netted 750 barrels a day. Six months after it was tapped a half interest was sold to the Eureka Oil and Gas Company for $150,000.

The Trapshooters' Oil Company now has nine wells in operation in Kansas and is acquiring other properties. It recently purchased 800 acres six miles south of Beaumont in Elk county. This is 16 miles south of the famous Sallyards pool.

Edward W. Arnold, the amateur trapshooting champion of Kansas, is the president of the company; Ed. O'Brien, the professional trapshooting champion of Kansas, is the vice-president. Other trapshots connected are Del Gross, Harry O'Brien, C. T. Rankin, Fred Clarke, former manager of the Pittsburgh Baseball Club; O. A. Johnson and S. H. Harris.

FIELD AND TRAP AIMING

To the man who has shot only in the field the trap game may hold astonishing facts. Nine times out of ten his beloved old field gun will not perform as expected. This is not the gun's fault, but one of the angles of the new game. Trap shooting demands a gun that will shoot a trifle high, for the birds are always rising when at the proper shooting distance. While the "clays" look as big as barrels to the spectators, they diminish rapidly when sighted over the end of a gun barrel. After a few sessions the scores of 97 and 98 birds which the regulars hang up will appear in their true value.

The reason the man who drops the most birds does not win lies in the method of scoring points. The Cleveland Gun Club stages two weekly events of twenty-five birds and one quarterly event of fifty birds. In order that the best man shall not win with regularity and thus make everyone lose interest, they handicap everyone. Each man makes his own handicap and can figure it out for himself by one of the best systems ever devised. One advantage of this system is that it varies from week to week, depending upon what kind of work a man is doing. The average of the last four events a man has shot in, is the average a man must make to get one "point." If he breaks an average of twenty birds in his last four shoots and then breaks twenty birds in the next shoot, he gets one point. If he should break twenty-two birds he gets three points for he gets an extra point for every extra bird he breaks above his average. Thus if a man is shooting away off form his handicap automatically lowers itself to suit his gait, and the dub who usually gets about fifteen birds and suddenly comes to life with twenty or so, also has his reward. To reward extra good work, a "straight"—that is to break every bird in the event—takes precedence over the handicap system, and the man who runs his twenty-five birds without a miss, wins.—Cleveland Plain Dealer.

THE LEAPING TIGER OF THE SEA

By Tom Marshall

An erroneous idea is extant among the fishermen of the Pacific coast and the island waters that tuna are indigenous to the Pacific ocean, specializing in the Catalina Island territory.

Leaping tuna are found in the Atlantic ocean from the mouth of the St. Lawrence river to Cape Cod, feeding upon blue fish, men haden or herring, the flying fish or squid of the Pacific are much preferred. The crescent-shaped tail of the tuna is dried and tacked above the doors of longshore fish houses from Cape Breton to Swampscott as a talisman of good luck, supplanting the old-time horseshoe.

The Atlantic tuna, or horse mackerel, run much larger than those of the Pacific ocean and travel usually in large schools, the weight running from 80 to 150 pounds, averaging about eight feet in length. They are of record as weighing 1,500 pounds with a length of 15 feet. Tuna were formerly harpooned for their oil, but have of recent years become a canned table delicacy.

R. S. Moloney, of San Francisco, Cal., the fishing expert of the Pacific coast, has just returned from an invasion of the Atlantic waters, near the Block Island fishing grounds located off the shores of Rhode Island. He reports the tuna of the Atlantic much larger than those of his home waters. He marvels at the lack of interest evinced by the deep sea anglers of those eastern waters in the capture of the tuna. The absence of desirable tackle or trained boatmen who would cater to the requirements of visiting fishermen, no rods equipped with lines and reels were available except through individual ownership. The market fishermen along the coast are making unusual money catching fish for the market, the price being exceptionally good and the demand unlimited, hence it would be a losing proposition to cater to the requirements of visiting sportsmen. A move is on in fishing circles of the Atlantic coast to organize a Tuna Club, a la Catalina. The requirements for active membership is the landing of a tuna weighing not less than 100 pounds. When this club is established interest in the sport of tuna fishing will develop and the game will become immensly popular. The landing of this acrobat of the sea is no child's play.

FOOD OF RAINBOW TROUT

The rainbow trout feeds on minnows and the insects he can forage from the surface of the water. To him a grasshopper is a dainty morsel, and many of the big ones have been tricked into the creel by the wise angler who hooks on a lively hopper and casts it the same as a fly, letting it float with the current in a natural manner and not trying to liven it up with a bunch of artificial jerks to fool the wise fellows. He carries far more speed in his fight than the brown trout, making a faster fight in every way; in fact, his battle on the fly resembles the battle of the native brook trout. About the first thing he does when hooked is to leap into the air and his leap is a thing of beauty, way up out of the water generally; at this point in the scrap many depart to other waters, having passed up the fly on the way.

TUNA CLUB'S CATCHES

From June 21 to September 30, 372 tuna were reported among the catches of members of the Tuna Club of Alavon. W. C. Boschen, of New York, was responsible for 102, the remainder being divided among thirteen other members. Ninety marlin sword fish were accounted for by the fourteen anglers, the highest number falling to H. W. Adams, of Vermejo Park, N. M., who caught 23.

The catches reported included the world's record tuna on light tackle, 314 pounds, time 28 minutes, caught by James W. Jump, of Los Angeles. The marlin weight record for the season, 328 pounds, fell to R. C. Grey, of New York, and the largest tuna of the season, 149¼ pounds, was landed by Ralph Bandini, of Los Angeles. Six of the marlins caught by R. C. Grey were released and swam away apparently uninjured.

The catches are shown, as follows:

W. C. Boschen, New York—Tuna, 102; marlin, 7; boatman, G. C. Farnsworth.

James W. Jump, Los Angeles—Tuna, 86; marlin, 11; boatman, K. S. Walker.

A. W. Hooper, Boston—Tuna, 65; marlin, 16; boatman, Tad Grey.

L. G. Murphy, Converse, Ind.—Tuna, 20; marlin, 10; boatman, Tad Grey.

Zane Grey, New York—Tuna, 21; marlin, 2; boatman, O. I. Danielson.

R. C. Grey, New York—Marlin, 8; boatman, O. I. Danielson.

C. L. Griffith, San Francisco—Tuna, 18; marlin, 9; boatman, Hugh McKay.

N. A. Howard, San Francisco—Tuna, 14; boatman, H. Stroughton.

Ralph Bandini, Los Angeles—Tuna, 12; boatman, Enos Vera.

R. B. Jump, Los Angeles—Tuna, 9; marlin, 1; boatman, R. B. Jump.

William Farnum, New York—Tuna, 8; boatman, I. L. Newberry.

H. Earlscliffe, Santa Barbara—Tuna, 5; boatman, C. Wickman.

F. H. Reed, Oklahoma—Tuna, 5; marlin, 3; boatman, C. Wickman.

H. W. Adams, Vermejo Park, N. Mex.—Tuna, 7; marlin, 23; boatman, H. Stroughton.

TROUT FISHING IN FRANCE

Fred Brinckman, one of the most expert fly and artificial bait casters among the membership of the Philadelphia County Fish, Game and Forestry Association, is now "over there." One would naturally suppose that once in France there would be little opportunity for anyone connected with the United States army to do anything excepting chase and kill Germans but Mr. Brinckman has demonstrated otherwise; also that his ruling passion for angling still crops out even in the midst of war. He is attached to the commissary and for many months was located in a region of woods, hills, valleys and trout streams. It did not take him long to learn that the streams were full of trout. In some manner Mr. Brinckman secured some small fish hooks. He found feathers and begged some colored silk from a farmer's wife, and made himself some artificial flies. He borrowed a fishing line from a farmer, cut a flexible sapling from the woods, and on the first leisure day, went fishing, and with the sound of big guns discharged and the explosion of big shells, he made a good catch of trout. To demonstrate his prowess Mr. Brinckman sent the club the heads of two large trout that he had caught, ad these have been mounted and are now on exhibition in a sporting goods store near Fifth and Cambria streets.

While Mr. Brinckman had good success in fishing for trout in the streams of France with his home-made tackle, he is not satisfied, and has sent home for his pet rods, lines and flies. These have been packed and sent to the soldier sportsman.

HUNTERS' GOODS GOING UP

Hunters would do well to stock up with shooting goods right away, if they would save money on their hunting bills this fall, for sporting goods dealers are expecting a notice in any mail now announcing a Government tax of 10 per cent on shotguns, rifles and ammunition and 25 per cent on revolvers. Shotgun shells are plentiful just now and the manufacturers are not apt to make any increase until such time as a shortage comes, as the sales are small enough without such an added handicap. A box of 25 smokeless 12-gauge shells sells today for $1.25. With the government 10 per cent tax on them the cost will be $1.38.

SOME TARPON FISHING

Senator Smith of Georgia, said at an Atlanta luncheon: "German militarism set out to overrun the world. Before the disasters that have befallen it, however, German militarism must now be feeling a good deal like Cal Clay. Calhoun Clay, of Paint Rock, was fishing for tarpon in Florida, and he hooked such a big one that it pulled him overboard. As Cal went over the side of the boat and tore through the water in the tarpon's wake, he said: 'Wot Ah wants ter know is dis—is dis niggah a-fishin' or is dis fish a-niggerin'?'"

CAIRNS COMING

The exigencies of war are having their effect on the dog world and particularly on the dogs of England, with the result that many of their best show dogs are finding homes in America.

Because of the ban on shows and breeding in England, Col. Young and Mr. C. Viccars, of the Chilton and Mercia Kennels, West Highland and Cairn terriers respectively, have made an arrangement with Mrs. Henry F. Price (one of if not the first to show a Cairn in this country) and will export to her some of their best dogs.

Ian of Mercia, conceded to be one of the most typical Cairns in England, is due to arrive in the near future. Just beginning his career at the time dog shows were forbidden he is the winner of twenty prizes at six shows and two reserve championships. Ian of Mercia will be shown as soon as advisable after his arrival.

WORLD'S FISHING RECORD

Another world's record in big game fishing was shattered in the Catalina waters, when James W. Jump recently landed a 314-pound marlin swordfish in 28 minutes, with light tackle. Not only is this unprecedented with light tackle, but the fish was near the Tuna Club record for a swordfish on any tackle. The biggest one ever caught was in 1916, which weighed 362 pounds.

Not in many years have the deep-sea fighters been so plentiful as this season off the famous southern California banks. Great swarms of yellowtail and other light tackle prizes have been frequent. The leaping tuna, dolphin and marlin swordfish, varying in size from 50 to over 300 pounds, have been plentiful.

Prizes to be awarded by the Tuna Club for the largest yellowtail, white sea bass, bonita, albicore and tuna sea bass this year will go to novices in the big game fishing sport from all parts of the country, some of whom have never previously caught anything larger than a fair size trout.

CASTING THE DRY FLY

Use a horizontal cast in preference to the overhead style in casting the dry fly; it is more likely to land right side up with the wings cocked; although more accuracy and distance are obtained by the overhead, this, however, is not as essential in dry-fly casting as to have the fly ride the water in the natural way. As a general thing a fly lights on its side when the overhead cast is used, and although a trout will rise to a floating fly in this position, the chances for a rise are greater when the fly lies on the water in the natural position of an insect with its wings fluttering above the surface in an effort to rise from the water. It is better to cast the fly up-stream, casting slightly across the current, allowing the fly to ride downstream with the current. Early season, and when the stream is discolored by flooded conditions, is poor time for the dry fly, as the trout are bottom or mid-water feeding. As soon as the insect life has developed and the waters clear, with the temperature rising, then the dry fly is a winner

FISH SLEEP IN WINTER

In Southern New Jersey, with the cooling water catfish are showing signs of letting up in biting. Yellow perch are being found in the deeper holes. In the ponds the bass are moving away from the shallow waters around the edges and assembling in the deeper parts preparatory to their semi-slumber until spring. While the bass is probably not a true hibernating fish, yet from about November until April the species gather together in holes well below the ice lines, and for that period remain with scarcely any movement. Most of the time is passed in sleeping, and little or no food is taken. The statement that the bass sleep may surprise some, yet it is nevertheless true. All fish sleep, even as do other creatures, although, having no eyelids, fish cannot close their eyes. But eyelids and closed eyes are not essential to sleep. Some fish while asleep actually lie down; others lean against some object. The majority rest quietly suspended in the water, with only an occasional movement of the fins to preserve their balance.

THE INTERSTATE TRAPSHOOTING ASSOCIATION

The annual meeting of the stockholders of the Interstate Association for the Encouragement of Trapshooting was held at the Association's office with the Corporation Trust Company, 15 Exchange Place, Jersey City, N. J., on Thursday, November 7th, at 10 a. m. The annual meeting of the directors was held at the Hotel Astor, New York City, on the same day at 11 a. m.

There were present at the directors' meeting Messrs. Murray Ballou, Edward Banks, T. L. Briggs, J. L. Clark, T. E. Doremas, F. G. Drew, O. R. Dickey, C. J. Fairchild, E. R. Galpin, F. E. D. Keplinger, T. H. Keller, George Livermore, George Frank Lord, T. A. Marshall, F. Manning, Paul North, W. F. Parker, Elmer E. Shaner, W. B. Stadfeld, H. E. Winans, and Nelson L. Whitaker, Directors of the Association. Messrs. Neal Apgar, P. P. Carney, C. Cave, C. A. Collins, J. S. Fanning, C. C. Gerow, F. J. Kahrs, H. A. Keller, E. I. Le Baume, S. McLinn, E. McCarty, C. W. Phellis, H. S. Rosenthal, C. T. Summerson and E. Reed Shaner were also present.

The following officers were elected to serve during the ensuing year:

President, T. H. Keller; vice-president, Fowler Manning; secretary, E. Reed Shaner; treasurer, manager, Elmer E. Shaner.

The greater part of the directors' meeting was devoted to a discussion of the future policy of the Association.

By resolution, it was decided to remove the office of the Association from Pittsburgh to New York City.

By resolution, it was decided that an Executive Committee of five members be appointed to operate the affairs of the Association for the ensuing year and that said committee be given the fullest powers to do so. This committee, however, will first prepare a complete plan of organization with a proper Constitution and By-Laws for adoption by the Association, together with a written policy, plan and budget for the year 1919 which shall be submitted to the Board of Directors within thirty days and which, when approved by the vote of the Board of Directors, shall become operative and the committee to be charged with carrying out of such plans or policies as may be approved. The intent of this Executive Committee is to consolidate into its hands the responsibility of carrying forward the work of the Association.

After discussing several matters of no particular interest to the general public, the directors' meeting adjourned to meet within thirty days to receive the report of the Executive Committee.

The secretary's report showed that there were 365 registered tournaments held and 5,164,948 targets trapped, with an average of 14,150 per tournament. There were 11 tournaments held in California, of which 10 were registered and at which 240,105 targets were shot at.

THE 1918 GRAND AMERICAN HANDICAP

On the beach front of the South Shore Country Club, Chicago, Ill., gathered again this summer the most skillful trapshots of the entire country to compete in the classic event of the year. With so many shooters in the service, some had expected a small entry list in the Grand American, but there were 620 entries and 598 started. They came from nearly every State and from Canada.

South Shore Introductory

AN OLD HORSE SUIT

By W. H. Gocher

The files in the courthouse at Tolland, Conn., show that on the third Tuesday in December, 1832, there was a horse case on the docket under the title "Dean vs. Rockwell" to recover $500, one-half of the amount for which Rockwell sold a "black pacing stud horse." It was tried in William Kill's hotel at Stafford Springs and decided in favor of Dean. in the writ the horse was represented as being abour seven years old, which made his foaling date 1825.

Elias L. Rockwell, the defendant, was born at Stafford Springs, then known as Stafford, in 1801. He was a short, thick-set man, with black, curly hair. Before he married and located in Norwich, N. Y., Rockwell drove all over the country selling Yankee notions as well as trading and racing horses in 1830, while in Montreal, Quebec, he heard of a black stallion that was a fast pacer, but so vicious that his owner would not go into the stall with him. Rockwell went and saw the horse. He bridled and rode him and also bought him for $150.

Rockwell returned to Stafford Springs with this horse and wintered there. He also equipped him with breeching and pulleys attached to the saddle so that he could control him while at speed, the horse being a bad puller, and exhibited him on training day, the first Monday in May. In the interval Rockwell sold a half interest in the pacer to John Dean, and as soon as the roads were settled, the pair started off with a peddler's wagon, the black pacer and a running horse owned by Dean being attached to the rear. While on their way west the outfit stopped at Norwich, N. Y., and raced the pacer on a flat near that town.

From Norwich, Rockwell and Dean continued their journey, selling Yankee notions and making match races until they arrived at New Orleans, La., where the runner died, while the pacer was sold to Major O. Duboise for $1000 after Rockwell rode him a trial in 2:26. Such speed at the pacing gait under the saddle was unheard of at that date, and Duboise expected to trim everything in the Southern country with the black horse. Some one told of the trial, however, and as he could not get any races, Duboise sold the pacer at cost to D. Henisohn of Louisville, Ky.

This horse was then known as Pilot and remained the property of Henisohn until a short time prior to his death. He was also the sire of the gray horse Pilot Jr., that appears in turf records as the sire of Tattler 2:26, the five-year-old record of the world when made in 1868; Tackey 2:26, the dam of Pilot Medium, whose son Peter the Great is the greatest of all trotting sires; Waterwitch, the dam of Mambrino Gift, the first stallion to trot in 2:20; Midnight, the dam of Jay Eye See, the first horse to trot in 2:10; Miss Russell, the dam of Maud S. 2:08¾, the world's record when made; and Lord Russell, the sire of Kremlin 2:07¼, a champion stallion.

Many authorities credit True Briton, a horse that was owned by Selah Norton of Hartford, Conn., for a number of years after the Revolution, as being the sire of Justin Morgan, founder of the Morgan family of trotters. This is disputed, however, and there are good grounds for same. The old suit in Tolland, however, proves beyond question that Pilot, the founder of the family of horses bearing his name, was owned in Connecticut and left there in 1831, tied to the tail end of a Yankee peddler's wagon.

GEERS

Edward F. Geers has been identified with light harness racing for over forty years. In all that time he never drove a race that he did not try to win. In hundreds of them he finished in the "also ran" group, but it was lack of speed or racing manners that placed him behind the money. In the early eighties, when Geers' name began to appear in racing summaries, few paid any attention to him, until he went to the front with Annie W. and Mattie Hunter and followed their successes with the descendants of Tom Hal, when associations began to give large purses for pacing races. With them he also made Tennessee as conspicuous in the light harness racing world, as the Belle Meade thoroughbred had made it on the running turf. From Tennessee Geers passed to Buffalo, where under the critical eye of Cicero J. Hamlin, he made the name of the Village Farm familiar in racing circles all over the world. It was also while in the employ of the Hamlins that a little incident occurred, which gave the public a glimpse of the sterling honesty of the man, and at the same time shows why of late years racing associations vie with each other in making his appearance at their meetings conspicuous in order to show the public they appreciate the splendid work which he has done for the American trotters and pacers. One day while a Detroit meeting was in progress Geers started a Village Farm horse that was known to be fast but had not shown his true form. There was open betting in Detroit in those days, and as very little was expected from the Village Farm representative it was in the fields that were being picked up by the pikers, who can not resist the temptation to buy a few cheap tickets in the hope that some day the clouds will open and reveal a second Peter Scott, and reward them with a return two or three hundred for one. Such things have happened and on this particular day, after the first heat, Geers went to C. J. Hamlin and told him the horse could win. The old gentleman had his doubts but always with an eye on the main chance, suggested that Geers drive an easy race and they would make a killing at the next town. Without a moment's hesitation Geers replied, "Mr. Hamlin, do not ask me to do that," and he went on and won. The field players were delighted, just as they were at Columbus last September when June Red flashed out in front so unexpectedly after being defeated by Chilcoot at Readville and Hartford and by Prince Loree at Syracuse. Like other mortals Geers makes mistakes in races, but no one has ever seen the cheaters hovering around his stable on race day, in the hope of exchanging a few tickets for a victory. As Leigh Hunt said of Abou Ben Adhem may his tribe increase.

ALASKA COD

Off our Alaskan coast lie the most extensive cod banks to be found anywhere in the world, and yet at the present time less than a dozen vessels frequent them. This has been due to the fact that the eastern and European packers, having been established much longer, controlled the business to a large extent. The war, however, diverted Norway's exports from this part of the world to the European continent, and as the Atlantic coast dealers were not able to take care of the additional demand, recourse was had to the Pacific coast, where the catch is limited only by the market demand.

Very little attention has been paid in this country to preparing the fish other than in a dry-salted condition. Norway has for many years prepared immense quantities of stockfish and marketed them throughout the world. Stockfish is cod which has been eviscerated and usually split almost to the tail and then dried in the open until it has the hardness of a board. In this condition it will keep for a long time if stored in a cool, dry place. A small quantity is put up in Alaska each year, and this will doubtless be greatly increased so soon as the war has cut off the Norwegian exports to this country.

If you are interested in Horses, Livestock, Hunting or Fishing, you should not fail to read the Holiday Issue of the "Breeder and Sportsman" and if you have anything along these lines to advertise, you should not fail to get your advertisement in that issue.

The war is over and we are on the side of victory. The pressure has been released. Times will be normal once more and now is the time to take advantage of conditions by advertising, whatever you have that is worth advertising.

WHY CREAM TESTS VARY

The farmer who sells cream is sometimes surprised at the variation in the test reported by the creamery. In the early part of the summer the tests tend downward. The farmer should not assume that a variation in the tests means either carelessness or dishonesty on the part of the cream buyer.

First of all the richness of the cream varies with the richness of the milk. In early spring and summer there are more fresh cows which results in a lower testing milk and as a result of this the cream goes down in proportion. A herd of cows may produce milk averaging 4 per cent in the fall and in the early spring and summer the average will run as low as 3.6 per cent. This much difference in the richness of the milk will cause a variation from 5 to 8 per cent in the cream test.

The next most important cause for variation is the speed of the separator. The faster the separator is run the larger the proportion of skim-milk and the smaller the proportion of cream. Consequently the high speed yields a richer cream. If a machine that is supposed to be turned 60 revolutions a minute is reduced to 40, the cream will be considerably lower in the test.

Another important cause of variation in cream tests, and sometimes the most important, is the amount of water or skim-milk used in flushing out the bowl. The difference of a pint used will make a noticeable difference in the test of the cream. A difference in the temperature of the milk separated will also have some effect. Some separators are more sensitive to temperature than others. With some a difference of 20 degrees in the temperature of the milk when separated will make a difference of several per cent in the test without affecting the thoroughness of the separation to any marked extent. It should be understood that these variations occur not as a result of more or less loss of fat in the skim-milk but as a result of a larger proportion being taken out in the form of cream.

LIVESTOCK AND MACHINERY

It is common knowledge that a very large percentage of the animals have been slaughtered for food in the densely populated European countries at present devastated by war. The danger of starvation has been so great, and the competition for the limited grain supply is so acute, that farmers have sacrificed their animals and are now struggling against famine without the help of animals in their efforts to exist.

Such conditions are appalling. War is perhaps less dependent upon animals for production now than at any previous time in the history of the world, yet, notwithstanding, agriculture is woefully inadequate to the needs of progressive people without animals. It is true that the ox, the mule and the horse have been relieved to a considerable extent by the tractor, the truck and the automobile. It is also true that vegetable fats such as cottonseed meal, peanut meal and oils from soy beans and other vegetable sources have contributed to our nutrition and relieved our sole dependence upon animal fats. Yet without milk, butter, cheese, beef, mutton and pork our efficiency must be materially injured and a time soon would come when our man-power in the present struggle would fail. It is also true that when properly managed livestock supplement rather than compete with man for food. Livestock and fertility are synonymous in farming. Animal foods are still indispensable and let us hope always will be. Without animals we would inevitably approach the condition of China, India and other countries where man is a beast of burden and agriculture a condition of slavery. The two distinguishing features of agriculture in this country are livestock and farm machinery. The war has increased the extensive use of both.

HORSE "FLU" AND HOW TO TREAT IT

Although the serious epidemic of influenza now affecting the human family has no relation to the disease of the same name which affects horses, specialists of the United States Department of Agriculture point out a resemblance of symptoms and course of the disease in each instance.

According to the department, influenza among horses at the present time is under better control in all sections of the country than ever before. This results almost entirely from the work of the Federal authorities in combating the pest.

Equine influenza is a common disease in the large cities of the country, affecting horses which pass through infected stables of dealers. Only, however, under certain influences not understood and when large numbers of horses in commercial channels are exposed to contagion, does it assume an enzootic or epizootic form. Unlike certain other infectious diseases, one attack of influenza does not grant a lasting immunity. However, previous attack or attacks or other unassignable reasons apparently make old horses less susceptible than young ones.

History indicates that this disease has been recognized in various outbreaks for several hundred years past. Even before the Christian Era, a severe epizootic believed to be influenza, is recorded as having occurred in Sicily, and again in A. D. 1301 it spread over a considerable portion of Italy, causing great loss among the war horses of Rome. In 1648 the disease affected Germany and spread to other parts of Europe, and in 1711 it followed the tracks of the great armies all over Europe, causing immense losses among the horses. Other extensive outbreaks obtained at intervals from 1813 to 1883, one of which was that of 1870-73, in connection with the Franco-Prussian War. The first recorded appearance of equine influenza in North America was in 1766. Probably the most severe outbreak, however, was that of 1870-72, when it spread over the entire country from Canada, south to Ohio, and then eastward to the Atlantic coast and westward to California, although the severity of the outbreak of 1900-01 should not be overlooked. In these epizootics, there was a heavy loss of horses, and being prior to introduction of the motor truck in city commerce, business in the great commercial centers of the country was seriously inconvenienced and in some cases practically suspended for lack of available horses.

Like the influenza epidemics in the human family, epizootics of equine influenza are difficult to control. The true primary cause of the disease has not been established, though it is generally believed to be due to a specific germ, too small to be detected under the highest power microscope. It certainly has the characteristic of extreme diffusibility, leading to spread of disease over a large area of the country in a few days, the outbreak running its course despite all efforts to prevent it, and the infection gradually subsiding without assignable cause.

The symptoms are those of fever, in some cases, preceded by a chill. There is great prostration and depression of muscular force; the visible mucous membranes, especially those of the eye, become a deep saffron, ocher, or violet red color, from which fact the term "pinkeye" has been given the disease. There is a great diminution or total loss of appetite and a rapid loss of flesh, which frequently reaches 30 to 75 pounds for each 24 hours. In uncomplicated cases, the fever abates after 6 to 10 days, and there is a general restoration to health. The death rate is relatively low (during the epidemic of 1872 varying from 2 to 7 per cent), the higher rate occurring among city horses. The complications are many and some times serious. Among such are those of the intestines and lungs. Pneumonia, one of the frequent complications, is always serious, as it affects the animal when reduced in strength and resisting power.

CULL OUT THE UNNECESSARY HORSES

The maintenance of unnecessary horses on the farm is a costly practice at any time. It is doubly so now, because of the high prices of feeds. On the average farm, horses and mules work an average of less than five hours a day throughout the year. Any other income they can create will reduce the cost of operations. There are two main methods of increasing the revenue from horses and mules. First, brood mares raising colts besides doing farm work. If the mares are of the right kind they are a valuable asset. Second, much farm work can be done with young horses and mules that have not yet reached the age at which they are most valuable. Such animals as these can well be used for farm work.

Horses, other than brood mares which are producing colts, and horses and mules which are not increasing in value, should be considered seriously as property for sale. It is possible to overstock a farm with horses. The equipment should be studied carefully to see that this is not done. By no means, however, should farm horse stock be so depleted as to cripple farming operations. Good strong horses and mules are essential for maximum production.

COLLEGE-FED STEER TOPPED MARKET

The highest price ever obtained on the St. Louis market for a beef animal was paid by Swift & Co. for a pure-bred Hereford steer weighing 1340 pounds. The price was $19 a hundred. Another steer, an Angus, weighed 1050 pounds and was sold to the same buyer at $17 a hundred. Both of these animals were fed by the University of Missouri College of Agriculture under the direction of H. O. Allison. Right good Missouri beeves averaging 1220 pounds sold the same day at $16.75.

PHILIPPINES OFFER GREAT OPPORTUNITIES

Great opportunities for cattle growing exist in the Philippines, according to O. D. Hargis of Texas, who recently returned from the islands. A great scarcity of cattle prevails there, he says, and those who have gone into the cattle business are making big money. The demand for home consumption is greater than can be supplied for years to come. It seems to cost practically nothing to raise cattle on the islands, the greatest expense being the original investment. The native grasses are highly fattening and are available practically all the year.

ARTIFICIAL MILK IN JAPAN

Cows are scarce in Japan, and the people use artificial milk made from the soy bean. The bean is soaked and then boiled until the liquid turns white. Then sugar and phosphate of potash are added and the boiling is continued until the liquid looks like ordinary condensed milk.

COTTONSEED MEAL FOR HOGS

One cornbelt hog raiser says: "Never feed cottonseed meal to a hog." All authorities agree that cottonseed meal should be fed with great caution if at all to hogs. In Louisiana the Agricultural Experiment Station has used cottonseed meal 1 part, rice polish 2 parts and corn 2 parts, fed at the rate of 1½ pounds per animal in connection with sweet potatoes, beginning about Nov. 1. But the cottonseed should not be fed more than three weeks without interruption, and the cottonseed meal should be omitted for ten days before the hogs are put on the market. Even in small amounts the extreme limit for feeding cottonseed meal to hogs is not over 40 days at the outside. In any case it must be fed with other feeds and make up only a small part of the ration, if used at all.

A "365" Day Liniment

YOU ARE SAYING TO YOURSELF—"If I only knew of something to stop that Backache—help my Rheumatism—cure my Neuralgia, I would send and get it at once."

Get It. Relief. Gombault's Caustic Balsam will give you immediate relief. A Marvelous Human Flesh Healer and a never failing remedy for every known pain that can be relieved or cured by external applications. Thousands testify to the wonderful healing and curing powers of this great French Remedy. A Liniment that will soothe, heal and cure your every day pains, wounds and bruises.

Gombault's Caustic Balsam
The Great French Remedy
Will Do It

It Helps Nature to Heal and Cure. Penetrates, acts quickly, yet is perfectly harmless. Kills all Germs and prevents Blood Poison. Nothing so good known as an application for Sores, Wounds, Felons, Exterior Cancers, Burns, Carbuncles and Swellings.

"I had a bad hand with four running sores on it. The more I doctored the worse it got. I used Caustic Balsam and never needed a doctor after that." —Ed. Rosenburg, St. Ansgat, Ia.

Mrs. James McKenzie, Edina, Mo., says: "Just ten applications of Caustic Balsam relieved me of goitre. My husband also cured eczema with it, and we use it for corns, bunions, colds, sore throat and pain in the chest."

A Safe, Reliable Remedy for Sore Throat, Chest Cold, Backache, Neuralgia, Sprains, Rheumatism and Stiff Joints. Whenever and wherever a Liniment is needed Caustic Balsam has no Equal.

Dr. Higley, Whitewater, Wis., writes: "I have been using Caustic Balsam for ten years for different ailments. It has never failed me yet."

A liniment that not only heals and cures Human Flesh, but for years the accepted Standard veterinary remedy of the world.

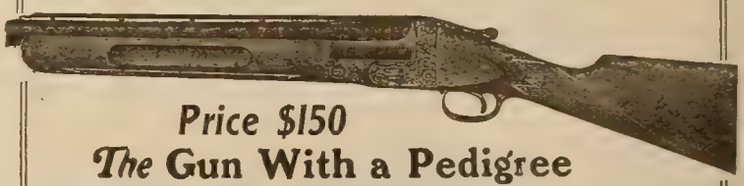
HERCULES POWDERS
IN ANY ONE OF 14 SHELLS

Note the 14 shells named on the left. You can tell at a glance which one is your favorite because you know what its *outside* looks like. But do you think as much as you should of what is inside of the shell?

When you buy shells, you are always careful to select the brand that you are accustomed to shoot. You should be just as careful to make sure that your favorite shell is loaded with a Hercules Smokeless Shotgun Powder. Look at the end of the box for the name Infallible or "E.C."



The dependability of Hercules Powders has made them the stanch friends of many experienced sportsmen. Let them be *your* friends.

You may shoot your shells today, next month, or next year; they will always give the same high velocity with light recoil and the same even patterns, no matter what their age. Neither time nor atmospheric conditions affect their reliable quality when they are loaded with Infallible or "E.C."

Any one of the 14 standard brands listed at the left can be bought loaded with Hercules. You should have no difficulty in getting your favorite shell loaded with either Infallible or "E.C."

THE
Parker Single Barrel Trapgun

Price $150
The Gun With a Pedigree

The Greatest Scores Ever Recorded Were Made With

Parker Guns

Mr. L. S. German made the highest official yearly average ever recorded with his Parker Gun, scoring 6137x6285=97.64%.

At San Jose, Cal., May 19th, Mr. Orval Overall won THE CHAMPIONSHIP OF CALIFORNIA-NEVADA, scoring 44x50 targets with his double Parker Gun.

At same place, May 22d, Mr. Harry Ogilvie won the INTERSTATE CALIFORNIA-NEVADA HANDICAP, scoring 97x100 at 20 yards with his single barrel Parker, and Mr. Len. Hawxhurst won the Professional Championship, scoring 94x100 with same kind of gun.

At Los Angeles, Cal., May 28th and 29th, Mr. Ed. Garrett made the highest aggregate score on the Preliminary and Pacific Coast Handicaps, scoring 187x200 at 18 and 19 yards, with his single barrel Parker, and Mr. Len. Hawxhurst at same place won Second Professional Average, scoring 381x400 targets with same make and kind of gun.

The Grand American Handicap has been won nine times with Parkers.

If interested in small bore double shot guns, please write for New booklet which will be sent free, giving valuable information on this subject.

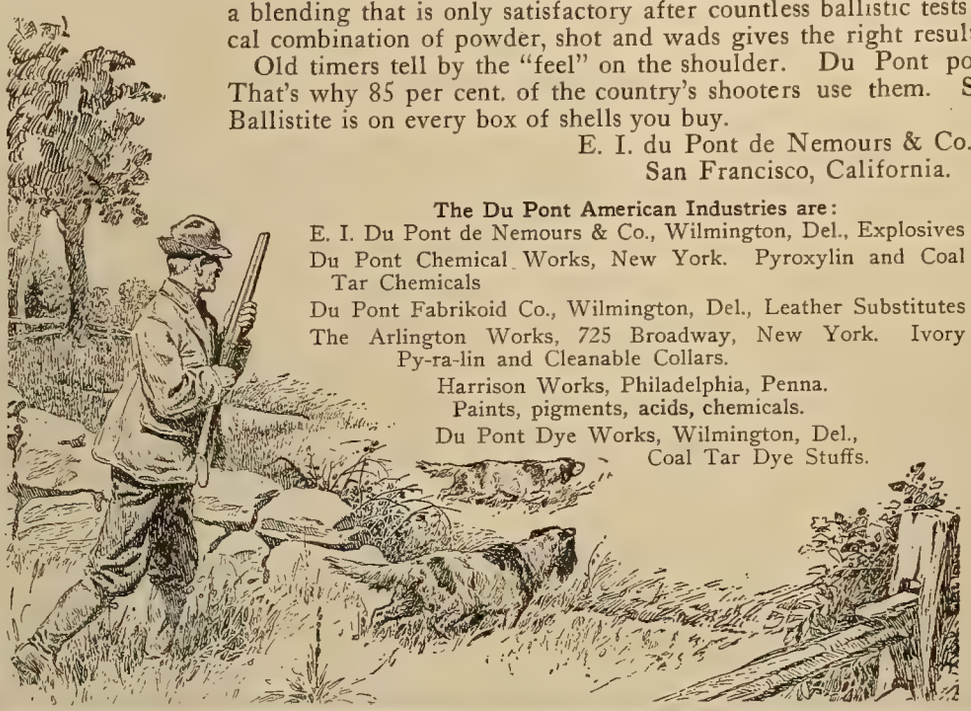
Velocity Counts

Velocity means speed—speed means penetration—speed properly controlled means pattern. These are important features in the shooting qualities of shotgun shells.



DU PONT Sporting Powders

Dupont—Ballistite—Schultze

as loaded in the shells you buy represent the blending of many different batches of Powder—a blending that is only satisfactory after countless ballistic tests have proved that every practical combination of powder, shot and wads gives the right results.

Old timers tell by the "feel" on the shoulder. Du Pont powders have the "right feel." That's why 85 per cent. of the country's shooters use them. See that the name Dupont or Ballistite is on every box of shells you buy.

E. I. du Pont de Nemours & Co.,
San Francisco, California.

The Du Pont American Industries are:

E. I. Du Pont de Nemours & Co., Wilmington, Del., Explosives

Du Pont Chemical Works, New York. Pyroxylin and Coal Tar Chemicals

Du Pont Fabrikoid Co., Wilmington, Del., Leather Substitutes

The Arlington Works, 725 Broadway, New York. Ivory Py-ra-lin and Cleanable Collars.

Harrison Works, Philadelphia, Penna. Paints, pigments, acids, chemicals.

Du Pont Dye Works, Wilmington, Del., Coal Tar Dye Stuffs.

DU PONT Powders

Standards for 116 Years

Many emergencies in the history of the country have demanded unusual efforts on the part of the Du Pont Company; but never in its 116 years of experience in powder manufacturing has the Du Pont Company been unable to supply the demands of American Sportsmen.

Du Pont - Ballistite - Schultze are still the most popular shotgun powders and the easiest to get. They are loaded in the shells stocked by practically every dealer in this country. There is no shortage of Du Pont powders. Do not allow substitution.

Fall Hunting With Your Remington

Every sportsman who owns a Remington Pump Gun goes afield with the knowledge that he is **perfectly** equipped to obtain results commensurate with his shooting skill.

Solid breech, hammerless, take-down, bottom ejection, easy balance, symmetrical lines—these features make the Pump Gun a superior arm for veteran or novice. Holds six shells. WETPROOF Steel Lined "Speed Shells"—Arrow and Nitro Club—are positively waterproof. With the Pump Gun they make the ideal shooting combination.

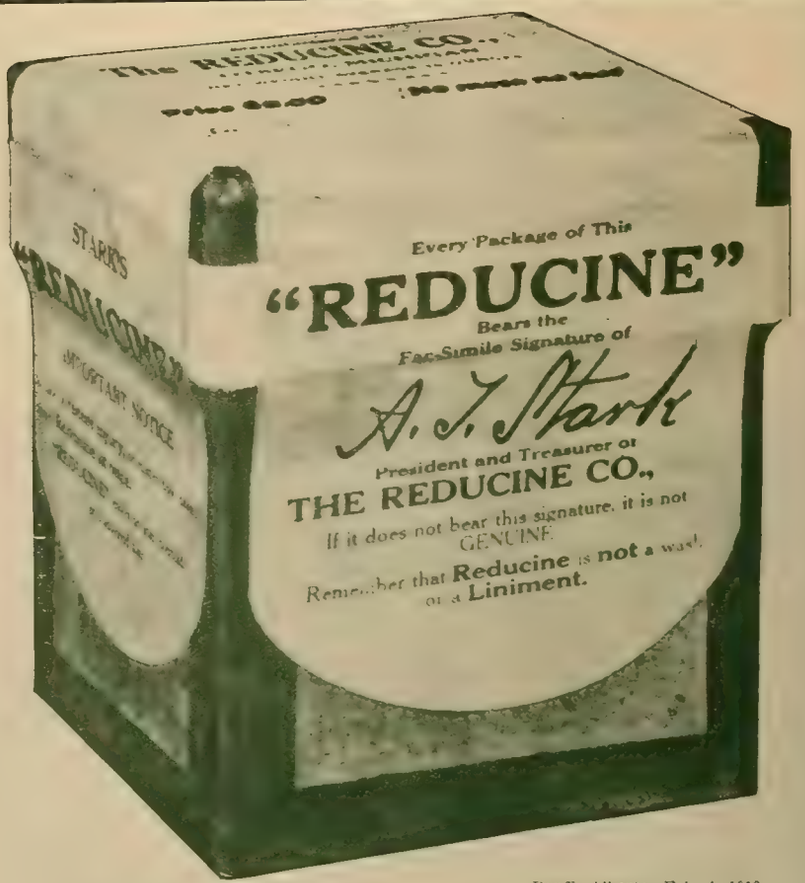
SNOWDEN FARM

Frank C Baldwin, Proprietor

Breeder of High-Class Hunters and Saddle Horses and Registered Jersey Cattle

Fredericksburg, Va., Feb. 18, 1918.

The Reducine Co., Otsego, Mich.



Dear Sirs:—In your letter of Nov. 24 you requested that I should write you the results of using the can of Reducine which you sold me at that time.

I first used the compound upon a horse which had a serious enlargement just above the hoof. After the proper applications, the enlargement entirely disappeared and the horse is now fully recovered.

Shortly after this I found that one of my cows had an enlargement in the joint just above the hock and I applied Reducine, with marvelous results. The enlargement was in the nature of a bog spavin, but the treatment was eminently successful, and it entirely disappeared in a short time, leaving the cow with no symptoms of lameness whatever.

You are at liberty to use this information if it is of any value to you. Very truly yours,

FRANK C BALDWIN.

Banff, Alberta, Feb. 4, 1918.

Reducine Company, Otsego, Mich

Dear Sirs:—You will, no doubt, be surprised to hear from me. I was reading your ad. in the Christmas HORSE REVIEW, and seeing that you have issued a new booklet, I would like to have one. I am still using your Reducine and have had still another remarkable cure on a horse with blood poisoning in the hind leg. It left him with a very much enlarged leg from hoof to hock, but with one 10-day treatment it is now normal again, to the surprise of several wiseacres who claimed nothing short of an enlarged leg for the remainder of his life. I went at it and made them all look funny when it was over. It was one of the most remarkable cures I ever met with.

I trust business is good with you and you can rest assured you have a good booster here in the far west. Yours truly,

W. L. MITCHELLTREE.

Greenfield, Ill., Dec. 6, 1918.

The Reducine Co., Otsego, Mich.

Gentlemen:—I have a peculiar case. About a year ago I had a growth start on my left breast. It got almost as large as a walnut, and finally got to hurt me from a jar. I had a doctor examine it, and he said he did not like the looks of it, but would not say what it was. I asked him if there was any medicine that might scatter it, and he said "No." He said I would have to have it cut out and then said I might start iodine, although he had no faith in it. So I used iodine, with no results.

I had used Reducine for years with great success, so I told him about that and he laughed and said nothing. I had a little left in a can that was about three years old. In thirty days the swelling was smaller. The doctor said it was smaller, but said he had no confidence in the Reducine curing it. I bought a new can from J. B. Sickles, of St. Louis, and have used from it fourteen days, and the swelling is almost completely gone. I can only feel it at times. It is so much smaller than it was that I think it will soon be completely gone. The doctor, I feel certain, thinks it was a cancer of some kind, but refused to tell me what his opinion was.

I am naturally a great friend of Reducine. Reducine is certainly a perfect preparation for the treatment of piles. Yours respectfully,

A. D. ROLLINS.

Sarepta, La., Dec. 4, 1918.

The Reducine Co., Otsego, Mich.

Gentlemen:—Will you please send me one of your latest booklets? I bought my first can of Reducine about five years ago and have found it the best medicine I ever used. I bought a four-year-old horse which was shipped here from St. Louis. He had taken distemper and his throat was swelled up as full as the skin would hold, and the swelling was very hard and feverish. I used Reducine on him and in 24 hours the swelling was all gone away. I have used it in many other cases, all with good results. Yours very truly,

THOS. HOOD.

North Haven, Conn., Nov. 14, 1918.

Reducine Company, Otsego, Mich.

Gentlemen:—What price will you make for us on Reducine by the dozen cans? We have about 125 horses and use more or less Reducine. We would like to buy the same direct, as we do with all our other supplies. There is no one here at North Haven that sells Reducine, and we have to send to New Haven for the same. Yours truly,

THE I. L. STILES & SON BRICK CO.,
Per D. B. Andrews.

West Milton, O., Oct. 12, 1918.

Reducine Company, Otsego, Mich.

Gentlemen:—I am writing you for information on the case of my horse just purchased. He has a bad case of fistula, but would be a very valuable horse if cured. He has had this about seven months. It has healed up once, but not right. His neck is very much swelled and is stiff. The man who owned him got discouraged and sold him to me last Friday. I commenced on him right away with Reducine. There is no place open, but it looks like it would break soon where it was open before. I have put Reducine on over the swelling and up as far as it was swelled. With Reducine I have cured contracted feet in several cases, also thrush, and taken off bog spavin. I have used seven cans of your remedy, but have to go to Dayton for it. I would like to keep it for sale in my store. What will it cost me by the two-dozen can cases?

Please send me your booklet. Any advice you can give me in the treatment of this case will be favorably received.

Thanking you in advance, I remain, Yours truly,

C. A. HESS.

For sale by Druggists and Horse Goods Dealers, or direct from us. Cash with order in all cases. Please send Draft, Express Order or P. O. Order.

Vol. LXXII DECEMBER, 1918. No. 18

The first California Liberty Fair which closed at Los Angeles on December 14th from a point of attendance and also from the number of exhibits, was a decided success. The directors aim to make it an annual event, believing that it is amply justified as an educational institution and a fundamental stimulus to the farming and breeding interests in California.

The California Liberty Fair at Los Angeles and the California International Livestock Show at San Francisco to be given within a week of each other, so that exhibitors can display at both places, will add much to the live stock and agricultural interests on this coast.

Neat and efficient accomodations for the live stock show were prepared for 1500 animals, which were the original entries to show on October 12. In spite of all the postponements, on account of the "flu" epidemic, the show opened over eight weeks later with practically 75 per cent of the entries in their places.

Here were prize Herefords, short horns from Missouri, Wyoming, Colorado, Montana, Canada, the celebrated Angus herd from Yakima, Washington, other breeds of beef and dairy stock from California, Oregon and Arizona. The California exhibit of hogs, in all classes, was a revelation to our own people. To sum it up, the livestock show was a big success, registering in sales over $150,000, a permanent addition to our stock raising industry.

The agricultural and horticultural building displayed convincing evidence that California is the richest in natural resources of any State in the country. The manufacturers' building is a revelation to everybody in the matter of manufacturing that this part of the State supports. The food products exhibit, the United States government exhibit, the school exhibit and all the others, are highly educational and artistically arranged.

The entertainment features of the fair have been clean and high class. The racing was well conducted and while the fields were small, there were some exciting contests. The horse show, fireworks and midway left nothing to be desired.

\- - -

At the Liberty Fair Horse Show at Los Angeles which closed on the 14th inst., Charles W. Winters took first prize for standard bred stallions winning with "Alhambra Prince." Alex Grant of Los Angeles took all the first for mares.

\- - -

The summaries of the Los Angeles race were not published either in Los Angeles or San Francisco papers and the copy prepared for the "Breeder and Sportsman," which was due to arrive in time for this issue, must have miscarried as it has not been received up to the time of going to press. It will appear in the January number.

Heald graduates are always in demand—even when hard times are abroad in the land. When they have completed a course in Heald's they can rest assured that there will be positions for them—225,000 Heald students in California and the West are filling the best positions on owners, managers, cashiers, private secretaries, accountants and reporters, and are calling back to Heald's Employment Bureau to furnish them with additional office help.

Heald's maintains an Employment Bureau for intelligently placing Heald-trained men and women. They will have the very best possible service in locating the right kind of a position after they have completed their course at Heald's.

Bert Baker, Hill P. O., San Diego Co., Cal., believes in the future of the harness horse breeding business in California. He is an enthusiast and has bred some fine animals, having an excess of stock. He is offering a McKinney stallion and will sell some of his well bred youngesters and high class mares, as will be seen by an advertisement in another column.

There were 825 heats raced on the Grand Circuit this year, at both gaits, the average time 2:07¾.

NEW DATE FOR LIVESTOCK SHOW

Work has been actively resumed in making preparations to receive the stock for exhibition at the California International Livestock Show which was twice postponed on account of the influenza conditions existing in this city on the dates for which the show was originally set. The show will open on February 8th. The change of dates will in all probability result in a very much larger and more representative show than would have been possible in November.

The California International Livestock Show Corporation was originated this past summer by a group of men well known in the history of California with the avowed purpose of advancing and developing the livestock industry of the west. The forthcoming show is to be given under the auspices of the San Francisco Chamber of Commerce.

RACING BILL FOR MICHIGAN

Efforts to legalize racing in Michigan, to provide a racing commission, and to restrict all racing to the control of the commission and then only under the auspices of agricultural societies, will be made at the coming session of the legislature.

A bill providing that races of all kinds in Michigan shall be conducted only under the auspices of state, district or county agricultural societies, and that a commission shall control the permits for racing, and that the so-called pari-mutuel system of determining the distribution of wager-money shall be legal, has been prepared and will be introduced.

Among those backing the bill are General Manager George Dickinson, of the Michigan State Fair, and some of his colleagues; members of the Detroit Driving Club; and members of district and county agricultural societies throughout the state. In the event the bill becomes law, the Detroit Driving Club probably will be reorganized as the Wayne County Agricultural Society, as it consists largely of men interested in the training of thoroughbred stock and there are sufficient numbers concerned in thoroughbred cattle to make attempts at "camouflage" under some other name unnecessary.

The bill, as prepared, provides for a commission of three men, one of whom must be a breeder and raiser of thoroughbred stock, and shall be named by the governor, one of whom shall be named by the officers of the Michigan State Fair, and one who shall be named by the officers of the state associations of county agricultural societies. The commission may appoint a secretary at a salary not to exceed $1,200. The salary and all the commission's expenses must be paid by the state, district and county fair associations in proportion to financial and other resources and strength. The commission may issue licenses for meetings lasting from three to thirty days and may revoke lincenses after a hearing, but its action is subject to court review.

Purses, prizes or stakes may be provided for the races, but they are payable only to owners of horses—none else may have an interest in the proceeds of the race winnings.

RACING AT COLORADO STATE FAIR

The patrons of the Colorado State Fair this year for the first time in the past three years, witnessed the return of the "sport of kings." The gate receipts indicated that the attendance was better than ever before, and everyone was well pleased to see the harness horses back on the track. Manager Beaman was more than pleased, and intimated that next year the horsemen could expect to see some early-closing events for $1,000 each, with the same $500 purse races.

Mr. Beaman is also secretary of the Rocky Mountain Racing Circuit, which he expects to call together early in January in order to get its racing program in the field in time for all to make plans on racing in Colorado in 1919. The secretary will urge all the members to offer two or three early-closing events. The summaries of the races at Pueblo will be found in our regular racing columns.

CALIFORNIA HORSES AT THE OLD GLORY SALE

The California consignment was disposed of at the first day of the Old Glory Sale as follows:

Hal Logan 2:05¼, b g, 7, by Jim Logan 2:01¾—Sweet Hallie, by American Hal. Henry Atkinson, Newark, N. J. $1200

Electric Forbes 2:16¾, b h, 6, by Malcolm Forbes—Allie Paine 2:18, by Rennselaer Wilkes 2:11¼. W. R. Flemming, Windsor, Conn. 235

Carolyn M. 2:07¼, b m, 5, by Lock Logan 2:07¼—Trilby Maid 2:18½, by Black Ralph Jr. J. T. Fayette, Penitang, Ont., Canada. 410

Marshall Logan, b g, 4, by Jim Logan 2:01¾—Leota 2:23, by Diablo 2:09¼. Gus Coginns, Atlanta, Ga. 200

John E. Logan, b g, 5, by Demonio 2:11¼—Effie Logan, by Durfee. Gus Coggins, Atlanta, Ga. 200

Tennessee Bill, b g, 3, by Jim Logan 2:01¾—Lela H. L., 3, 2:24¼, by Nutwood Wilkes 2:16½. Jesse Sickler, Carbondale, Pa..... 260

Rosey Logan, b m, 4, by Jim Logan 2:01¾—unnamed mare, by Demonio 2:11¾. N. Shapiro, Brooklyn, N. Y. 190

Alice Logan, br m, 7, by Jim Logan 2:01¾—Katie Steinway, by Steinway, 3, 2:25¾. I. Seidel, Brooklyn, N. Y. 190

THE PROPOSED PROTECTIVE ASSOCIATION

A well known western horseman, in the course of a personal letter, drops the following comments upon the proposed Horsemen's Protective Association, whose formation is being agitated and arousing much discussion.

"Of course, all the local horsemen are highly enthusiastic over the plan advanced by Magnus Flaws. Personally, I don't know about it. Some of those 'points' are all right, and, if we consider both sides of the question, as we are certainly bound to do, some are all wrong.

"Organization seems to be the accepted way of doing things. But we will suppose that at this coming meeting of horsemen a working organization is effected. Then where will we go from there? Will a threatened boycott be the weapon with which to whip stubborn and moss-grown secretaries into line? If so, it will never work out satisfactorily.

"If they succeed in perfecting an organization of horsemen I hope they will put cool heads in the responsible positions? The interests of fair officials and horsemen are identical. I fear there are some on both sides that forget this. There is need of harmony. I see indications of a breaking away from old-time traditions on the part of a number of fair officials, and feel sure that if matters are handled wisely, the coming year will see changes that will prove of real benefit to horsemen."

The frankness, justice and lucidity of these observations cannot but commend them to all dispassionate horsemen—and it is well to remember that it is only the dispassionate ones who can accomplish enduring things in a satisfactory way.—Horse Review.

THE END OF THE STOCKTON KITE
(By Geo. H. Tinkham)

The old kite shaped track at Stockton is now entirely obliterated. The ground is being leveled and rolled for a United States aviation field. Short and sensational was the history of this track, the only one of its kind except the kite shaped track at Independence, Iowa.

Over the Independence track in 1890 the stallions Allerton and Nelson made world records of 2:10. It was believed by W. S. Hobart, then the owner of Stamboul by Sultan, that his stallion could equal or beat Nelson's time over the same kind of track, as horses had been trotting from two to three seconds faster over the kite track, their being but one curve.

L. U. Shippee of the Stockton track was enthusiastic over the matter, and it was learned that a kite track could be laid off for about $4,000. Hobart subscribed $1,000, Leland Stanford $2,000, L. U. Shippee and George Sperry $500 each, and other subscriptions were obtained up to $4,400. Work on the track was commenced in June, 1891, and it was completed in time for the September fair. It was too soft, however, for racing, but all of the horsemen exercised their horses over that track and by fall it was in pretty fair condition.

Hickox came here with Stamboul, expecting to beat his record of 2:11¼ made in 1890, John W. Goldsmith driving. The stallion was not himself and was not started. Marvin with the Stanford stable, Millard Sanders with the Valenstin stables, came here together with other horsemen and made wonderful records over both the kite shaped and the elliptical shaped track. W. Wood paced in 2:07, Direct in 2:08, his record then 2:06, and Arion (2) trotted in 2:10¾ and Palo Alto in 2:08¾.

The following year, at the fair of 1892, three special races were trotted over the kite shaped track S. J. Simpson of the Breeder and Sportsman was very enthusiastic over the kite track and said, come what may, the track is the future race course. Marvin, after Palo Alto had made his fast mile, said "There's the record, let us see them wipe it out." The National Association refused to recognize the records, and the summer's work of over fifty horses was wiped out. The people opposed the new track because they had a very bad view of the races and the track was so fast the horsemen refused to start their horses. They said, "We will make records here we cannot equal on any other track, hence we will be barred." The new track for these reasons was a complete failure and never again used.

Regarding Stamboul, for whom the track was built, he started several times at the fall meeting of 1893, and made a record of 2:08¼. Again he started and trotted a mile in 2:07¼. The time was disputed, the National Association refused to recognize it, and horsemen will remember the scandal it created, the greatest of any record in the state.

Thoroughbred Matters

W. L. Appleby, who at one time was a successful jockey and afterwards trainer and owner of race horses, and who is well known on all the running tracks in America and a prominent figure on the tracks in California during the days when running races were flourishing, died at Reno, Nevada, week before last.

During 1917 thirty-six yearlings were sold at public auction in England for $5000 each, or more. From January 1st to November 1st, this year, there were sixty-four yearlings that can claim this distinction. This shows the demand for high class racing prospects and breeding stock in the old country.

A winter race meeting will be given under the auspices of the Business Men's Racing Association, Phoenix, Arizona, opening on December 21st. There will be no purses of smaller value than $200, with an overnight handicap of $300 or more each day. Phoenix has an excellent mile track, weather conditions are usually good at this time of the year and the stable conditions are all that could be asked for. Everything will be done to make it pleasant for visiting horses.

The stallion Spanish Prince, together with seventeen mares belonging to Messrs. Clarence Mackay and C. Carroll, were recently shipped from Havre to Baltimore. Lady Hamburg, a mare belonging to Mr. H. P. Whitney, and who is in foal to the great French racer Sardanapale, came across on the same boat.

A new association to be known as the "Blood Horse Breeders' Association of Australia and New Zealand" was organized in the rooms of the Australian Jockey Club last October. The new association has been formed with the object of promoting the interests of the breeders and owners of blood horses, and to promote the development and improvement of the blood horses in Australia and New Zealand. Membership of the association is open to all persons owning one or more horses entered in the Australian, New Zealand, or English Stud Books. Each owner has one vote, and no selling agents are to have a seat on the committee of the association. Mr. Philip H. Morton presided over the meeting.

It is calculated that in New Zealand during the past season the racing clubs paid $900,000 in taxation to the government, and that donations for patriotic purposes since the commencement of the war had exceeded $500,000, and the subscriptions to war loans $250,000. This is but additional evidence that sportsmen are liberal and patriotic the world over.

Mr. A. K. Macomber is responsible for thirteen entries for next year's Epsom Derby. All of them were bred in England at Childwickbury.

For the Derby of 1920 an entry of 279 has been received, a very satisfactory number in the circumstances of the time. His Majesty supports the race with five colts, by Polymelus. St. Denis, Sunstar, Radium, and Lemberg respectively, and it goes without saying how popular the victory of the Royal colors would be—a consummation by no means remote when the high pedigree of his representatives is considered. All the leading lights of the Turf are subscribers, and it is interesting to note that the National Stud—that generous gift of Colonel Hall Walker to the nation—is responsible for a party of seven, four of them being by Royal Realm, Great Sport, Night Hawk, and White Eagle siring the other three. The Oaks has obtained 227 nominations of which five are named by the King, Cicero, Sunstar, Tracery, Lemberg, and Rochester being their respective sires.

Through foreclosure proceedings by the Hibernia Bank of San Francisco against the California Jockey Club, Tanforan Park has changed hands, the consideration being about $150,000. It will now be subdivided into house lots and put on the market. Tanforan Park was one of the fastest and best equipped tracks on the Pacific Coast and was the scene of some of the best race meetings in the West. The grandstand, barns and paddocks were handsome and commodious. The track was laid out by Prince Poniatowski, and afterwards came into the possession of Thos. H. Williams, who at one time controlled three large race tracks about the bay, the California Jockey Club track in Berkeley, the track at Ingleside, and the track at Tanforan.

J. C. Cassou has started stocking the large Guejito ranch, 15 miles east of Escondido, San Diego county, with Chinese pheasants. This species of pheasants thrives in a mild climate like that of San Diego county, and is one of the finest game birds in the world, a bird that is useful either in its wild state or when kept in coops and pens. They are of the ring-neck variety, celebrated as producers and reproducers.

RACING IN KENTUCKY

(By John Hachmeister)

From various standpoints, the Kentucky racing season of 1918, which came to an end with the closing of the Latonia Jockey Club's belated meeting, will go down in history as one of the most remarkable in the annals of the Kentucky turf. In spite of extraordinary handicaps with which the sport was called upon to contend during the fall period, the season as a whole may properly be characterized as immensely successful. The spring meetings at all four Kentucky tracks were marked by record-breaking patronage, brilliant racing and a degree of public enthusiasm over the sport that was unprecedented, and which was all the more remarkable because of war-time conditions. The fall meetings, while beset with complications growing out of the influenza outbreak and other difficulties, nevertheless furnished further proof of the unbounded popularity of racing as one of the greatest diversions of the people of Kentucky and adjoining States.

The season closed with the conviction firmly implanted in the minds of those having the welfare of the sport at heart that racing in Kentucky is at the threshold of a greater era of prosperity and popularity than has ever been known before. With the great war at an end, it is the general opinion that racing is in for a tremendous boom next season, in connection with other outdoor sports, to which the people of the country will naturally turn in the reaction following the strain to which they have been subjected since the United States entered the war. The end of the season finds the Kentucky turf in a healthier condition than for a long time, with harmony prevailing in every quarter, from the membership of the newly appointed State Racing Commission right down the line. Horsemen generally are well satisfied with the personnel of the new commission and the belief s general, based on a knowledge of the views and ideas of the individual members, that a policy will be carried out by the new governing body which will further strengthen the position of the sport in public esteem.

Not the least important factor in the success of the various meetings in Kentucky this season was the participation of high class horses from the East in the rich feature races with which the Kentucky programs abounded. Inter-sectional rivalry ran high at various times and public interest in several of the outstanding fixtures of the season received an impetus on this account that was of decided benefit to the welfare of the sport. The indications are that not only will all the important fixtures which have brought the Kentucky turf into such prominence be renewed for next season, but that in several instances their attractiveness will be enhanced by an increase in values which already are so high as to challenge countryside attention and patronage. A notable instance of this sort will be the Latonia Derby, the value of the added money of which will be doubled and which, it is reckoned, will have a gross value of something like $50,000. With a fixture like this as the headliner for its spring meeting, and the $50,000 Latonia Championship Stakes, the richest race in all the world, scheduled for decision in the fall, to say nothing of numerous other events that will in themselves be well worth while, the patronage of turfmen from distant points, and which will be looked upon as wonderful but for the comparative eclipse into which they are thrown by events like the Derby and the Championship Stakes, it can readily be appreciated what a carnival of high class racing is in prospect at Latonia next season. And what is true of Latonia will apply with equal force to the other tracks of the State. The Louisville tracks will of course offer their usual valuable events, including the Kentucky Derby and the Kentucky Handicap, both of which rich fixtures have been well patronized in recent years by horsemen from one end of the land to the other. Many more eastern entries are looked for when the Kentucky states are opened next spring than in any previous season, as a natural result of the unprecedentedly rich offerings that will make the stake program so tempting.

One of the most notable features of the season just ended was the raising of the enormous sum of $500,000 by the racing and breeding interests of the State of Kentucky for Red Cross purposes. This huge fund was completed on the closing day of the season so far as the share of the race tracks was concerned and it is understood that the breeders have practically completed the raising of the $40,000, which was allotted as their part of the ambitious undertaking. Of the remainder, the race tracks at Lexington, Louisville and Latonia contributed $160,000, through an assessment on the pari-mutuel sales. The owners of horses that raced in Kentucky during the season contributed ten per cent of their stake and purse winnings which yielded $75,000, as their quota. The balance of $25,000 came from an assessment of ten per cent of the salaries and pay of officials and employees of the tracks and the jockeys who have ridden in Kentucky at any time during the season. In the cases of employees receiving less than $5 per day, the racing associations met their assessment of ten per cent. All of the funds raised from the various sources have been turned over to the Kentucky State Racing Commission for presentation to the Red Cross representatives. Needless to say, nothing that the racing interests of Kentucky have ever done along similar lines has received such general commendation as this stupendous undertaking which has just been carried to a successful consummation. In fact, it is the biggest thing of its kind ever attempted and carried to completion in the history of American racing or of any other sport in this country, so far as known.

JAMES ROWE

James Rowe, trainer for Harry Payne Whitney, and manager of the racing and breeding interests of that New York sportsman, has had a turf career that is replete with successes, first as a jockey, in which profession he was in the front rank; as a trainer he had developed more high class race horses than any man who ever lived in this country.

His first important engagement as a trainer was with the Dwyer Brothers, the Brooklyn butchers where success on the turf forms one of the most remarkable pages in the history of sport. The brothers had bought in Kentucky a colt known as Hindoo, which had at two years won all his races and been sold by Daniel Swigert, owner of Elmendorf Farm, to the Brooklyn turfmen. During the spring of his three-year-old form Hindoo won in easy fashion at Lexington, and in the Kentucky Derby defeated his field in such manner that no doubt existed of his class.

During his career as a trainer for the Dwyer Brothers Mr. Rowe saddled the mighty Luke Blackburn, considered by many to have been the greatest race horse this country has produced. He sent Miss Woodford to her victories fit to run for a king's ransom, trained many of the best owned by the two brothers whose careers on the turf find no parallel in history, and he won nearly every important event during the quarter of a century in which they raced as partners. Rowe had charge of the stable of the late August Belmont when the New York banker won many of the rich prizes of the turf; he trained for the late James R. Keene after the get of Commando began to carry off the important events of the Jockey Club tracks, including such cracks as Colin, Peter Pan, Sysonby, Delhi and Maskette. He trained for the late Colonel Thompson at Brookdale and sent forth Requital, with which horse he won the Futurity, and for Harry Payne Whitney he won the Kentucky Derby with the only filly to capture that classic in the history of the event.

Mr. Rowe is easily at the head of his profession; none other has sent so many first class race horses to the post; no trainer has seen his efforts crowned with such success. He has won the Coney Island Futurity five times, while his victories include practically every event of importance on the American turf. The list of first-class race horses trained by this horseman represents the entire success of the late James R. Keene during the period in which Major Foxhall Daingerfield produced for him stake winners galore. So extraordinary is the skill of the man who sent to the post Sysonby, perhaps the fastest horse this country has ever seen, who has won every important event in America, including the Kentucky Derby with a filly in which respect he is unique; has won a greater number of races the first time out than any man who ever lived. He has trained the winners of the Suburban and Brooklyn handicaps, being the first man to send to the post a three-year-old to be returned a winner; the Metropolitan, the Realization, Belmont, Withers, the Brooklyn Derby, the Lorillard and Omnibus Stakes, the Futurity frequently, in fact every event on the American turf of importance.

Rowe is not only a trainer for Harry Payne Whitney, but has absolute charge of the racing and breeding interests of the New Yorker, and supervision over the two establishments in Kentucky and New Jersey, where the training stable is prepared for its engagements.—Thoroughbred Record.

DESERT GOLD'S DEFEAT

Desert Gold, beaten at weight-for-age, over a mile and a half, seems incredible; but that is what happened in the Spring Stakes last October. She was taken to the front at barrier rise, and although Cagou was close enough to keep her going at top, she was apparently going at her best when heads were turned for home. Then came the surprise. Suddenly, from out of the jungle of horses stretched across the track, Poitrel was seen coming in the middle of the course. Half a furlong from home he drew level with Desert Gold's girths, and inch by inch he gained on her. For a few strides the pair were level. Desert Gold got her head in front, but the colt came at her again, and drawing steadily away from her in the last few strides, won on the post. The excitement was so intense that not a sound was heard from the crowd until Poitrel's number was hoisted, and then pandemonium broke loose. The champion had been beaten, and the crowd, as crowds always do, forgetting their old love, were cheering the new champion to the echo. As I timed Desert Gold to run the last mile in 1 minute, 39 seconds, and as Poitrel was at least ten lengths behind her at the time, some idea of the pace he must have traveled at can be gained from these figures.

Jas. Clark, who for several years has been on the staff of the "Horse World," has been tendered the secretaryship of the American Association of the Trotting Horse Breeders in place of Ted H. Kline, of Cleveland, Ohio.

Wickiup Rancho

Ages ago, when the Indians owned what is now California, they were accustomed to foregather every year in the pleasantest spot they knew and there hold their "Wickiup."

The Indians of one section gathered in one convenient place, those of another locality found another meeting place. Those that frequented the rich and lovely valley where Santa Rosa now stands selected for the purpose the park-like tract of beauty-land near Burke, where there was a creek and a plain, shade trees and sheltering hills, and where the yellow poppies commenced blooming before the shortest days of the year began.

As a matter of fact, what the red men held was a pow-wow or conference of sats, and they held it in some sort of a shack, or wickiup, erected for that especial purpose.

In view of the circumstance that the wickiup and its name long survived the pow-wow it had sheltered, white men who were unskilled in Indian lore got into the habit of calling the pow-wow the Wickiup.

Whence it came about that the name of Wickiup clung to what is the fairest corner of the Santa Rosa valley and is now J. H. Rosseter's Wickiup Rancho, the home of Disguise and Friar Rock, and their respective families of broodmares, yearlings and weanlings—great race horses of days yet to come.

The Wickiup Rancho is a wonderful place to see, and, though still incomplete and unfinished, is nevertheless even now the most beautifully equipped home of the thoroughbred ever contrived in California.

Rich fat land gives abundant pasture to mare, colt, and filly. The rolling hills where the pasture lies help to develop wind and muscle.

Below, on the flat, is the three-quarter mile racetrack, now being graded to an even level, which will encircle the field of alfalfa. Above, on the slopes, above the pastures, are the fields of upland hay.

Orchards and hop gardens dot the country roundabout; on the rancho itself are smooth green lawns, shrubberies, roses and millions of other flowers where the graded and gravelled roads take one hither and yon among the paddocks and stables and various messuages that are built or building on the fair domain of 1,100 acres. And these do not include the other section of 640 acres where the Wickiup Shorthorns and other thoroughbred stock are being raised under similar happy surroundings.

Driving along the State Highway from Santa Rosa, one may see the snug-looking green roofs and red-brown walls of the various Wickiup stables and other buildings nestling in against their backgrounds of oak and other shade trees; but to realize how wonderful they are one has to inspect them from nearby.

The landmark that may be seen farthest off is a building that seems from a distance to be some happily situated and artistically designed country club house of bungalow form.

This comfortable looking and spacious structure with its long facade and double-storied entrance hall is really the training stables; but not until one enters the portals and looks through to the grass-covered patio within the quadrangle does one suspect the real purpose of the building.

Constructed after the fashion of the old Spanish hacienda or the still older Dharmsala, or travelers' resting place, of the Far East, the forty stalls of the training stables are situate around an open turf-clad square, with the offices in front, and the wash house, bath, and other appanages in the rear.

These include the hot and cold shower baths for the horses—for thoroughbred horses nowadays appreciate shower baths the same as do men and women—the cooking apparatus for their mash, and all the other appurtenances and appliances that go to make up what is the veritable **dernier cri** in an up-to-date thoroughbred's menage.

The stalls open inwards on to the patio, around which runs a tan-bark pathway with a plank-rail separating it from the grass plot. Because this pleasant grass plot, smooth and close-cropped as a tennis court, is not meant to be a playground for race horses but a ventilating space, and withal, a solace to the eye.

It is also the exhibition ground on which—on especial occasions—the various horses may be paraded for inspection, or one of them may be led forth for the inspection of critic or connoisseur.

To widen this purpose, a reviewing balcony overhead enables ladies or other visitors to watch such parades or inspections from the safe seclusion of the second floor.

It is not only for the horses that these beautifully equipped stables have their social attractions.

As one enters by the main hallway, the offices on the right are equipped as efficiently and more comfortably than any city offices, with roll-top desks and other appurtenances, plus a racing library and a pleasant array of old English colored racing prints of great charm to the horseman's eye and inexpressible value to that of the collector.

That is understandable, and to be expected. It is when one goes up the stairs at the Wickiuip training stables, and enters the cosy club-room, or office parlor, or whatever it may be called, that is reserved for the host and his particular friends, that one realizes the hospitable intent of the owner of the Wickiup Rancho, and the geniality that is the characteristic of real old-fashioned, dyed-in-the-wool sportsman.

Here is a sun-kissed but unpretentious study of sorts with many windows and rush-matted floor, and a vista over all the lovely dale and the hills beyond which are the natural perequisites of Wickiup. In one corner a lounge, in another a comfortably sized table, in a third a fine open fireplace, "Comfy" chairs and little tables are about; a well-filled book-case, more colored engravings on the wall, a photograph or two and an oil portrait of some turf hero.

The Training Stables at Wickiup

The engravings are gay-looking and brightly colored, fresh as this morning's daisies. But they are worth looking at—all old Fuller prints of a hundred years ago:—Fillio La Puta, that won the St. Leger in 1815, by Sutherland; St. Patrick that won it in 1820; Theodora in 1822; Spaniel that won the Derby in 1839—all contemporary pictures.

Adjoining this pleasant eyrie are elaborately equipped bath rooms on one side, and on the other an equally well equipped pantry where the same discriminating taste that selected the pictures for the walls and the youngsters for the stables below has seen that the lemonades and other potions or rare and alien vintages were arranged with a catholicity of taste and ripe judiciousness as to quality.

To the rear of these is the reviewing stand aforementioned whence one may watch the horses without having to step downstairs.

The Stallions' Stables at Wickiup

Half a hundred yards above the training stables, to the eastward, with the dog kennels between, are the stallions' stables where Friar Rock, Disguise and the Arabian thoroughbred Araby are quartered in princely style.

This, of course, is a smaller structure than the adjacent training stables, but is even more elaborate in its appointments.

There is, to be sure, no extravagant nonsense of "silver feed troughs" or anything suggestive thereof such as one finds feelingly described in magazines devoted to fiction for females. But those thoroughbred sires are royally housed and royally cared for, and look happy as kings in their spacious stalls.

Friar Rock, truly a king, champs and nibbles at strangers, or fondles his groom, or his friend, Superintendent Strate, with kindly relish and abandon. No finer horse, in stall or paddock—no proper peer of Friar Rock—exists in Western America.

As is well known, Mr. Rosseter bought Friar Rock from John E. Madden, who paid $50,000 for him to August Belmont. This great son of Rock Sand is the only horse that won the Brooklyn Handicap, the Suburban and the Saratoga Cup as a three-year-old. He also won the Belmont Stakes, thus stamping himself as the sturdiest goer of his age in America.

The Brooklyn is a mile and an eighth, the Suburban a mile and a quarter, the Saratoga Cup a mile and three-quarters, and each race is open to horses of all ages. The three-year-old who can sweep up three such open events, and take the Belmont Stakes as well, must be pretty much "the horse of a century." And there seems every reason to assume that his victories as a three-year-old may yet be eclipsed by his achievements as a sire.

Friar Rock is a half brother to Fair Play and Golden View (the dam of Rock View). His dam, Fairy Gold, is full sister to the English stallion All Gold, imported by Mr. Harry Payne Whitney, which is now such a great success at the stud. His sire, the mighty Rock Sand, who died in 1915, was a success in the stud from the first, and was also sire of such great racers as Tracery, Rock Flint, Trap Rock, Flint Rock, Coastwise, Vulcain, Rock View and dozens of others. He was winner, among other events, of the Derby, the St. Leger and the Two Thousand Guineas, and was in effect the biggest money winner ever known on the English turf, with a prize list aggregating a quarter of a million dollars.

Wherefore great things may be expected of Friar Rock; and, to judge by the half dozen weanlings of his in the paddock below the training stables at Wickiup, such expectations may be realized on the race track before another two years have sped their course.

As W. H. Rowe, Registrar of the Jockey Club, has stated, Friar Rock is a great horse, and it is likely that his equal will not be found by those who have gone to England and are willing to pay $75,000 or $100,000 for a sire.

The Friar Rocks weanlings at Wickiup are a splendid looking lot of youngsters, and then there are twelve mares in the broodmares' paddock now in foal to the great racer.

In the next stall to Friar Rock is Disguise, the first of the Wickiup sires, and a horse with a great record, but different in many respects from Friar Rock.

Friar Rock is comparatively short in the barrel, deep-chested, of tremendous muscular development, a picture of force and power. Disguise is of the rangier type, long in the barrel, fine-pointed—the living embodiment of speed in a horse.

He has already proven himself a sire of great racers, and three of his yearlings now at Wickiup will be going east shortly to join Mr. Rosseter's racing string at New Orleans. A bunch of his weanlings are in the paddock and fourteen mares are in foal to him at Wickiup.

On the opposite side of the stable from Friar Rock and Disguise is the stall of Araby, the full-blooded Arabian from whom Mr. Rosseter intends to breed a strain of Arabian thoroughbreds. But there are as yet no Arabian mares at Wickiup.

The groom's quarters in the stallions' stables at Wickiup are as remotely different from the groom's stables of olden times as any horseman can imagine. A neatly furnished room, furnished better than many an hotel, with two single beds, affords the modern substitute for the tons of straw at the warm side of the stall that served many a groom of many a good stallion even as recently as the days of Disguise's grandsire.

Comfort and efficiency are the keynotes of Wickiup, and beauty has not been forgotten in making the comfort of man and horse complete.

The broodmares' stables, up the hill, are as cosy if not architecturally so imposing as the training stables. Then there are the weanlings' stables, near the residence of the superintendent, Mr. George H. Strate, which overlooks the level plain that is now being turned into a model three-quarter-mile race track. This track, which will surround a great field of alfalfa, will be railed off outside and inside like any regular track and will have an observation standard starting gate. It is situated more beautifully than any similar track in California and is cosily sheltered by the hills to the northward.

Mr. Strate's residence is a rose-covered bungalow standing in a lovely garden with a vine-clad porch that faces south. When the racetrack now being constructed is in working order, the porch verandah will be carried around to the west side of the bungalow, so as to afford a full view of the entire track.

Below the broodmares' stables are the work-horse stables, the men's quarters, and the kitchens and dining rooms nearby—all built in the same style of architecture, with green shingled roofs and brown-red walls, and all situated in spots deftly chosen for shelter, shade and comfort—models of all that such habitations should be.

In every paddock and every pasture, and wherever horses may have to go, there are concrete drinking troughs that fill themselves automatically from the Wickiup water system, which is supplied from a well 360 feet deep and pumped up into two great tanks on the northern hillside.

There are no oil lamps on the Wickiup Rancho. There is electricity everywhere—for pumping, for lighting, and even, on occasion, for heating, when there is need for haste and no occasion to start the cosy log fires that are the custom in that section of the country.

All over the place now run well graded roads. In front of the various buildings are turfed lawns and shrubberies; most of the main roads are already gravelled and marked off with stone borders, while everyday sees fresh improvements carried out.

An army of workers is kept busily at the various jobs of construction, levelling, improvement and so forth, which Superintendent Strate is carrying out for Mr. Rosseter, and which, during the past year and a half, have transformed Wickiup into a very paradise among ranches.

Under him, as foreman of the permanent staff, Ed Davis looks after men and horses in a manner that matches the spirit of the place, and is reflected in the smartness of everything and the kindliness of every horse and colt and other creature on the great rancho.

At present, apart from its complement of human workers, the inhabitants of Wickiup are the three stallions, Friar Rock, Disguise and Araby, thirty broodmares, seventeen weanlings and seven yearlings. By and bye, when the broodmares have their foals at foot it will be a still braver family. And, later on—when the legislators of this great State realize, as the Federal Government already has realized and proclaimed, that the breeding of thoroughbreds has to be encouraged rather than restrained—we may expect to see in Wickiup one of the greatest race-horse nurseries of America.

MODIFIES PROPOSED GELDING RULE

Frank Hitchcock, steward of the Jockey Club, has amended his proposed rule concerning geldings being eligible to certain stake races by confirming it to three-year-olds and over. The rule proposed now reads: "No gelding three years old or over shall be qualified to start in any race closing seventy-two hours before the day of running, except handicaps and selling races." The changes will permit geldings to start in races like the Hopeful and Futurity, from which they would have been excluded under Mr. Hitchcock's first proposition.

The Colorado State Fair Association is first in the field with the announcement of its racing programme for the 1919 fair, to be held at Pueblo, September 22 to 27. It has opened four early closing events for free-for-all trotters, 2:20 trotters, free-for-all pacers and 2:20 pacers, purses $1,000 each, and late closing events for 2:15 trotters, 2:30 trotters, 2:14 pacers and 2:25 pacers, purses $500 each.

A FAMOUS OLD-TIME STALLION

A great stallion in his time was Sultan, for he was the sire of no fewer than five Two Thousand winners, viz., Augustus (1830), Glencoe (1843), Ibrahim (1835), Bay Middleton (1836), and Achmet (1837). No sire before or since has begotten five winners of Newmarket's most important three-year-old race, four of them being in succession, and with the exception of Augustus—who was the property of Lord Exeter, and a chesnut son of his very good mare Augusta, and much the best of her offspring—all were owned by Lord Jersey. Sultan, too, begot the One Thousand victresses Galata and Destiny; a Derby winner in that very high class horse Bay Middleton; and the Oaks winners Green Mantle and Galata; but he got nothing which captured the St. Leger. Still, to most modern followers of racing and breeding, Sultan's name is probably unknown, except through his sons Glencoe and Bay Middleton; bnt nearly a hundred years since the horse had much fame as a racer. At the Newmarket Second October meeting, on Friday, October 19, 1921, a match for 300 guineaus was run over the Ditch Mile between Lord Exeter's Sultan, 5 yrs.. 8 st. 7 lb., and Mr. Greville's (really the Duke of York's) Banger, 5 yrs., 8 st. 7 lb., 5 to 4 being laid on Sultan, who won by a neck. Regarding this contest, a writer of the time says: "Of all the races since Diamond and Hambletonian, Filho da Puta and Sir Joshua, nothing ever made so great a stir as the race on Friday between Sultan and Banker; and though the match was for only three hundred guineas, yet great sums in bets were depending on it. Only a day's notice of this match was given; had it been made known for a month or two, probably the Health would have been as much crowded as it was on the occasions noticed above. There was little difference as to favoritism; which ever came forward of the parties to back their horse made him a favorite. The event showed their judgment, and the goodness of the horses—a finer race was never run. Banker made the play, which was very severe, so that Sultan dared not come up, or probably could not, till the last moment, when he just won; but with the greatest difficulty. Both horses finished full of running. The spectators seemed almost breathless, so much interest had this race excited, and the horses so well known—Banker from his superlative beauty, goodness, and small size; Sultan from being bred at Newmarket, known to man, woman, and child, also from being what the Yorkshireman calls 'henspeckled,' namely, three white legs and a white face—a good runner for speed, and a very fine animal."

KENTUCKY STATE RACING COMMISSION ALLOTS DATES

The organization of the Kentucky State Racing Commission, which was perfected last Saturday at the office of the commission, brought the three new members recently appointed by the Governor—W. J. Abrams, of Louisville; J. O. Keene, of Fayette, and Thomas A. Combs, of Lexington—into active participation in the legislative duties of that organization.

With Judge Allie Young, of Morehead, the only absentee, the commission returned the former officials, Johnson N. Camden as chairman and S. C. Nuckols, Jr., secretary.

Racing dates for spring of 1919 were granted as follows, the total being 61 days, a curtailment of seven days as compared with last spring:

Lexington, Thursday, April 24, to Thursday, May 8, 13 days.

Churchill Downs, Saturday, May 10, to Friday, May 23, 12 days.

Douglas Park, Saturday, May 24, to Saturday, June 7, 13 days.

Latonia, Tuesday, June 10, to Saturday, July 5, 23 days.

The rule placing a ban on the racing of two-year-olds before April 1 was rescinded in conformation of the act of the Jockey Club with which the rule had originated.

Mr. Keene, Secretary Nuckols and Judge Charles F. Price were appointed by Chairman Camden to revise the rules of racing.

It was voted that the $300,000 raised by the thoroughbred horse interests for the American Red Cross will be distributed by check from the State Racing Commission directly to the 154 Red Cross chapters in Kentucky, according to quotas worked out by the Red Cross officials last spring.

Messrs. John Hachmeister, of Latonia and Douglas Park; Charles F. Grainger, President of New Louisville Jockey Club; Colonel Vennie, of the same association, and Robert L. Baker, of the Kentucky Association, attended the meeting and accepted the dates as satisfactory.

KENTUCKY BREEDERS' ANNUAL SALE

The annual breeders' sale of thoroughbred horses, under the management of the Kentucky Sales Company, last week, drew a large attendance and good prices for high class offerings were the general rule, although most of the varied consignments included nothing to attract buyers. The feature of the sale was the consignment of imported English mares from Henry A. Porter of Tulsa, Okla., in which nineteen head brought $17,400. Major T. J. Carson paid the top price of the sale, $3,025, for the seven-year-old imported mare Tally Ho II., while E. R. Bradley paid the second highest price, $2,500, for the nine-year-old mare Magic Lantern II. Rody Patterson secured the Marcovil—Momentum three-year-old filly Sous Marine for $1,800, and Dr. M. M. Leach, acting for Jefferson Livingston, paid $1,450 for Hannah Pike, the six year old daughter of Beppo.

Mrs. F. G. Hogan and Mischief were sold for the benefit of the Red Cross. The bay mare Statira, 21 years old, was given to W. Hackett.

The English mares Santa Barbara II. and Lucide, which were knocked down to the bids of J. C. Milam, were purchased by Hon. Johnson N. Camden.

THE MELBOURNE CUP

Night Watch, the winner of the Melbourne Cup for 1918, is by St. Alwyne out of Wakeful (not Lady Wakeful). Wakeful herself was only just beaten for the Melbourne Cup of 1903, when she was carrying 10 st., and Lord Cardigan (6st. 8 lbs.) won, Seaport (7st. 2 lbs.) being third. That was Wakeful's last race, and it was as glorious as a victory. She was not put into training until she was four years old, and she may fairly be described as the best mare that ever ran in Australia, for all distances were like to her. She won the Newmarket Handicap of 1901, six furlongs, and the Champion Stakes of 1903, three miles, and that, too, in 5 min. 29¼ sec. Her son, Night Watch, must have matured slowly, for though he ran as a two and a three year old he never won. Last season he started once only, and that time he won, but it was a mile race of no great importance, and there seemed little reason to anticipate that he would ever win a Melbourne Cup. However, the St. Simon on Musket combination seldom fails altogether, and Night Watch has added one more to the many successes of animals thus bred. In this country St. Frusquin (grandsire of Night Watch) did well with Trenton mares, from one of which he got Rosedrop (dam of Gainsborough) and from another Tullibardine, winner of the Goodwood Cup.

St. Alwyne, sire of Night Watch, is by St. Frusquin—Lady Alwyne by Camballo. Wakeful, the dam, is by Trenton—Insomnia, by Robinson Crusoe—Nightmare, by Panic, and traces to Maid of Derwent, half sister, by Flatcatcher, to the famous mare Maid of Masham.

JESSE LEWISOHN'S DEATH TURF LOSS

The death of Jesse Lewisohn November 30th takes away another of the turf's notables. For several years Mr. Lewisohn had suffered from a nervous malady, but he was able to be about and go abroad to enjoy the sport of racing; in fact, many times he has said that it was the outdoor life and the exercise that kept him alive. He was only one of the thousands that have so expressed themselves. The late James R. Keene many times said that he would have died young but for his fondness for racing.

Jesse Lewisohn and his brothers, especially the late Oscar Lewisohn, had been partners in several horses, some of which had notable careers. The deceased spent several years in France and England prior to the war, but since that time has only had racing interests in this country. He was one of the popular members of the turf and a member of all the associations in this locality.

AN EXTRAORDINARY PERFORMANCE

(E. A. Morphy)

One feature of this year's Futurity which seems to have been overlooked by the California press, but was of interest to California breeders, was the extraordinary performance of the Ormondale Colt Purchase—now the property of the Brighton stables—which ran third.

According to the reports in the Eastern papers, the Californian was unfortunate in his jockey. Anyway, he ran backward from the barrier instead of forward when the gate rose, and then, when he turned, his rider took him from third position to extreme outside, losing eight or ten lengths more by so doing. Yet the boy seems to have had a man's job after that to prevent the colt from winning. He had speed enough left to make rings around most of his competitors. W. J. Macbeth hints at the facts very candidly in his description of the race in the New York Tribune.

"Purchase, which had been standing like an old stagehorse at the barrier did not decide to become contrary until the webbing was sprung. Then from the rail position he bolted clear across the track. * * * This bolt on the part of Purchase, if bolt indeed it was, (for diamond has been known to cut diamond, and Jockey Lyke's reputation is no purer than that of his stable connection) cost the Ormondale colt all hope of victory.

* * * "In the first quarter-mile Purchase ran all over the track. When straightened out he showed plenty of speed. He traveled a route much longer than the three lengths which separated him from the winner at the end. There were those who closely watched Purchase suspicious enough to accuse Lyke of indifferent horsemanship, if not worse, in the race. Right or wrong as such suspicion may be, Lyke has none but himself to blame for it."

P. A. Clark's Dunboyne, who won the big race, was admirably handled by Jockey A. Schuttlinger; he carried top weight, 127 pounds, and was a rightly popular winner.

AMERICA LEADS IN BREEDING

For the first time in the history of dogdom, America now leads the world in all breeds. This is because of the war. During the last four years most of the famous European kennels were practically wiped out and the cream of breeds scattered broadcast. As a result lovers of the different breeds are expected to come to this country in quest of the fine blood which is concentrated here.

The Shepherds (formerly the German Sheepdog), Belgians, Airedales, fox terriers and Brussels Griffons are almost a rarity abroad now. When hostilities began entire kennels of these war dogs were turned over to the various governments, and few are left to be returned to their former owners. Many of them were killed in action and others died from various causes in the trenches. They did yeoman work for humanity. With the declaration of peace hundreds of fanciers will endeavor to replenish their kennels, and America is the only country which will be able to help carry out their plans.

THE OLD GLORY SALE.

Nothing could be more encouraging to the optimistic breeder than the big prices paid for colts at the Old Glory Sale last month. In the palmy days of the San Mateo Stock Farm, Palo Alto Farm, and other big farms on this Coast when the get of Guy Wilkes and Electioneer was sent east for sale such prices were not often realized. Never was there a time when twenty yearlings sold for $100, and over at any one sale.

This year's Old Glory Sale differed in its offerings from its predecessors. Heretofore the November sales at New York have been in the main the clearing house for trotters and pacers that were campaigned the current season. This was not the case this Fall.

Horses suitable for next years races were conspicuous in their absence, owners were not willing to take a chance of putting their horses in the sale on account of the meagre supply available to replace them with other good prospects. The result is that every stable will stand pat with its present string, hoping to add to it before the next season's campaign.

At the Sale all horses suitable for racing next year were snapped up at higher prices than have prevailed for some time. Another striking feature was in the increase in the market value in the prices obtained for well made driving horses that are good stylish roadsters. Great as has been the inroads of the auto into the roadster's domain of utility, a prime roadster continues to find a ready market, especially in the South, and, with the ocean lanes open for exportation, the American trotter will find a welcome market across the seas, where not only breeding stock, as was the case before the war, but roadsters suitable for utilitarian purposes will be most salable.

No doubt but that many of the Walnut Hall Farm colts and those from other consignments, including the Laurel Hall and Magowan lots, which passed to their new owners at less than the $1,000 figure will develop into as successful (if not more successful) race winners as the top yearlings of the sale. The point is this: If a breeder wants to place his breeding operations upon a paying basis, if he wants to have the yearlings of his breeding in the $1,000 class at Madison Square Garden, or at any other sale, pedigree and individuality must be supplemented with intelligent marketing methods—educational development, not so much intensive speed development, but intensive education of manners and gait and intensive supervision of the feed box before and after weaning time as well as through the yearling summer.

An even twenty yearlings passed to new owners last week at values of $1,000 and over, the twenty totalling $44,635 and averaging $2,231.75. Ten of these sold for $2,000 and over, totalling $32,425 and averaging $3,242.50.

The roster of the "Thousands Dollar Yearlings" is well worth an extended presentation. The following is the list:

General Knight, b c, by Moko-Sybil Knight. 2, 2:22½, by Prodigal 2:16. A. H. Cosden, Southold, N. Y. $6,025

Miss Em 2:23, b f, by J. Malcolm Forbes 2:08—Mendosa Worthy 2:17¾, by Axworthy, 3, 2:15½. Ben F. White, East Aurora, N. Y. 5,500

Great Excitement, br f, by Peter the Great 2:07¼—Miss Busy 2:23¾, by Clay 2:25. Chauncey H. Sears, Fall River, Mass..... 5,000

Flo Shirley 2:23, br f, by J. Malcolm Forbes 2:08—Real Jay, by Jay McGregor 2:07¼. David T. Arrel, Youngstown, Ohio..... 3,300

Mr. Dudley 2:25¼, bl c, by J. Malcolm Forbes, 2:08—Bourbon Todd, by Kentucky Todd 2:08¾. Brook Farm, Chester, N. Y..... 2,000

Mabel Powers 2:25½, b f, by J. Malcolm Forbes 2:08—Ann Tregantle, by Tregantle 2:09¼. Fred E. Hyde, Hartford, Conn.... 2,000

Peter Stout, b c, by Peter the Great 2:07¼—Mary Allen Stout, by Ondale. H. L. Handy, Springfield, Mass. 2,000

Peter Buskirk, b c, by Peter the Great 2:07¼—Lady Ripples 2:15, by The Tramp. W. H. Hall, So. Willington, Conn. 2,000

Miss Drealise, br f, by Peter the Great 2:07¼—Drealise, by The Dreamer, 3, 2:14¼. Alonzo McDonald, Indianapolis, Ind..... 2,000

Star Shoot, b c, by San Francisco 2:07¾—Silver Silk 2:08½, by Moko. W. H. Leese, Brooklyn, N. Y. 2,000

San Andreas, b c, by San Francisco 2:07¾—Andorra, by Mobel 2:10¼. Ned McCarr, Pittsburgh, Pa. 1,500

Peter Whitlock, br c, by Peter the Great 2:07¼Fan Patch 2:09, by Joe Patchen, p. 2:01¼. Fatherland Farm, Byfield, Mass... 1,450

Odd Marks, ch f, by San Francisco 2:07¾—Patsie Sterling, by Walnut Hall 2:08¼. Walter R. Cox, Dover, N. H. 1,400

Laurel the Great, br f, by Peter the Great 2:07¼—Vie Worthy, by Axworthy, 3, 2:15½. Brook Farm, Chester, N. Y..... 1,300

Native Girl 2:29, bl f, by J. Malcolm Forbes 2:08—Native Ann, by The Native 2:10½. H. L. Handy, Springfield, Mass. 1,300

Swanhilde, b f, by Native King 2:11¾—Sultana Watts, by General Watts 2:06¾. Walter R. Cox, Dover, N. H..... 1,260

Korrina, b c, by Native King 2:11¾—Katy O'Neill, by Walnut Hall 2:08¼. Walter R. Cox, Dover, N. H. 1,000

Peter Stericker, b c, by Peter the Great 2:07¼—Humma, by Bingen 2:06¼. James A. Murphy, New York, N. Y. 1,000

Peter Philemon, b c, by Peter the Great 2:07¼—Zombrewer, p. 2:04¼, by Zombro 2:11. W. L. Snow, Hornell, N. Y..... 1,000

Pafrika, b f, by Peter the Great 2:07¼—Lady Ormonde, by Ormonde 2:08¾. Alonzo McDonald, Indianapolis, Ind. 1,000

A VALUABLE REMEDY

Caustic Balsam, applied at once to any cut or flesh wound, will kill any germ or source of blood poison, and the wound will heal promptly with scarcely any soreness. In these cases, apply without any rubbing, apply as soon as the flow of blood is stopped.

Notes and News

The stallion "Don Ponte" 2:02¼ that was sold by W. G. Durfee to go to Australia is making the season at Windsor, about 35 miles from Sydney. The horse is much admired by the Australians and is doing a good business.

Joe McGuire, who hails from Denver and who has trained and driven harness horses for almost as many years as that dean of the faculty, Budd Doble, is going to retire from the game. All of his horses, consisting of about forty head, will be disposed of at the Chicago sale. The McGuire horses have always been money-makers and the lot to be sold includes such horses as "Braden Direct" 2:01¼, "Red Rock" 2:10 and "Direct Last" 2:14¼.

J. C. L. 2:05½ is one of the best pacers out this season. He is owned by M. L. Woy of Fresno and started in three races at the State Fair, winning them all against good fields, taking the first two in straight heats. Good judges set him down as a two minute pacer.

William H. Ferguson's good horse Healani 56150 by Zolock 2:05¼, dam Queen Derby 2:06½, will stand at Dixon this season.

A. W. Longley will ship his horses including "Pedler Direct" 2:09¾ to Hemet, California, to remain until spring.

The "Baby Doll" raced in the East this year to a record of 2:12½ is a pacer by "Sterling S" and not the trotter "Baby Doll" 2:07½ by "Tom Smith."

No less than thirty-three trotters already in the 2:10 list reduced their records during 1918. This is a record number.

Captain Mack 2:05, the consistent five-year-old pacer which hails from Oregon, has been purchased by Fred Cline, Indianapolis, Ind., from Fred Woodcock of Forest Grove, Ore., the price reported being $5000. Captain Mack is by The Bondsman and out of Bessie L. (dam also of Nifty 2:07¾) by Montana Director, a son of Director 2:17.

Charles Van Passen of Wilryck, near Antwerp, Belgium, a prominent dealer and exporter of Belgian draft horses, makes inquiry through the Belgian consul in San Francisco as to the prices and prospects of being able to purchase first-class heavy horses in California to be imported into Belgium where there is a great shortage of horses on account of the number used up in the war.

Harold Cohen, the well-known horse dealer and prominent member of the San Francisco Driving Club, who enjoyed nothing better than driving his own horses in matinee races, died December 4th. Cohen at different times owned a number of good horses, including Vera Hal 2:05 and Harold C. 2:11.

* * *

Charles James is becoming quite a prominent figure on the trotting tracks in Australia. He is racing quite a large string of horses belonging to a number of well-known owners.

While the record for an individual yearling, $10,300, paid (for Miss Previous) in 1901, was not approached, the November Old Glory sale saw individuals from three different consignments sell for $5000 or over, Walnut Hall selling one for $6025; Mr. Magowan one for $5500, and Laurel Hall one for $5000.

* * *

The mare recently purchased by R. D. Mayes, mention of which was made in our last issue, was not Lady Owens, but Lady Ormo. She was bought from W. G. Baird of Santa Rosa and will be used by Mr. Mayes as a brood mare.

Bert Baker of the San Diego County believes in the future demand for good horses and backs his optimistic view with ninety head in his pastures and keeps raising good ones. He breeds them because he likes them and he is always willing to dispose of a good horse at a reasonable price.

Millard Saunders is no longer connected with the Rosewood Farm, Columbia, Tennessee.

Parties who have permitted highly bred mares to remain idle the past several years now have just reasons to regret that they did not breed them to prominent stallions.

The California pacer, Del Rey 2:03¾, that cost Walter Cox right at $10,000 and was, according to friend Cox, worth every dollar of it had he remained sound, has been pensioned and will be used for light driving by Superintendent Harry Burgoyne of Walnut Hall Farm, in Kentucky.

The California State Agricultural Society has decided not to offer its Futurity Stakes or the Occident or Stanford Stakes this year. The abandonment of these stakes, even should it be but temporary, is a blow to the breeding business in California and is to be greatly regretted.

L. C. Tewes of Waukegan, Ill., is the present owner of Prince Ansel. Prince Ansel 2:20½ was at one time the premier stallion of the Woodland Stock Farm and is now looking fine. He is the sire of Prince Lot 2:07¾, Joseph Ansel (3) 2:12¾, Lottie Ansel (2) 2:14¼, the dam of John Malcolm (2) 2:11½, etc.

At the recent meeting of the N. T. A. and the A. T. A. Boards of Review, in the ringing case of F. E. Holliday of San Jose, Cal., a double penalty was imposed, as he and the mare, alleged to be Nettie H., were expelled both by the National here and the American in Chicago at the same time, he having made quite an extensive circuit all over the country. The mare has been definitely identified as Emeline Dillon 2:07¼. The board ordered that Holliday be expelled and the winnings of the mare be returned for redistribution among the parties entitled to the same. The only National Association track she performed over was at Warren, Pa.

During his entire racing career Willie Durfee has shown himself to be one of the gamest drivers that has fought out a close finish under the wire. He inherits this quality together with a strong constitution to great degree from his sire's side. There is not a younger man for his years than his father, C. A. Durfee, of whom it is said that if he lives to be a hundred he will never be older in looks than fifty, and in capability for work and capacity for enjoyment of the good things of this life he excels much younger men. Willie Durfee put up one of the gamest fights for life on record in the battle royal that he "won by an eyelash," beating the Angel of Death in what looked to be a losing race. He wes taken with a severe attack of tonsilitis which resulted in extensive ulcerations; on the breaking of the ulcers a bad case of blood poisoning set in and for days his life was despaired of. This was still further complicated by a double pneumonia which brought him to the very brink of the grave. As a last resort when his life seemed about to flicker out and when he was too weak to be given an anaesthetic a desperate operation was decided upon. An opening was made through the back into his lungs from which was taken a large quantity of pus. From this time he commenced to rally. He was reduced in weight to ninety pounds, mere skin and bones. He has gradually improved until he now weighs 175 pounds, but his doctor advises him not to take such exercise as driving for a long time. During his entire illness his wife was indefatigable in nursing him and his recovery is largely due to her untiring efforts.

The healthy condition of the market at the present day is evidenced by the fact that the high prices paid at the recent Old Glory sale were brought about by the sparkling individuality of the offerings, and in this connection it is worth while to again recur to some of the high prices paid in the past for juveniles—Mascot (2) for $26,000, Voodoo (2) $24,100, Baron Rose (1) $8,500, unnamed colt (1) by Alcantara—Palo Alto Belle, $8,000, and $7,000 for a yearling out of Atalanta—and remember that in effect they were the result of a fad, as all five, prices totalling right at $75,000, belonged maternally to one family; that of Minnehaha, that made a fortune for L. J. Rose, Los Angeles, Cal.

H. T. Owen of Bakersfield lost his good mare Irene Ayers, in foaling a fine filly foal by Expressive Mac No. 41523. Mr. Owens expected much of this cross, and had entered the produce in the Futurity Stakes.

W. E. D. Stokes, who is convalescing at Lakewood, N. J., from a severe pneumonia attack, expects to be back at his desk in New York before the holidays and give attention to the numerous inquiries from Europe which have already commenced to come to him for trotting stock. With probably the largest collection of broodmares of any breeding farm, the Patchen Wilkes Stock Farm will be in an enviable position to supply the European demand which is beginning to evidence itself.

ST. FRISCO, 2:01¾, DEAD

"St. Frisco," 2:01¾, one of the greatest trotters of the age, died at Billings Park, Memphis, on December 9th. His death was the result of a hemorrhage, apparently from the same cause that brought about the demise of "Lee Axworthy," 1:58¼. "St. Frisco" was looked forward to as a prominent starter in the free-for-all trots during the coming year and great things were expected of him as a sire. His record of 2:01¾ is the champion trotting stallion race record and his campaign the last season shows him to have been one of the most consistent race horses ever seen. Whenever he was beaten it was always superior speed that conquered him, for he never quit trying. He was bred at Walnut Hall Farm and was trained and driven by that great horseman, Ed Geers.

RACING AT FAIRS

(By W. H. Gocher)

In the fifties when the New Englnd fairs began to add trotting races to their programmes, a few objected until they saw the increased attendance and the enthusiasm of the spectators when they had an opportunity to see the contests between Flora Temple, Lancet, Tacony, Highland Maid, Rhode Island, Ethan Allen and the other performers of that period. They then took their places in the grand stand and joined in the applause showered on the flying footed trotters hitched to the old style high wheeled sulkies which remained in vogue until 1892. Springfield, Massachusetts, was the first town to introduce this feature at a fair. It was followed by Hartford, where Flora Temple trotted the first mile to harness in a race over a half-mile track below 2:30. The New York State Fair, during its annual wandering from Buffalo to New York, Elmira, Watertown and other cities between 1842 and 1890, when it was permanently located at Syracuse, also gave races whenever a track was available, the light harness horse at intervals dividing the honors with the gallopers. Other cities also began to add trotting races to their programmes but few of them had very much harness racing until after the Civil War.

As the years rolled by the trotters began to take the lead at all of the state and county fairs, pacing races being rare until the middle of the eighties and early nineties, when trainers began to add hopples to their equipment. After that date the pacers became numerous until of late years they have been awarded almost half of the premiums. For a time the gallopers held their own in the south and at fairs located near the leading racing centers, but they were dropped when the fair managers found that they had to depend on bush horses and selling plasters for their contests. This also became so general that but two fairs in 1918 confined their race programme to running horses.

As long as there was unrestricted betting, the leading owners and trainers paid but very little attention to the "pumpkin shows," and in time the patrons of the latter became a class by themselves, while the courses over which they raced were the preparatory school for many horses which were destined to attract world-wide attention on the mile tracks.

In the early days the Hambletonians, Clays and Champions came from New York state, the Mambrinos and Pilots from Kentucky, the Morgans from Vermont and New Hampshire, the Morrills and Knoxes from Maine, the Bashaws from Iowa and the Hiatogas from Ohio. Their descendants were carried to every state in the union by those who shipped racing stables from town to town and their successes prompted breeders to purchase the best of each breed for reproduction in their respective communities. In a few years, their descendants began to appear in the show rings at the fairs, while many a farmer's son was seen in the sulky at fairs behind colts which they bred and developed over the track at the fair grounds. This personal element made light harness racing popular with the masses, as everyone in the community was anxious to see the local horse or horses perform. Also if one of them made a good showing or proved a winner, it usually resulted in a profitable sale or a trip to other towns where race meetings were being held.

There is also another feature in connection with light harness racing which makes it more popular with the masses than running, and that is the system of heats in which the horses repeat until one horse wins three, or two if the conditions call for it. In them the spectators become familiar with the horses and their behavior when scoring and racing, as well as the drivers, while with gallopers they canter to the starting point, frequently not in front of the stand, rush off at the drop of the flag and are gone before the average spectator has an opportunity to see if the winner is a bay or black. In other words, the spectator gets a dozen thrills in a trotting race but only one in a running event, its principal object being to get quick action for the money. Also the average man does not feel anything like comradeship for a slip of a lad perched like a monkey on the back of a galloping horse when compared with the life long experience of drivers who have followed racing for years.

Light harness racing has a punch that no other form of outdoor entertainments can deliver. For a time the purses were small but they were increased as soon as the fair managers recognized this fact. Also when the crusade against betting was started and Governor Hughes repealed the law under which New York tracks were operating, the light harness horses, instead of being stranded like the gallopers until oral betting was devised, continued on their way, racing for more money and before more people, the number of spectators running from one hundred and twenty-five thousand at Minnesota State Fair to the twenty or twenty-five thousand at almost any county fair on "big Thursday." Many of the driving clubs, which depended on privilege money, passed out of existence at this period but others took their places, a few like the members of the Orange County Circuit giving race programmes which commanded popular support, while others added racing to a fair as was done in 1908 at Hartford, where on Labor Day, if the sun is shining, there are more spectators than were ever

seen at two race meetings over at Charter Oak Park under former conditions.

Racing at fairs is the sheet anchor of the trotting horse breeder. The returns from the show ring and the race track fixes the value of his product. Over seventy per cent. of the meetings each year are given by fair associations and the vast amounts which they have invested in grounds and equipment are a guarantee of their permanent existence, aside from the support which they are receiving from the states in which they are located, while the federal government is also making a move in that direction. Also by comparing their programmes with those who operate without a fair, it will be found that aside from the futurities, with two or three exceptions, they give as much and requently more money for races. It is also a matter of record that in 1918 two of the three $10,000 events offered for aged horses were given by fair associations.

The associations that give race meetings on half-mile tracks are largely in the majority, the returns for 1917 showing that of the 1011 race meetings reported, 965 were contested on the two-lap courses while there were but 45 race meetings over mile tracks and 35 time-record meetings, making a total of 1046 for the year. The race premiums for 1917 amounted to $2,911,586.34. Of that amount $2,268,-017.79 were distributed on half-mile tracks and $643,568.55 on the mile tracks. An examination of the reports of these meetings also show that $1000 purses were given frequently by half-mile track associations, while a few gave $2000, and that at such meetings it required a horse of Grand Circuit calibre to get the money.

Fair managers have also begun to realize that it is not necessary to limit their dates to a few weeks in the fall after the hay and grain has been gathered, as a number of associations in Ohio have been giving for several years successful fairs in August. The Canadian associations in Alberta, Saskatchewan and Manitoba have also been holding their fairs in July and August. In other words a fair with a light harness racing feature can be held any time in the summer or autumn months by confining the exhibits to what can be shown successfully on the dates selected. Stock and industrial exhibits can be made, with ample notice, at any time. This is also true of the racing and amusement features. As for grain, if an early date is selected, the products of the preceding year are exhibited just as they are now even at late fairs. At a summer fair, fruit and vegetables are the only absentees while in their place the management is assured warm weather and sunshine, the two great underwriters of outdoor entertainments.

A POPULAR AND RELIABLE REMEDY

There is no remedy on the market that enjoys a greater degree of popularity than Reducine, and all who have used it are so certain of its curative powers that they have no hesitancy in recommending it, and they learn to rely on it to such an extent that they are never without Reducine within handy reach. Reducine is not only a remedy of merit but is backed up by business methods and enterprise in its management and sale, so that it is becoming not only a tremendous business but one of the most successful patent medicines on the market. The Reducine Company gets out a booklet that contains a lot of valuable information and is of interest to anyone who owns a horse or keeps house. Send your name and address and it will be mailed to you postpaid without charge.

It cannot be too distinctly and forcefully impressed upon the intelligence of every harness horseman that the great need of the hour is the encouragement and stabilizing of the breeding industry.

The whole sport of light harness racing at bottom rests upon it, and if steps are not taken, and taken at once, to assure if the support that it demands, and must have, the future of that sport presents serious problems. The drop in the birth-rate and the increased demand for horses for war purposes have left the country with few good sorts to keep the wheels of commerce turning. Nothing but racing has encouraged breeding for years past, and while champions are probably expected, the fact remains that a goodly number of horses are annually produced and disposed of for utility purposes.

Everyone admits that breeding and racing must be placed upon a firmer basis than it now possesses, but despite this, plans for doing so are very slow in materializing. The great organizations which are the governing bodies of the industry and its interests should forward at this period with plans for the relief of the situation. Horse-breeding is an essential industry, which should be further encouraged, and as it is apparent the rank and file is almost depleted, it is the duty of every owner to breed a mare.

WILD PIGEONS STILL PROTECTED

In the treaty with Canada, wild pigeons, the wood duck, and the little brown and sandhill cranes, are to receive total protection for ten years. As a consequence there will be no open season on band-tailed pigeons or the other birds mentioned, despite the fact that the period of protection afforded by state law has expired.

DIXON DOINGS

Elmo Montgomery is jogging Jim Logan who looks fine as a fiddle. He has a four year old mare by Demonia that raced a mile in 2:10 this year, and he is holding her over for 1919. He also has a yearling trotter by Jim Logan, dam by the Bondsman, a two year old gelding by Jim Logan, and a two year old trotting filly by Cailakin. His horses all look good and are feeling fine. He has five head of colts that he is jogging over on his ranch. He bid in Hal Logan at the New York Sale, and has turned him over to Thomas W. Murphy for the 1919 campaign.

Lou Matavia is a busy man with R. D. Mayes' horses. He is jogging Bon Cres, Verna McKenna, El Paso and a two years old gelding by Jim Logan, dam Remona (dam of Del Ray). He has also a two year old filly by Jim Logan, dam Bally Pointer, by Star Pointer, that he figures on taking up January 1, 1919, with six or eight broodmares, including Miss Nutonio (dam of Mable Trask). He has his hands full.

Louie Carrillo is jogging the stallion Healani 56150, by Zoloc 2:05¼, dam Queen Derby 2:06¼, by Chas. Derby. He is looking good and acts as though a fast mile was in sight for him in 1919.

The two year old roan filly, Miss Helmont, by Allon, dam Helen Kelley (dam of Graustark), by Bonnie McK., is growing to be a fine large mare and sure is a "rairing to go." The three year old pacer that beats this filly in 1919 will have to step lively. The three year old roan gelding, Jim Bergale, by Cavileer Gale 2:08¼, dam Bernice M., by Awhee, 2nd dam Bertha, is jogging nice and should make a good trotter in 1919. They are all receiving plenty of road work and are looking and feeling fine.

ATALENA, THE GREAT BROODMARE OF THE NORTH PACIFIC, IS DEAD

Atalena, by Altamont 3600, died at Portland, Oregon, Sept. 11, 1918. She was 24 years of age, and considering her environments, we can truly say she was a great mare.

She produced fifteen foals, fourteen of which are living today. Her list of performers are as follows:

Hal Boy 2:01, by Hal B., winner of $58,143.50 at 11 years of age.

Lena Patch, black mare, pacer, 2:07½, sired by Oregon Patch, son of Joe Patchen.

Indian Hal, by Hal B., pacer, half mile track, 2:09¼.

Sunny Jim 2:11¼, pacer, by Lattis Boy.

Dan Hal, by Hal B., public trial, 2:11¼.

Arch Light 2:14, by Search Light.

Miss Atalena 2:17, by Bonner N. B.

May Day Hal 2:13¼, by Hal B.

Henry Hal, by Hal B., four year old public mile 2:18, done on 60 days' training.

Three year old filly by Hal B., unbroken.

Two year old gelding by Cavalier Gale 2:08¼, unbroken.

One year old gelding, unbroken, by Patchen Bird, son of The Patchen Boy.

Weanling filly by Patchen Bird, brother to Hal Boy, May Day Hal and Indian Hal, died of blood poisoning.

Atalena died the property of O. J. Brown, Portland, Oregon.

Inasmuch as every foal from this great mare that has been broken to harness has had extreme speed, it is but reasonable to suppose that Henry Hal, by Hal B., and other four unbroken foals will, if trained, have extreme speed, so I may again say, Atalena was one of the great mares.

I got my information about the produce of Atalena from Mr. O. J. Brown. I saw Lena Patch take her record last fall and I am quite sure she could have beaten 2:05 on that day.

Indian Hal has had infirmities for some years, yet he goes out and paces gamely.

May Day Hal has heaten 2:10 in her races quite a few times the past season and looks a 2:05 pacer right now.

Sunny Jim was a sure 2:00 pacer, but conditions were against him.

Henry Hal was hardly broken when he paced in 2:18.

Hal Boy is a household word to all horsemen. And yet after all his years of brilliant racing and honest service, his millionaire owner coldly sent this grandest of all pacing horses to the auction block. I don't today know who Hal Boy's new owner is, but I sincerely hope the man is a kind owner who will not exact Hal Boy's last ounce and again send the little pacer to the auction block.

C. A. HARRISON.

TUTTLE'S ELIXIRS

"It is not the merit we claim for TUTTLE'S ELIXIR which has won its standard; it is the merit which is proven in its use that satisfies the horsemen that TUTTLE'S ELIXIR will do all we claim for it and more too."

As TUTTLE'S ELIXIR for the horse is the standard preparation of its kind so is TUTTLE'S FAMILY ELIXIR the standard remedy for various diseases which afflict the human race. In this Elixir will be found unfailing cure for La Grippe, Pneumonia, Rheumatism, and all joint affections.

KEEPING AMERICA'S HORSE SUPPLY ADEQUATE

(By Wayne Dinsmore)

More than one million horses and a third of a million mules have been furnished to the allied armies since war began. The United States, in addition has bought a third of a million more.

Veteran army officers declare horses and mules are indispensable in war. An adequate supply is vital to the military protection of any nation. Experience has shown the need of one horse or mule to every four men in service.

America's whole agricultural system, which has stood the test of war so splendidly, has been built on maximum use of machinery and horse power. Plowing, discing, harrowing, seeding, cultivating, hay harvest, grain harvest are all handled with the minimum of manual labor and maximum use of horse power. Tractors are supplementing our horses in this work, but the wide fluctuation in the amount of power needed in these different operations, soft terrain, and need for intelligence which will give what is practically self-guidance in many operations, make good horses the solid foundations on which our farm operations rest, and this will so continue.

The maintenance of an adequate horse supply is therefore one of our fundamental needs, both from the standpoint of food production and national defense.

How this may be carried out is our problem. High priced grain, hogs and cattle, have created profound disturbances in our usual agricultural practices. Our supply of horses, such as it was, was sufficient for our needs for the past four years, and the great curtailment in horse breeding which all experienced men know has taken place has not yet affected our agricultural or military effectiveness. It is admitted, however, that it will do so if effective measures to encourage the breeding of good horses be not taken.

The key to the situation lies in the use of good sires. These cost too much to individual farmers to own. Eight mares is the average owned on a good 200-acre farm. One stallion, worthy of service, should have 100 mares per season. To keep a stallion for use on the mares on a single farm is wasteful, as he can and should be available for the use of twelve or fifteen farms. Farmers themselves cannot take time from their own operations to travel a sire, and as it is not profitable to a man to own and travel one sire for public service particularly if he is a good one, we are rapidly reaching a point where men who have good mares have no good sires available.

The same situation has before this arisen in other countries. France met it by granting government subsidies to sires of approved stamp, thereby designating them as suitable for reproductive purposes, and adding enough to the earnings of a sire to justify men in owning fifteen or twenty stallions, which were maintained and traveled in localities desiring their services. This system has been in use in France for more than one hundred years and has given admirable results. Belgium has had a somewhat similar plan in force for fifty years, with the added proviso that the amount of the government subsidy increased each year if the horse was kept in use in one locality for three years or more. This gave to little Belgium a race of horses famous throughout the world, which the greatest horse-thief the world has ever known took to Germany to build up his own horse stocks.

Great Britain has had similar measures in force for some years, and Canada with a similar plan in use for two years past, finds it very successful.

State aid is needed to maintain an adequate supply of horses. It must come in the form of a state subsidy to approved sires. It can be administered through our stallion boards and it will bring back in added wealth to the state one hundred dollars for every dollar expended. It must be State, rather than Federal aid for there are only about twenty states that produce a surplus of horses. These supply other states and foreign countries. As they benefit directly through the added wealth coming within their borders, which goes to the farmers, and through them to the business men in every other walk of life, it is strictly a state limited enterprise. The details of it will be worked out along lines already found successful in other countries. In substance, however, it will provide for an expenditure of about $50.000 per year, which shall be used to pay twenty per cent. of the service fee of approved sires providing:

1st. That the farmers in any given locality first organize a club, with legal responsibility, guaranteeing 100 breeding mares

2d. That they arrange for the lease of a pure bred sire which must pass the approval of a special committee named by the Stallion board, before said lease is valid.

3d. That the service fee shall be $25 per mare, twenty per cent. of which shall be paid to the club by the State.

4th. That only 100 approved sires shall be granted a subsidy during the first four years the act is in force, and not more than three of these in any one county.

PIONEER RACING IN CALIFORNIA

A Few Record-Breaking Events in the Early Days —The Horses and Their Owners

(Special correspondence by Geo. H. Tinkham)

The pioneers who came to California to dig for gold or who came to engage in business, brought with them overland, or imported later on quite a number of high-bred stallions and speedy trotters and pacers.

Mile race tracks were laid off, the Pioneer and Union at San Francisco, the Centerville at Stockton, one at Sutterville and another at Brighton. Sacramento county, and the Louisiana race track across the Sacramento river in Yolo county. A half mile track was laid off at Sacramento in 1859 and two years later it was lengthened to the regulation distance. On this track the principal records referred to in these papers were made.

Running races were the popular sport of the Mexicans and the Americans long before California became a state. Harness races were pulled off as early as 1855. In that year, April, over the Sutterville course Prince McGath a very speedy pacer was matched against Fred Johnson, mile heats, for a purse of $400. Johnson won the race in 2:29 and 2:28, the second being a dead heat in 2:23, if the report is correct. It probably was correct as these two pacers again meeting July 16 on the Union track, San Francisco, mile heats three in five, Prince McGath took the first and third heats but was distanced in the fourth heat; time 2:31, 2:29½, 2:23, 2:28. On the same track two weeks earlier Prince McGath matched against Daniel Webster for $1000, easily took the coin in 2:30, 2:33, 2:38, 2:37; Webster taking the first heat. In September McGath, pacing a five heat race, dropped dead on the track.

One of the leading race horse men was F. M. Parker, agent for the Hazard company, and owner of the pacer Young America and the trotter California Damsel. Parker in June, 1858, matched Young America against Fred Johnson. The race was two mile heats over the Pioneer track. The betting was 3 to 1 on Johnson but America won out in 4:59 and 4:58½. Two years later Parker sold his pacer. The new owner had so much faith in Young America that he matched him against Pacific; mile, two-mile and three-mile heats, $2000 a side each race. Pacific, formerly called John Collier, easily won the money in the mile and two-mile heats and Young America's owner then paid forfeit. The mile heats were paced in 2:29, 2:28 and 2:29. The two mile heats in 5:21½ and 5:21½. Young America was distanced in the third heat and no time was given.

The first state fair was held in San Francisco in 1854, but the first racing took place at Sacramento in September, 1859. It was a pace, best two in three, for a set of harness. The entries were the sorrel gelding Pacific, then seven years old, and the ten-year-old youngster, Daniel Webster. The first heat was a dead heat, so interesting the judges forgot to take the time. Webster was then withdrawn and Pacific paced alone. The reporter caught the time, 2:34 and 2:38.

The pacing time of Prince McGath, 2:23, was not lowered for thirteen years. Then Defiance, by Chieftain, paced a mile in 2:22½.

Among the importation of eastern trotters none were faster than New York, owned and driven by the wealthy tug-boat manager of San Francisco, Stephen Card. Three more good ones were Rhode Island, handled by Charles E. Ellis; Jim Barton, owned by H. R. Covey, then of Sacramento, and Glencoe Chief, owned by Emeroy T. Pease, the sportsman stockbroker. These four famous trotters started in a three in five race December 16, 1857, over the Pioneer track, San Francisco, for a purse of $1000. Many thousands of dollars must have been staked for it was a race for blood. Jim Parton took the first heat. Rhode Island the second and third and Glencoe Chief the fourth heat. Darkness then coming on it was trotted out the following day; New York taking the last three heats, trotting the sixth heat in 2:32 time. There was present about 1000 people and some 200 vehicles.

Jim Barton and New York were taken to Marysville by steamer and entered in a three in five trot at the fifth state fair, August 25, 1858, over a half-mile track. Barton took the first money; time 2:36¼ 2:34½, 2:33½, and 2:35. New York took the second heat. About 2000 persons saw the contest.

Jim Barton, in February, 1860, was sold to Henry Barton for $4000 and entered in the Sacramento fair races of September, 1860. He was beaten by Glencoe Chief. Barton took the first two heats; time, 2:38, 2:34½ and 2:35. The trot took place over the Yolo Grove mile-track. About 1500 spectators were on hand.

Barton came back at the fair of 1863, and driven by Barney Rice, he took three straight heats from Glencoe Chief (Wm. Furguson) and Bob Cole (Dan Dennison) in 2:34, 2:34½ and 2:35½.

The following year saw Barton's defeat and retirement from the turf, he coming in third in a free-for-all stallion race with Red Bird, and the that-year imported stallion, Fillmore. Red Bird took straight heats, driven by Eoff, the best time being 2:33¼.

The famous mare Princess, grand dam of Lou Dillon, 1:58½, was the first California trotter to reach the 2:30 mark. She made this record in a mile race with New York. Sired by Andre's Hambletonian dam, the Wilcox mare, not considered of any speed value, her owner worked her hauling logs. Later he traded off for a second-hand wagon, she came into the possession of D. J. Gage of Chicago. Training the mare he entered her in a number of slow races under the name of Topsy. Then J. W. Teackle of San Francisco seeing Topsy, bought her. Under the skillful training of J. L. Eoff she developed great speed, although then twelve years of age, and January 3, 1858, she was matched against Jim Barton, two mile heats. She won easily. Barton led in both heats to the three-quarter pole and then "caved-in," as the reporter expressed it. It was the best two mile heats of the state; time, 5:17½ and 5:17.

Teakle had changed the name of the trotter to Princess and under this name she trotted a ten mile heat against Glencoe Chief in 29:10¾. Teakle won $35,000 on this race and a trot in mile heats with the same stallion.

Eoff then persuaded Teakle to let him take the mare east and match her against Flora Temple, then the coming speediest trotter in the world. Eoff, although he knew well that Princess was no match for Flora Temple, was a good bluffer and expected to win on his trump card. The two mares trotted many races, but I will briefly notice it.

The first race was June 16, 1859, over a wet, slippery track, three mile heats. A thunder storm had made the track in a very bad condition. Flora Temple won easily in 7:54 and 7:59½.

The following week they trotted two mile heats. Flora, in the first heat on the back stretch, threw a front shoe, cutting her quarters badly and Princess took the heat, trotting the first mile in 2:26. Flora in the second heat was very lame, Princess again winning; time, 5:02, 5:05.

Princess was undoubtedly the second-fastest mare in the world, for I am writing Hiram Woodruff's account of the races. The two mares were sent away on mile heats August 6, Flora Temple winning in straight heats in 2:23½, 2:22 and 2:23½. In the first heat Princess was only a length behind. At Kalamazoo, October 15, Honest Ance, later called Red Bird, was brought into the race; mile heats, three in five. Ance drove Flora very fast to the homestretch, he then tired and Flora trotted easily under the wire in 2:22½. In the third heat Flora Temple nearly distancing Princess, made her record, 2:19½. During the fall the two mares hippodromed the middle west, large crowds assembling to see the wonderful trotters.

Some time later Princess was sold to R. F. Galloway, who breeding her to Hamiltonian produced Happy Medium the sire of Nancy Hanks, 2:04. We see Princess in California again in 1869, then 22 years of age, when she took first money over the Stockton fair track, defeating Alicia Mandeville and Lady Bell, in 2:38, 2:38½ and 2:41¼.

We have noticed the pacers, Fred Johnson, Pacific and Prince McGath, 2:23; the trotters, Jim Barton, Glencoe Chief, New York, 2:30, and Princess, 2:30; and none others will claim our attention at this time except General Taylor, who holds the world's record for thirty miles. He was foaled in 1847 by the Morse horse dam, the celebrated trotting mare Flora, and raised by J. L. Ecyleston of New York. He brought the stallion across the plains in 1854 and sold him to a George Bennett of San Mateo.

The little gray had several owners in his long life, among them Leonidas Haskell of Black Point and J. W. Teakle, at one time owner of Gentleman George, the California Dexter, Princess Damsel. His last owner was A. W. Rhodes, the Sacramento saloonist and politician.

Taylor's first race on January 7, 1857, was not a very creditable performance. He was easily outclassed in a ten-mile dash by Honest John in 30:50. The reporter commenting on the race said, "The old saying that 'blood will tell' was falsified when Honest John defeated his 'blooded' opponent without a struggle."

In the following month, February 21, Taylor made a record. It was in a match race for $2000 a side, thirty miles, with Werner's Rattler, who was sired by Old Rattler in 1850, and he by the thoroughbred, Sir Henry. The race is said to have been closely contested, Taylor winning by only three lengths in one hour and forty-nine minutes.

The General's last endurance race, for he was then fourteen years of age, was with the prince of long distance trotters, Wm. H. Seward. The race of ten miles took place December 21, 1861, over the Willows track, San Francisco. The stake was $2000 a side, W. D. Chapman backing Taylor. The horse was not in first-class condition, but as it was the inauguration of the track estblished by George Treat, Chapman being a good sport, took chances on losing his money rather than disappoint the crowd. Barney Rice driving Seward trailed Taylor, handled by J. W. (Jim) Daniels, until the end of the sixth mile. He then led throughout the race in 30:16¼.

The old campaigner, like many sires of fast trotters, was not speedy. His first mile heat race was at the state fair, 1860. The directors gave a free-for-all stallion race for a purse of $300. The starters were Stockbridge, Chief, Vermont, Signal Rattler and Taylor. The race was won by Taylor in time so slow it was not published.

In the year following, September, 1861, Taylor made his mile heat record. It was a stallion purse, $500, best three in five. Fly-By-Night took the first heat, Stockbridge Chief the second heat and Taylor the three last heats in 2:44, 2:44, 2:45, 2:46¼ and 2:45½.

When nineteen years of age, 1866, he won out in a match race for $500 a side. Taylor to saddle, ridden by his owner; Rhodes and Alicia Mandeville to harness; time, 2:55¼.

In closing the decade let us bear in mind some of the foundation stallions of the California flyers of today. There was Stockbridge; Chief, sire of Abe Edginton, Stanford's famous motion picture trotter; John Nelson, by imported Trustee; Wisconsin Chief, sire of Signal; Mississippi Chief; Tecumseh, the sire of Pat Munt; Primus, the sire of Magdallah; Glencoe Chief, who passed his last days in a Stockton livery stable; New York, the first record breaker; Plumas, the sire of Ashley; Missouri Chief, sire of the past pacer, Nimrod; and Sinclair, sire of Doc Morgan, and he of Occident. The old stallion was burned to death in a Sacramento livery stable fire in 1866.

A FEW REMARKS ABOUT THE RECENT OLD GLORY SALE

Four hundred and twenty-eight horses were sold at an average price of $363.61.

Twenty yearlings sold at prices ranging from $6,025, one for $5,000. The twenty had an average of $2,275 each.

The great yearlings sold by Mr. McGowan and sired by J. Malcolm Forbes, 208, brought the highest average. The Peter the Greats sold for nice prices and the Walnut Hall yearlings sold at a high average. 'Tis true that a few choice bred yearlings sold for small prices, but in most cases these low priced ones were by sires that have not yet produced many top class race winners, and it is stated by many turf writers of note that several of those cheap sold colts may be valuable race horses when developed.

A large number of the colts and aged horses sold were purchased by the brightest men of the New England States, and now that the war is over, these wise Yankees are on the job and out in front getting ready for the harvest they will surely reap just as soon as the fanciers of Europe get home conditions leveled off in their respective localities. A Californian, J. Elmo Montgomery, had nerve enough to bring to Old Glory a consignment of very choice young horses, all sired by Jim Logan, one of the best pacers that ever wore iron, and while Mr. Montgomery did not get any big prices he made a market for his stock, and I just want to go on record by saying that if Mr. Montgomery will have all of his next crop of foals by Jim Logan nominated in all of the Eastern futurities, and will bring them to the Old Glory Sale as yearlings fat and well mannered that Mr. Montgomery's California bred yearlings sired by the great Jim Logan will sell at high prices and have a chance to top the sale, for Jim Logan is a certain sire of speed and is a son of the great Charles Derby. I have on past occasions in my blundering way made suggestions to Pacific Coast breeders to the effect that the harness horse interests should be revived, especially in California, and I will again say so, and hope to live long enough to again see many first class colts bred in California and I also hope to see all the colt futurities of California revived and also to see classes for one, two and three year olds, with satisfactory purses at every meeting in California, and I furthermore hope to see not one but two race meetings at every race track in California beginning with 1919.

And every standard bred stallion in California advertise in the Breeder and Sportsman, for it pays to advertise, and it pays to boom your own state's products, and it will pay every man who owns a good mare in California to breed his mare to one of the many good stallions in your state. Now is the time to be up and doing. What I have endeavored to impress on California's breeders is also applicable to the breeders of the entire Pacific Coast States.

C. A. HARRISON.

"SAVE THE HORSE"

One of the most popular patent medicines for horses that has ever been put on the market is that well known remedy, "Save the Horse." The manufacture of it has grown into a tremendous business due to two things that insures the success of patent medicines; first, merit, then publicity. It is sold with an absolute guarantee and those who have used it are ready to boost it with a testimonial to its merits. Its manufacturers have always been liberal advertisers and with the result of the publicity they have given it and their confidence in its efficacy, has proved to be highly gratifying. Prompt attention is given any inquiries by mail and advice and directions as to its use are cheerfully furnished on application by letter.

MATCH RACING

(By W. H. Gocher)

The present system of racing originated in matches, the first being friendly brushes on the road or turnpikes, followed by wagers on tracks which were built for the contests. In time stands were added so that the spectators, who flocked to the trial grounds, could see the contests. For years they were free to all comers, but finally a thrifty individual began to make a charge to meet the upkeep, while at a later date someone thought of enclosing the grounds and charging an admission fee to meet the expense of keeping the course in condition for racing and to cover the other expenses that go with it. Individuals and clubs also offered cups and plate for special events and when the track management began collecting money at the gate and grand stand, they also offered purses as an inducement for owners to enter and start their horses.

No form of racing in the early days created so much enthusiasm as a genuine match, as was shown by the race between American Eclipse and Henry, which before it was contested became a battle between the north and the south. When the trotters began performing under saddle they adopted the same method as the gallopers and it was continued after races to harness were introduced. In the days of Topgallant, Dutchman, Ripton and Lady Suffolk, if a match was made, it was for money and it was deposited before the horses took the word, or there was no race. These were the kind of events that enthused the old time followers of light harness racing on Long Island, one of the most spectacular being the flash between Pocahontas and Hero over the Union Course in 1855 for $2000, when the pacing queen to wagon distanced her rival in the first heat in 2:17½ and in so doing established a world's record that remained unbeaten to any hitch until 1878

When the horses, however, began to drift from the eastern tracks, there were so few of them in the first flight that their managers planned a series of hippodromes. The first set of these sham battles was staged in 1859 with Flora Temple and Princess as the stars; James D. McMann winning all of them with the little bob-tailed mare, while James L. Eoff, who passed into turf history as "Dismal Jimmy," managed the affair and divided the receipts. He was a California product, or at least he first attracted attention in that state, and was fortunate enough to play a return engagement of the same kind in 1866 with George M. Patchen Jr., when Budd Doble had Dexter. In that year they trotted twelve of those matches, which was also the same number credited to Flora Temple and Princess. Of course Dexter won all of them while "Dismal Jimmy" gathered in his share of the spoil with a horse that scarcely had speed enough to see which way Dexter went if his speed had been turned on in any of the events.

This gave Doble the cue in handling Goldsmith Maid and during the ten years he had her before the public, he took her on several barn-storming expeditions. The first was pulled off in 1869, when she won six races from American Girl. In 1871 and 72, she trotted a series of twelve races with Lucy, both of the mares being owned by H. N. Smith, although the public was not aware of it. In 1874 the perennial Goldsmith Maid came through again in half a dozen races with Judge Fullerton, while in 1877 she made a tour of the California tracks with Rarus.

By this time the public began to have doubts in regard to the genuineness of trotting turf matches, and the series which W. H. Crawford planned for Jay-Eye-See and Phallas, with other horses, when he was managing the Case stable in the early eighties, did not improve matters. Still a few of them were genuine, although their value was nearly always multiplied by two or four before the public was invited to see the contest. On this trip Jay-Eye-See defeated the old champion, St. Julien, over Fleetwood Park, New York, while he also defeated Majolica at Pittsburgh and Cleveland. At Rochester the clever people from Wisconsin struck a snag when they started Phallas against Trinket. The latter was then being trained by John E. Turner and on the day of the race he gave J. I. Case $500 to put on Phallas for him. After that no one could get a ticket away from the Case family. Those who were in with Turner took the other end and as everyone knows, Trinket won in straight heats. It was one of the best set traps ever seen on a trotting track, as Turner had Trinket up to record form and no one knew it but himself.

In 1885, Phallas started in a real contest at Cleveland, on July 4, when W. B. Fasig succeeded in bringing together that formidable representative of the Dictator family and Maxey Cobb, the two champion stallions. The bills stated that the race was for $15,000, but whether it was or not does not make any difference, as it was a battle royal until Maxey Cobb showed the white feather in the second heat. The time was 2:14, 2:15¾ and 2:20¼, at a period when the stallion record against time was 2:13¼.

In 1889 there was another genuine sporting match on the program at Lexington, Ky. That year A. L. McCrea, Jr., of Gouverneur, N. Y., offered to match the yearling filly Stamina, by Patron, against any foal of the same age in Kentucky for $2,500 a side. Bowerman Brothers accepted the challenge and named Axminster, by Wilton. McCrea also went to Kentucky to race them and won in 2:44¼; three days after Stamina defeated a couple of other youngsters in a purse race for $750.

Since that time match races for large amounts have not been very numerous, as class races and early closing events take the most of a horse's time, while owners are not disposed to risk the amount required to bring two good horses together in an event in which one of them must lose half of the wager. C. A. McCully, however, succeeded in 1901 in bringing together two real champions when he had Cresceus and The Abbott take the word for $12,000 at Brighton Beach.

They were race horses of different types, Cresceus being of the bull-dog variety that went away from the wire with the whizz of a cannon ball and finished with the throttle wide open without ever knowing where the wire was. The Abbott, on the other hand, wanted to be eased away with a silk glove and when under way had two minute speed for the balance of the trip. All New York was out to see them go. It looked like another American Eclipse and Henry Clay. On the first trip they raced like trotting machines, Cresceus winning in 2:03¼. In the second, Cresceus shot away true to form. The clip made The Abbott leave his feet and as he broke his check before getting back on his stride, he was distanced, Cresceus winning as he pleased in 2:06¼. Twenty minutes later he trotted another mile in 2:05.

The last trotting match for big money was decided over Charter Oak Park at Hartford, when Lord Derby and Boralma met on August 2, 1902, for $20,000. Boralma won the first heat in 2:08 and went amiss in the second, which Geers won with Lord Derby in 2:09½. Two more heats were trotted by Lord Derby in 2:18¼ and 3:44, in order to comply with the terms of the match, but very few people remained to see them. Since that date two record breaking matches were staged at North Randall, Ohio, the first being between Hamburg Belle and Uhlan on August 25, 1909, when the daughter of Axworthy and Sally Simmons defeated the Bingen gelding in 2:01¼ on the first trip and distanced him in the second in 2:01¾. This is also the fastest two heat race ever trotted, while the time made in the first heat has never been equalled in a contest by a trotter. W. J. Andrews drove the winner and he also had the mount behind Lee Axworthy when he defeated Peter Volo over the same course in 1916. Both of them were then in their four year old form and up to that time, Peter Volo was unbeaten. He won the first heat in 2:02 but lost the next two in 2:03¼ and 2:04¼. Peter Volo retired from the turf with the mark that he made that day, while Lee Axworthy trained on to a record of 1:58¼, being the first trotting stallion to enter the two minute list. His death on November 6 cost the trotting turf the services of one of the first champions, whose breeding was equal to his showing under the acid test of the race track.

MURPHY

Just as a straw shows which way the wind is blowing, the small acts of a man who has been successful in his profession make an index for his character and his method of doing business. This was aptly illustrated at Hartford, Conn., in 1917, during the Connecticut Fair, so far as Thomas W. Murphy was concerned. The free for all pace did not fill that year and as W. R. Neil, who had leased Russell Boy, did not have an engagement for the horse, he was anxious to arrange a special from which he would receive sufficient money to cover expenses for the week. The same state of affairs existed at Poughkeepsie, and in order to round out its program the association put on a race between Russell Boy and Butt Hale. It proved a procession with the former in front and as Butt Hale had won a five-heat race at Hartford on Labor Day, it did not seem advisable to start him again until Murphy said that if the event was made mile heats, two in three, instead of three heats, he was satisfied that Butt Hale would keep Geers' pupil busy. When the race started, the spectators settled themselves in their chairs or on the bleachers, satisfied that it was going to be a one-sided affair in fast time, but when Murphy closed with the flying leader in the stretch and was beating him until their sulky wheels rubbed and Butt Hale made a break, there was a buzz in the stand which showed that everyone expected that Murphy was going to put something over on Geers. The flash came in the second heat when the Senator Hale gelding whisked by Russell Boy in the stretch and won amid a volley of cheers in 2:02¾, the record which he carried with him to California later in the season and which he is not very apt to reduce. This made a third heat necessary and Geers, seeing that he had a Tartar on his hands, sprinted away from the word at a two minute shot and never let up on his mount until he was back at the wire. After the race Murphy was asked why he made such a desperate effort to win the second heat when the event was limited to two heats and each horse was receiving the same amount for the race. He replied: "You do not suppose I would let Geers have a heat so long as I could win it," and he further added, "If we had not rubbed wheels in the first mile, there would have been only two heats and Butt Hale would have won both of them." This is the spirit that prompts owners to keep Murphy's stable overflowing with racing material and induces them to purchase high priced colts and aged horses for him to race.

DOBLE

On October 10, Budd Doble passed pier seventy-seven on his journey through life. The return of his birthday found him under the palm trees at Los Angeles, California, in the enjoyment of good health, which he has been favored with for many years. To the present generation of race-goers the name of this man is comparatively unknown, as he has not raced on the eastern tracks since he came over the mountains with Kinney Lou in 1903. There was a time, however, when his name was on every lip just as Geers, Murphy, and Cox is today. Also during his career, which covered over half a century, Doble established a record that has never been, and no doubt never will be equalled, by reducing the world's record for trotters three times with Dexter in 1867, Goldsmith Maid in 1874, and Nancy Hanks in 1892. Dexter cut the 2:19¾ of Flora Temple two and one-half seconds when he trotted in 2:17¼, and Goldsmith Maid reduced his mark three and one-quarter seconds when she reached 2:14, while Nancy Hanks made the greatest cut of all when, thanks to the advent of the bike sulky, she moved the 2:08¾ of Maud S. to 2:04. The list of champions from Lady Suffolk, 2:29½ in 1845, to Uhlan, 1:58 in 1912, shows that no other man ever drove more than one and at present it is a difficult matter to tell where the next one will come from, although for a time it looked as though White had a chance with Lee Axworthy in 1916 when he trotted in 1:58¼.

It is also a pleasure to look down the long, long trail of the old Centerville course on Long Isand in 1861 when Budd Doble first attracted national attention by defeating Lancet to saddle with Rockingham in 2:24½. That was fifty-seven years ago, while at the time he was but nineteen years old. Doble's skill in the saddle and sulky in this and subsequent events with Rockingham and George M. Patchen, with which he defeated General Butler, ridden by Dan Mace, at two mile heats, prompted Hiram Woodruff to recommend him as trainer and driver of Dexter when that brilliant advance agent of the Hambletonian family of trotters passed out of his stable. With him Doble also earned the honors to which the New England poet Oliver Wendell Holmes referred in 1876 in his trotting poem, "How the Old Horse Won the Bet," when after mentioning old Hiram and Dan Pfeiffer, he said:

> "With them a third—and who is he
> That stands beside the fast b. g.,
> Budd Doble whose catarrhal name
> So fills the nasal trump of fame."

and it certainly did fill it at that time, as when Dexter was retired in 1867, he began his great work with Goldsmith Maid. It was continued for ten years during which the little bay mare earned more money and performed before more people than any horse that ever lived. She was the whale of the light harness racing world, and while Maud S., Nancy Hanks, Alix, Uhlan, and hundreds of others trotted faster, none of them can ever take her place in turf history. Doble made her, while with Nancy Hanks he only continued the work of Ben Kinney, and with Dexter, completed the preliminary training of Hiram Woodruff.

During his long career Budd Doble trained and raced many splendid trotters and pacers, such horses as Monroe Chief, Sam Purdy, Bonnie McGregor, Monbars, McDoel, Jack, Arrow and Ed Annan being in the number. All of them are now, however, practically forgotten, except by those who enjoy looking up the back crosses in the pedigree of successful performers, but so long as light harness racing has a place in turf history, his work with Dexter, Goldsmith Maid and Nancy Hanks will endure. There is also another sprig of fame linked with the name of this pleasant old gentleman, whose never failing courtesy and kindness toward his associates is still remembered, and that is that no one ever had a doubt but what the horse he was riding or driving was out to win.

CONSOLIDATION N. T. A. AND A. T. A.

The most important development at the semi-annual session of the National Trotting Association's Board of Review at the Murray Hill Hotel recently was the official announcement that both parent harness ruling powers have favorably considered the suggestion of the breeder's committee pertaining to the consolidation of the two racing organizations by the appointment of committees to a meeting in a future joint session, as was requested through A. H. Cosden, chairman of the breeders' committee at its session November 22nd.

In making the announcement Mr. Gocher said that for the present no definite notice can be given about the date and place of this joint session, that matter no doubt being left to the convenience of the three separate committees. The official announcement and what was heard on the side at the Murray Hill Hotel lobby, convinced horsemen present that both the National and American Trotting Associations, while ready to discuss the matter, yet will reserve final enactment to their respective congresses.

It is announced that the American Association's board of appeal at its session had pursued exactly the same course by leaving the question to its congress, and appointing a committee to meet in session as requested.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Sportsmen's Row

California prohibits the sale of aigrettes, birds of paradise and goura or mumida.

J. V. O'Hara, of Vallejo, Cal., is responsible for a new invention of aid to duck hunters. It is a decoy that wiggles its tail and dives like a real duck. The "bird" is manipulated by means of a wire from the shore.

Wyoming is the only State that permits sheep hunting. Four Canadian provinces also permit sheep hunting.

The killing or capturing of migratory birds between sunset and a half hour before sunrise is prohibited under Federal regulations.

Lead is a commodity that came into its own during the war. There is a scarcity at this time. To relieve this the trapshooting clubs have been requested to mine their grounds.

In a bulletin issued by the United States Department of Agriculture we are told that "Fewer game laws were enacted in 1918 than in any year since 1900—about 50 laws having been passed. States on the honor roll are Kentucky, Georgia and Mississippi. No game laws were enacted in these States."

The dam at the mouth of the Russian River below Duncan Mills, is now open. The weight of the water backs the dam at extremely low tides and causes it to wash out. Steelheads can now go up to spawn and fishing is excellent.

Lynn Bogue Hunt, the artist, stands supreme in America today as our greatest painter of game birds. The Remington Arms UMC Co. have just issued a new calendar designed by Hunt in which he has outdone his best previous paintings. The scene represents the golden eagle attacking a Canada goose. In conception, action, draftsmanship and in color it is superbly true to life. The calendar is a fine reproduction of a great painting and will be highly valued by sportsmen throughout the world, and those who are successful in getting one before the supply is exhausted will be fortunate.

PRACTICAL VERMIN TRAPPING FOR SPORTSMEN

A steel jump trap, mounted on the end of a pole, is one of the most effective means of combating hawks, owls and crows, in their wholesale destruction of wild life, the game species particularly. Every sportsmen's club should see that a large number of these traps are maintained on every high, cleared place in the best game cover in the surrounding country. Farmers on whose lands these traps are placed would undoubtedly be grateful to those who put them there, as they suffer heavily from the depradations of these creatures on their poultry.

It is useless to place these traps anywhere except on high, cleared places, as it is only to such spots that these species of vermin resort, in order to make a survey of the country, preparatory to descending upon their prey.

The pole should not be less than 5 feet in height, 8 feet is probably better. Attach the trap to the top of the pole with a piece of common stovepipe wire, using a pair of pliers in fashioning the wire into a staple. It is not necessary to point the ends, as these will go readily into the wood without sharpening.

The wedge at the end of the chain, attached to the trap, should be driven into the pole so far down, that the victim will be unable to get back to the top when he is caught. His struggles will free the trap from the grip of the staple, as soon as he is taken, and he will hang, head down, from the trap thereafter.

To poles, more than 5 feet in height, cleats should be attached, so that they can readily be reached for the placing of the traps.

A common error, among those using traps in this way, is to neglect them. This is almost as bad as not using them at all. Frequent inspection should be made and they should be kept well oiled, to prevent deterioration.

Experience seems to have shown that a No. 1½ jump trap is the proper size to use for this work, as the feet of certain species of hawks are too large to make the No. 1 absolutely certain in action.

WOULD DECREASE THE DUCK CROP

Steps have been taken by interested parties to drain the water from both the Klamath and Malheur reservations, to make the land available for agricultural use. The resulting gain is more than doubtful, while the loss would be a most serious one, not only to Oregon but also to the other Pacific Coast States, owing to the fact that these two bodies of water are the greatest inland breeding resorts for wild fowl remaining on the west coast. To destroy them would have a seriously detrimental effect on the future of the wild fowl of this region.

The continual progress of draining operations, whereby water is drawn from marshy tracts and shallow lakes and the land is devoted to agriculture, is rapidly cutting down the remaining feeding grounds for wild fowl. For this reason every effort should be made to retain a few specially desirable natural resorts for wild fowl in various parts of the country. Failure to do this will result in a decrease of our wild fowl resources, which may occasion far more loss than the agricultural value from these tracts will offset.

ART OF WING SHOOTING

(By Tom Marshall)

The art of wing shooting was taught at an early date, when feathered game abounded in this country in such unlimited numbers that a bag limit was an unheard-of possibility, and a closed season was a monumental joke.

Sportsmen, during that period, did not contemplate the ultimate disappearance of those feathered aces of the air, neither was the marked decrease due to excessive bags killed by the hunters. The march and encroachment of civilization, the cultivating and reclaiming of swamp and pasture lands, the cutting off of the timber and replacing of rail and hedge fences by the land-conserving barbed wire, eliminating in a great measure the nesting, breeding and resting sanctuaries, has been the real cause of game disappearance.

In some instances the use of modern firearms and ammunition has been cited as one of the reasons. Protective legislation, the enactment of stringent state and county laws, governing the season and bag limits, are keeping pace with improvement in firearms. It makes no difference what weapon is utilized in killing the bag limit if the laws are respected as regards excesses. It is positively the man behind the gun who is responsible for the killing of game, as a field novice is never destructive of wild life.

The gradual disappearance of game has forced the would-be wing shot into other channels for experience and practice. The inanimate target, upon which there is no closed season or bag limit, manufactured from pitch, clay and whiting, moulded into the form of a four-inch saucer, to be thrown from a trap a distance of approximately fifty yards, at a diversity of angles, in flight very much resembling a bird upon the wing. This flying object is to be crushed or broken in mid-air, with a restricted load from a twelve gauge gun. This "piece de resistance" when shattered by an aspirant for wing shooting honors, gives all the sensations and thrills experienced afield, when in pursuit of those feathered beauties; the only absent pleasure is the culinary finale.—Sportsman's Review.

THE CREED OF A SPORTSMAN

(By Zane Grey)

Let me pause in these momentous days and think with wonder and reverence how the spirit and activity of the American pioneer hunters and fishermen have given us the American soldier—that splendid type of the land of the free and the home of the brave.

I want my boy and his comrades and the boys of the future to receive this heritage of gun and rod. It is a heritage of the open, which now must be idealized to a love of nature and a thoughtfulness for the meaning and preservation of life.

Feeling this, I record my unalterable belief that a sportsman should—

1. Never in sport endanger human life.
2. Never kill wantonly or needlessly or brutally.
3. Obey the laws of State and Nation, work for better laws and uphold the law-enforcing authorities.
4. Respect the rights of farmers and property owners and also their feelings.
5. Always leave seed birds and game in covers.
6. Never be a fish-hog.
7. Discourage the killing of game for commercial purposes by refusing to purchase trophies.
8. Study and record the natural history of game species in the interest of science.
9. Love Nature and its denizens and BE A GENTLEMAN.

SHOOTING AT THE SHELL MOUND RANGE, OAKLAND

For the second time in his career as a shooter, Louis Ericksen has been crowned king of the Shell Mound Pistol and Rifle Club. The ceremony took place at the annual king shoot and banquet. This is the first time any member has won the medal twice. To secure permanent possession, the trophy must be won three times.

The special bullseye on the fifty-yard range was won by Al Thompson and on the 200-yard range by C. W. Seely.

O. Lillemo won the pistol championship with a score of 909, and C. W. Seely the rifle championship with a score of 2189.

Prize winners for the year and their scores:

200-yard rifle 25-ring target total, best ten shot scores during the year:

Class A—C. W. Seely 2189, A. Thompson 2107, E. Schierbaum 2102, K. O. Kindgren 2079, L. Ericksen 2077.

Class B—H. W. Kleinenbroich 1995, R. W. Ballard 1918, Chris Otten 1843, O. P. Petersen 1808.

Class C—T. Johnson 1870, A. Hartmann 1869, B. Brunje 1799, R. Santos 1785, G. R. Hauser 1769.

50-yard pistol range, 10-ring standard American target, best ten shot scores during the year:

Class A—O. Lillemo 909, C. W. Seely 894.

Class B—Alex Hartman 872, L. Ericksen 855, A. Thompson 813.

Class C—William Guild 806, Captain H. W. Gaetjen 776, O. P. Peterson 752.

Indoor rifle contest, 75 feet, 25-inch target, reentry contest, best ten targets to win:

Class A—A. Thompson 1200, W. A. Siebe 1195.

Class B—L. H. Delavergne 1134, R. Santos 1128.

Prize winners' special bullseye contest, 200-yard range, best three centers during the year, score by points one hundreds part of an inch from the dead center:

C. W. Seely	90½	A. Thompson	120½
E. Schierbaum	104½	K. O. Kindgren	124
L. Ericksen	111	L. S. Hawxhurst	129
F. W. McLaughlin	113½	T. H. Johnson	157½
R. W. Ballard	118	O. P. Peterson	169

Prize winners' special bullseye contest, 50-yard range:

	Total		Total
A. Thompson	20½	O. Lillemo	34½
F. P. Poulter	22½	L. Ericksen	35½
L. S. Hawxhurst	23	C. Otten	38½
E. Schierbaum	24	R. Santos	45½
H. Klienenbroich	29	T. H. Johnson	48

Plans for next season are very promising, as the club expects to donate $1500 for prizes for pistol and rifle shooting.

GOLDEN STATE COURSING CLUB ANNUAL MEET

At the Merced Coursing Meet, San Toy, from the Wickiup Kennels, won the California championship cup and $500 stakes in the final match on November 24th, defeating G. W. Heintz's Oakland Beauty. The same hounds were matched in the rundown last year, when Oakland Beauty beat San Toy. Oakland Beauty gets $150 for runner-up, and $125 each was won by Dr. Fred Clark's King F. and Roy Avery's Kildare for third and fourth place respectively.

The California Futurity was won by Davidson and Pritchard's Oakland Lass, which defeated J. M. Coleman's Vallejo Boy. This gives the winner $300 and the El Capitan cup. San Toy is pedigreed by Duke of Wellington and Jonella. Oakland Lass is the puppy of Alfred M. and Mazy.

Crowds attended the coursing each of the four days of the meet. Coursing men declare the meet exceeds last year's success in point of conditions of the grounds, while hares were found plentiful as ever. The club plans to stage the third annual meet at the same place.

OH! HOW THAT MAN CAN SHOOT!

The resourcefulness of the physically handicapped man is going to be brought home to us much more now as the wounded and maimed soldiers are invalided home from Europe. Men with lost fingers, arms and legs are going to do things that those with all their natural members do, and do them as well. We have been used to seeing civilians, who have been unfortunate in this manner, inclined to give up, but there is a very determined exception in Decatur, Ill., in the person of H. W. Cadwallader, the local representative of the Peters Cartridge Company. Since Cadwallader lost the sight of his right eye, he continues to shoot from his right shoulder but uses his left eye. He has a special rib set about two inches to the left of his regular rib on an Ithaca Trap Gun, so he can sight over it with his good eye. "Cad" couldn't shoot with much accuracy at first after making the improvised sighting arrangement, but he stuck to it, and during the last four shoots he has participated in, he has broken 540 out of 550 targets, an average of 98 1-5 per cent. This is a world's record for a man shooting under such conditions. It only shows what a man with determination enough to stick to a game can accomplish.

TRAPSHOOTING GROUNDS GOOD MINING

Where clay targets are trapped week after week for years the ground in front of the traps is well worth mining. After three years of shooting over the traps of the duPont Club in Wilmington, Del., the grounds were mined and 23 tons of lead were gathered. One year later the grounds were again mined, and again with good results. Several years ago the grounds of a gun club in Columbus, Ohio, were mined and 26 tons of lead were taken out. On the Columbus operation each 60 pounds of earth gave up one pound of shot.

The number of pounds of lead sprinkled over the ground for every 1000 shells loaded with 1¼ oz. of shot fired, is shown in the appended statistics:

Shots Fired	Lbs. of Lead	Shots Fired	Lbs. of Lead
1,000	78.125	60,000	4887.50
5,000	290.625	70,000	5568.750
10,000	781.250	80,000	6250.00
20,000	1562.50	90,000	7031.250
30,000	2343.750	100,000	7812.50
40,000	3125.00	250,000	19,531.25
50,000	3906.25	500,000	39,062.50
		50,000,000	3,960,250.00

NEW FEDERAL REGULATIONS

Amendments to the Migratory Bird Treaty Act regulations recently announced by the United States Department of Agriculture include, among other things, the removal of the limitation on the number of birds that may be transported within a state during the federal open season. The export of migratory game birds is limited to two days' bag limit, during any one calendar week of the federal season. Sportsmen must comply with state laws, if they further restrict the shipment or transportation of migratory birds.

Another amendment permits migratory waterfowl, reared in captivity, to be killed by shooting during the respective open seasons on such birds. Their sale is also permitted, subject to state laws. After March 31st, 1919, however, such waterfowl, killed by shooting, can not be sold or purchased unless each bird, before attaining the age of four weeks, shall have had removed from the web of one foot, a portion thereof in the form of a "V," large enough to make a permanent, well-defined mark, which will be sufficient to identify it as a bird reared in captivity.

An added regulation provides for the issuance of permits, authorizing persons to sell migratory game birds lawfully killed and by them lawfully held in cold storage on Juy 31, 1918; such birds may be sold under permit until March 31st, 1919.

Another new regulation makes it very plain that none of the regulations made by the federal governments gives license in any way, to anyone to take, possess, sell, purchase or transport migratory birds, contrary to the laws of any state, territory or district, made for the purpose of giving further protection to such birds. This has been done in any effort to remove, once and for all, the confusion that has heretofore existed in instances where, for example, a shorter open season on a species of migratory game birds was provided by a state than that named by the federal government. In such instances, the state law is paramount, of course.

WHY NOT BREED QUAIL AND GROUSE?

All naturalists and all sportsmen know that it is a very easy matter to introduce grouse and quail on protected areas and quickly to make these splendid foods so plentiful that they could be sold in the markets as cheaply as the European grouse and partridges are sold in the foreign markets, says a writer in the Game Breeder.

The pheasants easily are reared in big numbers and since the laws were amended a few years ago permitting game breeders to produce pheasants without fear of arrest the pheasants have become so abundant in many places that it will be no longer necessary to send money abroad to purchase them.

Why should American breeders be compelled to send thousands of dollars annually to Mexico for small quail when the larger Northern birds easily could be produced on American farms in sufficient numbers to supply the demands of all those who wish to purchase quail for breeding purposes, for sport or for food?

It seems nonsensical for the laws to say that money can be sent to Mexico for quail just as it was sent a few years ago to other foreign countries in payment for pheasants.

Quail shooting has been ended, probably forever, in many States. Some quail survive in parts of these States, but they are of no value either for food or for sport and they are not of any appreciable value as insect destroyers since there are not enough of them.

A little spraying of the plants will do more good in a few minutes than the few quail which survive will do in a year. Granting that the quail are beneficial to agriculture, why should not the State permit and encourage the farmers to make and to keep them profitably plentiful? Why encourage the breeding of fish and prevent the production of quail?

Why should a State game department or a State Legislature persist in being nonsensical?

Everybody Got the Limit of Ducks at Alviso

IS THERE ANYTHING YOU DESIRE TO KNOW ABOUT TRAPSHOOTING?

Trapshooting will be the greatest of all outdoor sports in 1919.

Before the war there were a half million trapshooters. Inside of another year the number of trapshooters should climb into the millions, for every man who wore khaki is a potential trapshooter.

There are 4000 gun clubs in the United States. As the boys come home many clubs will be given renewed strength. Many new clubs will be formed. There will be shooting clubs where guns heretofore were a curiosity.

The Breeder and Sportsman, through its expert on trapshooting matters, Mr. Peter P. Carney, Editor of the National Sports Syndicate, will cheerfully answer all questions pertaining to trapshooting, its rules, the proper method of organizing, equipping, and conducting a club, the laying out of traps, how to conduct a shoot, etc. If there is anything you desire to know about the Patriotic Sport drop a line to the Breeder and Sportsman and the information will be forthcoming.

MORE BIRD TREATIES PLANNED

At the recent annual meeting of the International Association of Game and Fish Commissioners, held in New York, a resolution was introduced by Mr. J. H. Wallace Jr., commissioner of the Department of Game and Fish of Alabama, requesting the president of the United States to propose treaties with Mexico and Central and South America for the protection of birds which pass from this country to those, in the course of their annual migration.

This resolution was adopted and active measures will undoubtedly be resorted to in carrying out the proposal.

Mr. Wallace and Mr. J. Quincy Ward, president of the International Association of Game and Fish Commissioners, have both been assured by the American Game Protective Association of its interest in this movement, and it is practically certain that every other organization having to do with the conservation of wild life, will enter heartily into the campaign that has been started.

Fortunately the resolution adopted by the Senate, in the authority of which the treaty with Great Britain, providing for the protection of birds that pass between this country and Canada, was negotiated, is general in its terms and permits the negotiation of further treaties with any country whatsoever. In view of this fact, no immediate legislative action will be necessary. Rather must first steps be taken in co-operation with and under the sanction of the department of state. It is probable that the Mexican authorities will be sounded informally, with regard to this matter, before any official action is taken. If they prove receptive, active steps will be taken to bring the matter to a head, and once the treaty is negotiated, it will be up to the Senate to ratify it.

The principle of the protection of migratory birds by treaty is now so well established and Congress is on record in favor of it, by such a large majority, that it is improbable that any serious objection will be met with, once the terms of the treaty itself are agreed upon by the two countries.

After ratification, it will be necessary to pass an enabling act, so as to make effective the provisions of the treaty. This would, of course, involve a campaign before Congress. Here again it is felt that the passage of such a measure would be comparatively easy, for the reasons stated immediately above. This is a movement that should appeal to every sportsman in this country, and it is hoped that if occasion arises in the future, to call on them for help, they will be as effective in action as they were with regard to the Canadian treaty.

DO YOU KNOW

(By Peter P. Carney)

The hawk can fly 200 miles an hour unaided by the wind?

500,000 shotguns are manufactured in the United States yearly?

The Boston Red Sox have never lost a world's baseball series?

Trapshooting is the greatest of all outdoor sports and will be even greater following the war?

Hand grenades were used in 1427 in the siege of Casolmaggiore?

There were only 500 gun clubs in the United States in 1900 and that there are 4323 today?

The United States Government distributes weekly 1,000,000 clay targets to the aviation schools for use in shotgun shooting?

More money is invested in trapshooting than in any other sport?

Governors Whitman, of New York, and Neville, of Nebraska, have asked the gun clubs of their States to get the "draftees" out and instruct them in the art of shooting prior to their induction in the army?

Trapshooting equipment is to be found in every aviation school in this country and France and that Uncle Sam's air men are taught to shoot with the shotgun before flying?

The Grand American Trapshooting Handicap is a bigger event than any other sporting classic, and costs more to stage than the world's baseball series?

Trapshooting is being featured by resort hotels and that 200 country, golf and yacht clubs have added the clay target sport for winter diversion?

RICE FIELD PROTECTION

A special open season on ducks in counties in California was granted by the Secretary of Agriculture from September 30 to October 15, inclusive, after an investigation that seemed to disclose the fact that extensive damage was being done to this crop by the birds.

This action was taken pursuant to authority invested in the secretary by the Migratory Bird Treaty Act of July 3, 1918, and agreeable to regulations under that act promulgated July 31 of the same year. Shooting of migratory ducks during this period was limited to owners or lessees of rice lands and they were restricted to killing only birds that were committing or about to commit serious injury to the crop. Shooting from artificial or natural blinds was prohibited, as was shooting on any field after the crop had been harvested.

Birds killed during the season thus declared were forbidden to be sold or wantonly wasted or destroyed, but their use by persons permitted to kill them and by the hospitals and charitable institutions in California was allowed.

It is hoped that this action of the secretary will put an end to the active propaganda which several newspapers in California have been carrying on, in which a wholesale slaughter of ducks, without any restrictions, was generally advised. It is only reasonable to suppose that this propaganda was aided and abetted by the market shooters and commercial dealers in game and game hogs. The restrictions prescribed by the secretary appear adequate, but it remains to be seen whether or not abuses will be allowed to creep in.

CANTIERI TELLS HOW HE DID IT

(By Kendrick Schofield)

It is not often that in less than four months after firing the first shot from a service rifle that one breaks into the championship class, but that is what was done by Second Class Seaman F. A. Cantieri, when he won the Leech Cup at the recent National Rifle Championships at Camp Perry, O.

Cantieri is an Italian, 25 years of age, and is connected with the Navy Range, Rumford, L. I. He made the acquaintance of the service rifle on May 16 last. Two months later he qualified as a marksman. The first week in July he won the rating of sharpshooter and on July 16 he graduated to the expert rifleman class. And he topped it off in September by winning the Leech Cup for 1918—an honor which every crack shot in the United States strives for yearly.

Listen while Cantieri, flush with victory, tells how he won the important event:

"I hit the 600-yard firing line feelin' fine. Thought my shootin' was only fair when I left that range. A marine at the peg next to me, he shoot thirty-two just like me. That marine he follow along wit' me to eight hunnerd yards. Both of us shoot and he throw a scare to me wit' goin' clean for a thirty-five w'ile best I can do is thirty-three.

"That Marine he follow me to one t'ousand, and I feel like slippin', but I know if I hold good I might win. We shoot even on first two shots, then that Marine he score a five an' I pull a four. The fift' shot that marine and me we come up wit' bulls. In the sixt' shot that marine he gets a four and me, I get a three. That make worry for me. I kno' my hold is all right. I think that three come from outside that hold. So I don't change my hold. Shooters everywhere carry tool bags to the range wit' micrometers and telescopes and screw-drivers and grease. Me I don't take tool bags; just the rifle and the cartridges. But I know when the hold is right.

"I take up my gun and I hold her like she was a woman I lo'ove. I w'isper to her, but I feel chilly and my arm tremble. I taka da gun down. I pull her up again and I don't feel no better. I taka da gun down and bring her up once, twice more. Then I hol' a long time and squeeze w'ile I'm chilly. Up come a w'ite disc. Somebody behin' whisper a marine has made 99. I winna da match."

RAPID FIRE AND THE MODEL 1917 RIFLE

Thousands of riflemen, both soldiers and civilians, eft Camp Perry at the close of the 1918 National Matches, thoroughly convinced that for rapid-fire at short ranges the Model 1917 rifle could not be equaled.

When most of the civilian teams arrived at Camp Perry the new rifles were objects of considerable curiosity. Although practically every man was familiar with the workings of the Krag and the Springfield, the mechanism and the sighting equipment of the Model 1917 were deep mysteries. And it must be admitted that at first the civilian shots did not take kindly to the new weapon, even after 10 days of range work with it.

When the National Rifle Association Matches began, the civilian riflemen still mistrusted the new weapon, but only two events were needed to give every man a comprehensive idea of just wherein the Model 1917 is a superior weapon.

Those two events were the Rapid Fire Match at 200 yards and the Rapid Fire Match at 300 yards. When the scores in these competitions were published it was found that 25 competitors had made perfect scores and that 46 had tied in second place on totals of 49 in the 200-yard match and that in the 300-yard match 51 entrants made 48 points or better.

These results cannot be equaled by any past performances in rapid-fire matches, especially under the rather unfavorable shooting conditions which prevailed.

REINDEER IN ALASKA

The reindeer is the department store of the Far North; he produces everything from a spool of thread to a milkshake. He is jack of all trades, meat market, dairy, haberdasher, tailor, shoemaker, notion counter and jitney all rolled into one. He is even legal tender in the erratic currency of the Far North, where a piece of pink soap can buy almost as much as a gold nugget.

In 1890, thirty-seven years after the purchase of Alaska, Dr. Sheldon Jackson turned up the collar of his fur coat and shuffled through Northern snows on an inspecting tour of the mission stations. He discovered that the natives of Arctic and sub-Arctic Alaska were rapidly losing their source of food supply.

The whales had taken it into their heads to swim further north away from the occasional steam launches of the modern hunters; the walruses and seal followed them and disappeared. The wild caribou, simple creatures that the Eskimos and Arctic Indians had caught easly, had been frightened away by the efficient guns of traders.

Besides losing the greater part of their food, their clothing supply also had stopped, because for years the Eskimos had traded ivory walrus tusks, sealskin and whale oil for Siberian reindeer skins.

The United States had to choose between feeding several thousand people or letting them starve. The latter choice was, of course, impossible, and the former was impractical on account of transportation.

In 1891, Dr. Jackson suggested to Congress his plan of importing reindeer from Siberia. There had never been reindeer in this country, the Eskimos knew nothing about the animals, and Congress considered the idea out of the question. But a private fund of $2,000 was raised by the people personally interested in Dr. Jackson's plan and the first herd of sixteen reindeer was brought across Bering strait from Siberia and landed in good condition.

Siberian herders, and a little later the more intelligent and efficient Laplanders, were imported to teach the native Eskimos and Indians the why and wherefores of the deer.

Before 1902, 1,280 deer had been imported; at the last Government report in 1914 there were 35,000 Government deer in Alaska, rapidly increasing.

When the deer are two years old they are broken in for driving. A deer makes an average speed of from eight to twelve miles an hour. But it is not his speed that makes him invaluable as a means of transportation; it is the fact that the deer can travel across Alaska without a trail, living on the moss which carpets the country.

Dogs cannot haul enough provisions to feed themselves on long journeys, while one of these camels of the North can haul 200 pounds of cargo, up mountains and down valley, and finish the journey in as good, if not better physical shape than when the trip was begun.

Each Arctic mission station should own at least 5,000 deer. In the first place, a herd of deer banishes all terror of famine or isolation or extreme cold. The milk of the deer is thick and creamy, and, mixed with water, makes a delicious drink; venison has always been considered a luxury. In the second place, the revenues gained through selling the young fawns and the meat of the older deer can eventually support the missions. And thirdly, there is always present an efficient and comfortable method of travel.

The United States Government loans deer to mission stations for fixed periods of time. When the three or five years are up, the Government demands the return only of the original number and the station may keep the fawns.

Secretary Lane is reported to be a firm believer in the future of the reindeer industry in Alaska, and has suggested that venison should be made a valuable part of the nation's meat supply.

MIGRATORY BIRD TREATY ACT AMENDED

The United States Department of Agriculture announces the promulgation of amendments and additions to the Migratory Bird Treaty Act Regulations effective October 25, 1918.

Hereafter the open season for black-bellied and golden plovers and greater and lesser yellowlegs in Texas will be from September 1 to December 15.

Regulation 5 as amended now reads as follows:

A person may take in any one day during the open seasons prescribed therefor in Regulation 4 not to exceed the following numbers of migratory game birds:

Ducks (except wood duck and eider ducks).—Twenty-five in the aggregate of all kinds.

Geese.—Eight in the aggregate of all kinds.

Brant.—Eight.

Rails, coot, and gallinules (except sora).—Twenty-five in the aggregate of all kinds.

Sora.—Fifty.

Black-bellied and golden plovers and greater and lesser yellowlegs.—Fifteen in the aggregate of all kinds.

Woodcock.—Six.

Wilson snipe or Jacksnipe.—Twenty-five.

Doves (mourning and white-winged)—Twenty-five in the aggregate of both kinds.

An amendment of Regulation No. 6 has the effect of removing the limitation on the number of birds that may be transported within a state during the Federal open season. The export of migratory game birds is limited to two days' bag limit during any one calendar week of the Federal season. Persons must comply with state laws further restricting the shipment or transportation of migratory birds.

An amendment to paragraph 2 of Regulation No. 8, which is of great interest to breeders of game, permits migratory waterfowl raised in domestication to be killed by shooting during the respective open seasons for waterfowl, and the sale thereof subject to State laws; but after March 31, 1919, such waterfowl, killed by shooting, can not be sold or purchased unless each bird, before attaining the age of four weeks, shall have had removed from the web of one foot a portion there of in the form of a "V" large enough to make a permanent well-defined mark, which shall be sufficient to identity it as a bird raised in domestication.

Another amendment provides that the plumage and skins of migratory game birds legally killed may be possessed and transported without a Federal permit. Provision is also made for the issuance of special permits authorizing taxidermists to possess, buy, sell, and transport migratory birds.

Two new regulations have been addeded. Regulation No. 11 provides for the issuance of permits authorizing persons to sell migratory game birds lawfully killed and by them lawfully held in cold storage on Juy 31, 1918. Such birds may be sold under permit until March 31, 1919.

Another new regulation is as follows: "Nothing in these regulations shall be construed to permit the taking, possession, sale, purchase, or transportation of migratory birds, their nests and eggs contrary to the laws and regulations of any State, Territory, or District made for the purpose of giving further protection to migratory birds, their nests, and eggs, when such laws and regulations are not inconsistent with the Convention between the United States and Great Britain for the protection of migratory birds concluded August 16, 1916, or the Migratory Bird Treaty Act, and do not extend the open seasons for such birds beyond the dates prescribed by these regulations." This regulation is a restatement of the substance of Section 7 of the Migratory Bird Treaty Act and is intended to remove the confusion and uncertainty that exists in regard to the effect of the Federal law and regulations on State game laws.

DUCKS AT LAKE MERRITT

It's going to be a grainless winter for thousands of wild ducks which yearly flock to Lake Merritt in the heart of Oakland, Cal. The Oakland Chamber of Commerce has abandoned its annual pageant in welcome to the fowl, and food conservation orders have prohibited the feeling of barley and other grain to them, as has been custom in the past.

W. W. Richards, who is an ardent sportsman and naturalist, and who has furnished the "Breeder and Sportsman" with some excellent pictures of the ducks at Lake Merritt which were published last year, says that he thinks there will be as many ducks at Lake Merritt this year as formerly, but does not expect they will stay as long.

"The first ducks to reach Lake Merritt are the sprigs. They begin arriving the latter part of August. Most of them come from the Klamath reservation near the California-Oregon line.

"The next flight consists of pintail, widgeon, green wing teal, shovelers, gadwell and mallard. They arrive about the middle of October.

"The last flight comes from Yukon delta and Saskatchewan and consists of canvasbacks and redheads.

"I have hunted ducks all over the country, but on no other body of water have I ever seen so many birds or so many different varieties, all dwelling in peace with each other and with mankind, in the heart of a city of 285,000 inhabitants within a few minutes' walk of the city hall, and surrounded by the constant activity of a great metropolis."

NEW MEXICO COMBATS PREDATORY ANIMALS AND INJURIOUS RODENTS

Prowling predatory animals are on the decrease in New Mexico, due to the intensive campaign waged by State and Federal forces of the Biological Survey, United States Department of Agriculture. One thousand and fifty-nine coyotes, 201 bobcats, 55 wolves, 13 mountain lions, and 7 bears including 3 grizzlies, have been exterminated at a total cost of $11.20 an animal, without deducting fur values. This is considered a very small outlay for protection in view of the fact that the average gray wolf kills $1,000 worth of livestock a year, while a mountain lion destroys $500 worth of stock and the bobcat and coyote $50 worth each. On this basis the saving represented in this co-operative campaign is nearly nine times the amount of the gross expenditure.

Poisoning operations against predatory animals for this winter from December to March, 1919, are planned on a scale so extensive as to include the main winter ranges of the State. With more carefully systematized methods and a larger and more dependable personnel at the disposal of the United States Bureau of Biological Survey than has heretofore been available, quick and permanent relief from coyotes and bobcats is promised for New Mexico stockmen who are keenly interested in the project and are willing to co-operate in the work to the best of their ability.

During the recent summer 12 hunters paid by the State and 15 in the employ of the Federal Government have conducted an intensive trapping campaign. This force will be increased to 40 during the fall and winter trapping season, as at those seasons the animals are more easily captured, while the value of their fur gives an income to the State which almost pays for the cost of killing.

IT IS SOVEREIGN

The Spohn Distemper Compound has been before the horse public for a quarter-century or more, and a remedy that will live that length of time is "all to the good." It is not only used by horsemen, but by stockmen, poultrymen, and owners of dogs, as catarrhal complaints prevail among other animals besides horses. Distemper and influenza are diseases most prevalent in the winter months, and work as much havoc among live stock as they do in the human family, if not taken in hand at once. Write for booklet giving full directions for its use and much interesting veterinary information. See advertisement.

A Record Breaker---56 Years in the Lead!

HEALD'S BUSINESS COLLEGE

ESTABLISHED 1863, and has ever since kept pace with the wonderful growth of San Francisco and the State of California. Over 225,000 young men and women have had the benefit of a business training at Heald's.

Good Positions await Heald Graduates.

The Trained Man is Always in Demand—
He is Never Out of a Job.

Business Men Recognize a Heald Diploma as a Guarantee of Efficiency.

The Farm

STATE FARM WINS AT CHICAGO SHOW

The University Farm stock have again been victorious in the show rings at Chicago, according to a telegram received from Professor Miller. The telegram says that California Marvel, the senior yearling Shorthorn, has been made champion of this great breed. Jock, the Junior yearling Reserve Champion Angus and Grizzly, the crossbred Shorthorn Angus, receive 2nd champion of the Angus.

Two Shropshire grade wethers won 2nd and 3rd place. A Poland barrow won reserve champion and the pen of Polands won first.

The Farm also exhibited five steers, five wethers and five barrows and won first prize on this entry.

The grand championship goes to Purdee University, on a pure-bred Angus yearling steer. This college won first place last year also. University of Wisconsin captured the prize for the carload of hogs and grand champion pen of barrows.

That the University Farm can win in this exhibition proves that good cattle can also be produced in California where no corn is raised as all the other exhibitors at this show live where corn is the main feed.

Professors True and Miller are in attendance at the International. After the show they intend to purchase some breeding animals for the Farm.

RED CROSS TO SUPPLY OXEN

A plan to increase at once the diminishing food supply in Palestine by placing plowing oxen at the disposal of native farmers unable to own them, has been launched here by the Amrican Red Cross. The organization plans to buy large numbers of oxen, to be rented out by the day at nominal rates, or resold at cost to farmers. There are at present in this district but 65 plowing animals against 418 before the war; and food production is at a menacing level.

COST OF KEEPING WORK HORSES

Results of investigations on the cost of horse labor on the farm by the University of Missouri College of Agriculture show that, exclusive of depreciation, the average cost of keep per head of 75 farm work horses during 1912-13 was $92.33; of 113 head for 1914, $995.58; and of 132 head for 1915, $86.63, or on an average for the whole period of $91.22.

It was found that the cost of feeding, as a rule, made up 72 per cent of the total cost of keeping a farm work horse. Farms on which the feed cost per head ran lowest (average $45.69 per head) fed an average of 10.3 bushels of oats per head of work stock, while farms on which the feed cost per head ran highest (average $93.25 per head) fed an average of 41.6 bushels of oats per head of work stock. Farms which used corn for grain and no oats had an average feed cost of $58.79 per head and received approximately the same amount of work from their horses as farms which fed oats almost pound for pound with corn at a feed cost per head of $71.56.

The average amount of labor per horse for 1912-13, 1914 and 1915 was found to be 1165 hours, 1164 hours, and 1127 hours respectively. The heaviest working of horses with the most liberal feeding or the lightest working with approximately a maintenance ration did not in general prove as economical from the viewpoint of horse labor cost as medium work on a moderate ration. From the viewpoint of economy, experience seems to warrant keeping sufficient work stock on a general farm in this region so that each horse will not have more than an average of 1400 or 1500 hours work, but it will not warrant a large enough supply to make the average amount of labor per horse less than 800 hours.

Records from the farms indicate that mules do more work on a given cost than either geldings or mares, and likewise geldings do more work than mares.

-: AN INTERESTING SHORT STORY :-

We cannot prepare any better advertisement for

GOMBAULT'S CAUSTIC BALSAM

than the following voluntary testimonial from a man who stands very high in all business and social circles where he is known:

No. 2131 Wyoming Avenue, Washington, D. C.,
November 26, 1917.

The Lawrence-Williams Co.,

Dear Sirs:—I have had GOMBAULT'S CAUSTIC BALSAM constantly in my home for thirty-three years and have used it for a large number of animal and human ailments. It is by far the most effective, reliable and economical medical preparation that I have ever known. Its persistent use for chronic rheumatism, lumbago, neuritis and kindred troubles bring sure relief. For sore throat, pains in chest and acute cramps it penetrates and relieves pain. For mosquito bites, bee stings and bites of all other vermin it instantly stops all irritation. For itching between the toes and on limbs, it is an instantaneous cure. For fresh cuts, wounds and old sores, it eliminates all danger from blood poisoning and hastens a cure. A few drops of CAUSTIC BALSAM is more effective than half a bottle of any other application that I know of.

Truly yours, M. J. LAWRENCE.

GOMBAULT'S CAUSTIC BALSAM has had a steady reliable sale in France, where it is made, for forty-five years. In the United States and Canada, with only moderate advertising, it has had an increasing sale for thirty-five years. The demand is produced strictly by its merits. Price $1.75 per bottle. Sold by druggists, or sent by Parcel Post on receipt of price. Guaranteed to give satisfaction. For further particulars and unlimited testimonials, address

JAPAN NEEDS MORE LIVESTOCK

Emperor Sends Representative to Study Methods in America

More livestock is the greatest need of Japan just now. She has prospered exceedingly since the beginning of the war and now her only apparent poverty is in livestock. Her people no longer are vegetarians, as many people suppose, and they have developed a vast need for cattle and sheep, horses and mules.

In the whole of Japan today there are only 2,700 sheep and not enough horses or cows to talk about. There are plenty of pigs and smaller animals, but there are no mules in all the archipelago. In Japan the few hundred sheep kept at Nasu are considered one of the wonders of the islands. The Japanese people have been depending almost entirely on imports of beef and mutton and since her people have mingled with the western nations the Japanese appetites for meat has wonderfully increased. But the war has cut these imports to almost nothing and Japan is striving to establish a livestock industry of her own, so that hereafter she may be independent of an outside supply. In order to further this movement, Dr. Issa Tanimura, livestock commissioner for the Japanese Emperor, recently visited the United States and made a special study of the great American livestock industry.

Dr. Tanimura is one of the great scholars of Japan, says Charles Philip Norton in the Farmer. He was an eminent lawyer before he renounced his profession, years ago, to take up livestock raising. Today, livestock is his hobby, his incentive in life. He is the director of the Mikado's experiment station at Narashino, and of a sheep and grass farm at Nasu, the principal projects of this type in Japan at the present time. His mission to this country was a patriotic one, as viewed by the Japanese, and it may be regarded by American farmers as of international importance.

"I am going home with a vast amount of exact information," Dr. Tanimura stated recently, at the conclusion of his three years' study in America, " and in a little while we will start the great work. During my stay in America I have learned two important things: a vegetable diet lacks fats and nitrogen, and to be strong a race of people must have plenty of mutton and beef to eat; they must also have warm woolen clothing."

"Japan intends to purchase in America the pure bred cattle, sheep and horses with which to start her new industry in the briefest possible time. To America the Japanese will turn for instruction in the basic problems of livestock raising—selection and breeding, care and feeding, and the prevention and cure of diseases to which livestock is subject."

To begin with, Japan has plenty of room in which to start her livestock industry. For its expansion, she has the boundless areas of Manchuria and Korea. "Teach us to solve the problems of livestock raising," says Japan, "and we will extend the blessing throughout the Orient. It is a work for humanity, for civilization."

Tradition has been partly to blame for Japan's previous neglect in building up a livestock industry of her own. In the olden days the people of Nippon refused to eat animal flesh as food. "You Americans speak of a feeding herd of 10,000 sheep as a small number," said Dr. Tanimura, "but in Japan the few hundred sheep which we keep at Nasu are considered one of the wonders of the islands. This should emphasize our need. I might add that the ancient prejudice against animal food no longer exists among the Japanese people."

Dr. Tanimura's thorough study of America's livestock industry is a compliment to the farmers and breeders of this country. The Japanese is thorough in everything, and Dr. Tanimura recognized the high standard to which the stock raisers of the United States have elevated their industry. Everything that came under Dr. Tanimura's observation he watched carefully; anything he learned he recorded in the most systematic manner for future experimentation.

GLANDERS YIELDS TO VICTORY OF ITALIAN SCIENCE

The reviews of medicine and veterinary surgery speak of important researches looking to the cure of glanders, which afflicts horses and may also attack man, who almost invariably succumbs.

At the beginning of the war the spread of glanders, especially among the quadrupeds of the Third Army, suggested to Colonel Commanding Dr. E. Bertetti, director of the veterinary service of the army, the idea of utilizing the victims of glanders in making experiments in regard to its curability.

Obtaining permission of the war ministry and the supreme command of the army the experiments were begun at Caorle in a sanitarium rigorously quarantined and equipped with all the latest scientific and surgical appliances.

Dr. Guido Finzi, head of the Institute of Pathology and Medical Clinics of the Superior Veterinary School of Turin, assisted Dr. Bertetti. After two years they announced that glanders was curable, not only in its chronic stages but but also in its process of evolution.

The importance of the discovery and the evidence of the results obtained led the two experimenters to ask for a commission to make practical tests of their discoveries. The results fully confirmed the results announced by Drs. Bertetti and Finzi.

WHAT THE FARM BUREAU DOES

The Farm Bureau organizes its forces to carry out an approved county-wide program of work for the general improvement of agriculture and home economics: It employs a county agricultural agent to serve as a director or extension leader of agriculture; it secures the counsel and guidance of the best farmers of the county, extending their knowledge and experience; it seeks to eliminate duplication of effort and to correlate all agricultural activities in the county; it discovers and extends the good farm practices and demonstrations of the successful farmers of the county; it introduces new crops and improved cropping methods where they are needed; it encourages organized and co-operative methods to secure more profitable livestock in the country; it demonstrates co-operative methods for controlling insect pests and plant and animal diseases, which may cause losses over large areas; it takes an active part in the plans of the home makers of the county in solving home and community problems; it seeks out and encourages intelligent leadership for the boys' and girls' club work; it conducts an "Exchange" or "Want and For Sale" department, bringing together the man who wishes to sell and the man who wants to buy; it permits of united action for insuring fair treatment and the development of a more profitable marketing system for all farm products; and it acts as a representative body in national and state campaigns for agricultural improvement, standing ready to carry out the nation's program in all rural communities.

Gombault's Caustic Balsam

The Worlds Greatest and Surest Veterinary Remedy

HAS IMITATORS BUT NO COMPETITORS!

SAFE, SPEEDY AND POSITIVE.

Supersedes All Cautery or Firing. Invaluable as a CURE for

FOUNDER,

NO PEACE TERMS HERE

Like a Knight of the Crusades he is conquering Evil! The Cause is just!

The insidious Microbe has caused woe and suffering since the World was made and Living Things were created!

Through the centuries Man has been militant against Microbes, or Germs; victorious at times, again falling victim, in this Warfare against the Cause of Disease.

Man and his Faithful, Dumb Friend, the Horse, alike are subject to this ***great danger.***

To destroy Disease Microbes demands powerful forces, ready on the minute; and ***To Save Life*** there can be NO PEACE TERMS with Germs or Microbes.

SPOHN'S COMPOUND destroys the Evil Germ---this is peace---restores vital functions---saves life---makes beautiful the Animal form---and Lo! Peace by Destroying the hideous Microbe!

Millions of lives of Horses---Millions of Dollars---Saved and Protected.

SPOHN'S, the Destroyer of Evil Microbes, to be had at all Drug Stores, or from the Manufacturers.

SPOHN MEDICAL CO., GOSHEN, IND., U. S. A.

Look at both ends of the shells that you buy. It is not only important that you get your favorite shell, but also that it is loaded with your favorite powder. It is not enough to look at the base—look at the wad end too, to be sure that your shells are loaded with one of the

HERCULES
Smokeless Shotgun
POWDERS
INFALLIBLE "E.C."

Many experienced sportsmen use Hercules Smokeless Shotgun Powders exclusively. Use them yourself and you will benefit by their uniform quality. They are as dependable as old friends. They always give high velocity with light recoil, always burn clean and give even patterns.

Don't take chances with a powder that may vary in quality. Shoot the powders that you know are dependable.

The 14 standard shells listed at the left may be bought loaded with a Hercules Powder. Select your favorite, but be sure to look on the box for the name, Infallible or "E.C."

THE
Parker Single Barrel Trapgun

Price $150
The **Gun With a Pedigree**

The Greatest Scores Ever Recorded Were Made With

Parker Guns

Mr. L. S. German made the highest official yearly average ever recorded with his Parker Gun, scoring 6137x6285=97.64%.

At San Jose, Cal., May 19th, Mr. Orval Overall won THE CHAMPIONSHIP OF CALIFORNIA-NEVADA, scoring 44x50 targets with his double Parker Gun.

At same place, May 22d, Mr. Harry Ogilvie won the INTERSTATE CALIFORNIA-NEVADA HANDICAP, scoring 97x100 at 20 yards with his single barrel Parker, and Mr. Len. Hawxhurst won the Professional Championship, scoring 94x100 with same kind of gun.

At Los Angeles, Cal., May 28th and 29th, Mr. Ed. Garrett made the highest aggregate score on the Preliminary and Pacific Coast Handicaps, scoring 187x200 at 18 and 19 yards, with his single barrel Parker, and Mr. Len. Hawxhurst at same place won Second Professional Average, scoring 381x400 targets with same make and kind of gun.

The Grand American Handicap has been won nine times with Parkers.

If interested in small bore double shot guns, please write for New booklet which will be sent free, giving valuable information on this subject.

Fastest dead heat—Robert J., b g, 5, by Hartford John R. Gentry, b h, 7, by Ashland Wilkes (1894) 2:04
Fastest 2-heat race—Directum I., ch h, 7, by Directum Kelly (1914) 1:58, 2:00
Fastest 2-heat race, by a gelding—Prince Alert, b g, 8, by Crown Prince (1901).....2:02¼, 2:00¾
Fastest 2-heat race, by a mare—Miss Harris M., b, 5, by Peter the Great (1917).....2:00½, 2:00¾
Fastest 2-heat race—William, b c, 4, by Abe J. (1914) 2:00½, 2:00, 2:02½
Fastest 3-heat race, by a gelding—Independence Boy, ch g, 6, by Thistle (1911)..2:02¾, 2:01¾, 2:02
Fastest 3-heat race, by a mare—Miss Harris M., b f, by Peter the Great (1916)..2:01¼, 2:01¾, 2:04½
Fastest 3-heat race, divided heats—Single G., b h, 8, by Anderson Wilkes (1918) (Miss Harris M. won 1st heat) 1:58¼, 1:59½, 1:59¾
Fastest 4-heat race—Russell Boy, b h, 6, by Rustic Patenter (1916), (Eraden Direct won 3d and Judge Ormonde 2d heat)..2:00¼, 2:01¼, 2:01½, 2:05¼
Fastest 5-heat race—Napoleon Direct, ch h, 7, by Walter Direct (1915), (Peter Stevens won 3rd and 4th heats 2:02, 2:01¾, 2:03½, 2:05¼, 2:01½
Fastest 6-heat race—Russell Boy, b h, 5, by Rustic Patenter (1915), (Hal Boy was 1st, Judge Ormonde 2d and 3d heats).....
..... 2:03½, 2:03¾, 2:02½, 2:04¼, 2:03¼, 2:03¼
Fastest 7-heat race—Jerry B., ch g, 7, by Argot Wilkes (1908) (Minor Heir won 1st and 2d, The Eel 3d, and Copa de Oro 4th heats).....
.....2:00½, 2:02, 2:05¾, 2:08¾, 2:06½, 2:06¼, 2:07¼
Fastest 8-heat race—Directum, blk h, 8, by Director (1905) (Coleridge won 1st and 2d, Paul 3d and Ben D. 4th and 5th heats)..2:05¼, 2:06¾, ...2:07¼, 2:07½, 2:07½, 2:08¾, 2:10, 2:11½
Fastest 9-heat race—Handy Jim, br g, 8, by Inline B. (1915), (Joe H. won 1st and 6th, Al Dillard 2d, Flash Patchen 3d, Elisha Jay 4th and 5th heats) .....2:12½, 2:12¼, 2:11¼, ...2:12¼, 2:12¼, 2:15¼, 2:11¾, 2:11¼, 2:11¼
Fastest 10-heat race—Kitty R., b f, 4, by Kermiss (1898), (Miss Maymo won 1st, The Bishop 2d and 3d, Tom Webster 4th, Harry C., 7th and 9th, Ding 8th heats).....2:11½, 2:12, 2:13½, ...2:11¾, 2:10¾, 2:13¾, 2:14¾, 2:16¼, 2:17¾, 2:20

PACING—TO WAGON

½ mile—John M., bl g, 5, by Paris (1903)..... 1:00¼
1 mile—Dan Patch, br h, 7, by Joe Patchen (1903) 1:57¼
1 mile, by a gelding—Little Boy, b g, 8, by Kenton (1901) 2:01½
1 mile, by a mare—Aileen Wilson, bl, 10, by Arrowwood (1910) 2:04½
1 mile in race—Angus Pointer, b g, 6, by Sidney Pointer (1904) 2:04½

PACING—UNDER SADDLE

1 mile—George Gano, b h, 12, by Gambetta Wilkes (1915) 2:10¾

PACING—WITH RUNNING MATE

1 mile—Flying Jib, b g, 8, by Algona (1894)..... 1:58¼

PACING—TEAMS

1 mile—Minor Heir, br h, 10, by Heir-at-Law, and George Gano, b h, 9, by Gambetta Wilkes (1912) 2:02
1 mile (amateur driver)—Prince Direct, blk h, 9, by Direct, and Morning Star, b g, 7, by Star Pointer (1904) 2:06
—The Horse Review.
Fastest 5-heat race—Early Dreams, b g, 9, by Richard Earle (1917), (Lu Princeton won 1st and 3rd heats).....2:04½, 2:05, 2:04¼, 2:05½, 2:05¾
Fastest 6-heat race—Esperanza, b m, 7, by Carlokin (1918), (Blanche Carter won 1st and 4th and Bertha McGuire second heat)..... .....2:05½, 2:04¼, 2:04½, 2:06¼, 2:07¼, 2:06¾
Fastest 7-heat race—Ima Jay, b m, by Jay McGregor (1917), (Ross B. won 1st, Early Dreams 2d and Royal Mac 3d and 6th heats)..... .....2:06, 2:04¾, 2:05¼, 2:05¾, 2:07¾, 2:08¾, 2:08
Fastest 8-heat race—Nutbearer, b g, 8, by Nutbreaker (1902), (Alice Carr won 1st, Rhythmic 2d, Wentworth 3d and Dulce Cor 4th and 6th heats) .....2:09¼, 2:08¾, ...2:09¼, 2:08½, 2:10¾, 2:12¾, 2:10¾, 2:12
Fastest 9-heat race—Alix, b m, 5, by Patronage (1893), (Pixley won 6th and 8th, Nightingale 7th, Lord Clinton 5th, and Hulda 2d and 3d heats) ..... 2:07¾, 2:10¼, 2:10½, ...2:11¾, 2:11½, 2:09¾, 2:12¾, 2:15¼, 2:09¾

TROTTING—TO WAGON

½ mile—Uhlan, bl g, 7, by Bingen (1911)..... :56¼
1 mile—Lou Dillon, ch m, 5, by Sidney Dillon (1903) 2:00; Uhlan, bl g, 7, by Bingen (1911).. 2:00
1 mile amateur driving—Lou Dillon, ch m, 5, by Sidney Dillon (1903), 2:00; Uhlan, bl g, 7, by Bingen (1911) 2:00
1 mile, by a gelding—Uhlan, bl, 7, by Bingen (1911) 2:00
1 mile, by a stallion—Lee Axworthy, b, 5, by Guy Axworthy (1916) 2:02¾
1 mile in a race—Lou Dillon, ch m, 5, by Sidney Dillon (1903) 2:04¾
1 mile in a race, by a gelding—Lord Derby, b, 7, by Mambrino King (1902) 2:05¾
1 mile in a race, by a stallion—John A. McKerron, b, 5, by Nutwood Wilkes (1910)..... 2:10
Fastest two heats—Lou Dillon, ch m, 5, by Sidney Dillon 2:04¾, 2:04¾

TROTTING—UNDER SADDLE

1 mile—Country Jay, ch g, 13, by Jay Hawker (1909) 2:08¼
1 mile, in a race—The Wanderer, b g, 9, by The Tramp (1914), and California B., b g, 7, by Athasham (1916) 2:14½

TROTTING—WITH RUNNING MATE

1 mile, against time—Uhlan, bl g, 9, by Bingen (1913) 1:54½
1 mile in a race—Frank, b g, 7, by Abraham (1883) 2:08½

TROTTING TEAMS

1 mile—Uhlan, bl g, 8, by Bingen, and Lewis Forrest, bl g, 7, by Gen. Forrest (1912)..... 2:03¼
1 mile in a race—Roy Miller, b h, 99, by Bingen and Lucy Van, b m, 13, by Anderson Wilkes (1918) 2:10¼

TEAMS—TANDEM

1 mile—Mambrino Sparkle, ch m, 8, by Mambrino Chief, Jr., and William H., b g, 11, by Young Wilkes (1886) 2:32

TEAMS—THREE ABREAST

1mile—Belle Hamlin, br m, 12; Globe, br g, 10, and Justina, b m, 12, by Almont, Jr. (1891).. 2:14

TEAMS—FOUR-IN-HAND

1 mile—Damiapa, ch m, 9; Bellnut, ch g, 8; Maud V., ch m, 9, and Nuispra, ch f, 4, all by Nutmeg (18.6) 2:30

PACING

½ mile—Directum I., ch h, 9, by Directum Kelly (1916) 0:55¾
1 mile—Dan Patch, br h, 9, by Joe Patchen (1905) 1:55¼
1 mile, in the open—Directum I., ch h, 9, by Directum Kelly (1915) 1:56¾
1 1-16 miles—Directum I., ch h, 9, by Directum Kelly (1916) 2:09¾
1⅛ miles—Directum I., ch h, 9, by Directum Kelly (1916) 2:16¾
1¼ miles—Nervolo, b h, 7, by Colbert (1903)..... 2:38
1½ miles—Locanda, br h, 6, zy Allerton (1903).. 3:15¼
2 miles—Dan Patch, br h, 7, by Joe Patchen (1903) 1st mile 2:07½, 2d mile 2:09½)..... 4:17
3 miles—Elastic Pointer, b h, 15, by Brown Hal (1909) 7:31½
4 miles—Joe Jefferson, b h, 12, by Thomas Jefferson (1891) 10:10
5 miles—Lady St. Clair, b m, 12, by St. Clair (1874) 12:54¾
Fastest stallion—Dan Patch, br, 9, by Joe Patchen (1905) 1:55¼

BREEDER AND SPORTSMAN
Turf and Sporting Authority on the Pacific Coast.
(Established 1882.)
Published Monthly.
F. W. KELLEY, Proprietor.

OFFICE, 239 PACIFIC BUILDING
Cor. of Market and Fourth Sts., San Francisco.
P. O. DRAWER 447.
National Newspaper Bureau, Agent, 219 East 23rd St., New York City.
Entered as Second Class Matter at San Francisco P. O.

Terms—One year, $1; six months, 75 cents. Foreign postage 25 cents per year additional; Canadian postage 15 cents per year additional.
Money should be sent by Postal Order, draft or registered letter addressed to F. W. Kelley, P. O. Drawer 447, San Francisco, California.
Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

DATES CLAIMED 1919 GRAND CIRCUIT

North Randall	July 7-12
Kalamazoo	July 14-19
Toledo	July 21-26
Columbus	July 28-August 2
North Randall	August 4- 9
Philadelphia	August 11-16
Poughkeepsie	August 18-23
Readville	August 25-30
Hartford	September 1- 6
Syracuse	September 8-13
Columbus	September 15-20
Columbus (2nd week)	September 29-October 4
Lexington	October 6-11
Lexington (2nd week)	October 13-18
Atlanta	October 20-25

There is no matter pending before the State Legislature that would be productive of greater prosperity to the state than would be the appointment of a State Racing Commission with authority to regulate racing in California. There was a time in the nineties when the production of horses in California was next in value to its entire wheat crop and was the third largest industry in the state. At the present time there is a big demand for draft horses and with every prospect that the shortage next year will be greater. There is also a demand for high class thoroughbred and harness horses, horses that can win in races. Racing in California is now at its lowest ebb and it is to be regretted that horses purchased for racing must be taken over to the eastern tracks. The Government has had great difficulty in getting suitable horses for cavalry purposes and is deeply interested in the promotion of breeding thoroughbred horses, the lack of which in this part of the country has been caused by cessation of racing. The appointment of a State Racing Commission such as exists in Kentucky and Maryland where the period of racing on each track is limited and the Commission awards dates, regulates purses and the betting is limited to the pari-mutuels system which does away with the obnoxious features of other kinds of race track gambling, would mean a revival in the horse industry. Under a Racing Commission the public would have absolute protection, racing would be encouraged, the attendance would be larger and purses more liberal. This would stimulate the up-keep of the breeding interests and Uncle Sam would have less trouble in getting remounts. Now that such men as J. H. Rosseter, A. B. Spreckels, A. K. Macomber, Edward Cebrian, A. J. Molera, W. A. Clark, Captain W. H. McKittrick and other lovers of the thoroughbred type have come to the front and invested heavily in the choicest stock, there is a chance with a State Racing Commission to make racing again popular with the best element in the community. Mr. A. B. Spreckels has always been a consistent lover of the thoroughbred and a successful breeder of high class race horses and his stable of horses have always been prominent at the big race meetings. To show the necessity of this type for cavalry purposes the following official record is self-explanatory.

Colonel R. S. Chaplin of the British Army Remount Service, stationed at St. Louis, speaking of the possibilities for American breeders and their aid to the army, says: "Missouri and the western states have wonderful possibilities as a horse raising section, and yet I find a deplorable scarcity of the type fit for cavalry use. I can get a good horse for heavy and field artillery, but the lighter types are bad. My regiment in England had the pick of the Irish hunters, which are developed by a top cross of the thoroughbred, and I rather blush for some of the stuff I am compelled to send over. The horse is still an absolute necessity in warfare. In England we have found that the thoroughbred is the essential foundation for the perfect army horse, and that is why racing is fostered by the government and why we are racing even during the war. I understand there is no racing in Missouri. That probably accounts for the scarcity of the type of horse essential for cavalry use. If horse racing was conducted in Missouri as it is in England you would probably see the breeding of thoroughbreds in your state."

NORTH PACIFIC ITEMS

(Special Correspondence)

Every so often we hear the remark, "Oh, the harness horse business is dead." This time-worn comment is often made by well meaning men and often made by pesimists. If any reasoning man will read the horse papers, especially the Christmas editions, he will soon see that 1918 was a great year in harness horse racing; also the recent sales accounts, and some critic has dug up the fact that at sales held years ago bigger prices were paid than in 1918. Yes, I believe that in the days of Marcus Daley, J. H. Shults, Pierce Bros., Tom Lawson and a score of other get rich quick enthusiasts larger prices in a few cases were paid for some pedigreed lemons than the good prices of 1918 winter sales..

As to racing on the North Pacific Circuit, any man with a 2:08 trotter or a 2:04 pacer got the best sort of an argument for his money; for instance, Fred Ward floating home in 2:07 at Salem behind a trotter, and Tom McKay floating in in 2:03¾ behind Lady Hal with a Chanihuha timing bunch putting it out as 2:04¼, O. U. C. doing his trick in 2:02¼ with no assistance except a nice, sensible drive by Mr. Smith. Believe me, O. U. C. mile in 2:02¼ over Salem track and all alone was some mile, and at no spot did O. U. C. waver; he just paced and finished on his courage. And that Spokane pacer, Sister Norte, when Newhall gave her the chance she breezed home in front in 2:05¼.

And Harry Squires with Lena Patch by Oregon Patch by Joe Patchen and out of Athelena—Squires just said, "Whoa, girl," and Lena breezed home in 2:07¼.

Well, at Salem, Spokane, Yakima, Tiler, Idaho, the battles were fast and furious and the attendance at all places was big.

Now winter is on and I notice lots of activity and laying in of stocks of racers for 1919. Charley Guion has assembled nine fast ones at Yakima—Sister Norte 2:05¼, Joe McKay 2:07¼, Lena Bond 2:15, by The Bondsman out of Orslena 2:11¼, and several other good steeds. Sam Bush is preparing a few over at Canby, Oregon; Harry Squires has a big stable. Sim Lindsay is at Canby and has Hemlock 2:08¼ and several other nice pacers. At Salem, Fred Woodcock has seven nice horses, Mr. Grant has Francus Jr 2:08¼ and Boneray, one of the nicest and fastest and best gaited young trotters I ever saw. Boneray belongs to Mr. Lea, State Fair secretary, and I am sure proud of Mr. Lea; he is one secretary that loves a horse and is not afraid to own one. Such Secretaries as Mr. Lea are few and far between. I wish every secretary owned one or more horses, then they could see a horseman's side of it.

Perry Mozia is working two nice trotters of the Zombro tribe at Salem; John B. Stetson is there with May Day stallion 2:13¼ and Western Scout by The King Red, and some other Hal B. mares.

Bob Stetson, who had a really good season last year but said goodbye to the game, has repented and has assembled a herd of four horses, all but one of which he had last year, and opened up for business at Salem. John Kirkland is wintering three head at Albany, Ore.

I could name a lot more, but I said too much now. I hope to hear of lots of activity in California and all over the Coast. The game is not dead and with all its faults we love it yet. Cheer up, the bluebirds will soon be singing.

C. A. HARRISON.

John R. Gentry 2:00½, sole survivor of the greatest galaxy of pacers the harness turf has ever known, celebrated his thirtieth birthday last week by going a mile to harness over the Cumberland Park Track, Nashville, Tenn. More than twenty years have elapsed since the memorable race at Fleetwood Park, New York, when Gentry defeated Robert J. 2:01½, Frank Agan 2:03¾, and Star Pointer 1:59¼, in the three fastest heats on record.

HORSE VALUES SOARING—IN GERMANY

Germans have little to recommend them, but it must be said that they are fond of horses—so fond, in fact, that they have eaten up nearly all of the horses within their boundaries.

The following Associated Press dispatch, emanating from Coblenz, now held by the American Army of Occupation, is interesting, to say the least:

"Horse meat again has experienced another advance in Germany. Meatless days are being generally observed throughout Germany. In Coblenz the week beginning December 16 was a meatless one. The ruling price of horse meat in the area occupied by the American army is at present as follows: Per pound, horse sausage, 1 mark 80 pfennings; horse meat, one mark, 60 pfennings; horse liver, one mark, 40 pfennings. By order of the obergermeiser of Coblenz, if the weekly meat allowance is taken in horseflesh double the amount is permitted, but this is not to exceed one pound per person per week."

A DIAGNOSIS OF BREEDING CONDITIONS

By Capt. Walter B. Palmer, U. S. A.

There comes a time in the life of every breeder of live stock when he asks himself the question whether he is justified in enlarging or retrenching upon his output. Industries, like individuals, have their ups and downs, and the breeder of fine horses at present is deep in the "winter of his discontent."

The factors which have played important parts in the decrement of horse interests in general have been so often enumerated that they need not be retold. Chief among them, however, is the mechanically driven pleasure vehicle and its ally, the tractor, that now is looming up on the horizon intent on performing the labors of the draft horse. It is probable that in many cases where large areas are to be cultivated this servant of man will prove profitable and certain it is they will emancipate the horse to a large extent from the slavery of the farm, much as the motor driven trucks have relieved him of much of the drudging of city hauling. The fact remains, however, that on all farms there are many duties which the tractor cannot perform. There are also many climatic conditions which tend to reduce the efficiency of the motor vehicle. At all such times we turn in our helplessness to man's best friend, and, with the same cheerful willingness which has characterized his action from the dawn of history, he comes to our relief and forces us to admit that as an economic factor in the world's civilization he always has and always will play an important part.

The latest reports from the stallion registration boards of the several states indicate that in every instance the reduction in the number of hoses in service ranges from 25 per cent. to 50 per cent. Add to this the fact that only two-thirds as many mares were bred in 1918 as in 1917 and you have a fair estimate of the condition in the United States during the past season.

It is a condition, and not a theory, which confronts us, and fair-minded breeders who can read between the lines will have no difficulty in foreseeing the scarcity of horses which must prevail in five to seven years.

Looking at this subject from a financial standpoint only, it is a weird joke to imagine for a moment that a tractor, with its kindred ailments and its impending deterioration, can compete with a pair of mares which produce foals and deliver 100 per cent of efficiency from New Year's to Christmas, and it is high time that farmers turned a deaf ear to the senseless claptrap of those writers who fill the columns of our periodicals with tractor propaganda at so much per column. We will admit that the tractor is a necessary evil, but we cannot condone the methods of exploiting its questionable superiority.

One millon, three hundred thousand horses have been purchased for war purposes. Of these, one million, in round numbers, have been exported.

The lighter horses have been sadly lacking in quality and show a decided need of more care in mating sire and dam, a work which this government has too long neglected, but for which it now contemplates encouragement.

That there will be a well defined system of military training after this great conflict seems to be pretty thoroughly admitted. This alone will require a large number of horses of cavalry and artillery type.

Mounted police, who seem best able to control traffic conditions in our larger cities, annually are requiring a larger number of splendid animals with finish and substance. The planter of the South, who loves his walking horse; the farmer, who requires a pair of horses because of the multitudinous duties they can perform; the horse lover, who rides or drives because of the thrill which the horse affords; the soldier and the mounted guardian of the peace always will stand as ready customers for horses of outstanding excellence.

What, then, are the conclusions?

First. That, because of the rapid decline in breeding, it is an auspicious time to begin.

Second. That, because of European conditions, breeding stock will be in demand after the cessation of hostilities.

Third. That our ideals must be higher and that the quality of the animals produced must be so pronounced as to attract the attention of all the world.

Fourth. That it is a grievous mistake to patronize a stallion because of a cheap service fee or convenience of location.

Fifth. That those of us who by nature or special training are qualified to produce horses should set our face toward the plow drawn by them and not turn back, producing each year a limited number of colts from the best sires and dams obtainable, and that we should be unshaken in our faith and unswerving in our loyalty to that noblest of all animals, to the end that no instrument of earth or air shall displace him.

CAPTAIN WILLIAM B. PALMER, U. S. A.

Thoroughbred Matters

The Wikiup Stock Farm, owned by John H. Rosseter, has made twenty-one nominations in the Futurity of 1921. His great young stallion, Friar Rock, is represented by thirteen, Disguise by seven and Rock View by one.

* * *

The stallion Spanish Prince, imported by Carroll and Mackay, from France, will be located at the Silverbrook Farm, Red Bank, New Jersey. Among his companions was the American-bred mare Audience, dam of speedy Whisk Broom.

Plans for the re-opening of the Tijuana track will be held in abeyance pending the rescinding of passport regulations. James Coffroth, who is president of the Lower California Jockey Club, is looking over the racing plant across the border from San Diego with the object in view of starting up as soon as conditions are favorable.

Breeders throughout the country are now turning their attention to selecting suitable mates for their mares. We believe it would be to the stallion owners' interest and also to the interest of the breeders in their vicinity to advertise at once. We feel certain that the earlier the advertising date the more business will result.

Hourless, the crack American three-year-old of 1917, and who began his stud duties last year, served fourteen mares in his first season. The horse will cover many more of the mares belonging to his owner, Major August Belmont, next year, although a few nominations to approved matrons at $1000 each will be accepted.

President Charles F. Grainger, of Churchill Downs, has announced that geldings would not be barred from this year's Kentucky Derby. This is the first official statement to that effect. The ruling means that J. K. L. Ross can send Billy Kelly to the post in the rich event. Toto, from Frank Weir's stable, will also be a sure starter if he trains well.

The three hundred thousand dollars ($300,000) pledged to the American Red Cross second war fund by the Kentucky Racing Commission has been raised and distributed among the one hundred and forty-three Red Cross chapters of Kentucky, the Lexington chapter receiving $12,000 as its pro rata. Incidents such as this are possible and are of not uncommon happening in a commonwealth progressive enough to legalize racing under a commission.

There was a mistake in the spelling of Mr. Rosseter's thoroughbred establishment at Burke, near Santa Rosa, Sonoma county, California that appeared in our last issue. The name of the place is "Wikiup Rancho," not Wickiup. In the supplement to Webster's Unabridged Dictionary it is spelled with a c and no doubt the careful proofreader looked it up in the dictionary and thought the copy was being corrected by making it to conform with the conventional way of spelling it. Mr. Rosseter in all of his undertakings has been a very successful man and no doubt he has a very good reason for differing with Webster. Which ever way it is spelled the fact remains it is one of the handsomest, most complete and best equipped thoroughbred plants in the United States.

NAMES FOR E. CEBRIAN'S YOUNGSTERS

New Orleans, La.—Names for the fine band of two-year-olds being trained by Al Farrell for Edward Cebrian have been filed with the Jockey Club registrar and approved. These with the breeding of the youngsters follow:

A la Mode, b f, by Von Tromp—Modesia.
Ace of Trumps, blk c, by Von Tromp—Bonsetta.
Belligerent, br c, by Von Tromp—Gano Belle.
Broadway, blk c, by Von Tromp—Dally.
Dirigible, b c, by Von Tromp—Directa.
First Aid, br c, by Von Tromp—Trained Nurse.
Irresistible, br c, by Von Tromp—Illusion.
Seclusion, b f, by Von Tromp—Isolation.
The Leopard, ch c, by Von Tromp—Ruth W.
Under Cover, b f, by Von Tromp—Foul Play.

These youngsters are all the product of Mr. Cebrian's breeding farm near San Jose, Cal., and they hold out the promise of developing into racers of no mean ability.

THE BLOOD OF HANOVER

Although all horses carrying native American strains of blood in their veins are now barred from registration in the English General Stud Book, the Special Commissioner of the London Sportsman, not so very long ago, made public his opinion that an exception should be made in the case of Hanover. In this I am in entire accord, for Hanover was the most wonderful horse foaled in the United States since 1850, the year Lexington first saw light. It has ever been a debatable question with me whether the American Stud Book's rendering of Hanover's pedigree is correct or not. There are just some points about that Wild Medley cross I wish could be made more clear; anyway Hanover was a wonder and his influence for good still lives and will continue to live for many generations to come, all of which is thoroughly demonstrated by just a casual glance through the blood lines of many of the best of our two-year-old winners of 1918.

Here is an incomplete list of some of the big two-year-old winners of last season, all of which show Hanover:

	Races	Amt.
Eternal	6	$55,437
Billy KeKlly	14	33,383
Hannibal	3	17,300
Col. Livingston	9	17,224
Pen Rose	14	9,934
Delico	3	9,050
Vindex	1	734
Sir Barton (2nd in Futurity)		
	50	$143,052

Truly the above is an imposing list, no doubt an incomplete one, but full enough for my purpose, and all but one of them, the Futurity second, Sir Barton, winners of really good races, and the total amassed by the seven is simply astounding, and just to think that each and every one of them carries the blood of that splendid specimen of the thoroughbred race Hanover coursing through his veins. Verily it is a sin that the name of Hanover should be barred from any country's stud book. What is more sons and daughters of Orby, whose dam, Rhoda B., was of course a daughter, have been going great guns t'other side. Good Lord! what would they say should Grand Parade win this year's Victory Derby; the name is appropriate enough if not suggestive.

The juvenile champions of the East, Eternal and Billy Kelly, both you see, carry the Hanover strain. Retained II., grandam of the former, is a daughter and Billy Kelly's sire, Dick Welles, is out of Hanover mare Tea's Over.

Hannibal, winner of a Saratoga Special and a Keene Memorial at the Belmont Park spring meeting, is out of Mexoana by Mexican and she out of Hanoana by Hanover. Colonel Livingston, by odds the best juvenile that raced in the West or rather I should say Western two-year-old, treated all comers alike and could beat the old ones as well as those of his own age, and won the Fort Thomas Handicap, 128 pounds up; Breeders' Futurity, in spite of the villainous ride he had; Harold Stakes, and was a thoroughly game and fast colt, for which no obstacles, in the way of incompetent rides, seemed too great for him to overcome. I do not fancy geldings, despite the recent successes of Old Rosebud and Exterminator, but it's hard to make this one a loser for this year's Kentucky Derby, and Colonel Livingston is a son of Hanover's son, Handsel, the best bred son, to, he had, which if given a proper chance, would no doubt have averted the impending catastrophe of oblivion.

The filly, Sweep's daughter Pen Rose, was a wonder and is out of Hanover's daughter Hanrose. Pen Rose never flew at quite such high game as some of the others, but fourteen victories in one season is something few accomplish. I wonder, will she be back, I trow not?

The Queen City Handicap winner Delico has for a dam Dainty Dame by Handspring, son of Hanover and Vindex, a colt of magnificent proportions and balance, plenty of size, a looker if ever there was one. I myself was never introduced to a finer specimen of the thoroughbred horse; verily, he is awe-inspiring, and Vindex is out of Bellefontaine by Watercress and Bellefontaine's dam is the Futurity winner Hamburg Belle, daughter of Hamburg, son of Hanover. Of course, Sir Barton never won a race, but finished a more than creditable second to Dunboyne for the Futurity, and Sir Barton's dam is the dam of the famous Sir Martin, Lady Sterling by Hanover.

Please take a bit o' time and go over this list of 1918 equine juvenile celebrities carefully. I have never heard of any one horse, bar St. Simon and perhaps Stockwell, which so absolutely cornered the speed market of the equine world as has Hanover, yet, shame on your breeders, as you style yourselves, this is the very line you are about to let slip from your grasp. Happily there are yet to be found some few male descendants of Hanover and the line, though apparently at one time doomed, may yet be saved to posterity and how, simply because a new comer at the game has hearkened the voice crying? This new comer is no less a personage than Mr. A. K. Macomber, who intends to give his horse Palo Alto a chance, and Mr. Macomber may and I sincerely hope will go down to history as the man who saved the Glencoe line from extinction.

Passing Shower, winner of four races and $8,565, is another good one carrying the Hanover strain. Passing Shower's dam, Passan, is a daughter of Hanover's son Hamburg.—"Exile" in Thoroughbred Record.

ENDURANCE TESTS UNDER CAVALRY CONDITIONS

(By W. R. Brown, President, Arabian Horse Club of America.)

The writer wishes to be advised in the columns of this paper or elsewhere, by those acquainted with long distance riding, in and outside the army, as to what constitutes a satisfactory test for young horses in the fall of their three-year-old form, to prove them of sufficient soundness, speed and endurance to qualify for cavalry mounts after they reach maturity.

Also what should constitute a longer and more severe test for mature horses to parallel the most severe exercise they would be called upon to undergo in actual war conditions.

For the sake of clarity replies are solicited under the headings below in both tests.

First—Equipment and weight to be carried

Second—Distance or distances to be accomplished.

Third—Time and speed limits.

Fourth—Conditions surrounding race, such as feed, attention given horses on the road, judging, points considered, desirable routes, season of the year, etc.

While there have been many competitive long distance endurance tests staged at various times and places, there appears to have been no continuity of similar tests made over a considerable period of time, and many of the tests were open to the criticism of cruelty. Without doubt a test could be devised that would bring out the inherent qualities of courage, stamina, physical and mental endurance of a horse under heavy-weight, which could be continued with profit year after year without being inhumane, and which would be most valuable in its effect upon American cavalry of the future.

While it may be contended with some reason by the advocates of the race course test, that fast sprints over short distances with light-weights, call for the same physical and mental qualities of courage and endurance, it will be seen by a more careful investigation of the matter that the actual conditions are not exactly parallel, because physical tests should be apportioned to correspond at various gaits, slow, medium or fast. Take one matter alone, the exhilaration of the heart beats. An animal might be capable of relatively slow movements for an indefinite period whose heart was not accustomed to fast gaits, while the sprinter with excessive heart and lung development, might suffer from inability to eat and rest and might collapse over a relatively long period. The mental qualities also which have been developed for great speed are not necessarily those which endure long and continued hardship and privation the best, and we often hear this expressed by cavalrymen under the terms, 'tractability," "ability to rustle" and "easy keepers." In any event such a test should be welcomed by all, as the proof of the pudding is in the eating, and the statistics gathered, if persisted year after year, would be invaluable to the future preparedness of America. As a sporting event it could easily be made the basis of lasting interest and competition, second only to the race track itself.

Here are a few of the long distance contests or tests: A competitive ride for prizes took place between Budapest and Vienna on the 7th and 8th of October, 1908, the distance being 229.5 K. M., or about 143 miles. Seventy-nine riders started and 29 were obliged to give up on account of the severity of the pace. The following day the horses were again inspected as at the finish, in the trot, gallop and jump. The fastest time made was 16 hours and 38 minutes and the first seveteen finished within 19 hours and 31.5 minutes. Most of the contestants rode by dividing the route into distances of 10 to 15 K. M's., alternately trotting and galloping. The horses were given sugar and water while being trained and fed enroute oats, mash and melas as well as given freely to drink. The breeds contesting were:

	Started	Finished
English Thoroughbred	10	4
Unknown by English halfbred	7	5
Irish	3	2
Galicians	9	6
Hungarians	50	33
	79	50

The winner was a small Magyar mare of Arab descent. The average time including all stops was 8.6 miles per hour and without doubt was over ten miles an hour on the road. This test was certainly too severe and cruel, as five horses died on the way, but shows of what extreme endurance the horse is capable.

The Hon. Sir James Penn Boucault, three times Premier of Australia says in his book on the Arab that a Mr. H. S. Price, an owner of Canowie, used often to ride a horse of Arab blood from Canowie to Adelaide, a distance of 130 miles within the 24 hours. This would be at the average rate including all stops of 5 4 miles per hour. Sir Boucault's father living six miles south of Adelaide frequently rode to visit his sister at Manoora a distance of seventy-five miles, always doing the journey each way in one day or at about six miles an hour. Sir Boucault himself rode in the sixties across the trackless brush from Netley to Ketchowla a distance of eighty miles between 8 a. m. and 11 p. m., or at the rate of 5.3 miles per hour.

Major General Tweedie in his book on the Arabian horse recounts that in 1840 Captain Horne of the Horse Artillery undertook to ride his gray Arab horse, Jumping Jimmy, 400 miles in five days, and accomplished the feat on the Bangalore race course before a large crowd of spectators in four days, twenty hours and fifty–five minutes, or at the average rate, including all stops, of 3.4 miles per hour. He quotes Captain Nolan's book on cavalry as containing an account of a Persian troop horse, which only fourteen hands high, was ridden throughout an 800 mile march in India by a private of the 18th Hussars, who weighed with his accoutrements, 22½ stone or 315 pounds.

General E. Daumas in his book on the horses of the Sahara with commentaries by the Emir Abd el Kader, both men of international reputation and of the highest honor and thorough horsemen, reports that the Barbs endure hunger and thirst with ease, and without injury will cover 60 to 70 miles a day for several consecutive days, that it is no very rare occurrence to hear of horses doing from 120 to 150 miles in 24 hours, or at the rate of 5.6 miles per hour. One instance narrated by Daumas was of an Arab of Tell, Si Ben Zyan, of the family of Marabouts of the Oulad Salahh, verifiable by witnesses, whose mare Mordjana, in danger of being requisitioned by the Turks for debt, was ridden by him from Berouaguia to Leghrouat out of the country in order to save her, a distance of 200 miles, in a little over 24 hours, or at the average rate of over eight miles per hour. Another Arab Mohammed Ben Mokhtar, of the Tell, in order to save his two sons from a raid of the Turks, placed one son four years old in front of him on the saddle and one of six years behind on a pad, and fled to Leghrouat in a day. The officers of the Oran French division stated that in 1837 their General attaching great importance to the receipt of news from Tlemcen, gave his charger to an Arab to go and procure the news. This man setting out from the Chateau Neuf at four o'clock in the morning returned at the same hour the following day having accomplished 170 miles, in 24 hours or at the rate of seven miles per hour. Daumas gives the weight carried by the horse of a chasseur D'Afrique setting out on an expedition in the Sahara as of 350 pounds.

The usual full weight of an equipped United States cavalryman is from 235 to 250 pounds.

Under the auspices of the Morgan Horse Club of America, in September, 1913, an endurance race was ridden over a route arranged between Northfield and White River Junction, Vermont. Nine horses were started, three Arabians, five Morgans and one broncho, with army men as riders. All three Arabians finished together in 30 hours, 37 minutes, or at the average rate of five miles per hour, winning first and third in score of points and a Morgan horse won second. The principal conditions were that speed including all stops must not be over six or less than four miles per hour. Points were allowed for speed, condition at the finish, condition 24 hours subsequent to finish, and for weight carried over the minimum of 160 pounds. Practically all horses finished in good condition.

In September, 1918, a similar test was given by two Arabians from Maynesboro Farm, Berlin, N. H., supervised by army officers. The route lay between that place and Portland, Maine, and return, the distance covered 162 miles, and the weight carried 200 pounds. Both horses finished together without distress in 31 hours and 9 minutes, over roads that were muddy from constant rain, or at the average rate of 5.2 miles per hour. Hay and crushed oats were freely fed enroute and the horses given frequently to drink. Twenty-four hours subsequent to the finish they were inspected by a veterinary and declared in perfect condition.

One of the most famous endurance races was the ride between Berlin and Vienna, in which 140 German and Austrian army officers started simultaneously, one group leaving Berlin as the other left Vienna. They were mounted on picked horses, among which were thoroughbreds, half-bred Prussians and Hungarians, and some native ponies from the uplands of Austro-Hungary. The animals had been thoroughly trained and conditioned. The roads were the best, and the weight was a little more than a race horse takes up, the winner having carried 128 pounds, plus saddle and bridle. The distance covered was about 350 miles. Count Stahremberg, who was the first to arrive, came in in a few minutes less than 72 hours, or at the rate of 4.9 miles per hour. Lieutenant Teitzenstein, the first of the Germans to arrive in Vienna, did the distance in a trifle more than 73 and one-half hours. Both horses died from the effects of the journey, and many others were permanently disabled. It was the ponies who came in with the least injury, though not in the shortest time.

Many rides of excellence were made by individual horsemen in the United States in the days when the army was engaged in keeping the Indians on their reservations in the trans-Missouri country. Colonel Richard I. Dodge tells of an express rider in Texas who carried mail from El Paso to Chihuahua, a distance of three hundred miles with a weight of two hundred pounds, taking a week to go and a week to return and using the same pony continuously for six months, without diminishing either his flesh or his fire. As the country was infested by Apache Indians the man had to ride by night and hide by day, doing one hundred miles at a stretch and resting his pony four days between trips.

In 1879 several single couriers of General Wesley Merritt's command rode from Thornburg's rat hole to join the main column, one hundred and seventy miles, in a little less than twenty-four hours, or at the rate of seven miles per hour.

There are some wonderful feats of endurance by men and horses recorded in the War Department, considering that the more members engaged the slower the pace. Captain A. E. Hood of the Fourth Cavalry, rode with eight men one hundred and forty miles in thirty-one hours in pursuit of a deserter at Fort Reno, Indian Territory, in September, 1880, or at the rate of four and a half miles per hour. Neither horses nor men were specially selected. The report says that they rode continuously at a walk and a trot.

Four men of Company H, First Cavalry, in 1880, carried dispatches from Fort Harney to Fort Warner, one hundred and forty miles, in twenty–two hours over a bad road, or at the rate of 6.4 miles. The horses were in good condition at the end of the ride, and after one day's rest made the return trip at sixty miles a day.

Edward M. Curr in his book on "Pure Saddle Horses and How to Breed Them," in a chapter on riding long distances, says, that of all paces that at which a horse can accomplish the greatest distance with the least cost of toil and condition is undoubtedly the jog trot which generally covers five miles an hour, and that this is less fatiguing than a fast walk, because to ride on the top of any pace is uneconomical. He might also have added that scientifically speaking a pace under six miles an hour has been found to be the maximum obtainable without undue stimulation of the heart and respiratory organs. He also touches upon the well known physical fact that rests should be apportioned to horses in varying degrees as the factor of fatigue is accumulative. What they should be for different heavy-weights and long distances opens an interesting field for experiment wholly untouched by the racing calendar, and it is to gather suggestions as to what lines such experiments should take that this article is written.

NOTED HORSES THAT DIED DURING 1918

In the list of thoroughbreds which died in 1918 no more distinguished name appears than that of Ben Brush. He was a high–class race horse in his younger days and when retired to the stud became one of the most famous and successful sires in the world. It is through him and his lusty sons that the Bramble line of the house of Bonnie Scotland is now dominant in American breeding. His son, Broomstick, has been premier American sire three times and now in 1918 another son, Sweep, has gained the same crowning honors. No less noted as a race horse, but not so successful in the stud, although by no means a failure, Bannockburn is another notable name in the mortuary list. In breeding there were other losses of moment in the deaths of the stallions Ivan the Terrible, Cederstrome, Harrigan, Waldo and Knight of the Thistle. Much was expected from the latter horse when he was brought over from England, but in a way he proved a failure. He sired some useful horses, but nothing brilliant in racing. Some noted brood mares also disappeared in death. Ivory Bells, dam of the great race horse Old Rosebud, was one. The English mare Glass Jug, which ran second to the peerless Sceptre in the Epsom Oaks of 1902, was another. Lady Violet, Belmont-bred and owned and one of the most prolific brood mares on record, being dam of seventeen living and one dead foals, including Lord of the Vale and Watervale, was at the venerable horse age of twenty–eight years when she died. Horses still in racing or recently in racing which expired included Arriet, Chalmers, Chiclet, Ed Howard, Lady Rosebud, Marion Goosby, Montressor, Pan Zareta, Pockichoo, Red Cross, Sandhill, Shannon River, Solly and Ute, only one star among them, but all horses gifted with speed and of considerable note. The star was the remarkably speedy Texas mare Pan Zareta. No more well-beloved sprinter ever flew around an American race track than this wonderful creature. Her death seemed a personal bereavement to her host of admirers. Chiclet's breeding was such as seemed to promise great usefulness in the stud and, in that sense, his death was a real loss beyond the ordinary.

DIAMOND JUBILEE AND CANNON

Diamond Jubilee, one of the favorite horses of the late King Edward of England, which was sold to Argentina for $150,000, was a perfect horse in conformation, but with mental peculiarities. One of the chief of these was his dislike to Mornington Cannon, the jockey, which was particularly curious when one remembers the gentle methods of the famous horseman; but the antipathy was mutual, and it was by his own request that the jockey was relieved of the mount in the classic races. This was fortunate for Jones, who fell in for the ride, which he turned to the best advantage by steering the royal candidate to victory in the Two Thousand Guineas, Derby and St. Leger, and has enjoyed the distinction of riding as first jockey for the King of England ever since.

THE 1918 WINNING TWO-YEAR-OLDS.

The following is table of the winning two year-olds:

In the list of winners there are 316, a number greater than would be expected. The Record gives only the money won by those who came in first. No account is given of second and third moneys.

The total won by the 316 horses is the handsome sum of $675,000 (first money only). The horses winning the greatest amounts are:

Eternal	$55,437
Billy Kelly	33,383
Hannibal	17,300
Col. Livingston	17,224
Elfin Queen	15,586
Sweep On	14,851
War Pennant	13,520
Crittenden	13,501

The sires whose get won the largest amounts are:

Sweep	$92,421
Celt	44,501
Dick Wells	39,018
Ormondale	24,884
Olambala	24,474
Jim Gaffney	20,005
Disguise	19,606
Handsel	17,524
Ballot	16,299
Uncle	14,642
Star Shoot	12,244

W. S. ANDERSON, in Thoroughbred Record.

THE FUTURITY ENTRIES

Nominations for the Futurity of 1921 show a falling off of 102 entries from the 928 that were received last year for the 1920 running, but Secretary Earlocker still has fifteen breeders to hear from, and he is confident that number will reach the 1920 total and probably go beyond that figure. In checking up the returns it has been shown that there was a shortage of 232 over last year's nominations, and to have cut that down to 102, with increases elsewhere and the coming in of new breeders gives reason for the belief that he is making a modest estimate when he promises that the 1920 figures will be reached. Then it must be remembered that the 928 received last year was the largest entry received for many seasons.

Of those received John E. Madden sent the largest number when he named eighty-three, though this was considerably under what was expected and was just thirty-nine short of his nominations last year. His list contains the stallions Star Shoot, Friar Rock, Ogden, The Finn, Ormondale, Plaudit, Yankee, Hessian and Sea King One reason for the falling off in the Madden nominations was that he had sold a number of mares to J. H. Rosseter, of San Francisco. Mr. Rossetes himself made twenty-one nominations, of which Friar Rock is represented in thirteen, Disguise with seven and Rock View one. Arthur B. Hancock did not send along as many as were expected, and his list was an even dozen short of the 1920 entries when he nominated thirty. His lot is divided among Wrack, Rock View, Ballot and Celt.

J. O. Keene, though he named eighteen, all the get of Luke McLuke, is just fifteen short of his nominations of a year ago. Hal Price Headley named an even dozen, and the lot is equally divided between Uncle and Ultimus. The Sunset Stable is represented by nine Friar Rocks, and, in fact, the young stallion that John Madden purchased from Major August Belmont evidently had a big season, judging from the number of times he is represented in the nominations that have been made. His name appears in various lists other than the Madden list. John S. Barbee pinned his faith to the imported stallion Huon and he has named an even half-dozen. Thomas C. McDowell has The Manager, Uncle and Jack Atkin as his representatives.

An interesting lot of nominations came from E. F. Simms, who is a part owner of the three year-old Eternal, the colt that took the measure of Billy Kelly in the famous Red Cross match at Laurel last fall. Mr. Simms evidently bought a number of mares, and he is represented by ten different stallions. They are Short Grass, Luke McLuke, McGee, Rock View, Zeus, Delhi, Jack Atkin, Ultimus, Dick Welles and Sweep. The Thorncliffe Stable, from Canada, made three nominations, in which First Sight is represented in tow and Calgary in one. O. A. Bianchi has made eleven, with Jim Gaffney represented in ten of them and Watervale in the other.

In explaining the falling off in the number from last year Secretary Earlocker explained that many of the breeders fell off in the number while others made no nominations whatever The most important falling off was that of James W. Corrigan, who was associated with Price McKinney in the Wickliffe Stable last season. Mr Corrigan is out as a breeder and last year he named fifty-six Major Belmont was seventeen short of last season and Clarence Mackay failed by thirteen to equal his nominations of last year. The Duryea Estate named a dozen last year and there are none for 1921, and on down the line there were shortages as has already been told amounting to a difference of 232.

Notes and News

J. Elmo Montgomery states that Tommie Murphy has written him that Hal Logan is the "find of the year," and he confidently expects that Hal will be the sensation of next season.

Nearly a thousand—in fact to be exact, 969 people—were reported killed in the State of New York last year by automobiles. Nothing is said of the many thousands that were injured in automobile accidents. The public pays dearly in human life and pain for its desire to "get there quickly."

The Horse Review Racing Guide for 1918 has been issued. This annual publication contains the summaries complete for 1918 in the United States and Canada and in addition over a hundred closely printed pages of statistical tables, providing the largest amount of valuable and indispensable information of great interest to the light harness horse contingent. The volume as a whole contains over four hundred pages and notwithstanding the great increased price of getting out the work the Horse Review has magnanimously held it at the old price of $2 and $2.50, according to the style of binding. This price will hardly allow profit and in maintaining the Review shows a public spiritedness that will be appreciated by the horsemen throughout the country.

J. L. Bullock of Tulare has sent his mare, Cora Wickersham, to the Hemet Stock Farm to be bred to Wilbur Lou. Cora Wickersham is twenty-two years old and was a most consistent dam of winners of the Breeder's Futurity Stakes, while Wilbur Lou was another Futurity Stake winner and sire of Futurity Stake winners. The produce of this union should possess a great burst of early speed.

The figures of the Government Statistical Abstract rise to confound the prophets who predicted that the horse would disappear before the advance of motor transportation. Neither in actual numbers, nor in relative proportion to population, has the horse shown any decline in the past twenty years, which period covers the development of the automobile. There were 13,538,000 horses in the United States in 1900, according to the census, and the number in 1917 was 21,210,000. Our population in the former year was about 75,000,000, in the latter approximately 100,000,000. The number of horses increased by 56 per cent while the population was increased some 33 per cent. The fact that we were furnishing horses to the allies in Europe did not prevent an increase of some 51,000 in the total number during the year 1916-17. And it is reasonably safe to guess that despite our own participation in the war, there are now more horses in the country than there were in 1917.

There are two great stallions standing for public service in Pleasanton and if they were anywhere else in the United States their books would be full. Owners of good mares on this coast are making a mistake by not seizing the opportunity to breed to such great horses. The horses are "The Anvil," 2:02¾. The fastest trotting stallion ever offered for service in California and one of the fastest and best bred stallions in the United States. The other is "Vernon McKinney," 2:01¼. This great horse is a sire of early extreme speed and a high class horse in every respect. Judging from the prices paid for yearlings at the Old Glory Sale, racing prospects are going to bring big money and now is the time to breed your mares to good horses.

Dates for the 1919 State Fair have been definitely set. It will be held from August 30 to September 9, inclusive.

An even twenty yearlings were sold at the Old Glory Sale for $44,635, an average of $2231.75, prices ranging from $6025 to $1000. It is to be noted that they were all the get of sires that have not only been tried and found to be capable of producing winners but are horses whose names have figured most prominently in print not only in the news columns but the advertising columns of the turf journals.

The man who has a good stallion and fails to advertise him is "hiding his light under a bushel." It is proven every day. The sagacious owner of a good mare will every time select the horse that is best advertised, realizing that with equal merit the offspring of the horse most in the public eye will be worth the most money.

Whether you have a thoroughbred, standard bred or pure bred draft stallion if he is worth keeping he is worth advertising in the turf journals to the extent of one or more service fees. Enough said—see the point? Send in your copy.

THE PLEBIAN PACER

(By W. H. Gocher)

One afternoon about thirty-five years ago while sitting on the club house steps at Fleetwood Park, Allie Bonner said: "A gentleman would not drive a pacer on the road," and at that time the clever amateur reinsman was right, as there was very little to recommend a sidewheeler in the early eighties, except speed. Over ninety per cent of them had either ewe necks, sloping quarters, crooked hind legs and very little knee action. They looked like the departing remnant of amblers which were supposed to trace to the famous Narragansett pacer that swam ashore on Rhode Island in colonial days. There were, however, a few exceptions, as no one ever saw a handsomer pair of race mares than Mattie Hunter and Buffalo Girl. Their kind, however, was in the minority until the Tennessee pacers, nearly all of which carried a strong infusion of thoroughbred blood, appeared and were in time followed by the round made, rapid going, trotting bred pacers of the John R. Gentry, Joe Patchen and Single G. type.

Amblers and pacers date from the earliest days of horse history and were very numerous until vehicles supplanted the riding horse. There was also such an active demand for them, especially for ladies, that in England in the time of Queen Elizabeth over three hundred years ago the dealers made a practice of hoppling horses, just as trainers do now, to make them adopt the ambling or pacing gait.

The early records of harness racing in America show that there were a few pacing horses in the thirties, while on June 4, 1844, Aggie Downs started the 2:30 list for that gait by winning a heat in 2:20 from Calhoun and Fairy Queen over the Centerville Course. That mark was reduced to 2:23 later in the year over the Beacon Course, which was located on the present site of Hoboken, N. J., by Unknown, when he distanced Fairy Queen in a race for $400. This feature made pacing races unpopular as whenever a contestant made a break, he was distanced. There was also a suspicion that the horses were not always to blame for their bad behavior and the fact that there was frequently a difference of from ten to twenty seconds in the time of the first and last heat of a contest made associations hesitate before giving pacing races. This feeling also continued until the appearance of the stoutly bred pacer, which showed that he could run true to form through a series of heats, while the bad actors were in time equipped with hopples to keep them on their gait.

The three old worthies, James Whelpley, Isaac Woodruff and James Eoff, were in the sulkey when the 2:20 list for pacers was started at the Union Course, September 9, 1852. Whelpley won the first two heats with Pet in 2:19¼ and 2:18¼, and Woodruff the next three with Roanoke in 2:27, 2:27, 2:45. Pet was distanced in the fourth heat and Eoff, who was driving Tecumseh, in the fifth. The race was for $500 and the average race goer can surmise what was said by the spectators when the time was announced for the last heat.

In 1855 James D. McMann, who later made his name a fixture on the trotting turf by driving Flora Temple in 2:19¾, appeared at the Union Course with the Ohio bred mare Pocahontas and won with her to wagon in 2:17½. That was the best on record until 1869, when Yankee Sam won over the half-mile track at Uhrichsville, Ohio, in 2:16½, a mark which he failed to reduce even when he was started against Lamplighter on the mile track at Detroit and Coldwater Billy at Pittsburgh.

After a skip of seven years a batch of good paces appeared on the turf, the group including Straightedge, Lucy, Shaker Boy, Sweetzer, Ben Hamilton, Bad Sally and Sleepy George. Sweetzer was owned by John Tod, the first president of the Cleveland Driving Park, and delighted his owner on October 6, 1877, by winning at Cleveland from Sleepy George, Lucy and a couple of others in 2:16, 2:16, 2:16¼, the three fastest heats on record up to that date and all of them below the world's record. This mark stood at the top of the list until the following year, when Sleepy George, after being raced by Geo. H. Smith from 1873 to 1878, passed into the stable of W. H. Crawford. He won with him at several meetings, including Pittsburgh, Cleveland and Utica, and finally hooked up with Sweetzer and Lucy for a five heat battle at Rochester. Sleepy George won the first heat in 2:15, but Sweetzer outpaced him on the next trip in 2:1C¼. Sleepy George then had an easy trip in 2:22, after which Hickock went on and won with Sweetzer in 2:20¼ and 2:17¼.

What was known as the "big four," that is Rowdy Boy, Sleepy Tom, Mattie Hunter and Lucy, swept down the line in 1879. Their series made pacing races popular. All of them were good actors, with but very little difference in their speed, and when the heats were split Lucy was apt to win, but not always. Rowdy Boy was the first of the quartet to do any record making, when at Saginaw he won a heat in 2:15 but lost the race to the blind horse Sleepy Tom. On July 16, Sleepy Tom won again at Columbus in 2:14½ and the following week at Chicago scored another victory when he paced the fifth heat of a postponed race in 2:12¼, a new world's record for the son of Tom Rolfe, whose dam was the old pacing queen, Pocahontas.

Tennessee introduced its first champion pacer in 1881 when Little Brown Jug made not only a new world's record but also a new three heat record at Hartford by defeating Mattie Hunter and Lucy in 2:11¾, 2:11¾, 2:12½. It was a sparkling performance and prepared the racing world for the triumphant careers of the Hal pacers which culminated in Star Pointer crossing the two minute line. Little Brown Jug was also the last pacer to reduce the world's record in a race, although John R. Gentry equalled it when he won from Star Pointer at Glens Falls, N. Y., in 1896.

Johnston started the 2:10 list in 1883. He made his record over the West Side track at Chicago and the following year reduced it over the same course in 2:06¼. For a long time it looked as if that record would never be beaten, but finally in 1891 Direct clipped off the fraction over the kite track at Independence, Iowa.

In 1892, the pacers, like the trotters, were benefited by the advent of the bike sulky and new records became an every day affair. Geers took the first shot at the pacing record with Hal Pointer and cut it to 2:05¼ at Chicago, while Andrews shoved it down to 2:04 with Mascot at Terre Haute. This was equalled by Flying Jib the following year at Chicago during the world's fair. Geers made another bid in 1894 with Robert J. and when he finished the season the little gelding had a record of 2:01½. That was the mark that John R. Gentry equalled and afterwards reduced to 2:00½, over Rigby Park at Portland, Me., on September 24, 1896. Dave McClary made the next move at Readville on August 28, 1897, when he drove Star Pointer to a record of 1:59¼ and started the two minute list which now represents the names of eleven pacers and four trotters, the fastest in the list being Dan Patch with a record of 1:55, made behind a pace maker, while Directum I. is credited with 1:56¾ in the open.

The plebeian pacer which occupied but a very small space in the public eye in the early days is now an important factor on the turf. They have become very consistent race horses that can fight out a series of heats up to the limit of their speed and at a clip that was never dreamed of even by the most sanguine when they saw the "big four" battling for supremacy or even at a later date when the names of Joe Patchen, Star Pointer, John R. Gentry, or Robert J. were familiar with race goers. The high water mark was reached at Toledo last summer when Miss Harris M. and Single G. reeled off three heats in 1:58¼, 1:58½ and 1:59¾, making a new target for future racing champions to shoot at.

HEALANI 56150

As previously announced in these columns William M. Ferguson, the enthusiastic lover of harness horses at Dixon, has purchased the good stallion Healani, by Zolock 2:05¼. Zolock is the fastest son of the great McKinney and one of the handsomest horses ever raced on the Pacific Coast. As an individual, Healani equals his sire. His dam is Queen Derby 2:06¼, by that great sire of pacers, Charles Derby; his second dam is Addie Ash, by Indianapolis, and third dam Addie H, by Ashland Chief. On his dam's' side he represents the best that existed on the famous old Oakwood Park Stock Farm. From his inheritance of speed and stamina he should be a sire of great race horses as well as grand individuals. He has had very little preparation and after fourteen months without having a harness on him he trotted miles in 2:26 and halves in 1:09, and can now show a two minute or better speed for an eighth. Mr. Ferguson has had him jogged five or six miles a day all winter and he now looks and feels good, showing that he is in fine fettle. His owner expects he will trot a mile in 2:10 or better this year. He is only 8 years old, a line trotter and that he is standing for public service should be taken advantage of by all who own good mares suitable for his cross.

Secretary of Treasury Glass and Postmaster-General Burleson prefer the time-honored horse-drawn vehicle to the automobile, and in deference to their wishes the House appropriations committee last week amended the legislative bill so as to provide carriages for their personal use instead of automobiles, which will be furnished to other members of the Cabinet.

THE HIGH COMMISSION AT PHILADELPHIA

The following associations were represented when President Harry K. Devereux called the Grand Circuit stewards in session at Philadelphia on Tuesday of this week:

North Randall (Cleveland, Ohio), Harry K. Devereux; Poughkeepsie, N. Y., Thomas W. Murphy; Atlanta, Ga., R. M. Striplin; Hartford, Conn., W. H. Gocher; Readville, Mass., James F. Young; Toledo, Ohio, Joseph J Mooney; Columbus, Ohio, Harry D. Shepard; Syracuse, N. Y., Daniel Ackerman, Jr.; Lexington, Ky., and Kalamazoo, Mich., E. W. Swisher (of Columbus, Ohio).

EARLY RACING IN CALIFORNIA

(By Geo. H. Tinkham.)

In the decade from 1859 to 1869, two very important events occurred—the civil war and the completion of the overland railroad. The war did not in any degree interfere with racing in California; the railway greatly benefited it by increasing the attendance at the annual State and County Fairs, thereby adding to the gate money and permitting the associations to give bigger purses and a better class of races.

Better stallions were imported, and among them was a chestnut pacer named Longfellow and trained by Pat Farrell at his training quarters at the old Bay View Park, South San Francisco, and owned by Chase and Bowley, livery stable keepers in San Francisco. Farrell declared Longfellow to be the best pacer he ever held the reins over, but after winning several races, he was beaten in 1867 by Empress, a mare formerly called Queen of the Pacific and once owned by A. F. Smith of Sacramento but sold to Charles Shear the year her name was changed. This mare took three heats in slow time, winning from Mike O'Brien and Longfellow. Two years passed, and Longfellow defeated in straight heats Darkness, Mike O'Brien and Empress, pacing the third heat in 2:29 and reducing his record. The year following, in 1871, he met his Waterloo.

The new champion, first called Col. Visher, was sired by Chieftain, who was brought to California by steamer by S. S. Crim in 1864. The dam of Col. Visher was a mare driven across the plains in 1849 by Sebastian Visher of Stockton. He was a sheep raiser and driving the long legged roan pacer over the plains in a buggy soon learned he could pace. The colt was trained by a former mule team driver and at the Stockton fair of 1868 he paced in 2:32½ and 2:43, easily defeating the little blue colored pacer from New Mexico. It was a wonderful heat in those days for a green pacer, and he was the talk of the State. Soon after this performance Col. Visher was sold to A. G. St. John of San Jose, for $1,500, I believe. He was renamed Defiance and in capable hands developed speed rapidly and entered in the free for all pace at Sacramento in 1871 and won in straight heats from Longfellow and Albany Boy in 2:25, 2:22½ and 2:23. The following year in a free for all pace he took the first, second and fourth heats and Billy Mayo the third heat, Longfellow third. The same year, September 26, Defiance made the world's record for two mile heats, pacing a second dead heat with Longfellow in 4:49½, 4:47¾, 4:37¾. The following year, 1873, a little gray gelding named Van Voorhies, outpacing Defiance, Jim Brown and Johnny Swildle, took three straight in 2:20, 2:20, 2:20¼. The fastest coast heat and heats since the days of Prince McGath, Defiance had a pacing record of 2:19½ and a trotting record of 2:22. He was the first of the four double-gaited pacers, Defiance, Direct, Homestake and Ottinger.

Leaving the pacers, we will first notice the imported trotters, among them Red Bird or Honest Ance as he was called throughout the East. He had trotted with Flora Temple and was brought to California in 1851 by James L. Eoff. He was the first stallion to lower New York's record, 2:32. He, like General Taylor, was sired by the Morse horse and the year of his arrival appeared at the State Fair grounds, then at Twentieth and I streets. Late in the forenoon of September 19 it was announced that in the afternoon at three o'clock there would be a trotting race for a purse of $500 between four of the fastest trotters of the State course, over the Yolo track. The Fair track was then only a half mile. The announced entries were Red Bird, owned by J. L. Eoff, California Damsel, formerly Columbia, owned by John Crook, Glencoe Chief, owned by Captain Stephen Card, and Jim Easton, owned by W. D. Chapman. It was for that day the classy four in California—the equal of Guy Wilkes, Woodnut Manon, Arab and Nellie R. in the 80's. The crowd, over 1,000 in number, hurried over to the Yolo track through the heavy dust and hot sun, and paying their $1 admission, waited. In the meantime the liquor sellers were doing a rushing business and the gambling tables were crowded with those anxious to "buck the tiger." After a long wait in which the people became very weary, two trotters came upon the track, California Damsel and Red Bird. Then the crowd began to howl, for many of them had bet the Damsel against the field. Some accused "Jim" Eoff of crooked work, for his fame as a trickster had preceded him. Others said Chapman and Card were afraid to start their horses as Red Bird was a ringer—Honest Ance with a record of 2:27. It was a put-up job and a fake race, the Damsel easily winning in 2:34, 2:31, 2:31½.

The fastest trotting mare of that day aside from Princess was May Queen, a trotter, later of distinguished fame because of her son May King by Electioneer and he the sire of Bingen 2:06¼. She was sired by Norman's Alexander in 1855 dam Jenny by Crockett's Arabian, and had a record of 2:20. She was for several years on the California turf and first became noticeable because of her two races with Geo. M. Patchen. In November, 1865, she easily out-trotted him and Gentleman George mile heats in 2:31, 2:39, 2:35. Immediately a match was made between her and Patchen, two mile heats for $5,000, to be driven out December 16 over the Pioneer course, San Francisco. Again she was the victor, winning in 5:05, 5:07. Her race in the free for all at the State Fair of 1866 was unimportant as she there took straight heats from Young America, Captain Hanford, Young Lightning, a pacer and unknown in 2:31¼ best time. She then lowered the State record in 1868 over John G. Downey, named after the Governor, Captain Hanford and Gus Bilger in 2:29, 2:29½, 2:31. From this time she was handicapped to wagon and in 1869, driven by Barney Rice in a free for all purse, she took the first, third and fifth heats Regulator (J. L. Eoff), the second and fourth heats Hanford (S. M. Whitehead), third in 2:32 4-5, 2:35 3-5, 2:34, 2:37, 2:38 3-5.

The sensational race of the year was the match race October 14 over the Alameda track between George Treat's Venture by Belmont dam by American Boy six years old and S. B. Whipple's 4-year-old Harvest Queen by Rysdick Hambletonian and Emma Dubois. The stakes were $10,000 a side. About three thousand persons were present and some $25,000 changed hands. George Treat had several runners and trotters, but he soon discovered that Venture was in the wrong class. In the first heat the mare led to the half, when she broke, and Venture passed her, winning the heat with the Queen three lengths behind. In the second heat Venture trotted first under the wire, but the judges set him back for running. More running in the third heat, and in the fourth heat Venture did more running than trotting time, the best heat 2:44 second heat. The race was over at 4:15 o'clock, but so poor was the steam ferry accommodations the San Francisco sports did not reach home until 8 o'clock. And they said never again.

Venture was one of the leading performers in the great colt race of September, 1866, for a purse of $8,000, this stake being the forerunner of the established Occident State founded in 1880. Three years previous a number of gentlemen assembled in San Francisco and agreed to establish a purse for three-year-old trotting colts. Each owner named one or more colts and paid in $5 a month.

Thirty colts were named, but eight only appeared for the trial contest. The four colts making the best two heat average were eligible to start the following day for the purse. The colts were driven out in three different classes. The contest took place over the Shell Mound track, Oakland, and over $30,000 was bet on the result. The time winners were Billy Vernon 3:01½, 2:57½, Algerine 3:00½, 2:59, Venture 2:54¼, 2:58, Eastonia 3:01½, 3:00¾. These four colts started the following day, and surprisingly strange the slowest trial colt, Eastonia, took two straight heats in 3:01½, 3:00½. Venture was distance for running.

DOINGS AT DIXON

(Special Correspondence.)

R. D. Mayes has recently purchased in the East and sent to Dillon Axworthy to be bred the producing mare Chimes of Normandy 2:23 by Chimes dam Santos. She was the dam of Norman Dillon II 2:07¼, the world's fastest two-year old gelding out in 1918. This mare, while somewhat aged, will be a bargain if he can get her with foal.

The horsemen at the track are already talking over the prospects of races for the May Day, 1919, celebration to be held in Dixon, as has been the custom of the times for forty years. They are trying to arrange half mile heats for three-year-old pacers (of which there are four here now), with others in sight. They expect six or eight three-year-olds to face the starter on May 1, 1919. With these colts right and the track fast, some of these colts will step this track in 1:03 or better for a half mile.

Wm. M. Ferguson has recently purchased the fast pacing mare, Vera Hal 2:05, and has her at the track. The interest naturally centers in the free for all pace with Verna McKenna 2:09¼, Teddy Bear 2:05, Jim Logan 2:01¾, Bondelene 2:04½, Burt Hale 2:02, and Vera Hal 2:05 as possible starters. What a race you would see as they turn into the stretch for home! The track record, 1:01¼ for a half mile, is held by Teddy Bear. With the above horses ready and a good track and good day, do not be surprised if the above mark is lowered.

There are at present eighteen head of horses taking their jogwork daily over the track, and as all have wintered well and recently been clipped, they sure look fine, as no doubt Hoover was overlooked when dealing out their rations.

Lou Matavia, in charge of Mr. Mayes' horses, is stepping around like a two-year-old as he is anxiously awaiting the foaling of Miss Untonia (dam of Mabel Trask 2:01½), which is due now in a few days to the cover of Peter the Great 2:07¼. Who wouldn't step some with such a bright prospect in sight? It is reported that Mr. Winnings, the head man for Mr. S. A. Fletcher, owner of Peter the Great 2:07¼, offered Mr. Mayes a large figure for this colt when it is a week old, the same being refused. Hard to realize what price could be obtained for a full brother or sister to Mabel Trask 2:01½.

Vera Hal has been clipped and shod and is as fat as a seal and surely enjoys her work and feels like a colt.

If nothing unforseen happens and everything matures as it's hoped for, the public will witness, on May 1, 1919, over the Dixon half mile track, some of the closest and fastest racing witnessed anywhere in the United States and for the time of year no doubt the fastest in the world.

LOS ANGELES SUMMARIES

The following is the report of the summaries of the harness races at the Los Angeles Liberty Fair. This report reached us too late for our last issue, as was noted at that time.

December 4th

2:09 Trot; Purse, $1,000

Red Star	1	1	1
Miss Frisco	2	3	2
Maggie M	4	2	3
San Felipe	3	4	Dr

Time: 2:09½, 2:10, 2:12.

Free for All Pace; Purse, $1,000.

Bondelin	1	2	
Emma M	3	5	
Mac Fitzsimmons	2	1	
John Malcomb	4	4	
Directress Mac	5	3	

Time: 2:08, 2:07¾.

December 5th

2:11 Trot; Purse, $500.

Edith Carter	1	1	3
Zolock Zar	3	2	1
Dr. Bainbridge	2	3	4
Barbara D	4	4	2

Time: 2:16, 2:12¾, 2:15¼.

2:14 Pace; Purse, $1,000.

Emma M	1	1	1
Dixon Boy	2	2	2
Ora Belle	4	3	3
Surety	3	4	4
Roma Dee	Dr		

Time: 2:12½, 2:11¼, 2:11½.

December 6th

2:11 Pace; Purse, $500.

My Sweetheart	1	1	1
Dairy Maid	2	3	2
Alacker Jr.	3	2	3
Hemet Queen	4	4	4

Time: 2:15½, 2:21½, 2:22½.

2:20 Trot; Purse, $1,000.

Red Star	1	1	1
Maggie M	2	3	2
Sky Rockett	3	4	3
By Pass	4	2	4
Edith Carter	Dr		

Time: 2:12, 2:14½, 2:16½.

December 9th

Free for All Trot; Purse, $1,000.

Red Star	1	1	1
Miss Frisco	3	2	2
Allie Lou	2	3	3
By Pass	4	4	4

Time: 2:13, 2:13¼, 2:13½.

2:08 Pace; Purse, $1,000.

Mac Fitzsimmons	2	1	1
Emma M	1	4	4
Directress Mac	3	2	2
Roma Dee	4	3	3

Time: 2:11¼, 2:12, 2:11½.

December 10th

2:10 Trot; Purse, $500.

Edith Carter	1	1	2
Maggie M	2	2	1
Sky Rockett	3	3	1
Dr. Bainbridge	4	4	4

Time: 2:13½, 2:13, 2:12¼.

2:05 Pace; Purse, $600.

Bondelin	1	1	1
Directress Mac	3	2	2
Mac Fitzsimmons	2	3	3
John Malcomb	4	4	4

Time: 2:07¾, 2:08¼, 2:09½.

December 11th

Special Mixed Class; Purse, $500.

Alacker Jr.	1	1	4
Ora Belle	2	2	1
Barbara D	3	4	2
Hemet Queen	4	3	3

Time: 2:20¼, 2:16¼, 2:14½.

2:11 Pace; Purse, $500.

My Sweetheart	1	1	3
Dixon Boy	2	2	1
Dairy Maid	3	4	4
Surety	4	3	2

Time: 2:15½, 2:16¼, 2:11½.

December 12th

2:07 Trot; Purse, $600.

Allie Lou	1	1	1
Maggie M	3	2	2
Miss Frisco	2	3	3
By Pass	4	4	4

Time: 2:09½, 2:10¼, 2:10½.

Free for All Pace; Purse, $500

Bondelin	4	1	1
Mac Fitzsimmons	2	4	2
Emma M	1	2	4
Directress Mac	3	3	3

Time: 2:07¾, 2:06¾, 2:09½.

December 14th

2:10 Trot; Purse, $200.

Miss Frisco	3	1	1
By Pass	1	2	3
Zolock Zar	2	3	4
Barbara D	4	4	2

Time: 2:12¾, 2:15½, 2:14½.

2:12 Pace; Purse, $200

John Malcomb	1	1	2
Ora Belle	3	2	1
Surety	2	3	4
Dixon Boy	4	4	3

Time: 2:10, 2:09½, 2.09¼.

TURF TRAGEDIES

(By W. H. Gocher.)

Racing has its tragedies as well as its pleasures and while very few of them appear in front of the scenes, there are times when tears are blended with the applause that rolls through the grand stand after the finish of a heat. Ample evidence of this was seen at Hartford in 1905 when the thousands who had assembled to witness the contest for the $10,000 Charter Oak Purse saw Sadie Mac fall dead near the distance in the fourth heat as Angiola flashed by the stand in front of Norman B. and Lisonjero.

It was conceded for weeks that, barring an accident, the unbeaten daughter of Peter the Great and Fanella would win this event, as she had repeatedly shown faster than any horse entered in it. At Detroit in her first start of the year, Sadie Mac won in 2:06½, while at Buffalo she landed a $10,000 event without being forced to a drive. Her next appearance was at Readville in another $10,000 event, where she lost her first heat during the season and the second one in her career to Kid Shea, but won in 2:06¼. Another victory awaited her at Providence, where she defeated Lady Gail Hamilton and Turley in 2:07¾, while the end came without a moment's warning at Charter Oak Park, where in her three year old form she won from Ethel's Pride and Lord Roberts, and also where her dam was foaled.

The most spectacular death of a trotter that ever occurred on a race track was seen at Pittsburgh on July 15, 1881, during the inaugural meeting of Homewood Park, when Bonesetter dropped dead. He had trotted two heats with Driver, Midnight, Wedgewood, Trinket and Patchen, being in the thick of the fight in each. In the third heat, while Midnight and Trinket were finishing out in front, Bonesetter faltered near the distance. McCarthy yelled for someone to catch him. No one came to the rescue, while the splendid stallion, whose brilliant racing had thrilled thousands for four seasons, staggered and swayed almost to the judges' stand, where with a lunge, he fell towards the rail and was dead when he struck the ground.

Bonesetter was bred in Tennessee and was owned by H. V. Bemis of Chicago when he died. D. B. Hibbard brought him out in 1878 when he won eight out of fifteen races from such good horses at Woodford, Mambrino, Scott's Thomas and Indianapolis, while he also had a seven heat battle with Protein and Little Fred at Chicago, the Blackwood mare winning after Bonesetter had placed two heats and a dead heat to his credit.

Frank Van Ness raced Bonesetter in 1879, when he won twelve out of eighteen starts from such horses as Driver, Hannis, Voltaire, Dick Swiveller and Charley Ford. Dan Mace also won with him in 1880, when his score was eight firsts out of twelve starts, while in 1881 McCarthy won two races with him at Fort Wayne and was beaten by Trinket, Wedgewood and Voltaire prior to his death at Pittsburgh, the race at that meeting being won by John Shillinglaw with Midnight.

Bonesetter is entitled to a tab in the race horse hall of fame, as during his career he was started in fifty-two races, of which he won thirty. He was also second in thirteen, third in six, fourth in two and unplaced in five. The black mare, Flash 2:19¼, made a place for him in the table of sires.

Young Rolfe made a whirlwind exit at Mystic Park, Boston on September 18, 1884. He was a Massachusetts product, having been bred by Wesley P. Balch. He sold Young Rolfe to Horace Nelson, who developed him at Waterville, Mo., where he also got a few foals, the splendid trotters Aubine and Nelson being among them.

In the spring of 1884 John Sheppard purchased Young Rolfe and placed him in James Golden's stable. He prepared him for his turf career, his first starts being at Mystic and Beacon Parks, where he won his engagements. Another race was picked up at Providence before going to Albany, where Young Rolfe won the $3000 Clay Stake from Harry Parker, Fleet Medium and Kingsley.

Golden dropped into the Grand Circuit with Young Rolfe at Rochester, where he finished third to Nelly L. At Utica the following week he finished second to Montgomery. These races were followed by victories at Hartford, Springfield, where Young Rolfe made his record of 2:21¼, and Providence.

When the bell rang for the race at Mystic Park Young Rolfe was a top heavy favorite, as he had three or four seconds more speed than Lizzie M., Dickard, Breeze Medium and the other horses named to start against him. When the word was given Golden took his mount out in front and remained there until near the head of the stretch, where Young Rolfe made a break and ran like a wild horse. Golden was unable to stop him, and seeing that he was going to choke down, he made an effort to guide him to the outside of the track. Near the distance Young Rolfe faltered, and fell. He was dead before anyone could reach him.

There was a sad scene at the Buffalo Driving Park on August 3, 1886, when the first heat of the 2:33 trot was being contested. Five horses took the word, one of them being Lucy Fry by Blue Bull out of the old race mare Kitty Bates 2:19, which promised to be one of the best trotters of the year. Like Young Rolfe on his fatal day, Lucy Fry was an overwhelming favorite, on account of her showing the preceding week at Cleveland, where she trotted the fifth and deciding heat of a race in 2:20¾, defeating George A, Lady Haven, Opal and May Day. In the Buffalo race she marched out in front of the field and remained there to the upper turn. At that point she stopped and her competitors swept by, George A. winning with the Canadian mare Geraldine in the place. After the heat it was learned that Lucy Fry had broken a bone in her hip and a bullet put her out of misery.

The most gruesome tragedy on the turf occurred at Chicago, September 22, 1866, in connection with the $5000 match race between General Butler and Cooley. The latter was the favorite and won the first two heats. The next two were won by General Butler. It was almost night when the fifth heat was started. General Butler was in front as the horses disappeared around the turn and nothing more was seen of them until Cooley jogged in and General Butler galloped by without a driver.

An investigation developed the fact that someone whose identity was never known knocked a board off the back fence of the grounds and had held it over the inside rail of the back stretch near the half-mile pole so that the head of William McKeever, who was driving General Butler, struck it when his horse passed that point. McKeever dropped from the sulky dead, while the perpetrator of the crime escaped through the hole in the fence.

LEE AXWORTHY 1:58¼
World's champion trotting stallion. Died Nov. 6, 1918.

FALL IN LINE WITH NEW ASSOCIATION

While the South Dakota State Fair Association has the credit of antedating the plans of the newly organized Harness Horse Association, J. D. Kelly of Oregon, Ill., wants to claim the honor of being the first to fall in line. He writes:

"Oregon will open the Illinois Valley Circuit with $300 added money purses the week of July 4th. The entrance money will probably be $5 to enter and $10 to start, with entrance fees added to the purse and no deductions."

Secretary Frank D. Fuller of Memphis states that the Tri-State Fair will also have the added money purses.

At a recent meeting of the State Fairs of Iowa, Minnesota, South Dakota and the Interstate Fair of Sioux City, it was decided the racing at those four Fairs will be all under the new plan. That is, each Fair will appropriate in the cases of each of these Fairs about 75% of what they formerly advertised to give as purses. Des Moines will give a 2:14 trot and 2:14 pace early closers, and add $1,500 to the entry fees received. These will be at 3% as heretofore. For the late-closers they will charge an entrance fee of $10 to accompany the entry in cash, and $5 more for starters at 11:00 o'clock the day of the race. These $15 entrances will be added to the amount of the purse and there will be no deductions, either from the stakes or late-closing classes. They will add $800 instead of a $1,000 purse, $600 instead of $800 purse and $500 instead of $700 purse.

Late Thursday evening, at Sioux City, the Northwestern Iowa Fair Circuit had its meeting, and decided to race under the same plan, and add entrances to the purse they offer, and not deduct anything. They voted to add $250 or more to each purse, and charge and entrance of $10, which would be added. It will be seen that $250 added with eight entries is better than a $400 purse, and with five starters it is better for the second, third, and fourth horses, and only $10 less for the first horse than a $400 purse could be. It will also be seen this is just about half the usual entry fee.

Secretary Magnus Flaws of Chicago writes that he is getting numerous inquiries from associations as to what the Harness Horse Association requires, so that they can take the matter up at their circuit meetings. Other associations desiring such information should address him at 542 S. Dearborn Street, Chicago.

Numerous requests are being made that the next meeting of the new Association be held in New York and this will be shortly decided by the Organization Committee.

THE TWO-MINUTE ROSTER

Trotters

Uhlan	1:58

Prince Alert	1:59½
Napoleon Direct	1:59½

A NEW BREEDERS' ASSOCIATION

The Pacific International Livestock Exposition has been taken over by the breeders of the Northwest, under whose direct management it will be in the future. They have elected a directorate of forty men and an executive committee of thirteen, both being made up of the prominent breeders of this Western country. At the first meeting of the directors, O. H. Plummer was elected general manager of the show and to represent breed interests all the year round, with an office in the Northwestern Bank Building, located in the center of the city, which will be made the headquarters for livestock men and breeders when they visit Portland.

A budget is being prepared covering the cost of the proposed buildings, and there is also being prepared a tentative premium list. It will be about the first week in February before these figures will be ready to submit to the directors, after which time a drive will be made for funds, after the manner of the Liberty Loan drives, with a county chairman and sub-committees, each county being given a quota to raise, based on the valuation of livestock in their particular county. The management is also going before our State Legislature for the purpose of asking for an appropriation of $25,000 a year to apply on the premium list of the Pacific International, of which the horses are coming in for a liberal share. A great deal of attention will be given the Horse Department at the coming show, which will be held November 15-22 next, inclusive.

A MYSTERIOUS DEPOSITOR

(By W. H. Gocher.)

During a recent convention at Atlantic City, a group of bankers were talking shop on one of the hotel porches. Most of their remarks were rather commonplace, until a lanky individual, whose general appearance showed that he came from near the Mexican border, snapped the ashes off his cigar with the remark that if no one objected he would tell them of an odd incident in connection with a director in the bank of which he was president. As no one demurred, he prefaced his story with an explanation that he came from Texas, where cattle was the staple with an odd mining interest cropping out. With his people a man's rating depended on what he had on the hoof. Cattle was also about all that a man could get a loan on, unless he could lay down paper as good as government bonds.

"One day, however," he continued, "a young man with whom I had a nodding acquaintance came into the bank and made application for a small loan, while he frankly admitted that he had no security to offer, except an assignment of a portion of his salary. He was working for a friend of mine, and I knew that he had a permanent position. Still that kind of knowledge does not satisfy bank directors, so I turned him down. Later in the day another man came in and took up a note which I had long since charged to profit and loss. It was a personal matter and as I counted the money, I decided to let the young man have a portion of it. So the next morning when I met him on the street, I told him that if he would call I would help him out. I suppose some of you old flint hearts have done the same thing a few times in your lives, just as a flyer, instead of counting up the interest that a loan will bring in before the principal is paid.

"Three weeks later my young friend came into the bank and after making a deposit, handed me a check for the loan with the interest to date. During the next three months he also came into the bank nearly every week to make a deposit, after which there was a skip to the following August, when he again began to make deposits and continued them to October. His account also showed that the only check drawn against it was the one with which he paid my loan.

"Finally a third year rolled around and about the middle of July he appeared again. Starting off with a few hundred a week, his deposits soon ran up to four figures. Each of them was also a draft on New York or Chicago, and no two ever came from the same city. As there was considerable bad paper floating around that country at that time, I told one of the secret service men about this peculiar account, as I could not imagine where this money was coming from. All that he could learn was that a man called at each of the banks, purchased the drafts with currency, and mailed them to the mysterious depositor. He also learned that he never received or sent any telegrams, or sent off any express matter and so far as they could find out wrote but very few letters. His mail was limited to an occasional letter and three or four weekly papers. This year the drafts were purchased in Michigan, Ohio, Pennsylvania, New York, Massachusetts, Connecticut, Kentucky and Texas, while the others came from Oklahoma, Missouri, and Illinois. The account also became such a matter of comment in the bank that the clerks were betting pennies as to where the next draft would come from.

"The following year my young friend began depositing about the middle of July and continued until October. The drafts came from the same states as the preceding year, while the amounts, except in a few cases, were about the same, until the last one which was well up in four figures. A few days after that deposit was made I had occasion to go to New York. Upon my arrival, I registered at a hotel near the Grand Central depot and while I was waiting for the clerk to assign me a room, a middle aged man, who had occupied a section opposite me in the sleeper on the ride from Cincinnati and registered after me, stepped up and asked if I knew a man, naming the bank's mysterious depositor. I said that I did and not knowing what kind of a game was going to be handed me in the big city, like an old ranger I felt if my gun was in place and turned to walk away. The stranger followed me, however, and in a very friendly way asked a few questions regarding this young man and of course there was nothing for me to tell him except that I knew him. Finally my chance acquaintance told me that the name of this young man was well known in light harness racing circles in the north and that for four years a horse owned by him had been winning regularly, first at meetings in the middle west and during the past two years at many of the big meetings, also that he had purchased the horse for a large amount and was going to take it to Europe. He said that he remembered the name of the town where the owner lived, although he had never met him, and spoke to me when he saw by the register that I came from the same place.

"By that time I began to get wise to the operations of my young friend and on my return home he told me that he had purchased a colt for a small amount and placed it in the hands of a trainer. By careful management he succeeded in saving enough money to pay the bills until the horse was ready to go to the races and the loan was to take care of the shipping bills and entrance fees. His horse also won its first race and kept winning. In fact there were only five or six races in the four years when it failed to get in the money and as he quietly remarked his trainer knew that it was not good while the public made it a top heavy favorite. No one with a grain of sense in the racing world asks for anything better than that, where there is pool selling with the field selling against the favorite. To one on the inside it was like finding money and he did.

"However, that young man is now one of the directors of the bank and he will inherit the few pennies I have saved, as he has also married my daughter. In time he will no doubt come to one of these conventions when he may tell a few of you how he owed his start in life to a horse."

THE DRAFT HORSE SITUATION

Wayne Dinsmore, secretary of the Percheron Society of America, before the forty-eighth annual Kansas Agricultural Convention, held at Topeka January 10th, among other things says in regard to the foreign demand for draft horses that it is a problem which no man can as yet measure. It was anticipated that there would be an immediate and large demand for our horses in England and France, but letters which I have recently received from men in Great Britain who are especially well qualified to speak with authority, indicate that there will be no immediate demand for our commercial horses there. In the first place, they are so short on horse forage that ration cards have been issued, and the amount each horse can have is doled out with even greater care than sugar was to the human beings. In the second place, the British government is now selling 125,000 horses from the army in Great Britain, and will, it is estimated, sell half a million more within the next eight months. The London Times, on December 11, 1918, quotes Sir Wm. Birkbeck, director general of remounts, as having estimated, in a speech made December 10th, 1918, that the number of horses eventually to be released from the British armies would be not less than three-quarters of a million. General Birkbeck also proved by the exact records of the army that the percentage of wastage among army horses, even allowing for war losses, was considerably less than that experienced by ordinary commercial firms in Great Britain before the war. Brood mares released fom the army are to be sold to British farmers, but the government retains a lien on the progeny up to three and one-half years of age at $250 per head.

The number France will demobilize is estimated at nearly three-quarters of a million, and the United States government had at the time the armistice was signed 166,554 horses and mules in Europe, all of which will be sold there within the next two or three years. This means that there will be approximately one and a half million horses released from the allied armies for other uses in the next year or two, and such a demobilization will forestall any extensive exportations and rapidly reduce values from the higher levels prevailing in Europe to figures more nearly approximating prices here. There is, however, definite evidence in my possession which forecasts the inauguration of some shipments of heavy drafters from the United States to Europe as soon as cargo space is available at reasonable rates, and there is also certainty of some exportations of Percherons from the United States to Great Britain, as three separate British concerns are already at work on preliminary plans for Percheron purchases in this country. These will be very strictly safeguarded by the British Percheron interests, which have already given notice that they will not allow any shipments unless the animals are inspected and passed before leaving the United States by their own representatives. Knowing, as we do, the harm which came to American horse interests by the importation from France and sale here of many inferior Percheron stallions, we can but applaud the good judgment our British cousins are displaying in taking steps to check the activities of irresponsible speculators who might seek to engage in the trade. The demand for Percherons in England will grow, slowly but surely, as they acquaint themselves with the merits of the breed, and there is reason to believe that the trade will eventually be almost as important as our sales to Canada, which totaled 770 Percherons during our last fiscal year.

Despite the conditions I have already discussed, which will delay the establishment of a large trade in the exportation of horses, there is bound to be a great volume of business in exporting horses within the next five years. Even New York financial journals have taken note of this, for the Wall Street Journal recently said: "Nothing on the American farm will be in greater demand abroad than the horse."

All this must favorably affect the future of the draft horse here.

When all is said and done horsemen must realize that the horse will survive as a power unit so long as equine power can be furnished more cheaply, more efficiently and more satisfactorily than in some other form. Horses today furnish the greatest proportion of the power needed in producing crops, and there is no reason to believe that the supremacy of good draft horses on farms ever will be threatened seriously, but inefficient horses, and their owners, will be slowly but surely eliminated.

The advantage to the farmer of producing his own power units is very great, for then he is independent. Tractor manufacture requires labor in the iron and coal mines, steel mills and tractor factories, and much of this is high-priced labor. Strikes or wage increases may within a very brief time double the cost of power to the farmer who is dependent on the factory, and he is subject to the arbitrary action of manufacturers in the prices he must pay for repairs and the time when he shall receive them. The cost of fuel is also beyond his control. The man who uses draft mares and rears his own power units is free from such problems. He knows that the cost of his power units cannot be suddenly and arbitrarily increased by the action of a manufacturer or labor union. He knows that he has no need to fret about repairs, for if one horse gives out another can be substituted in thirty minutes or less, and he is raising his own fuel in roughage and grains and can tell the Standard Oil Company where to go when the price of internal combustion oils is increased.

We must not forget, also, that while the horse in ordinary work exerts a pull equal to one-tenth his weight, he can in an emergency pull a load five or six times as great, while mechanical power at best can pull only a 100 per cent. overload. This reserve of power available in horse power units is invaluable on the farm or anywhere else when thoroughly dependable power that can work in soft footing is needed.

Furthermore, the waste from his equine power units goes back to the farm as fertilizer instead of being sold to the old junkman at half a cent a pound, and last, but not least, his power units in horse flesh endure much longer than any other field power he can buy.

The good draft horse still reigns supreme on farms, and will continue to do so, but the inefficient horse is doomed.

DEATH OF WALTER MASTIN

Walter Mastin died suddenly in Sacramento on Jan. 4th. He was a great sufferer from rheumatism, having been confined to the house and practically helpless for a long time. He was about sixty years old at the time of his death and will be remembered as a trainer and driver as well as a breeder of trotting horses of some prominence. A number of years ago, along in the nineties, he became owner of the stallion Falrose 2:19, sire of 11 in the list. He won several races with this horse and thought so much of him, he kept him until he died of old age, although there had been times when he could have sold him at a good figure. When Mr. Mastin's malady incapacitated him for driving and training horses he engaged in the real estate business and was quite successful, making enough to place himself in easy circumstances during his long illness. With his passing goes an excellent horseman and a man who made and held a host of friendships. During the long years of suffering he seemed always cheerful and hopeful, but the dread malady gradually overcame a strong and virile constitution.

The death of William Hogoboom, who passed away at Walla Walla, Wash., was a great loss to the trotting horse fraternity on this coast. William Hogoboom bore an unblemished reputation as a driver, was a most efficient trainer and his love of horses was great. When in California he was superintendent of the stock farm of Mr. D. E. Knight of Marysville. Mr. Knight was president of the Pacific Coast Trotting Horse Breeders' Association and a prominent business man in this state, a good judge of horses and men. When he picked William out he showed his confidence that he had the right man by trusting him with the management of all his horses.

Mr. Hogoboom died after a painful and lingering illness, putting up a game fight that lasted to the wire. He was a man who would walk miles to inspect and admire a fine race horse and was capable of tracing out its pedigree and passing on it from a physical standpoint. All of his friends and acquaintances believe and are confident that he drove every heat to win and all will miss this veteran horseman when they go to the tracks this coming season.

Thomas W. Murphy, of Poughkeepsie, in a recent letter to C. A. Burne, of Toronto, paid a glowing compliment to the trotter, Chilcoot 2:04¼, when he stated that the Canadian stallion was one of the best gaited, mannered and fastest horses he ever sat behind in his successful career with the harness horse. Mr. Murphy is very anxious to race Chilcoot another season as he is training absolutely sound and he has every faith that he will trot to a very low record next year. However, the earnest appeals of the breeders in Canada to return the stallion to stud duties are receiving grave consideration from Mr. Burns, and he may yield to their wishes.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Sportsmen's Row

The one sport that benefited most by the war is trapshooting. When the United States Government installed traps in the training camps and made trapshooting one of the courses of instruction it did more for the promotion of the sport than had ever been accomplished.

It is hoped notwithstanding the loss of Mr. O. N. Ford, who goes to the Olympic Club, the San Jose club well be able to reorganize and keep going. The members of the club should get busy and make plans for an active season.

Trapshooting is not a picayune sport. It is not a proxy sport. It has more active contestants than any other sport. You may not know it but it is a fact nevertheless that more money is invested in trapshooting than in baseball.

The Spokane (Wash.), City Council has revoked its order prohibiting trapshooting on Sundays at Glover Field, and every Sunday now the Spokane Gun Club entertains at the traps. The Sunday shooting was stopped last spring because of objection by a nearby church. This objection has been withdrawn.

Redding, Cal., is a starting point for hunting trips to the mountains, where big black bear and deer are plentiful.

Frank Troeh, of Vancouver, Wash., and O. N. Ford, of San Jose, Cal., traveled from ocean to ocean last year to engage in trapshooting competitions.

The run of herring has begun and the fishermen are drawing their nets in Richardson's Bay. Last season thousands of tons were taken between Sausalito and Tiburon and preparations are being made to take care of an immense catch this year.

Bluebills and canvas ducks are getting plentiful in San Pablo and Richardson's bays and large rafts are to be seen from the ferry boat connecting Belvedere and Sausalito.

Fishing for striped bass is good in Napa Creek and several hundred pounds is not unusual to be taken on a single line in two days' fishing.

Ptarmigan stew, long absent from its central place on Alaska tables, probably soon will return to its important place on the territorial bill of fare. Reports state that the game birds are coming back to their old haunts in the hills and taundra after a lengthy unexplained absence. The birds were reported disappearing last spring. In several parts of Alaska the absence of the ptarmigan worked a hardship on whites and natives, many of whom make the birds their chief dish at times.

The Vernon Gun Club of Los Angeles claims the dates of June 6th, 7th and 8th for their spring registered shoot.

Another world's record in big game fishing has been shattered in the Catalina Island waters. James W. Jump landed a 314-pound marlin swordfish in 28 minutes, with light tackle. Not only is this unprecedented with light tackle, but the fish was close to the Tuna Club record for a swordfish for any tackle. The biggest one ever caught was in 1916, which weighed 362 pounds.

Not in many years have the deep-sea fighters been so plentiful as this season off the Southern California banks. Great swarms of yellowtail and other light tackle prizes have been frequent. The leaping tuna, dolphin and marlin swordfish, varying in size from 50 to over 300 pounds, have been plentiful. W. C. Boschen, of New York, is credited with capturing 99 tuna and five swordfish for the season. His nearest competitor is James W. Jump, of Los Angeles, with 96 tuna and 11 swordfish. Ralph Vandent holds the record for the season with the largest tuna caught. It weighed 149½ pounds.

Prizes to be awarded by the Tuna Club for the largest yellowtail, white seabass, bonita, albacore and tuna seabass this year will go to novices in the big game fishing sport from all parts of the country; some of them have never previously caught anything larger than a fair-sized trout.

The white-headed buzzard is said to be quite extent, and that within the past twenty years. The sea otter is so rare that a single skin will fetch $1,500. It is only found on a part of the wildest of the Alaskan coast.

THE LEADING AMERICAN TRAPSHOTS

Year in and year out there is little to choose between the leading trapshooters of the East and the West.

It is in the averages, year in and year out, that class tells—and this goes for other sports as well as trapshooting.

Following the publication of the 1915 trapshooting averages the writer hit upon the idea of selecting teams from the East and the West, picking the ten highest men from each section. The selecting of these teams has been continued yearly ever since, and the agitation resulting has done a wonderful lot of good for trapshooting. for it has been the cause of a number of sectional matches.

In selecting these teams the Eastern shooters were able to show up just a shade better than their Western brethren each year until we compiled the 1918 averages. In these averages the Western gang came to the front.

In 1915 the West averaged .9544 against .9566 by the East. The West averaged .9570 in 1916, while the Eastern ten averaged .9615. In 1917 the figures were extremely close, viz.: West, .964419; East, .964453. In 1918 the Western shooters averaged better than .96 for the first time, while the East fell below that figure for the first time, the averages being: West, .9604, and East, .9564.

For the four years the Eastern shooters averaged .9592, while the West averaged .9591. The general average bears out our statement in starting out that there is little to choose between the best of the two sections.

Frank Troeh of Vancouver, Wash., has been on all four of the Western teams and Charles H. Newcomb of Philadelphia, Pa., and Frank S. Wright of Buffalo, N. Y., have been on all of the Eastern teams. Harry Lorenson of Newman, Cal., has made the Western team the past two seasons and Henry Pfirrman of Los Angeles, Cal., has been on the team for the past three years. George N. Fish of Lyndonville, N. Y., has been on the Eastern team for the past two years and Hank Pendergast is serving his third straight term. Ford and White of the 1918 Western team made the first one chosen, and Coburn of the Eastern team was on the 1915 selection.

California is the mainstay of the Western team, four of its members being from the State of Sunshine. Another of the teams hails from Washington, which gives the West coast quite a representation. California had four members of the team in 1917, also. New York had four members of the Eastern team in 1917 and managed to retain three of them on the 1918 team.

The 10 Best Amateurs of the West

TO CLASSIFY PUPPIES

A change in the rules of the American Kennel Club, provide for the classification of puppies in two separate divisions according to their ages, will probably be adopted.

Under the present rules puppies are eligible for exhibition when they become six months old and thereafter until they are twelve months old. This ruling is attacked as unjust by a number of exhibitors on the ground that there is a considerable difference between a six-months-old puppy and one twice that age. Exhibitors lately have argued that if the puppies were classified in two divisions the competition would be equalized.

THE RISE AND PROGRESS OF TRAP-SHOOTING

By Clarence A. Haight in the Olympian

Trapshooting originated in England and live pigeons were used as targets; the sport became popular and eventually nearly every place of prominence had its pigeon club. Along in the 80's glass balls were manufactured and thrown from traps and later the present day clay pigeon or blue rock target was offered as a substitute for live pigeons. The sport of shooting blue rocks has been popularized so that today sixty million or more blue rocks are trapped annually in the United States alone.

The United States Government recognized its possibilities in perfecting enlisted men in the use of firearms, especially in aviation camps, and the boys to go "Over There" were given a course in blue rock shooting. We have had reports of the efficiency of our boys with shotguns when going over the top, and some of those boys must have learned to handle their guns at the blue rock traps.

In California, as far back as 1889, the Lincoln Gun Club operated a set of five traps at Colma and was recognized as the pioneer clay pigeon club on the coast, and to this club credit should be given as the pioneer which gave impetus to the sport in which so many of today find such keen enjoyment.

The Olympic Club has recognized the necessity of taking up blue rock shooting as an athletic sport and is now building a clubhouse and installing traps at Lakeside for its members. An instructor has been engaged for those who desire lessons in the art of shooting. The Juniors will have their days out there, and the young idea will be coached as to handling firearms. All of the kiddies will go out there and shoot a real gun, with cartridges loaded with real powder and shot. How some of the daddies of the Olympic Club will swell up when their kid comes back with an Olympic efficiency medal! I think I now see some of the old ones taking up the gun in an effort to go to the front with their little ones.

Trapshooting is not a new idea with Olympians. In 1896 the club fostered a trapshooting annex and sent a team of six men to the California Inanimate Target Association tournament at Stockton. Their team consisted of J. S. Fanning, W. J. Golcher, Arthur Webb, M. O. Tuednee, Clarence Wauman and C. A. Haight. L. D. Owens acted as captain. This team won the championship that year with a score of 100x120. Fourteen teams competed. That score today would be relegated to the "also ran" class in the smallest state in the Union. The Olympic Club has some oldtime trapshooters now enrolled on the Olympic roster. Dr. E. G. McConnell followed the game with considerable success in the days of the San Francisco Trapshooting Association, with grounds at Ingleside. Clarence Nauman was without doubt the champion blue rock and pigeon shot in California for several years, and both Dr. C. D. McGettigen and Dr. Edw. Topham now, take active interest in the sport, so we may expect to see the McGettigen, Topham and Nauman juniors emulating the high mark of efficiency set by their good dads at the Lakeside traps.

I have followed the game since 1864 and still enjoy the sport. There have been times when I felt the game so easy that a dose of carelessness crept in, and I invariably fell—so far as my score was concerned. Concentration is a strong factor toward success, and unless a shooter attends strictly to his knitting when facing the traps he will surely lose, and drop bird after bird which should be hit.

So, Brother Olympians, go out to Lakeside and take a whirl at the little mud saucers. Try it yourself. Don't stand back and criticise and tell your friends the game looks easy. Don't be afraid to try and make the start for fear of comment by the regulars or the onlookers. There is not a sport in the world that I know of where there is so little attention given to a man's lack of ability than in trapshooting. The great majority are at all times ready to assist those who care to take suggestions as regards guns, load, etc. The fellow who crows today will surely be beaten tomorrow, for such is the experience of shooters at the traps.

I saw the great Fred Gilbert lose four birds in a twenty-bird race in a tournament at Ingleside. It created quite a stir at the time. There is more comment when a champion like Fred Gilbert loses a target or two than when the novice drops a hatful. The novice is expected to lose; he'd be a wonder if he broke them all.

—CLARENCE A. HAIGHT in the Olympian.

Frank M. Newbert of the Fish and Game Commission is not only an efficient officer in his state position, but an enthusiastic lover of field sports. At the traps he averages around 90 per cent, and in the field he is recognized a clean shot. He holds the last California live bird record and has held stake championships in California and Nevada at the traps in the amateur class. He is enthusiastic over the rapid growth of trapshooting in the last two years and believes the sport tends to make a man better physically and mentally and more efficient in his business and a better soldier should he ever have to go to war.

O. N. FORD TO BE IN CHARGE

The Olympic Club of San Francisco will install on their property at Lakeside, where their golf links are located, one of the finest, if not the finest, trap shooting ground in the United States. O. N. Ford, considered by many the world's greatest trapshooter, a popular and ardent enthusiast, has been engaged by the Olympic Club as manager and instructor. Mr. Ford comes from San Jose, where he has made his home for the last six years. Not only trapshooting, but rifle, pistol and archery practice will be taught by Mr. Ford, who is an expert in all these lines. The Olympicans could not have selected a better man to have charge of their activities along these lines, and no doubt he will make it the most popular branch of the club.

Ford has put in eighteen years at the trapshooting game and has fired over half a million registered and unregistered shots during that time, making several world's records, and being accounted among the leaders of the game for nearly two decades. He has shot in every state in the Union and Canada and set up two world's records this year which will probably stand for several seasons to come. From April 6 to October 6, this year, he shot at 9,470 registered targets in official competition and scored 96.02 per cent., the highest score ever made on 12,270 targets, and the largest number of targets ever fired by a single shooter in one season, either professional or amateur.

MIGRATORY BIRD LAW NOT UNCONSTITUTIONAL

E. W. Nelson, chief of the Bureau of Biological Survey, United States Department of Agriculture, reports that there has been no decision of the United States Supreme Court declaring the migratory bird law unconstitutional.

The case of the United States v. Shauver, involving a prosecution under the migratory bird law of March 4, 1913, was removed to the Supreme Court of the United States on the government's writ of error from a decision of the United States District Court for the Eastern District of Arkansas, in which it was held that that law was unconstitutional. This case was argued in the Supreme Court in the fall of 1915 and on February 28, 1916, was restored to the docket by the court for reargument, and in October, 1916, was passed on motion of the attorney general of the United States, subject to call for argument on agreement of counsel. Meanwhile, the United States and Great Britain concluded a treaty for the protection of migratory birds in the United States and Canada, and on July 3, 1918, the President approved the act of congress known as the Migratory Bird Treaty Act, which superseded the migratory bird law of 1913, and which is now in full operation throughout the United States. After the passage of the Migratory Bird Treaty Act the Shauver case presented merely a moot question, and on the 6th inst. the attorney general moved the court to dismiss this case, the motion being granted. There was no occasion for, and there was not, a decision of the court in the matter.

DUE TO DU PONT

General Hedlam of the British army, on being introduced to an official of the Du Pont Powder Company a few years ago, exclaimed: "The Du Pont Company is entitled to the credit of saving the British Empire."

England, unlike Germany, was not prepared for a world war. She was utterly unprepared to supply the powder necessary to enable her army and navy to beat off the prodigious Hun attacks.

Had not the Du Pont organization of chemists, powder makers, engineers and executives gotten ready in an incredibly short period of time to supply Great Britain, France, Russia and Italy with smokeless powder, Germany would have been the victor in the first year of the war.

Therefore, if it could be truthfully stated that the Du Pont Company was the savior of Great Britain, it could with equal truth be said that the company saved the world.

However, it was not merely as a producer of smokeless powder that the Du Pont Company helped to defeat Germany. Millions of tons of coals have been used in our war industries. Approximately 40 per cent. of the blasting powder and dynamite used in mining this coal was manufactured and furnished by the Du Pont Company.

Millions of pounds of copper and steel have been used in the manufacture of shells, rails, barbed wire, electrical equipment, locomotives, munition-making machinery, etc. In these industries, also, the Du Pont Company furnished approximately 40 per cent of the explosives used in mining the ores which went to make up this war material.

Hundreds of thousands of gallons of alcohol, sulphuric and nitric acid were required for war purposes. The Du Pont Company's chemical organization manufactured a large percentage of these useful ingredients.

When all of these facts are considered, can any single industrial enterprise in the world claim more honor and distinction because of the assistance rendered the world in defeating autocracy than E. I. Du Pont de Nemours & Company?

A REAL GAME CENSUS

As sportsmen become better organized and as the old-time politicians is replaced with men of purposeful qualities on our state game commissions, the tendency to place the administration of game affairs on a substantial business basis becomes more and more apparent.

The man who pays his hunter's license fee year after year has one cardinal want—"more game"—and, more and more, the energies of state game commissions and of sportsmen's associations are being directed toward the fulfillment of that want.

The protection of game and its increase is coming to be recognized more and more as a problem that demands first-rate business efficiency, and, consequently, the more progressive states are entrusting the administration of game affairs to men with business ability. The ideal game commissioner is the man of proved busness ability plus a knowledge of sport and a warm sympathy with its ideals. Every day it is being proved that sympathy with and knowledge of sport essential as these are, do not constitute the entire equipment of the 100 per cent. efficient game commissioner, and were the question put up to the writer of this article he would say that business ability comes first in selecting a man for the administration of any state's game resources.

The awakening that has taken place has resulted in action that is highly constructive in its nature. Surveys are being made of the situation and remedies are being evolved to fit the problems that arise from such action. In this connection, one of the most signficant measures that have been adopted is that recently put into effect by George D. Pratt, conservation commissioner of New York, who announces that in the future all sportsmen in that state must make an annual return on a blank provided for that purpose of all game and vermin killed by them during the preceding twelve months when they apply for a hunter's license.

No competent man would think of attempting to manage any business without keeping close track of income and disbursements, yet that is the very thing we have been attempting to do in the business of conserving our game. In this business income is represented by the number of game birds that are in existence in the game cover in any locality at the commencement of the open season. Outgo is the number that perish between that time and the next open season, whether from vermin, the elements or before the sportmen's gun.

Probably we shall never be able to know with accuracy the toll taken by the elements and vermin, but if we keep a strict account of the yearly bags of the sportsmen we shall still be able to acquire a substantial knowledge of the situation.

In very many places we are probably killing more birds than are being produced. This means eventual extermination. Heretofore, this has all been guesswork, but from now on, in New York at least, we shall know; at least, the accumulated figure of three or four years will give up knowledge on which we may safely base conclusions.

Pennsylvania and Massachusetts have both done pioneer work through their game commissions on the game census problem, but, without disparagement of those efforts and with high praise for them, in fact, it may be said that the plan perfected by New York seems to promise the most concrete results yet obtained.

The American Game Protective Association ventures, respectfully, to suggest that every game commission in the country adopt at once the New York idea. The census blank used by that state is printed on the back of the stub of the license, which is retained by the issuing authority, the county clerk, and it must be filled in before another license will be issued. If any state has already printed its licenses it will probably still be possible to print the cenus blank on the reserve side. If for any reason this is impossible, the blank may still be issued by printing it on a separate piece of cardboard. The American Game Protective Association has sent sample blanks to every game commission in the country, with the request that their adoption be given earnest consideration.

Sportsmen can aid greatly by urging their state game commission to adopt the census idea. Let every state and local sportsmen's club adopt a resolution to that effect, and let individual sportsmen express their views to their game commissioners.

This innovation was put into effect in New York January 1. On taking out licenses for 1919 sportsmen are now required to state as best they can from memory what game they took in 1918. In order to make their reports on the 1919 kill more exact each person to whom a license is issued is supplied with a small tally card. This he will turn into the issuing authority when he applies for his 1920 license. The applicant is also given a neat manila envelope in which to carry his tally card and license.

A significant and commendable feature of the census blank is the provision made for reporting on vermin killed. Gradually our people are awakening to the fact that persistent, systematic warfare on these creatures is essential if we are to have more game.

VERNON SCORES

Members of the Vernon Gun Club, Los Angeles, held their regular weekly shot January 12. The following scores were turned in:

	Season price, 50 targets				Cline-Cline Co.			Take home trophy
	Hdcps.	25	25	Tl.	25	25	Tl.	25tgts
Rossback	18	23	23	46	23	22	45	23
Tuttle	16	21	23	44	23	22	45	23
Sharman	18	23	20	43	20	22	42	25
A. W. Bruner	16	21	22	43	23	22	45	....
Bokring	18	25	23	48	....	....	....	....

S. A. Bruner and J. F. Dodd tied for season prize in class A, with 46x50.

Rossback was high in B class with 47x50.

Myers was high in C class, with 45x50.

Rossback and Dougherty tied for a leg on Cline-Cline Co. Trophy, with 48x50. They also tied for the sterling silver spoon. Take Home Trophy, Dougherty won in shoot-off with 24x25; Rossback, 23x25.

SEVEN MILLION DOLLARS WORTH OF RECREATION

Last year the national forests provided $7,500,000 worth of recreation to the people of the United States, according to Landscape Architect Frank A. Waugh in his publication "Recreation Uses on the National Forests," just issued by the U. S. Department of Agriculture.

The government charges no admission fee to these great recreation grounds, containing some of the finest hunting, fishing and camping places in the world; but if the citizens had paid the minimum price demanded for wholesome recreation by commercial dealers in that commodity, the total would have reached the above amount. More than 3,000,000 people spent on the average not less than 25 hours in the forests, so that the number of hours of recreation was at least 75,000,000. At a valuation of 10 cents an hour, the cost of a cheap movie, it would represent $7,500,000 worth of recreation.

Outdoor recreation is a necessity of civilized life, and as civilization has become more intensive the value of the forests for recreational purposes has increased tremendously. The extensive use which the public is now making of the national forests for this purpose places recreation alongside of timber production, grazing, and watershed protection as one of their primary uses. The Forest Service has made many provisions for the benefit of the visitors. Camping and picnic grounds equipped with many conveniences are provided, game is protected, the streams and lakes are stocked with fish, and trails and roads make the hunting and fishing grounds and the scenic beauties of the forests accessible. In a number of cases cities near the national forests have leased especially desirable sites for municipal play grounds. Persons who wish to build permanent camps may now lease tracts of not more than an acre for that purpose.

HAS A DATE WITH A WHALE

Cap'n Edward Johnson of the fifty-ton fishing schooner Mabel E. Bryson, which tied up at the Fulton fish dock recently with ten tons of sea bass and porgies under her hatches, modestly declared, as he ordered round after round of lemonade at Jimmy Burke's place, on Front street, that the phenomenal catches, which meant $2,000 in his pocket and $150 for each of the crew, was not his work, but Oliver's, says the New York Tribune.

"Not a season goes by," said Cap'n Johnson, "and hasn't for twenty years, that I haven't met up with Oliver somewhere about 200 miles sou'sou-east o' the Hook. He's got to be quite a whale, Oliver has, now—'bout 250 feet long and blacker'n the Liberian Cabinet. 'Twas on the 18th of July, in '98, that I first met him. The Mabel was splashin' a bit in a cupful o' wind, having had no luck an' not carrying much ballast, and a cask o' prime whisky, the best Jimmy Burke carries, had slid overboard. Oliver gulped it down in one swallow and grinned till his face looked like the broadside of an old-time frigate with all her ports open.

"Right after that we began to haul in fish till our arms ached, and since that day I've never put out from New York without a hooker aboard for Oliver, and every season we've met up with him at least once.

"'Twas last Wednesday, about sunup, only it was that thick and greasy you couldn't tell east from north. I was pacing the deck, uneasy like, because we'd been cruising a couple o' days without smellin' fish or hearin' from Oliver, and was mighty nervous about U-boats, too. All of a sudden there come a bang like a four-point-seven out o' the haze off our starb'rd bow an' a big gray shape loomed up, headin' straight for us and carryin' a bone in its teeth like the surf on the Catalinas.

"I got our auxiliary going and put a couple o' men at the seacocks, with orders to open her up at the word, for I see that thing was comin' at a thousand-knot clip, an' the Mabel E. Bryson ain't good for more'n eight; but just as I was goin' to give the word it heaved up out o' the water an' winked its port eye, an' I see it was Oliver. The sound like a gun was when he flopped his tail, I guess.

"Well, Oliver run alongside less'n two cable lengths off, an' not black like he used to be, and had a pretty uppity, skittish way about him, too. I don't know, but maybe black whales turn gray as they get old, but I got suspicious that Oliver had gone and camouflaged himself somehow on account o' the U-boats. Anyway, here he come as proud as rum punch, an' when he got alongside he give a kind of cough like an' spit something out, an' backed off and looked at it, an' cocked an eye at me, just like a kitten that's caught its first rat.

"First off I couldn't make out what it was, but I whipped out my glasses and seen it was a life preserver. I spelled out the printin' on it, an' it was Unterseeboat U-53. Oliver, he grinned a couple o' rods wide when he see how flabbergasted I was, an' then he give another little 'ahem!' an' up come eight sailor caps, an' the printin' on them was just the same as on the life preserver.

"I hollered to Olafsen, who was out in a dory lookin' at the nets, to go over an' pick up the stuff, but the words was no more'n out o' my mouth when Oliver he shook his head violent an' went an' swallowed the life preserver an' the caps down again so quick that Jonah himself woulda been surprised.

"I see then that he knowed what he'd done an' meant to keep the relics himself. We heaved over his whisky, and was that proud of him we chucked in the crew's cask, too, and Oliver smiled just like a man a long time at sea who's got his foot on a brass rail again.

"Just then Olafsen hailed me an' said the nets was fair draggin' at the buoys, so we had our work cut out for us, for I never, even in the twenty years I been buyin' drinks for Oliver, see more fish than we in them nets. I certainly am proud of Oliver, an' when the war's over I'm going to give him a couple o' barrels o' good water-proof black paint so's he can renew his youth."

PASSING OF THE MOOSE

A note of warning is sounded by the supervisor of the United States Superior National Forest, L. M. Brownell, to the effect that the moose, giant of the deer family, is rapidly following the buffalo along the sloping way that leads to obliteration.

The big game animal of the Minnesota pineries has for years been the moose. In the heart of that region lies the Superior State Game Refuge, with its 2,000,000 acres of land, and here in larger numbers than anywhere else in this land have been found these hermits of the animal kingdom, pacing, solitary, the forest aisles; browsing on maple, birch and willow, or, in summer, hock or shoulder deep in lake or stream, baffling the stinging flies and munching the tender shoots of lilies and wild rice.

And now, says Mr. Brownell, they are moving on —some to the Canadian woods, but more from their unhappy hunting grounds in Minnesota to the happy no-hunting grounds in oblivion. Their bodies are found often, scorned as regards the meat or even the antlers, bullet-rent simply to gratify the idle caprice of puerile-spirited hunter.

WILD BIRD CALLS

The note of the jacksnipe is practically always one of alarm—a hurried Scaipe! Scaipe!—which is best imitated by a sudden kissing sort of suction on the back of the hand or the palm of the hand; a noise that at least some hunters can make very successfully.

Once in a while, if this note is produced, a snipe that is pitching high overhead will decoy to it. He fancies that somewhere down on the marsh below him there is a snipe feeding, or one which has been feeding.

It is not by any means a universally or even widely successful form of calling. There was once a duck hunter whose boat was pulled up on a piece of bog not more than half an acre in extent. He killed sixty-five jacksnipe on that little piece of mud in one afternoon, and they all came in from high overhead.

He simply sat in his boat as though he were waiting for ducks and shot them as they came. He said that sometimes he tried to call them, and thought it was successful. In all likelihood the birds had found feed in that particular spot and came there without much regard to the call.

There are commercial calls for use in decoying shore birds or some of the plovers. They are usually made of a bell muzzle of horn, with a little horn or bone mouthpiece. You can learn to operate these; but, perhaps, you can almost as easily learn to imitate the call by the unaided whistle.

One of the best plover hunters shot for the market on the Western prairies, his usual game being the golden or black-breasted plover. He could utter so shrill a whistle as to be heard for a distance of half a mile, or, perhaps, more, down wind, and it was rarely that a passing flock heard his whistle and did not turn to his decoys. He used tin decoys, which he set out in front of his blind, just as a duck shooter does his work.

The one best bit of advice to give any man who is trying to deceive the keen sense of hearing of any wild game is to study repression. Do not call too much. One call too many—even one unnecessary Twit-twit!—will send a flock of turkeys scurrying away unseen. The same is true of the overstrenuous duck caller, and, indeed, of every other appeal to the hearing of wild game.

TRAINING HOUNDS

"Hunting in America requires an altogether different hound from those used in England, conditions being very dissimilar," says a writer in All Outdoors. "Hounds require superior hunting ability, wide ranging, greater perseverance and patience, and, above all, a much better nose to enable them to take an old and cold track probably made the day before and work it out inch by inch for six or eight hours if necessary.

"Hunting and training qualities are usually inherited from the dam, while speed, endurance and conformation are transmitted from the sire. Even a superficial knowledge of the subject indicates that speed and hunting instinct are among the greater qualities a hound should possess, and they are much sought after.

"But a hound, lacking vital force, staunchness and endurance, can never excel. During the kindergarten course, as far as possible, pups should be trained under the most favorable hunting conditions, and the work made as easy and light as possible.

"Later on harder problems may be submitted for their solution. An ideal hunting day is when the ground is damp and moist (not frozen) with a heavy atmosphere, a cloudy sky, and light southern breeze.

"All hounds should be taught to swim, but do not do it by throwing them into the water. When the waters warm enough not to chill, take your hound out in a boat a short distance from the shore, place him gently in the water, and pull ashore fast enough to prevent efforts to get into the boat.

"It is seldom that more than a couple of lessons are necessary to make them feel at home in the water."

VERMIN AND GAME IN FRANCE

Readers of this department have been impressed, we hope, with various articles that have appeared from time to time calling attention to the absolute necessity for persistent, systematic warfare on vermin by sportsmen and farmers. The American Game Protective Association in referring to the matter says:

Generally speaking, we are inclined to favor action such as this, rather than long closed seasons and the placing of legitimate game birds on the song-bird list as a measure to increase the game supply, though we recognize that the closed season has its use, and very valuable they are at times.

Emphatic endorsement is given the views that have been expressed in a recent article in the Saturday Evening Post by Baroness Huard, who has this to say with regard to game conditions in France in their relation to vermin, following the declaration of war:

"In all the universe it seems to me that the wild animals were the only creatures really exempt from preoccupation about the fray. It might be war for man and the friends of man, but for them had come an unexpected reprive, and even the more wary soon felt their exemption from pursuit. During the first few weeks of the conflict the cottontails, always so numerous on our estate, were simply terrified by the booming of the guns. But, like all the rest of us, they soon became accustomed to it and presently displayed a self-assurance and familiarity undreamed of, save, perhaps, in the Garden of Eden.

"It is quite a common sight to see a brood of partridges or pheasants strutting along the roadside like any barnyard hen and chickens and one recalled with amazement the times when, stretching themselves on their claws, they would timidly and fearfully crane their necks above the grass at the sound of an approaching step. At present they are not at all sure that man is their worst enemy. The government having decreed that there shall be no game shooting in the army zone, weasels, polecats and even foxes have become very numerous, and broods of quail and partridge that once numbered ten to fifteen have singularly diminished by this incursion of wild animals, not to mention hawks, buzzards and squirrels.

"One autumn morning I appeared at our gateway just in time to see a neighbor's wife homeward bound with the corpses of four white hens that 'Maitre Renard' had borrowed from their coop dangling from her arm."

Baroness Huard mentions the fact that wild duck, which formerly had lingered in the neighborhood of her estate in large numbers during the migration, have disappeared, but she states that she is unable to account for this.

FEDERAL GAME LAW FOR HUNTERS AND TRAPPERS

The U. S. Department of Agriculture has issued Farmers' Bulletin 1022, "Laws Relating to Fur Bearing Animals," which is a summary of legislation in the United States, Canada, and Newfoundland, relating to trapping, open seasons, propagation, and bounties. Under the stimulus of high prices there is always danger that trappers will deplete the trapping grounds and permanently decrease the number of fur animals, the Federal specialists say. Regulations and seasons should be carefully observed, so that the fur supply of the future shall not be endangered.

For the fiscal year ended June 30, 1918, the foreign trade of the United States in raw and manufactured furs reached the largest total in the history of the country. While exports were only $13,903,631 as compared with $15,729,160 for 1917, the imports were $38,389,372 as compared with $21,553,375 for 1917. The total foreign trade in furs increased over 40 per cent.

"LIGHTNIN' BUGS" FINE BASS BAIT

How an ancient angler, stumbling upon a new bait "wrinkle," "bottled up" his discovery—and bait, too—in an unchubby manner until the end of the season is related by "Silent Sam," a well known eastern author-angler. The bass season is about over for the year, even if the fish laws say that he still may be taken. And certainly it is too late for a fisherman to make use of the discovery of Frederick William Meyer, who is no "clown prince" but an American, even if he does bear the same front handle as one of the Super-Huns. But they may find occasion to try Bill's idea out next summer when the dog days come along and daylight fishing for bass is unremunerative, Bill's idea is a fine one, for night fishing in the summer time while the bass are feeding during the hours of darkness after their daylight slumbers. Let "Silent Sam" tell it.

Just before closing his bungalow in the Birch Cove and removing his lairs and penates to Ridgewood, N. J., Frederick William Meyer, otherwise Bill, let the cat out of the bag, spilled the beans, or however he chooses to express the elucidation of how he managed to catch all the bass out of Greenwood Lake. If there are enough bass left to spawn next year it isn't Bill's fault.

Ran Out of Bait

We are trolling along the edge of the sunken island for wall-eyed pike when he announced his determination to quit the game. "I've got to get back and look after things," he said.

"I thought you were going to stay up here and plug for bass till the lake froze over?" I said.

"What's the use?" he demanded, "I can't get any more bait."

Knowing him to be a devotee of the plug, a Decker by day and a luminous Kalamazoo by night, knowing him to express contempt for the festive frog, the humble night walker, the hoary helgramite and the modest crawfish, I marveled at his regretful reference to the lack of bait. Then deliberately and with malice aforethought he spilled the beans.

Still, you never can tell. Many a great public benefactor has shared his secret with the world simply because he realized that he couldn't get any more bait.

And thereby hangs a tale; but it must unfold itself in logical sequence. When Bill and his family first took the bungalow in the Birch Cove early in the season Bill was a stranger in a strange land. He didn't know the water, but he had a casting rod, a free running reel, a Decker by day and a luminous Kalamazoo by night; moreover he had a pair of keen eyes and a trick of smelling a bass 40 feet under water. So it wasn't long before he found 'em.

And he found most of 'em in the dark. Not that he neglected the Decker by day. Far from it. From sunrise till sunset he would automatically cast and reel. "Just to sort of keep my hand in," he would explain. "No use getting rusty. Just killing time till dark."

Then from the time it got dark until the sun popped up over Sweeze Hunter's farm house 'way up on top of the Tuxedo mountain, he would automatically cast and reel. In spite of what he said about having to go back to Ridgewood and look after things, my private opinion is that he went back to get some sleep.

"That luminous Kalamazoo of yours must be some plug," I said one morning as I watched him distributing what looked like a boatload of live bass among the neighbors.

"Sure is," grinned Bill. I thought I detected just the suspicion of a deliberately twitched eyelid as he said it. However, I wasn't quite sure. So the next night I thought I'd try a little luminous plugging myself, and repaired to Bill's favorite haunt over the weeds in the East arm. There I found him, and was almost on top of him in the darkness before he knew it. He reeled in faster than I ever saw him work a plug before, and I noted him cut his line with a knife and stick something in his pocket.

We worked the weeds together for two hours after that, and although the phosphorescent glow of our luminous plugs fairly illuminated the landscape, neither of us had a strike. "Who's the Jonah?" growled Bill. "I got nine before you butted in."

Several evenings after that as I was returning from the postoffice in the dust, I saw Bill grouping about under the birches surrounding his bungalow. He seemed to be engrossed in the infantile game of catching fireflies. "What's the answer?" I demanded.

"Oh, just spearing a few lightnin' bugs," he said. Again, I thought I detected just a suspicion of a deliberately twitched eyelid. "My daughter is studying insect life," he explained, "and she wants a few specimens."

"Oh, papa!" I heard a voice murmur from the darkness of the porch. This was followed by suppressed giggles from the same direction.

Well, it was none of my business, so I went home. But I couldn't help thinking about it. In the meantime Bill continued his nocturnal fishing, and the water in the lake kept getting lower and lower.

While the rest of the residents damned the East Jersey Water Company for exercising its prerogative to draw the water from the lake I couldn't help speculating as to whether the vast quantities of bass Bill Meyer was lifting from their native habitat didn't have considerable to do with the water going down. There is no combating the law of physics.

It wasn't until a couple of days before he left for Ridgewood to get some sleep and while we were trolling for the aforesaid wall-eyed pike that Bill gave me the true inwardness of the deliberately twitched eyelid.

We were fishing from the same boat that day, and neither of us cared for pike fishing anyway; hence the bean spilling episode. To go back to the beginning, Bill told me he was going home because he couldn't get any more bait.

"What bait?" I asked.

"Lightnin' bugs," said Bill. "There was a heavy frost one night last week and I haven't seen a firefly since."

"Come again," I said.

And then he told me. The luminous Kalamazoo had been a blind, a bit of camouflage. His night bait for bass had consisted of fireflies. What I called him wouldn't pass the censor, but he took it in good part, for I had the presence of mind to smile when I said it. All he said was, "I'll show you how it's done," and, reaching into his tackle box, he produced a most wonderful casting lure.

Structurally it was simply a glass medicine vial tightly corked. This was encased in a harness of light-weight wire, to which were attached two treble hooks. The cork, although fitting the neck of the vial tightly, was carved with a downward curve.

"That's the boy that got 'em," said Bill, proudly. "And now that I can't get any more lightnin' bugs, I don't care who knows it. There's the best plug ever invented, and I suppose I could get a patent on it and make enough money to keep me in coal all winter if I didn't have to go back to Ridgewood and look after things.

"See the shape of that cork? That makes a wabble in the water that would coax a bass from the depths of the bottomless pit. And fill that little bottle with a bunch of lively fireflies, chuck it out in the dark, and oh, boy!"—Sportsmen's Review.

CARNIVOROUS LIZARD FOUND

A carnivorous lizard, sixteen feet long, was described by H. C. Raven, of the American Museum of Natural History. He encountered the monster in Borneo. It was the subject of a paper which he read at the fourth annual meeting of the American Society of Ichthyologists and Herpetologists at the Brooklyn museum.

The flesh eater is called the monitor lizard and is the largest in the world.

HOW TO HANDLE DEER MEAT

The California Fish and Game Commission tells what to do with a deer.

To transport a deer on a saddle horse throw a rope across the saddle, pulling a loop of it forward through each cinch ring.

Place the buck across the saddle and put the head through one loop and the haunches through the other.

Draw the ends of the rope tight, make a loop in one, reeve the other through it and make fast.

To skin a deer head for mounting, cut the skin around the neck well down on the shoulder and breast.

Then cut along the upper side of the neck to the top of the head. Thence make diagonal cuts, one to each horn.

Cut off the ears close to the skull, turn them inside out, and cut away the meat, leaving the cartilege. Skin carefully around the eyes. Cut the lips close to the skull, leaving them attached to the skin. Split them from the inside and fill the cut with salt.

Rub plenty of salt into the flesh side of all parts of the skin and let it dry slowly in the shade or roll it up hair side in and ship at once to a taxidermist.

To butcher a deer, hang it up by the hind legs, slit the skin along the middle of the breast and belly and to the end of the tail; then along the inside of each leg.

Cut off the feet at the joints and peel off the skin. Cut through the wall of the abdomen without piercing the intestines; loosen the diaphragm at the back and sides; cut away the lower intestine close to the bone and empty out the entire contents of the carcass. Split the breastbone with a hatchet.

The best cuts of venison are the saddle and haunch.

To make jerked venison or "jerky" use lean meat cut into strips about one-half inch wide. Lay these side by side on a frame made of slats or poles supported about four feet from the ground and keep a small smoky fire going underneath until the meat is thoroughly dry.

Fresh meat should be hung up and protected from flies by cheesecloth.

PASSENGER PIGEONS

The New York Sun published a news item from the Mohawk Valley to the effect that a resident of that section had observed a bird which he identified to his own satisfaction as a passenger pigeon.

If the observer knew the passenger pigeons in the old days I for one respect his opinion and regard the identification as in all probality authentic.

While the passenger pigeons generally are considered extinct, a few of us cling to a more hopeful view of their case.

Speaking for myself, this view is based upon a lifetime of thought devoted to the subject, as well as upon certain facts having to do with an uninterrupted chain of occurrences of the pigeons which have come to my knowledge through observation and from certain reliable sources of testimony, and which, furthermore, may be expressed in the conviction that we shall see these birds again.

Not, of course, approaching save in a relatively small degree their former numbers—the diminution in the mast throughout the range of the wild pigeons in North America the natural result of settlement has attended to that—but still as an occasional, gladsome circumstance.

This predicted restoration is in no sense advanced as a faunal comeback, for following the extermination of a species there is no comeback in biology. But from good and sufficient evidence at hand I am firmly convinced that the complete extinction of the passenger pigeons is more apparent than real.—Tamarak.

HOW TO BUILD A FIRE

The sportsman in the field or mountain without matches can start his campfire by the aid of the shotgun. As an experiment, the writer tried it out this fall and found it so successful that it is worth passing along.

First make preparations to start the fire from the flame. Do this by building up your wood ready to light, standing kindlings up on end against the larger sticks wigwam fashion, with an opening at the bottom for the tinder, shredded bark, dry pine slivers or any dry splinter pounded between two rocks, make the best tinder.

After removing the shot from the cartridge, sprinkle the most of the powder on the tinder, leaving only a few grains in the shell. Then tear a bit of dry cotton cloth with fluffy edges, a bit of lining from your clothes probably, fill this loosely into your emptied cartridge. Put the shell into your gun and fire straight into the air. The cloth will drop close to you and either will be aflame, or at least smouldering, so that you can blow it into a blaze. Drop this quickly into your tinder and your fire is made.

TIPS ON SNIPE SHOOTING

A gun will get wet and rusty, no matter how much care is taken of it; sand will get on the bolts, and if a hammer gun, between the hammers and the locks, in the holes for the plungers, and in every conceivable place in which a grain of sand can lodge. A hammerless gun is the best form of gun to use; there are not many places for sand and rust to lodge.

The stool or decoys used in snipe shooting depend mainly upon the kind of snipe you expect to shoot; for meadow shooting, yellow-leg stool are the best, while on the beach any kind can be used. You have doubtless read or heard of gunners using skimmock shells in place of stool; they are perhaps better than no stool at all, but do not mislead yourself with the belief that they are as good as well-formed tin or wooden stool.

There are many excellent reasons why stool should be placed to leeward of the blind. Snipe, as a rule, always fly against the wind, and when coming to stool always come in from leeward. If your decoys are to windward of your blind you will have to be craning your neck around to watch the birds, while with stool to leeward every snipe will be in plain sight.

In setting out decoys always stick them up in water if possible; stool in the water will show up much better than those on land. Do not make the mistake of putting the stool in one little bunch; spread them out well, and if twenty-five or thirty stool are used you will be surprised at the showing they will make.

There is another little trick in setting out stool that ofttimes gives the gunner a better shot. Put the stool well to the right of the blind; then, after you have shot your first barrel into a flock, the rest of the birds will be to the right of you, which is much handier than turning to the left for the next shot.

WILD DUCK FARMING

In view of the rapidly decreasing supply of game, according to a recent bulletin published by the United States Department of Agriculture, the raising of mallard ducks as an industry is advocated. The Bulletin goes on to show that the ease with which the mallard can be bred makes it the best species for wild duck farming, and its beauty, popularity, hardiness, adaptability and fecundity fit it as no other duck is fitted to the game duck of the future.

Only one-tenth of the food of the mallard duck is derived from the animal kingdom and about nine-tenths from the vegetable, according to the bulletin, which is a report of a study of the natural food habits of this valuable game bird. The study was made to assist those who are propagating mallards in a semi-domesticated condition, to provide proper feed for them, and to enable the improvement of bodies of water and marshes as feeding grounds for wild ducks. It was found that they feed mostly on the sedges, water grass, smartweeds, pondweeds, duckweeds, coontail and other semi-aquatic plants. In the stomach of one mallard was found 102,400 seeds of primrose willow. They also feed some on water beetles, bugs and dragonflies.

The bulletin, number 720, also disucsses the food habits of the dusky or black duck and the Southern black duck, which are closely related to the mallard, though not as important.

RESCUED BY A DOG

After watching for two days the spot in Duck Lake, Canada, where the husband was drowned Mrs. Patrick Bruyere, of River Desert, Quebec was saved from starvation by the sagacity of her dog, which swam to the mainland from the rock in a lonely part of the lake where the woman was marooned, with an appeal for help.

Mrs. Bruyere went on a fishing trip with her husband three days ago. They landed on a rocky island some distance from shore. A squall set the canoe adrift, and Bruyere, who could not swim tied a line about his body and waded into the lake after the canoe. Getting to the end of the line and within a few feet of the drifting canoe, he called to his wife to let go of the line. As she did so Bruyere stepped into a hole and sank. Mrs. Bruyere was unable to help him.

On the lonely island her calls for help were unanswered for two days. She found a pencil and paper in her husband's coat, which he had taken off before he went after the boat, and wrote an appeal for help, which she tied to the dog's collar. Then she told the animal to return to the mainland.

The dog carried the message to a neighbor, who organized a searching party and rescued Mrs. Bruyere. She was in a serious condition from exposure and lack of food.

FEEDING THE DAIRY BULL

Although the bull in the dairy herd is often looked upon as a necessary evil it should not be forgotten that the calves inherit half their blood from him M. H. Fohrman of the University of Missouri College of Agriculture says that too often the bull is housed in dark, dirty quarters and little attention given him. The bull at all times should have a proper feed, and the kind will depend somewhat upon his age. Young growing bulls do well when fed legume hay and 4 to 8 pounds of grain daily. A suitable mixture to be fed with clover or alfalfa hay is four parts of corn chop, one of oats, and one of bran. Older bulls as a rule are not as active as young animals, and there is more danger of overfeeding them. After the animal is mature he requires only sufficient feed to keep him in good breeding condition and to keep him warm. The herd bull should not be allowed to become fat as this results in sluggishness and early loss of breeding power. See that he has an abundance of drinking water and ample opportunity for exercise.

While care should be exercised to avoid overfeeding, do not go to the other extreme in the case of young bulls, as underfeeding checks growth. Size is always a desirable quality, and it is poor economy to underfeed a growing sire. Feed him a sufficient amount of grain to furnish ample material for growth and regulate the quantity according to his appetite and condition.

NEED FOR MORE LIVESTOCK

That the production of livestock in the United States is not only necessary but will be profitable for some time to come, according to E. A. Trowbridge of the University of Missouri College of Agriculture, is evident from information supplied by the Food Administration.

The Central Powers were much better prepared for the war than the Allies by having 42 per cent more meat per capita. Also, the Germans apparently captured much livestock which made it possible for them to save that which they had at home.

Belgium, Serbia and Rumania are practically exhausted of livestock resources. The Allies have decreased their herds and flocks 45,787,000 head, while the Germans have reduced theirs about 18,000,000 head—only a little more than one-third. Neutral nations show a livestock reduction of nearly 1,500,000 head. European loss, therefore, exceeds 65,000,000 without consideration of Austria, Turkey and Russia. The Food Administration estimates the total European decrease at 100,000,000 head.

The total number of sheep, hogs and cattle in this country is 187,000,000, according to best estimates. When this is compared with a depletion of 100,000,000 of Europe's flocks and herds it appears that Europe has already lost more than half as many meat animals as there are in the United States today.

BULLETIN ON DAIRY FARMING IN CALIFORNIA

Discussions of the best methods of dairy farming under California conditions, based in part upon the results of the recent Dairy Cow Competition conducted under the direction of Professor F W Wall by the Universtiy of California, are comprised in a bulletin recently issued by the College of Agriculture. The bulletin is illustrated with pictures of most of the prize-winning cows and contains a complete statement of milk and butter fat records made in the competition. The system of feeding and management of the prize winning herds is described by the respective owners. A copy of the bulletin will be sent upon application to the Director of the University Experiment Station, Berkeley.

HOW TO PROTECT COWS FROM FLIES

It is questionable if it is worth while to spray cows to protect them from flies. The continued use of any spray gums up the skin until the animal suffers more from this than from the flies, unless she is washed once or twice each week. The amount of milk produced is not appreciably increased by spraying cows, but the greater comfort in milking may be sufficient to pay for the trouble. It is generally more convenient and more satisfactory to purchase some of the prepared fly repellants than to get a formulae filled. C. H. Eckles of the University of Missouri College of Agriculture mentions that two formulas that have been used with some success are:

1. Fish oil 1 gallon, oil of pine tar 2 ounces, oil of pennyroyal 2 ounces, kerosene ½ pint.

2. Fish oil 1 quart, petroleum 1 quart, carbolic acid 1 ounce.

These mixtures, like the ready mixed ones, are applied most advantageously with a hand spray pump. The spray is generally applied once a day, just before milking in the evening. If flies cause sores on the udder, the repellant may be applied to them.

PUREBREDS ON THE RANGE

"The value of purebred stock is strikingly brought out by the experiences of two grazing permittees," says Forest Supervisor D. N. Rogers in his annual grazing report to the District Forester at San Francisco. "One man, owning purebred Hereford cattle, sold coming two-year-old steers averaging 1000 pounds in weight for an average price of $80 per head. A second man, owning scrub stock, sold two- and three-year-old steers averaging 900 pounds in weight for an average price of $70 per head."

But the feeding of a properly balanced ration during the winter also has its value, particularly when applied to well-bred stock, as is further shown by Supervisor Rogers' grazing report. The following instance is cited:

W. J. Clinch, a rancher in American Valley, sld a carload of beef, the average weight per steer being 1372, and the average price per head $160. This beef dressed out 63 per cent. The cattle were two-year-old Hereford and Durham crosses. They were fed six pounds of grain each for five months during the winter, in addition to hay. They were kept entirely upon the Clinch ranch. They had been fed hay for seven or eight days, in addition to pasturage, before weighing.

Good breeding and good feeding—that's the winning combination.

CANNING A BEEF YEARLING IN TEN HOURS

From the hoof to the can in ten hours. That is the transformation through which a beef yearling went in a demonstration conducted by the home demonstration agent in Montgomery county, Texas. The yearling was killed in the morning while the agent was getting the canners ready, sterilizing the jars, and preparing the pots for cooking. The meat was cut from the bones in neat, convenient sizes, and that which was to be served as roast beef was dredged in flour and cooked in wash pots of hot grease until brown. The steak was cut in small pieces, cooked in the wash boiler, packed in the cans, and covered with gravy. While these were sterilizing in another pot, all the bones were boiled and after these were cooked the meat was removed from the bones and ground through a food chopper for hash, loaf, or croquette meat. To the beef stock was added what vegetables were on hand and all excess fat, and this was canned for soup. In the meantime the liver, heart, and tripe had been cooked and was speedily placed in cans. Three canners heated by coal furnaces were used, and by night the entire beef was in cans for future use.

Gombault's Caustic Balsam

The Worlds Greatest and Surest Veterinary Remedy

HAS IMITATORS BUT NO COMPETITORS!

SAFE, SPEEDY AND POSITIVE.

Supersedes All Cautery or Firing. Invaluable as a CURE for

TILLY ALCARTRA—THE GREATEST COW IN THE WORLD

Again a dairy cow has given evidence of the astonishing amount of food that she is capable of producing in one year, and again it is a Holstein–Friesian that has beaten all previous records for production.

Tilly Alcartra has been in the limelight of the dairy world before. One feat was a 7-day record of 40 lbs. butter from 729.1 lbs. milk—but that is by the way.

Her production for 1918 amounts to 33,424.8 lbs. milk, from which the butterfat is equal to 1,322.25 lbs. butter. She averaged over 42 quarts of milk per day for the whole year, and her total production if sold at 9 cents per quart would bring a return of $1,400! For four years she has an average of 27,629.4 lbs. milk, 1,-185.92 lbs, butter, and for six years her average is 26,129 lbs. milk and 1,023.18 lbs. butter; while the total production for the six years is 156,-776.2 lbs. milk, 6,141.36 lbs. butter. By this demonstration she has proven beyond all doubt that she is the greatest and most wonderful milch cow the world has ever known.

The nearest competitor to Tilly Alcartra is the Jersey cow, Sophie 19th of Hood Farm, whose six years' production is 75,920.8 lbs. milk, 5,217 lbs. butter; the milk being less than half that given by the Holstein. "Tilly" is 10 years and 3 months old; she has had six calves, and is a sister of 13 cows who have been a credit to the Holstein breed, two of whom have exceeded 20,000 lbs. milk and over 900 lbs. butter in a year, and six have records from 732 up to 796 lbs. butter.

She is a daughter of Alcartra Polkadot Corrector 30024 and out of the dam, Tilly Lou 2d 82057. Alcartra Polkadot Corrector is a son of Alcartra Polkadot, a 29-lb. cow having five A. R. O. daughters, two with records of over 33 lbs. butter each in 7 days and one over 31 lbs. "Tilly" was bred by McKay Brothers, of Buckingham, Iowa, and was purchased as a 2-year–old by the A. W. Morris Corporation, of Woodland, Cal., in whose hands she has made all her big records.

Tilly Alcartra stands, at the beginning of nineteen hundred and nineteen, without peer in the dairy world, having proven that the Holstein-Friesian breed of cattle is well-nigh incomparable.

THE LIVESTOCK INDUSTRY

It is generally understood that the time to go into the livestock industry is when animals are cheap. The same rule would apply to buying land and in fact, everything, but while this is the approved system so far as theory and advice giving is concerned it is far from being the practice. More people engage in the livestock industry when prices are soaring skyward than any other time and they buy land when grain is high. The boom prices are the chief incentive to enter any business. Men are buying land and are building irrigating ditches just now because all kinds of farm products were never so high before and it occurs to us that there is no better time than the present to engage in growing livestock. However before we have the animals, before we buy animals we must make some preparation to feed them. The man that feeds livestock must have hay meadows either native or artificial and must have water to make the grass grow. There must be a combination of land and water. We urge our friends who want a permanent home and who want an industry, to fortify themselves in this way and they will be fixed for life. There is no better property on earth that a man can own and no better pursuit a man can follow. Grain growing wears land out but the livestock ranches are more productive by far than they were fifty years ago and fifty years hence the same thing will be true. This is easy but it takes work to preserve the fertility of a grain ranch and keep it from deteriorating. The stock ranch is all the time growing better but every crop of grain that is grown upon a field weakens it just that much unless some system of growing the legume is employed. There is an opportunity now to buy land and make it pay for itself in a short time.

HORSES AND MULES IN THE ARMY

Some idea of what has been done in furnishing horses and mules for overseas service may be gained from a report made by the Statistical Section of the Remount Division. This shows that up to January 11, there had been shipped overseas from this country a total of 67,948 animals which included 5,489 cavalry horses; 33,396 draft horses; 28,088 draft mules and 975 pack mules. The total number of animals lost enroute overseas so far reported is 600 horses and mules, or less than one per cent of the total number of animals shipped.

The total number of animals purchased overseas to date is 152,336. Purchases of horses in France amounted to 109,848; in Spain, 1531 and in Great Britain, 11,898. The value of purchases in France was $43,-122,093,52; Spain, $589,159.96, and Great Britain, $5,314,711.15, or a total value of $49,025,964.63 for 123,277 horses purchased overseas. The total number of mules purchased overseas amounted to 29,059 with a value of $11,115,846.72. There were 9341 mules valued at $2,895,927.76 purchased in France; 12,941 mules with a value of $5,619,155.74 purchased in Spain and 6777 mules valued at $2,600,763.22 purchased in Great Britain.

There were on hand with the American Expeditionary Forces December 25th, 1918, a total of 191,631 animals. This total included 26,023 cavalry horses; 109,528 draft horses, 48,614 draft mules and 7476 pack and riding mules. The total loss overseas to December 25, 1918, amounted to 42,311 animals which included 36,-189 horses and 6122 mules. No arrangements have yet been made by any foreign government for taking over the animals belonging to the United States which are now in Europe. The matter has been informally discussed in this country and the Remount Division was informed that no objections would be raised if the animals should be turned over to the Allies as there is an ample supply of animals in this country.

Plans are now being outlined by the Remount Division for the encouragement of horse-breeding in this country with a view to supplying suitable cavalry and artillery horses in the future. Reports from the Bureau of Animal Industry show that there were 2.9 per cent more horses and 8.4 per cent more mules on the farms in the United States on January 1, 1918, than there were on January 1, 1914. According to reports there is no appreciable decreases in the number of animals in the rural districts of England while there is about a 20 per cent pre-war decrease in France.

BLACKLEG

Blackleg is a disease that affects cattle. The first indication of it is depression, loss of appetite, a failure to ruminate and a high fever. The breathing becomes rapid, and the animal moves with difficulty and lies down often. In a few hours swellings appear under the skin, and in twelve hours the animal may become paralytic. The muscles of the affected quarters become dark brown or black.

Blackleg is caused by a germ found in the soil in some sections. These germs get through the skin by way of scratches, pricks of thorns, stubble beards and penetrating foreign bodies which may puncture the skin. Cattle between six months and two years are the most susceptible. The disease does not usually spread from animal to animal, but the germs from the sick or dead, animal get into the soil and from the soil to another animal. For this reason the dead animal should be burned or buried (at least six feet deep) and quick lime sprinkled over it. In case of burning, it must be done thoroughly, then disinfect thoroughly. Where blackleg is known to have occurred all cattle should be vaccinated.

THE STANDARD TROTTING STALLION

HEALANI 56150

WILL MAKE THE SEASON 1919 AT THE

DIXON RACE TRACK

WITH RETURN PRIVILEGE

FEE, $20 FOR THE SEASON

HEALANI is by Zolock 2:05¼ (McKinney's fastest son), dam Queen Derby 2:06¼, by Charles Derby (sire of Jim Logan 2:01¾, Don Derby 2:04¾, and 8 others in the 2:10 list); second dam Addie Ash, by Indianapolis; third dam Addie H., by Ashland Chief.

HEALANI 56150 is not only highly and fashionably bred, but is a handsome and stylish individual. He has size, style and quality. Without doubt he is one of the fastest speed inheritance stallions (if not the fastest) on the Pacific Coast. He is coal black and absolutely sound, without a spot or blemish, and one of the best mannered horses living, so gentle a lady or child can handle him. Will stand with his head over stall door and pays no attention to mares being cross tied in front of his stable door. This horse was worked some last summer and fall, after 14 months without having a harness on him, and trotted miles in 2:26, halves in 1:09, and has and can now show two minute speed and better for ¼ of a mile. Has been jogged 5 or 6 miles a day all winter and looks and feels good and, no doubt will trot a mile close to 2:10 or perhaps better this fall. He is a nice going line trotter and can carry his speed. He is only 8 years old.

Best of care taken of mares, with no responsibility assumed for accidents or escapes. Address all correspondence to

WM. M. FERGUSON, DIXON, CAL.

HORSE SALE DISTEMPER

You know that when you sell or buy through the sales you have about one chance in fifty to escape sale stable disease. "SPOHN'S" is your true protection, your only safeguard for as sure as you treat all your horses with it you will soon be rid of the disease. It acts as a sure preventative, no matter how they are "exposed."

The Greatest Scores Ever Recorded Were Made With

Parker Guns

Mr. L. S. German made the highest official yearly average ever recorded with his Parker Gun, scoring 6137x6285=97.64%.

At San Jose, Cal., May 19th, Mr. Orval Overall won **THE CHAMPIONSHIP OF CALIFORNIA-NEVADA,** scoring 44x50 targets with his double Parker Gun.

At same place, May 22d, Mr. Harry Ogilvie won the **INTERSTATE CALIFORNIA-NEVADA HANDICAP,** scoring 97x100 at 20 yards with his single barrel Parker, and Mr. Len. Hawxhurst won the Professional Championship, scoring 94x100 with same kind of gun.

At Los Angeles, Cal., May 28th and 29th, Mr. Ed. Garrett made the highest aggregate score on the **Preliminary and Pacific Coast Handicaps,** scoring 187x200 at 18 and 19 yards, with his single barrel Parker, and Mr. Len. Hawxhurst at same place won Second Professional Average, scoring 381x400 targets with same make and kind of gun.

The Grand American Handicap has been won nine times with Parkers.

If interested in small bore double shot guns, please write for New booklet which will be sent free, giving valuable information on this subject.

KENILWORTH

By Imp. Sir Modred, dam Imp. Queen Bess by Marden

A Great Stake Horse and a Great Sire

Property of Bugeia Bros., Novato, Cal.

KENILWORTH

A Great Stake Horse and a Great Sire

BY IMP. SIR MODRED, DAM IMP. QUEEN BESS, BY MARDEN; 2nd DAM LIZZIE, BY PETRARCH.

Description and Performances.

KENILWORTH is one of the grandest stake horses ever bred, and a great sire. He is a brown stallion, standing 16 hands and 1 inch high, weighing over 1,300 pounds in stud condition, and is now in superb condition. He raced at 1,240 pounds. He is a winner of 94 races, having met nearly all the best horses in training in America during the years of his racing. He ran six furlongs at Tanforan in 1:12½, beating Waring. He holds the mile record of 1:38¼ of Ingleside track, and at Oakland carried 132 pounds and ran three-fourths of a mile in 1:13. He defeated the great Articulate every time he met him, and has beaten every horse that has met him as many as three times. He has been a consistent winner as a two, three, four, five, six and seven year old. His sire, imported Sir Modred, was a great race horse, a winner at two, three, four and five years, his Australian victories including the Canterbury Derby, Canterbury Cup, Metropolitan Stakes, etc. Idalia, dam of Sir Modred, also produced the high-class stake winners Betrayer, July, Liverpool and Cheviot. Since being imported to America by the late J. B. Haggin he has led the winning sires several years. Imported Queen Bess, dam of Kenilworth, has had six foals since reaching America. Prince Tyrant and Tyran by Tyrant were both road winners as two, three and four year olds. Old England, her foal of 1899, was one of the best stake winners of 1901 and 1902.

Among KENILWORTH'S consistent winning get are Coopertown, Kiang, Eel, Warefare, Katie Gleason, Pay Streak, Halworth, Envy, King Worth, Real Worth, Clark M., Ada Anne, Midsummer, etc.

SEASON OF 1919 AT NOVATO, MARIN CO., CAL.
FEE $100 10 Approved Mares
Best of care taken of mares, and fed as owners may desire.
Address **BUGEIA BROS.**
NOVATO, MARIN CO., CAL.

Registered Desert Arabian Stallions at Stud

EL JAFIL	EL SAKAB	EL SABOK
14-2 hands	16 hands	15-3 hands
10 years	4 years	3 years

These horses represent the purest Desert Arabian blood. They combine with speed and endurance a high-spirited but tractable disposition, making ideal sires for Saddle and Road Purposes.

EL JAFIL, THE SIRE OF EL SAKAB AND EL SABOK, IS A RELIABLE FOAL GETTER.

Inspection of His Get Is Invited.
Accommodations for Mares, Pasture or Stable.

A GREAT PETER THE GREAT

The Standard and Registered Trotting Stallion

PETER KLYO BELL 62389

California Pure Bred Stallion, License No. 1088

WILL MAKE THE SEASON IN SACRAMENTO, CAL.

PETER KLYO BELL is by Peter McKlyo 2:06, by Peter the Great 2:07¼, the world's greatest sire of extreme speed, leading sire of Futurity winners and leading sire of Grand Circuit winners 1918. Peter Klyo Bell's dam is the strongly bred Electioneer mare Iran Bell, dam of Nearest Alto McKinney 2:11¾, by Iran Alto, sire of Dr. Frasse 2:11¾ and 22 others in the list. His second dam, Bell Bird 2:26¼, holds the world's yearling record to high wheel sulkies, and is the dam of Wildbell, matinee record 2:05½, Chico.

PETER KLYO BELL represents the most popular blood lines at the present time. He is a remarkably handsome young stallion, bright bay, 15½ hands, weighs 1100 lbs. He is a pure gaited trotter and gives every promise of being the high-class race horse that he should be by inheritance. Owners of good brood mares can make no mistake by breeding to this grand young horse, as his produce is sure to be in great demand.

The best care taken of mares in any manner that owners may desire, but no responsibility assumed for accidents or escapes which under the conditions and care exercised are almost impossible. For further particulars address

KARL GLASER, 1703 G Street, SACRAMENTO, CAL.
SERVICE FEE $30 With Return Privilege

THE STANDARD TROTTING STALLION

HEALANI 56150

WILL MAKE THE SEASON 1919 AT THE

DIXON RACE TRACK

WITH RETURN PRIVILEGE

FEE, $20 FOR THE SEASON

HEALANI is by Zolock 2:05¼ (McKinney's fastest son), dam Queen Derby 2:06¼, by Charles Derby (sire of Jim Logan 2:01¾, Don Derby 2:04¼, and 8 others in the 2:10 list); second dam Addie Ash, by Indianapolis; third dam Addie H., by Ashland Chief.

HEALANI 56150 is not only highly and fashionably bred, but is a handsome and stylish individual. He has size, style and quality. Without doubt he is one of the fastest speed inheritance stallions (if not the fastest) on the Pacific Coast. He is coal black and absolutely sound, without a spot or blemish, and one of the best mannered horses living, so gentle a lady or child can handle him. Will stand with his head over stall door and pays no attention to mares being cross tied in front of his stable door. This horse was worked some last summer and fall, after 14 months without having a harness on him, and trotted miles in 2:26, halves in 1:09, and has and can now show two minute speed and better for ¼ of a mile. Has been jogged 5 or 6 miles a day all winter and looks and feels good and, no doubt will trot a mile close to 2:10 or perhaps better this fall. He is a nice going line trotter and can carry his speed. He is only 8 years old.

Best of care taken of mares, with no responsibility assumed for accidents or escapes. Address all correspondence to

WM. M. FERGUSON, DIXON, CAL.

DATES CLAIMED 1919 GRAND CIRCUIT

North Randall	July 7-12
Kalamazoo	July 14-19
Toledo	July 21-26
Columbus	July 28-August 2
North Randall	August 4- 9
Philadelphia	August 11-16
Poughkeepsie	August 18-23
Readville	August 25-30
Hartford	September 1- 6
Syracuse	September 8-13
Columbus	September 15-20
Columbus (2nd week)	September 29-October 4
Lexington	October 6-11
Lexington (2nd week)	October 13-18
Atlanta	October 20-25

Fair and racing circuits are being organized throughout the Northwest, East and Middle States. Dates are being taken, announcements made, and there are evidences of activities all along the line except in California, which as far as fairs and races are concerned, appears to be deader than the proverbial door nail.

There are many fair grounds in this state and a number of them have race tracks, the owners of the grounds and the members of the various district boards of agriculture should wake up to the importance of giving an annual fair, with such premiums as are justified by the extent and the quality of the exhibits.

From an educational point of view, commercial advancement, increase in the quantity and quality of the productions of a locality there is no greater institution than the county fair, to say nothing of its importance from a social standpoint. The fair is where the people get together from all sections and have a good time.

There has been a vast improvement in the quality of livestock raised in California during recent years and our breeders have had no hesitancy in paying the prices demanded for the very best strains and the result is a tremendous increase in the value of livestock in this state.

There are quite a number of horses, trotters and pacers as well as thoroughbreds that are in training and with a little encouragement from the fair directors material for good race meetings would be on hand in time for the circuit.

Every county fair that has a race track should give a race meeting for such purses as it could afford. A county fair without a race meeting is like a menagerie without a ring performance. It takes both to make a circus that will draw the crowds.

Fifty thousand dollars has been paid on the purchase price for the Latonia and Douglas Park race tracks by the Lexington syndicate. There is no doubt the consummation of the sale will be made without a hitch. Under the administration of such men as Senator Camden, Allen T. Hert, Jas. Brown, P. J. Hanlon and R. J. Baker racing will be kept clean and above board and the transfer of the race tracks to the breeding syndicate means that most of the political opposition to horse racing has been removed in Kentucky. This will also dispose of the suit of the Douglas Park Jockey Club against the Racing Commission claiming that the Commission was not invested with authority to enforce the Jockey Club to offer definite sums for their purse events. An effort will be made to induce Secretary Hackmeister to remain at the helm.

Be Frank and Billy Kelly are two of the three-year-olds of this year that will have their winning opportunities greatly reduced for the reason that they are geldings. Many of the best stakes for 3-year-olds bar geldings. There has been some talk of making the Saratoga Cup also a race exclusively for entire horses and mares, and if such is done it will mean putting up the bars for every age division from three-year-olds upwards.

INTERMOUNTAIN ASSOCIATION MEETING

At a meeting of the Intermountain Fair and Racing association held at Spokane the last of January the following officers were elected:

President J. M. Markel, Filer, Idaho; Vice-President, Horace S. Ensign, Helena, Mont.; Secretary-Treasurer, W. L. Tennant, Spokane, Wash.; Directors, Robt. H. Cosgrove, Billings, Mont.; D. W. Parratt, Salt Lake City, Utah. Boise, Idaho, was selected as the convention city for 1920.

The majority of the tracks in the circuit will put on running races only for the 1919 season, the only exceptions being Billings, Mont., and Yakima, Wash. In all relay races the minimum daily purse shall be $230 in each relay, tho all plan on an offering of $250 per day.

Roman standing races will command a minimum purse of $100 per day, for half mile race, while the pony express races; to be 1½ miles daily, will represent a minimum purse of $175 per day. In the relay races the rate is based on a two mile race daily. In the running race programs at each fair, there will be a minimum of at least one stake race daily and minimum of five overnight entry races. Total purses on these races will range from $5,500 at the smaller fairs to $9,000 and better, at the larger fairs.

The Association has also adopted the rules formerly used by the Pacific Jockey Club, and these will be slightly revised to meet new conditions, being then issued as authorized and recognized by the Intermountain Fair and Racing Association, to be in force in all territory reached and covered by this circuit. The circuit at the present time takes in the following: British Columbia, Washington, Idaho, Oregon, Montana, Wyoming, Utah, Arizona and California.

There was present at the convention representatives from the following fairs, who have taken dates for 1919 as follows:

Lincoln and Adams County Pioneer Association, June 17-18-19; C. E. Ivy, Secretary, Davenport, Wash.

Spokane Interstate Fair, Sept. 1-6; W. L. Tennant, Secretary, Spokane, Wash.

Montana State Fair, Helena, Mont., Sept. 8-13; H. S. Ensign, Secretary.

Walla Walla Fair, Sept. 8-13; L. L. Lynn, Secretary, Walla Walla, Wash.

Washington State Fair, Yakima, Wash., Sept. 15-20; Frank Meredith, Secretary.

Midland Empire Fair, Billings, Mont., Sept. 15-20; Robt. H. Cosgrove, Secretary.

Pendleton Round-up, Pendleton, Ore., Sept. 18-20.

Idaho State Fair, Boise, Ida., Sept. 22-27; O. P. Hendershott, Secretary.

Twin Falls County Fair, Filer, Ida., Sept. 30 to Oct. 3; J. M. Markel, Secretary.

Utah State Fair, Salt Lake, Utah, Oct. 6-11; Earl J. Glade, Secretary.

In addition the Vancouver Exhibition, at Vancouver, B. C., who could not be represented at the meeting owing to conflicting dates with the Canadian convention, have taken the week of Sept. 8-13 for this year. H. S. Rolston is Secretary.

The Spokane Meeting was well attended, not only by fair managers, but by a number of carnival, concession and race men. The delegates were entertained on Thursday noon, Jan. 30th, at a luncheon given by the Spokane Interstate Fair and the Spokane Rotary Club, in the Hall of the Doges, Davenport Hotel.

The stake book for the circuit will go to press about March 1st, and will have a wide circulation throughout the entire West as well as over the Canadian circuit.

THE NORTH PACIFIC FAIR CIRCUIT

At the meetings of representatives of the North Pacific Fair Circuit held in Seattle Janary 31, dates were arranged as follows: Centralia, Washington, August 18th to 23rd; Elma, Washington, August 25th to 30th; Spokane Washington, Sept. 1st to 16th (no horse racing); Vancouver, B. C., Sept. 8th to 13th; Walla Walla, Washington, Sept. 8th to 13th (no horse racing); Washington State Fair, Sept. 15th to 20th; Gresham, Oregon, Sept. 15th to 20th; Oregon State Fair, Sept. 22 to 29th; New Westminster, B. C., Sept. 29th to Oct. 4th; Boise, Idaho, Filer, Idaho, Helena and Billings, Montana, have all decided to have no horse racing and I predict failure for all associations that have cut out this important attraction. I understand that Portland, Oregon, expects to give a race meeting before Centralia and I hope this meeting will take place and firmly believe it will as I understand that the very best business men in Portland are interested in it. Mr. A. H. Lea of Salem is doing all he can to make the Portland meeting a certainty and a success.

All the old racing conditions were adopted by the North Pacific Fair Association notwithstanding the writer and others tried to have the new Eastern arrangements in regard to the lesser entrance fees and no deduction of money from winners. I am sorry we failed to carry out our ideas as I had hoped for easier and better conditions for the harness horse meetings.

C. A. HARRISON

DIXON DOINGS

While the track at Dixon is one of the live tracks in the state at which horses are being trained today still there has been little doing there just now except jogging and won't be until the weather clears up.

"Tennessee Bill" Morrison who was with Elmo Montgomery for years is now working with Lou Matisia taking care of R. D. Mayes horses. Ed Parker is now in charge of Montgomery's horses.

R. D. Mayes the owner of Miss Natoma (dam of Mabel Trask 2.01¼), was most agreeably surprised on the 12th, Lincoln's Birthday, when she presented him with a handsome horse colt by Peter the Great 2.07¾, as any one could care to see. A full brother to Mabel Trask is something that every horseman would like to own and no doubt Mr. Mayes will be besieged with buyers wanting to purchase this handsome colt.

WHAT MAKES A DRAFT HORSE VALUABLE

In the ultimate analysis, it is his ability to work, and if he is a breeding animal it is his ability to reproduce offspring that have that same quality of long endurance at heavy work. The draft horse is primarily a utility animal, his chief purpose decidedly not ornamental. The most serious charge made against draft horses on the farm is that they cannot stand as much punishment as a smaller horse. That is true, but in most instances the fault is due to having the wrong kind of a drafter. Get these qualities in your drafters, for they are indispensable—a good free walk, clean joints, well set legs, plenty of bone, wide hoof heads, a thick frog, a live hoof wall on the big round foot of medium depth at the heel, a short and strong back, a deep middle, a head that sets up well and a clean throat latch. The slightest deviation from a correctly set of feet and legs under the body, hinders a perfect walk. Naturally the worse this fault is, the more difficult it is for the animal to travel and the more tired it becomes from work. Hind legs that stand out too far from under the body or that are too wide apart are weak. They do not give the animal the strength in his hindquarters that he has where the line of the leg is directly below the point of the buttock and where the hocks come together a bit and the toes out slightly, military fashion. Front legs that stand too wide apart cause a paddling gait, which is very wearing on a horse. Where the front feet are too close together, the animal is always a good stumbler. Insist in every instance on getting clean joints, for even then enough become unsound afterwards. The hock, the joint of a drafter that is most often unsound, should be wide from front to back, broad and the skin should fit the bone as neatly as a glove fits a lady's hand. The meaty hock fills easily and the small hock is likely to throw a bone spavin, both very objectionable from the standpoint of a first-class, serviceable draft horse. The old Scotch saying—"No foot no horse" grows more significant with the passing of the years. If a draft horse hasn't a sound set of feet to stand on, he isn't worth much. Get a small foot, a shallow foot, a narrow foot or one with a dry, dull looking hoof wall, and one can gamble on having a lame horse very soon if he isn't already that way. A lame horse is like a broken piece of machinery, it must cease working until repaired. Beware of short, stubby pasterns, for they are almost invariably found on horses with side bones. The pastern should be of medium length and set at an angle of about 45 degrees to give the horse a springy step and to keep his hoof heads sound. The hoof that is allowed to grow too deep at the heel usually contracts because the frog drys up from the lack of use. Then the hoof walls receive the jars instead of the frog. The peculiarity of frog tissue is that if it isn't used, it soon drys up and the most of it disappears. The shallow foot without any frog soon goes lame, because there isn't any buffer to take off the concussion as the horse walks or trots. Plenty of bone below the knees and hocks indicates a heavy boney frame throughout the body, and that is what it takes to support a big horse and make his service last over a long period of years. The long, slack back soon goes down, because it isn't strong enough to support the wear and tear of the animal at work. A deep middle indicates plenty of room to carry feed, and that always goes with a good doer. The head and neck that sets up well almost always goes with a horse with a good walk and a cheerful way of going at his work. The low headed, thick throat latched horse is frequently bad in his wind, he can't stand much heat as a rule and he invariably has a poor walk. For service, the color makes little difference, if the horse is put up right, but typical breed color makes a material difference in the selling value of an animal for breeding purposes. Why all of this emphasis upon conformation and soundness? Because therein lies very largely the secret of success in the business. If breeders expect to produce draft horses that will meet with the greatest favor among the farmers and will sell most readily at profitable prices, they must breed drafters that possess all these good qualities associated with soundness and as nearly perfect in their conformation as the skillful breeder can develop them.

Thoroughbred Matters

LEADING MONEY-WINNING OWNERS OF 1918

In 1917 A. K. Macomber was the leading winning owner with stable earnings of $68,578. In 1918 his stable won the greater total of $95,264, but that sum only sufficed to place him second in the list of winning owners. First place was won by the formidable aggregation of horses gathered by Commander J. K. L. Ross, regardless of cost, it being the first time a Canadian owner has occupied that exalted position in North American racing. The acquisition of Cudgel in 1917 from John W. Schoor was the master stroke that brought about the stable's success, that excellent race horse winning more than a third of its total of $99,179. At weight for age he was the best race horse in the United States when at his best, and a worthy compeer of the other grand racers Broomstick has sent into racing from time to time. The brilliant two-year-old Billy Kelly was acquired at a time when he had filled most of his engagements, still he raced in the Ross colors sufficiently to place him second to Cudgel in money won for the stable, says Daily Racing Form.

Although A. K. Macomber was deprived of the primacy of American owners, his stable was a powerful one and he had the satisfaction of knowing that he was well represented in racing by some capital thoroughbreds. He had two of the best three-year-olds of 1918 in War Cloud and Motor Cop, and an excellent handicap horse in Hollister and a notably good two-year-old in War Pennant, all of which finished in the division of winners of $10,000 or more. Unluckily, possibly, in a moment of irresolution concerning going on with racing while the great war was in progress, he sold Motor Cop, War Pennant and War Marvel to J. K. L. Ross for the reported sum of $75,000, action which he regretted subsequently. Even so, the stable is still one of great strength, with all kinds of possibilities bound up in the glossy hides of its big band of young horses.

The following is a list of the winning owners of 1918 with stable earnings of $25,000 or more each to their credit:

J. K. L. Ross	$99,179
A. K. Macomber	95,264
H. P. Whitney	70,300
J. W. McClelland	60,865
W. R. Coe	58,228
Williams Bros.	55,831
R. T. Wilson	50,527
W. S. Kilmer	50,303
J. E. Widener	42,269
P. A. Clark	42,111
J. Sanford	37,947
E. R. Bradley	37,087
E. B. McLean	35,905
W. F Polsom	34,710
B. J. Brannon	33,011
J. Livingston	32,807
Brighton Stable	32,389
Quincy Stable	30,554
A. Miller	30,039
G. W. Loft	29,253
F. D. Weir	27,594
W. E. Applegate	26,741
R. F. Carman	26,176
S. C. Hildreth	26,117
K. Spence	26,001

In the important item of stable earnings Eternal was the leader of the year with $56,137 to his credit. Next came Johren with $49,156, followed by Exterminator, $36,147; Cudgel, $33,826 and Billy Kelly, $33,783.

Never in any year did our horses seem to furnish more keenly enjoyed entertainment to patrons of racing than in 1918. There have been years when some better horses than the best of 1918 were in competition, but the best class of racers of the year were up to a high average of excellence and gave many exhibitions of the superior speed and dauntless gameness characteristic of the thoroughbred. A feature of unusual interest marking the racing of the year was the successful assaults in the previous mile records. Sun Briar making a new time record for the distance in a regular race and Roamer effacing the long-standing record of Salvator in a race against time. Sun Briar's new record of a mile in 1:36 1-5 was made August 6 at Saratoga when winning the Delaware Handicap. Roamer's record of 1:34 4-5 was made at the same marvelously fast track August 21. In passing it may be said that after the close of the Saratoga meeting Sun Briar ran over the track there in 1:34, but, not being run in the course of an authorized meeting, the feat has no place in the table of American records, although interesting as a demonstration of the colt's great speed. This colt, a star of 1917, seemed a failure in the spring and did not round into form until midsummer, but when he came to himself was observed and may really have been the best three-year-old of 1918, although he was not kept in racing long enough to establish the fact, says Daily Racing Form.

PRINCIPAL WINNING HORSES OF 1918

The ten leading two-year-olds in money won in 1918 were:

Eternal, b c, by Sweep –Hazel Burke	$56,137
Billy Kelly, b g, by Dick Welles—Glena	33,783
Dunboyne, ch c, by Celt—Network	32,030
Hannibal, ch c, by Olambala—Mexoana	19,725
Col. Livingston, b g, by Handsel—Axis	19,623
Sweep On, b c, by Sweep—Dodler	16,751
Elfin Queen, blk f, by Disguise—Sprite	15,936
Lord Brighton, ch c, by Ballot—Miss Crittenden	15,161
War Pennant, br c, by Jim Gaffney—Maltha	14,020
Pen Rose, b f, by Sweep—Hanrose	10,084

The ten best money-making three-year-olds were the following:

Johren, b c, by Spearmint—Mineola	$49,156
Exterminator, ch g, by McGee—Fair Empress	36,147
War Cloud, b c, by Polymelus—Dreamy	25,100
Jack Hare Jr., br c, by Marathon—Moon'et.	23,815
Motor Cop, b c, by Uncle—Xarco	16,810
Sunny Slope, ch c, by Astronomer—Neva W.	11,263
Eyelid, ch f, by Eyebrow—Raiment	10,730
The Porter, b c, by Sweep—Ballet Girl	10,655
Sun Briar, b c, by Sundridge—Sweet Briar	10,525
Compadre, blk c, by Colin—Playmate	9,819

The ten most successful four-year-olds follow:

Cudgel, b c, by Broomstick—Eugenia Burch.	$33,826
Naturalist, b g, by Rabelais—Nature	14,942
Hollister, br c, by Sunstar—Our Lassie	13,358
Corn Tassel, br g, by Santoi—Cornfield	11,237
Midway, ch c, by Ballot—Thirty Third	10,516
Bribed Voter, ch g, by Ballot—Marie Frances	8,612
Beaverkill, br c, by Ogden—Dolly Higgins	8,256
Grundy, ch g, by Roquelaure—Prude	7,949
Minto II., b g, by Sundridge—Miss Ronald	7,625
El Rey, ch c, by Peep o' Day—Lady Strathmore	7,188

The ten five-year-olds which led the others of their age in amount of money won in the racing of last year follow:

George Smith, blk h, by Out of Reach—Consuelo II.	$18,550
The Brook, br g, by Troutbeck—Hattie T.	17,410
Bet, b m, by King James—Nancy D.	12,505
Slippery Elm, br g, by Bannockburn—Schwalbe	11,735
Old Koenig, b h, by Golden Maxim—Masthead	10,650
Sun God, ch g, by Aeronaut—Sunrise	8,318
Spur, b h, by King James—Auntie Mum	7,175
Franklin, ch g, by Jim Gaffney—Gliding by	7,108
J. J. Murdock, b h, by Contestor—Grotesque	6,669
Kama, b g, by Stanhope II.—Kermess	6,505

The ten leading money-winning horses of 1918 which raced in good form as six-year-olds or over were:

Roamer, b g, 7, by Knight Errant—Rose Tree II.	$21,950
Hauberk, b g, 6, by Martinet—Druid	12,623
Leochares, b g, 8, by Broomstick—Leayonara	10,020
B. of B. Mawr, blk m, 8, by Ort Wells—The Belle of Mayfair	8,510
Rancher, b h, 6, by Galveston—Sweet Lavender	8,135
Obolus, b g, 6, by Oddfellow—Kenmore Queen	6,797
David Craig, ch g, 7, by Peep o' Day—Avon II.	5,635
Baby Lynch, br m, 6, by Leonid—Queen Lithe	5,361
Yorkville, b g, 8, by Yorkshire Lad—Susie Bush	5,235
Hank O'Day, br g, 6, by Peep o' Day—Eric Belle	5,166

—Thoroughbred Record.

ARABIAN HORSES

Through long service and contact love for the horse has become an inherited attribute of human nature. Now that the automobile has taken the place of the roadster, horseback riding has become more popular with fashionable society than ever before and to own and ride a high-class saddle horse is the ambition of most of the smart set.

The popularity of the Arabian horse is constantly growing in this country and horses carrying Arabian blood that make good saddle horses bring good prices.

The Arabian horse has many desirable characteristics differentiating it from other breeds. These differences appear in uniformity of conformation, intelligence, larger brain capacity, beauty of general conformation, docility, courage and endurance.

Colts need little breaking and develop up to six years of age, they live and breed to a greater age than other species. The Arab horse possesses a fine head, mane and tail, high head and tail carriage, while the usual colors are solid bay, chestnut, gray and brown with star or blaze with one or more white feet. Many of the crossbreeds are particolored and beautifully marked.

Their pure blood is potent in revivifying other breeds, giving courage, endurance and docility, making splendid cavalry horses.

Mr. S. C. Thomson of Concord, Cal., an enthusiastic breeder of the Arabian, is advertising for public service three registered stallions that represent the purest Desert Arabian blood.

Mr. Thomson has a number of mares of his own and is an enthusiastic horseman and a great admirer of the Arab strain. He invites people who are interested to visit his place and see his Arabian stallions and mares.

LUCK ON THE TURF

Mr. A. W. Cox, who for some years raced as Mr. Fairie, started his racing career in England about 30 years ago, and one of his earliest purchases was Lady Muncaster, by Muncaster. She had been consistently raced at two and three years old, winning six out of nine races at two years, worth £3260, but only won two small races (£325) at three years, and Mr. Cox raced her without success at four years. Her first foal to survive was Isoletta by Isonomy, who did not race, followed by Speedwell by Springfield, who won the Middle Park Plate, but did not train on. She had several other foals, but they did not show up prominently. Isoletta's foals also did not show any great promise, and Mr. Cox disposed of her to go to Italy in 1903 for 475gs. Of her progeny, bred by Mr. Cox, Matoppo won £225, Mahdi £1725, Eon £341, Floramour £140, and Galicia £1232, and it was through the latter that the principal successes came. Her first foal, Eastern, won £1696 10s, and was sold to Belgium. Carpathian followed, but owing to an injury could not be trained. Then came Bayardo, who won £44,534, and the next year, Lemberg £41,694. Of her other foals, Silesia, Zia, and Radamas did not win, and her last foal to race, Kwang Su (1913) looked to be good (he ran second in the Two Thousand Guineas and New Derby), but only won one race of £285. Silesia went early to the stud, and her first foal, Radesia, was sold for 530gs, but Mr. Cox retained the next one, My Dear, by Beppo, and her winnings so far total £6983. Isoletta had another daughter, Chere Reine, by Florizel II., and her first foal, Aleppo, netted Mr. Cox £8887. Aleppo was followed by Telephus, who won £1570, and by Queen's Square, who has just finished this season by adding £1375 to the exchequer. The money won for Mr. Cox by the descendants of Lady Muncaster are as follows:

Lady Muncaster	£ 1,925
Isoletta	3,663
Galicia	95,192
Chere Reine	11,832
	£112,612

Had Mr. Cox sold Bayardo and Lemberg, it is quite possible that he would, including the sales, have netted £200,000 for his investment in Lady Muncaster, but he kept both stallions. Bayardo gave good promise as a sire, but he died in June, 1917, being only 11 years old. In his first season, 1914, he only got one winner, Good and Gay, but she won £3632; in his second, two winners of £2004; the next year he had 15 winners £4448; in 1917 Gay Crusader, of the seven winners of £12,332, contributed £10,180. Bayardo's 1917 record was bettered this season with five winners of £15,650, of which Gainsborough took £13,410. Lemberg has not risen to the same heights. In his first season, 1916, he got one winner of £204, in 1917 five of £1965, and the season just closed four winners of £1638. It must not be forgotten, however, that there was very little racing in the years these horses have been at the stud, and this, no doubt, has affected their returns.—N. Z. Referee.

THE MACOMBER TRAINING STABLES

Walter Jennings, who has charge of Mr. A. K. Macomber's racing string at Mr. Macomber's training quarters at Belmont Park, writes that he has a stable of thirty horses in training and that the commodious training quarters will accommodate many more. Mr. Macomber has spared no expense on the stable and other buildings and appointments to make it one of the finest training quarters in the country. In addition to the stables and the cottage occupied by the trainer, there is another big building with rest rooms for the employees, a blacksmith shop and the private quarters of Maurice Bernard, the foreman, of the stable. But it is to the sleeping quarters for the stable help, all of which are colored, that Jennings points with particular pride. "It is a place as clean as any hospital, and with cots much the same as those used in the hospitals," writes Jennings to Woodland friends. "All these appointments were made under the personal supervision of Mrs. Jennings. The place is presided over by colored 'Aunties,' who see that the boys live as circumspectly as maids in a boarding school."

Although the champion of his string is War Cloud, Jennings is equally as enthusiastic over others of his stable. Star Master, the first horse that ever won a race under the Californian's colors, and now a 5-year-old, may be expected to produce some great races this coming season. Tracksend, who was turned out after his 2-year-old form, will come back to the races as a 4-year-old, in excellent condition. War Loan, War Bond, War Rocket and War Smoke are other new performers from whom much is expected.

Star Hawk, for two years a servant in the stud, may appear again and Liberty Loan and War Star, both of them in California now, may also be taken East to campaign this year. There are only eleven 2-year-olds in the Macomber barns and all of these are by Uncle and out of good mares. The 3-year-olds are said to give much promise.

REVIVAL OF RACING

Indications point to a complete revival of the thoroughbred racing.

Those sections of the country which have tracks where attractive purses are hung up are to be subsidized if the schemes of sportsmen and promoters in Washington, Illinois, West Virginia and Northern New York bear fruit.

In the Northwest arrangements are making for the proper domination over horse racing, with similar ideas on tap in the Middle West and other sections mentioned. In and about Chicago there is a movement to re-establish the Washington Park Club.

This is the organization which cut such a swath in the racing of the Middle West in the early nineties with the American Derby as the chief piece de resistance. It is turf history that the East made every endeavor to corral the honors and the great $50,000 stake.

There was general lament when racing there was wiped out in 1894.

Energetic effort being made for a revival in Chicago is shown by inquiries made in behalf of the old Washington Park Club. It will be the purpose of those who are at the forefront of the scheme to promote racing, steeplechasing, polo, hunting and kindred sports.

In the course of the last eight years California, Florida, Montana, South Carolina, Utah, Virginia, Oklahoma and Idaho, which in 1911 gave horse owners considerable sums in stakes and purses, have banished from the racing map, but Arkansas, Louisiana, Nevada and Wyoming have come back, so there is some compensation. It is probable that other comebacks of importance will be registered before long. In the meantime Kentucky, New York and Maryland are the states which have kept the sport living, although New York was but flickering dimly in 1911 and 1912. It is interesting to note how steadily the racing returns of that great state have mounted upward from the $402,603 of 1913 to the $1,156,299 of last year, all due to common sense decisions of the New York courts in regard to betting. Study of this presentment of racing returns in the United States makes it seem a veritable map of the vicissitudes of the sport in this country. In the broader field of North American racing the outstanding fact is that since 1904 the vast sum of over fifty millions of dollars has been distributed among owners of winning horses. But for the war-time suspension of Canadian and Mexican racing this great total would have been increased by at least two and a half millions more. This is a tabulation of more than passing significance and interest to the turf world:

United States Racing Revenues Since 1910

State	1911	1912	1913	1914	1915	1916	1917	1918	Totals
Kentucky	$463,929	$446,390	$539,750	$524,495	$570,881	$670,439	$746,895	$ 754,155	$4,716,934
New York	10,900	30,290	402,603	580,860	539,170	650,459	972,073	1,156,299	4,342,654
Maryland	277,850	356,930	355,690	413,990	438,374	578,725	715,690	765,678	3,902,927
Louisiana					87,800	169,280	273,835	274,190	805,105
S. Carolina	32,700	194,155	183,450	209,105	4,745				624,155
Montana	74,145	91,600	133,360	133,550					432,655
Florida	310,885								310,885
Arkansas					42,868	90,250	122,150		255,268
Virginia	84,985	72,265	67,935	14,400	2,610	3,360	2,265	3,325	251,145
Idaho	72,690	113,380	11,000						197,070
Nevada					40,150	78,500	43,350	23,240	184,240
Utah	67,935	90,375							158,310
Oklahoma	61,200	53,270	39,000	2,400					156,470
California	73,085				47,595		9,375		130,055
Colorado		12,350		34,600	43,095				90,045
Illinois	7,250			2,000		57,085			66,335
Massachusetts	10,765	11,960	11,910	9,835	7,040	9,135			60,645
Wyoming							29,150	30,000	59,150
Indiana		12,600	31,100					6,000	49,700
Pennsylvania	2,940	6,025	1,015	925	9,605	8,895	4,150		33,555
Missouri		5,200					21,700		26,900
Texas	9,200		6,600	7,500					23,300
Michigan				5,200			14,200		19,400
New Jersey	4,685	4,260	600		1,700	1,525			12,765
Washington	11,430								11,430
D. of Columbia		3,950	7,265						11,215
Kansas	6,400								6,400
Delaware							6,000		6,000
Alabama						3,250			3,250
W. Virginia		2,625							2,625
								Total	$51,612,389

THE MIRAMONTE STUD

Edward Cebrian, proprietor of the Miramonte Stud, which is domiciled in the San Jose Valley, now one of the thriving young thoroughbred nurseries of California, is one of the most liberal of the far Western nominators in stakes that are to be decided in the course of the coming season on Eastern tracks. Last season Mr. Cebrian developed a first-class two-year-old in American Ace, a son of Von Tromp and Rosegal. American Ace showed brilliant form in June. After running third to Dunboyne and Grimalkin at Belmont Park he defeated Star Realm and Bright Lights in a fast maiden race at Aqueduct and then finished second to High Time, beating Different Eyes, War Marvel, Lord Brighton, Star Hampton and The Trump in the Great American. But, unluckily, he developed a "leg" at Aqueduct and Mr. Cebrian has no great hope that he will be better than a useful three-year-old.

American Ace is one of half a dozen horses claiming for sire the Ben Brush stallion Von Tromp (half brother to Peter Pan) to show first rate form on American tracks in the course of the last two or three seasons. High Cost, one of the fastest two-year-olds of 1917 and a sprinter of parts last season, is a son of Von Tromp and Mitten, and sprinter Bon Tromp is a son of Von Tromp and Bonsetta, and Bon Jour, winner of the Clipsetta Stakes at Latonia last summer, is a daughter of Von Tromp and Jourdan. Edward B. McLean, of Washington, bought Bon Jour from Mr. Cebrian at Saratoga a couple of seasons back and when the Von Tromp filly won the Clipsetta she defeated both Regalo and Battercake. So Mr. Cebrian is encouraged to believe that he has some winning Von Tromp two-year-olds for this season's racing.

These Cebrian youngsters will be handled by Charles Casey, the developer of American Ace and the handler also of the horses of J. H. Rosseter, another California breeder. Casey is at New Orleans with the Cebrian two-year-olds which will make their Eastern debut at Havre de Grace and Pimlico before going to New York. Von Tromp, which was a first-class race horse himself, is what the breeding sharps call a "pure dominant." A rich deep bay himself he gets bays, browns and blacks mostly and puts his own impress on his offspring. Practically everything he sends to the races has size, bone and substance in combination with "breedy" carriage. Also his youngsters are smooth gaited and they stick.

Of the two-year-olds in Casey's charge that will bear the silks of Mr. Cebrian next season Ace of Trumps is the most showy. This fellow is a strapping black from Bonsetta. He is accordingly an own brother of Bon Tromp and his dam traces in the female line to no less distinguished mare than Bourbon Belle, the mother of Hanover. She is, indeed, a daughter of Bon Bon, an own sister of Hanover. Bonsetta's sire was that successful St. Simon stallion Masetto, the sire of Waring. There is another good looking black in the string from Dally, a daughter of Giganteum and Dal, she by Mortemer and Katie Pearce by Leamington. This one is a half brother of Rey Oakwood, a winner at various distances and in various parts of the country. Cuyama, one of Von Tromp's winners of other seasons, has a prepossessing full brother in the chestnut colt The Leopard, whose dam was Ruth W., a daughter of King's Counsel and Letter B., by Erdenheim. Carbureter has a half brother in Clear the Way, a brown colt of ample size and exquisite balance.

Directa, the dam of this colt—Clear the Way, is a California-bred mare. She was reared at the late Lucky Baldwin's Santa Anita Stud; her sire was Vinctor and her dam was Zalinda, a daughter of Gano and Experiment by Monarchist. California mares are coming into prominence again. Kalitan, the Preakness winner of a couple of seasons back, claims one of them for a dam. Mitten, another, has produced as many winners, probably, as any mare now in the service. Kenworthy, King Worth, Envy, Hearsay and High Cost all claim her for dam. Still another, Trained Nurse, a daughter of Yo el Rey and Santa Rosa by Wheatley, is responsible for a smart brown colt of the Cebrian establishment that has not yet been named.—Thoroughbred Record.

FIRST AND LAST DERBY

The Derby was instituted on Epsom Downs in May, 1780. At that time there were some soda springs nearby which people of over-indulgent natures flocked from London to drink, and there used to be horse-racing of a sort on the Downs. The first to think about a Derby was Sir Thomas Charles Bunbury, and he named it after Lord Derby's estate, The Oaks, which was nearby. The Oaks was started a year previously by Lord Derby. This race was for fillies, and Lord Derby won it with one of his own, Bridget, by Herod. As Sir Thomas Bunbury (better known as Charles) owned a colt whom he very highly prized, it is only natural to infer that he suggested the Derby, for three-year old colts, in the expectation of winning it, much as Lord Derby doubtless did in respect to The Oaks. His name will live for ever in the annals of the turf as the owner of Diomed, the first winner of the Derby, the greatest race for three-year-olds in the world. It was in Sir Charles Bunbury's town house, at a dinner party given by him there after the Epsom meeting of 1779, that the proposal for the institution of the Derby originated, a race which was intended to be solely for colts, as The Oaks, which had been first run for in that year at the recently concluded Epsom Meeting, was for fillies. It was, however, ultimately decided to make the event—as it has remained ever since—open to both sexes.

In 1777 Sir Charles purchased of the Hon. Richard Vernon at Newmarket a chestnut colt, by Florizel, a son of the celebrated Herod, out of a Spectator mare foaled in 1763, and bred by Mr. Panton. To this youngster, Sir Charles gave the name of Diomed, and the colt in due course formed one of the 36 entries for the first Derby Stakes, run at Epsom in May, 1780. Diomed's first appearance on a racecourse was at the Newmarket Second Spring Meeting of 1780, when, carrying eight stone, he won a sweepstakes of 500 guineas from three opponents of fair class. He was next seen in public at Epsom, on the first Derby day, the 4th of May, 1780, when, with six to four laid against, he started first favorite for, and won the race, beating the celebrated Colonel "Eclipse," O'Kelly's Bondrow, and seven others, all of whom were placed by the judge. In all Diomed won £5319 in stakes. In 1799 Diomed was sent to Virginia, where he covered many mares and founded the line of American-bred racehorses. It has since been written that the ship which carried Diomed to America was wrecked off the coast of Virginia, but Diomed was not born to be drowned. He swam ashore. It, has also been said the famous cavalry horses of the Confederate troops in the American Civil War owed most of their strength and endurance to their sires, who were mostly descendants of Diomed, who died at a great age. One chronicler declares he was over 40 years old when he died. The first volume of the English Stud Book says, "Diomed was sent to Virginia, north of America, at the age of 22, where he covered a great number of mares, and was alive in 1807."

Now that, fortunately for mankind, the war is over, the English classic races will be again decided on the old battleground where these races have been run since their inauguration about 138 years ago. Until this terrible war began the Derby was decided at Epsom, and the St. Leger at Doncaster; but these racecourses being required for war purposes, and the Government having curtailed racing, they were run off at Newmarket under the auspices of the great English Jockey Club, and under the old conditions, except that the stakes were reduced. By a curious fancy the St. Leger was called the "Subscription Stakes," and the Derby the "New Derby." The last winner of the Derby was Gainsborough, who was bred by his present owner, Lady James Douglas, who is the first lady to own a winner of the Derby, and, in fact, of the Triple Crown.

KENILWORTH

Kenilworth is a name to conjure by, it brings up visions of racing days gone by when racing was in the spotlight in California. Memories of surging crowds of excited spectators, the flash of color under the wire and the Kenilworth's number on the top of the announcement board. He is without question one of the world's most consistent winners, having won 94 races and meeting nearly all of the best horses in America during his racing days. He ran six furlongs at Tanforan in 1:12½ beating the great Waring. He holds the mile record 1:39½ on the Ingleside track and at Oakland carried 132 pounds and ran ¾ of a mile in 1.13. He defeated the great Articulate every time he met him and has beaten every horse he has raced against as many as three times. He was a consistent winner at two, three, four, five, six and seven-year-olds. His sire imp. Sir Modred, who was a great race horse and one of the world's greatest sires. Kenilworth was not only a great stake horse but is a great sire, among his get such race horses as Coopertown, Kiang, Eel, Warefare, Katie Gleason, Pay Streak, Halworth, Envy, King Worth, Real Worth, Clark M, Ada Anne and Midsummer, etc

Kenilworth is one of the handsomest horses in the country, stands 16.1 hands high, weighs over 1300 lbs. and is now in superb condition. He is owned by Bugeia Bros., of Novato, Marin county, who have an advertisement for public service for the season of 1919 at the fee of $100 limited to ten approved outside mares.

Harry Stover who formerly owned and raced Kenilworth thought so much of him that he refused $30,000 in cash for him. Kenilworth accomplished the remarkable feat of winning thirteen straight races against good fields

Notes and News

Ed. F. Geers, dean of harness reinsmen, celebrated his sixty-eighth birthday January 25. The "Grand Old Man" was born at Lebanon, Tenn., in 1851.

Dr. J. G. Belt of Phoenix disposed of the last of his horses at the Chicago sale last month. W. L. Selman of Phoenix is now the owner of the mare Caddie Russell by Western Mack, son of McKinney, dam Tabbie R by Temescal, son of Palo Alto. She was bred last summer to Wilbur Lou.

Harry S. Harkness, son of the late L. V. Harkness, died at his New York home last month a victim of influenza. Mr. Harkness was thirty-eight years old and an ardent patron of out door sports and also interested in aviation. It will be remembered he purchased Guy Axworthy 2:08¾ in 1916 giving $20,000 for him.

Secretary Flaws of the Harness Horsemen's Association reports that every member of the association is practically appointing himself a committee of one to get new members and that the list of membership is swelling rapidly. The regular adjourned meeting of the association will be held during the Chicago Sale, Wednesday morning March 5th, at 10 o'clock and it is expected there will be a large representation of horsemen present.

At the annual meeting of the stockholders of the Walla Walla Agricultural and Stock Association held last month it was decided to give another meeting this year and to make many improvements in the grandstand, livestock sheds, to erect new buildings and to beautify the grounds. L. L. Lynn was re-elected secretary. There are now forty-five horses that are being wintered and trained at the track. Walla Walla will figure prominently on the North Pacific Circuit this year.

At the annual meeting of the American Trotting Register Association, held Feb. 5, the following officers were re-elected: President, David M. Look; vice-president, Paul C. Wilson; secretary treasurer, Frank E. Best. The following new names were added to the board of directors: Hon. J. W. Bailey, Washington, D. C.; W. S. Harlan, Lockhart, Ala.; J. O. Winston, Saugerties, N. Y.; Harry Burgoyne, Donerail, Ky.; S. A. Fletcher, Indianapolis, Ind.; W. D. Dickerman, Mamaroneck, N. Y.; Thomas Irvine, St. Paul, Minn.; A. H. Cosden, Southold, N. Y.

Chas. Guion has a strong stable at the Yakima, Wash, fair grounds, the property of A. E. Harden, the big stock man of Goldendale, Wash. Guion will race the pacers Sister Norte 2:06 and Joe McK. 2:07½, and the trotter Lena Bond 2:15, by The Bondsman, dam Orlena 2:11¼, by Ormonde 2:08¾, and her four-year-old brother. He also has in the stable the four-year-old pacer Hal Harden, by Hal B., p, 2:04½, dam Midget, by Lovelace 2:20, an own brother of Wallace H., p, 2:08½, and a four-year-old filly by Del Norte, p, 2:08, dam by Yendis, son of Sidney, p, 2:19¾. Guion's campaign will be in the Western Canada Circuit and in the North Pacific.

Wm. G. Durfee has quite a promising string of horses at the Los Angeles track, among them being a fast green pacer Alhambra Duke, belonging to Durfee and Winters. This horse has paced a half-mile in a minute and looks as though he could carry his speed. Another one is Barbara D, a three-year-old trotter by Carlokin, dam Honey Healey, that has trotted a half in 1:03. He also has Rico 2:05¼ and a number of others making up a string of eight or ten altogether, including a three-year-old pacer by Copa de Oro, that he thinks a good deal of. Jud Collins is doing the driving for him but Mr. Durfee hopes to be able to get in the sulky before long. He made a remarkable recovery from his serious illness and while [illegible] feels at to drive his doctor has not yet given him permission to do so.

Lieut. J. V. Crozer, L. R. D., who recently visited this state as special representative to the British and Canadian Recruiting Mission, wishes to announce to his friends and acquaintances that since victory [illegible] and is no longer required his services he has turned his attention to one of the [illegible] of the Allies [illegible] of the United States and [illegible] the Surrey Cavaliers of Epsom, and in this regard may be [illegible] with D. Lorne & Company, Tribune Building, Winnipeg, Canada, who [illegible] wholesale and retail grain and stock lands. Lieut. Crozer has had several years of practical experience in Western Farm Lands, and naturally with the return of peace leaves war [illegible] former work in which his friends will, we feel sure, one and all wish him success.

It was at the conclusion of the Civil War in the United States that trotting racing commenced to flourish and to become the popular sport and be soundly established. The coming peace may bring about the same effect and as the war was world wide, harness racing may have a tremendous boom in all countries that were at war which would mean a big foreign demand for American-bred trotters.

Jas. H. Hoyt of Suisun is offering 900 acres of which fifty to seventy-five acres is upland and the balance good tulle land all leaded particularly desirable for a stock ranch and also for a term of one or two years. This land is so situated and has such desirable qualifications that any one looking for a location of this description should not fail to investigate this offering. See advertisement.

The foals kept eligible in the Kentucky Futurity for foals of 1918 number 625 and represent 189 different nominators. The largest number of entries being 70 from the Walnut Hall Farm. There are 92 stallions represented of which 22 have ten or more mares each in the list of entries. Walnut Hall Farm's greatest stallion "San Francisco" 2:07¾ has 48 and divides honors with "Peter the Great" 2:07¾ who is represented by the same number. Of the total 625 eligible in the stake there is only one entry from California.

Grover H. Perigo, for the last thirteen years connected with the editorial force of the "Horse Review," died of tuberculosis on the 20th of last month. Mr. Perigo was only 31 years old and was one of the best posted, brightest and most popular special writers on horse matters in the country. He had a remarkable genius for statistics and his work in that line has made the "Horse Review" and the new Review Racing Guide so essential to horsemen for accurate reference. His early demise was not only a great loss to journalism but is deeply regretted by all who knew him.

Walter Direct, p, 2:05¾ and Carlokin 2:07½ are fixtures at Frankfort, Ind., where both stallions are great favorites. Walter Direct boosted his 2:10 list to seventeen, Napoleon Direct, p, 1:59¾ at the head, and three new members joined in 1918. Twelve of the lot have records better than 2:08, and all got their marks in races. An offer of four figures has been several times made for Grace Direct, p, 4, 2:06¼ this winter. Carlokin left the greater part of his progeny in California, where racing has been light, but no one will forget his daughter, Esperanza 2:03¼, a 2:00 prospect. A three-year-old filly by Carlokin, owned in California, showed better than a 2:10 clip in her work on Jan. 24 this year. Carlokin's eastern foals only lack age to prove up.

It is more than 100 years since the Russian Count Alexis Orloff, by crossing an Arabian stallion on Dutch mares, founded what is now known as the Orloff trotters. The Orloffs were the fastest European trotters until the importation and crossing of the American-bred trotter, and as a breed possess good form and stamina. Their speed does not compare with American trotters, but it is considerable and possibly greater than American trotters could show under the same conditions. In 1845 the Russian Government bought the Orloff stud from the Countess A. A. Orloff, daughter of its founder. There were 21 stallions and 196 mares of the Orloff trotter breed, and nine stallions and 112 mares of the Orloff hack breed, in the stud. It would be interesting to know what has happened to the Russian Government studs lately.

POLO AT DEL MONTE

Eric Pedley, the all-around Stanford athlete, classifies polo as a game which is more exacting than boxing, tennis, football, baseball and the list of other competitive games in which Pedley has been identified at Stanford University. He claims that polo is faster, requires faster and keener judgment and more condition than any other sport.

Pedley has been playing the game for the past nine years, his father having been an enthusiast in Southern California, who raised and bred polo ponies for his pleasure. When the Stanford student was fourteen years of age he proved a sensation in the tournaments that were held at Riverside and other Southern California points.

Pedley makes a practice of boxing three to four rounds daily and he says that he comes out of those tilts with the padded gloves in tiptop condition; but in the six chuckers of play here on Sunday he was fatigued when the final whistle was blown. He says that polo requires the use of muscles that are not brought into play by the other competitions.

Pedley will run down here from Stanford for the polo matches which will be regular week-end events for the rest of the season.

The young all-around athlete is rated by polo critics as being one of the coming stars of the game. He is a fearless and dashing rider and his judgment of distance and keen eye always make him a dangerous man for his opponents to watch.

The Del Monte polo season opened auspiciously on Sunday, January 26th, when Del Monte defeated San Mateo, 7 to 3½. Big tournaments are now being planned with teams to enter from Mexico, Honolulu and Eastern and Coast points.

THE FIGHTING CHANCE

We read a lot of interesting and also instructive articles as to what wonderful sires some certain stallions are, all of which is true. I read all these items with interest. I study the tabulations of the mares served by such sires as Mocku, Walnut Hall, Peter the Great, Etewah, and the many other sires, and I say to myself, small wonder these mighty stallions are so successful, and to add to the success the progeny of these horses are nominated in futurities and are developed from earliest colthood by competent trainers. All of which is as it should be. On the other hand, I contend that the foals sired by any well bred stallion and out of a well bred mare, has a chance to become great if given a reasonable bringing up by its breeder or owner, so the small breeder has a big chance, not just an equal one with the rich breeder, but a good fighting chance, and I believe that every small breeder and small owner should take the fighting chance and give his one or more colts and fillies the fighting chance, care and attention, as I believe that raising, developing and racing of standard bred horses is directly along the same lines as of the human family. The child of poor parents, if given the least bit of care, has at all times the fighting chance to become great, and I know that history will bear me out in this. So just to stop all argument along this line, I will cite the life a world's really great, able and noble man, Abraham Lincoln.

It was good blood flowing in his veins and the fighting chance that produced Abraham Lincoln, so it's the good blood flowing in the veins of a young horse together with a sensible bringing up by its owner and the fighting chance, that brings out great race horses. Away up on an isolated plain in Eastern Oregon was bred a black pacer named College Gent, sired by a steed named Kentucky Patterson. Well if any one looks up the career of College Gent they won't dispute my statement to the effect that College Gent was a real race horse and a big money earner. College Gent was bred by a farmer in an out of the way place was developed by a farmer boy on a bull ring. It was the good blood in the veins of College Gent and the fighting chance taken by his breeder and the son of the breeder that gave us College Gent, the real race horse, so again I say cheer up, ye small breeders, and your sons, and while I am at the long story I will add to it that a few years ago I had a well bred yearling filly named Maggie Ansel at Salem, Oregon, and for sale at $125.00. Maggie was by Prince Ansel and out of Maggie Hall by Moko 2d, dam Maggie Grasir, by Red Wilkes, so I can truly say this nice filly was well bred. She was put up at sale with a $125.00 reserve publically made on her. She did not sell. After being put back in her stall the late Billy Hoggoboom brought to me two boys of about 16 or 17 years of age, one of which said he came up to buy Maggie but was sorry he could not buy her. I said why? Answer: I only have $80.00. I asked his name and address, his said Gervais, Oregon, and pa is a farmer. I said, boy, you can owe me $45.00 and I will take your note for a year and you take my filly. He said, no thank you, I don't never want to owe any body money. His voice wavered, he looked into Maggie's eye fondly. I said, boy, if I sold you Maggie for $80.00 would you be kind to her and develop her. He said, Mister, I sure will. His fine clean-cut young face lit up. I said, "Boy, Maggie is yours for $80," and the pleasure of that boy and his brother amply paid me for all my failures as a horseman. He took out a check-book, wrote a check, and handed it to me. I have him the certificate, put a good halter on the filly, the boys had a buggy, behind which they led Maggie away, and asked me to call on them if ever in Gervais.

Next year Maggie won all the 2-year-old blue ribbons at Salem, and the third year the same. Last fall, while at Salem, two young men spoke to me and said, "Mr. Harrison, we are the boys from Gervais who own Maggie Ansel. We are glad to again meet you." They told me in pride how nice Maggie was and that she is a fast pacer. They did not have her trained, just road work. The eldest boy said they were both going away in the army, having just enlisted, and what would I advise about Maggie. I said, "Boys, breed Maggie in spring." They said they would be away. I said, "Let me select a sire, and have the man who has the sire close by your place come and take your mare away and breed her and put her back on your place."

The embryo U. S. Defender said, "What horse?" I said, "Cavalier Gale 2:08¼, son of Baron Gale and Nella Jay, and if you get a foal it will sure be bred to be a race horse if it gets a fighting chance."

The young man said, "Mr. Harrison, I will accept your suggestion." I took the boys to Fred Woodcock, who had and still has Cavalier Gale, and explained to Fred what the boys wanted, and Fred agreed to get Maggie Hall this spring, and I will see to it that he does. The boys went to war. They may have given up their young lives. I hope not and I am sure that it's many a time those boys think of Maggie Ansel and of her prospective foal if it is born in 1920, and lives, and those farmer boys live to develop it and give it the fighting chance it may be a champion.

C. A. HARRISON.

ANDY McDOWELL

(By W. H. Gocher)

During the Grand Circuit Stewards' meeting in Philadelphia, Andy McDowell came in from Byberry and mingled with the throng at the Bellevue-Stratford. Very few of the later day racing men knew him and still less recalled the days when he was one of the leading reinsmen of the turf and made a few record breaking performances each season.

Considerable water has run under the bridge since Andy McDowell left his home at Port Hope, Ont., for the southern side of Lake Ontario, where he started on his turf career as a rider. For a brief period he was located at Albion, N. Y., but when increasing weight caused him to slip from the saddle into the sulky, he located at Rochester. Being a nervy youngster with a light hand and a good knowledge of pace, Andy soon had plenty of mounts, his first good horse being the Clear Grit gelding Fuller, that paced to a record of 2:13¾ in 1883.

The engagements of this and other horses carried him west and when Marcus Daly decided to include a trotting department on his farm in Montana, McDowell was selected to do the driving. In 1891 he sent him east with Prodigal to win the third renewal of the $10,000 M. & M. at Detroit. The brother of Patron carried a ton of money when the horses were called in this event. In the first heat an unknown called Prince M., driven by a railroad conducter from over in Indiana, rushed out in front and showed him the way to the wire. He was set back for a swerving in the stretch, Prodigal being given the heat in 2:17¼. On the next trip George Spear, who was making his first start in the Grand Circuit, cut loose with Temple Bar and won in 2:17¾. After that the race was all over but the settlement. The defeat put a spoke in Prodigal's turf career, while at Cleveland the following week, Temple Bar was expelled for an effort to drop a race to Leicester, driven by James Goldsmith.

Andy McDowell's gala days of racing were checked off the calendar while he was in the employ of Monroe Salisbury and swept down the line with Azote, Alix, Expressive, Directly, Altoa, and Ella T. Alix and Azote were the best pair of trotters ever seen in one stable, while Expressive is still referred to as one of the gamest three year old trotters that ever took the word. McDowell drove them perfectly, while he also made Alix a champion when she trotted in 2:03¾ at Galesburg, Ill., in 1894. Another world's record was also placed to his credit that season over the kite track at Chillicothe, Ohio, where he drove Flying Jib with running mate in 1:58¼. This was the first mile to harness under two minutes and is still the record to that hitch.

After his contract with Salisbury expired, McDowell located in the East, where in 1901 he won one of the most remarkable races of his career at Hartford in the $10,000 Charter Oak Purse with Georgena. On public form, the Epaulet mare did not appear to have one chance in fifty with such material as Lord Derby, Alameda, Lady Geraldine, and York Boy arrayed against her. This did not bother McDowell, however, his only fear being that Georgena would break down before the race was over. In the first heat she forced Alameda out in 2:09¼. McDowell then went to the front and landed the event after a desperate struggle with Lord Derby, the fastest heat being trotted in 2:07½. The result of this race was also one of the greatest surprises ever seen in the old fixture, the only one to equal it being the victory of Wilkes Heart in the mud in 1907, when on account of rain the Hartford meeting was limited to one day.

In 1896, while racing in the Middle West, Andy McDowell purchased the trotter Oslund L. 2:16¼ from George W. Sherwood of St. Paul, Minn. He carried him with his stable to Lexington, where he sold him to a foreigner through an interpreter. After the sale, the horse disappeared and nothing was heard of him for four years, when I received a cable from the Imperial Trotting Club of Russia, asking me to send a man to Moscow to identify a horse called Oslund L. Andy McDowell was selected to make the trip and experienced very little difficulty in identifying the horse. It was also subsequently learned that Oslund L was shipped to Hamburg and smuggled into Russia, where he was raced as an Orloff until the interpreter, who accompanied his owner to America, hinted that the horse was not as represented.

THE ARABIAN STUD BOOK

The Arabian Stud Book, containing 360 pedigrees and descriptions of American-owned Arabian horses, has been issued by the Arabian Horse Club of America, the headquarters of which organization are located in Washington, D. C. The compilation is prefaced with an interesting article in declaration of the purposes of the club from the pen of W. R. Brown, proprietor of the famous Maynesboro nursery at Berlin, N. H.; a further chapter on type and conformation of the Arabian breed by Mr. Brown, who is president of the club; also a history of the Arabian horse, contributed by H. K. Bush-Brown. H. Ingram, 175 Fifth Avenue, New York, is the registrar of the society.

WILL IT CLOSE HALF THE RACE TRACKS?

To the Editor:

In the last issue of the Trotter and Pacer of New York appeared the following:

"The following very plain, explicit and emphatic prediction is made by a sporting writer in the Philadelphia Record 'Never in the history of harness racing sport was a more radical step taken than the one aimed at by the Horsemen's Protective Association, which was recently launched at a big gathering of horsemen of all classes in Chicago. If in the near or even distant future this new organization secures sufficient membership and influence to put its principles in operation, it is an absolute certainty that more than 50 per cent of the present trotting associations will die a natural death and their race track grounds either be closed up or cut into building lots.'

"We do not yet know positively what form of demand upon the racing associations the Horsemen's Protective Association is going to make through its constitution, which is now being prepared by a committee, but we cannot believe that it will be anything so radical as to insist upon an utter abrogation of the entrance fee at each and every track, for we agree with the above writer that this course would spell ruin for the sport. The slogan of the movement which has been started by Mr. Flaws is 'No more racing for the horsemen's money.' The intimation that there ever has been any racing for the money of the horsemen, as an entirety and as a general rule, is very much an exaggeration. There have been instances in which the entrance fees were aggregately greater than the purse, but they have been exceptional and by no means a frequent thing, and in every such case the racing promoter ought not to be reminded that in common fairness and decency the surplus should be added to the purse. If the promoter fails to display a conception of this propriety he should be made to see it by any process which is effective, and no demand can be too strong.

"But there are many associations whose entrance fees do not pay one-half or one-quarter of the purse. They annually calculate on how much money they can appropriate to their races in excess of the funds received from entrance fees and by experience they are able to determine pretty nearly what the latter will amount to. In the alternative of suspending the fee or getting no entries, they would be compelled to close their tracks, or, if a fair, eliminate the racing feature, or else reduce their purses to half their usual value or less. In any case the result is bound to revert against the interests of owners and trainers.

"If the Horsemen's Association will come forward and present a demand that is possible to grant, and practicable, as we feel assured it will, we think there is no doubt the racing associations will meet it in a proper spirit and try to comply with it. The principle of the sweepstakes plan would embody a demand of that character. Let the racing association announce what sum it is prepared to add to the sum of the entrance fees in any event—$100, $200, $300 or $500—and the sport will then be conducted upon a dependable and more equitable basis. The horsemen would still be racing for their own money, but not altogether so, and they would always know just what share of the burden is borne by the tracks. The horsemen ought to realize that the tracks cannot carry all the burden, except in the case of large fairs, nor will they continue to try to do so very long."

It should be apparent to anyone and especially so to Mr. Al Saunders, secretary of the Philadelphia Association, who attended and spoke at the Chicago meeting, that no **demand** of any kind has been made on racing associations, for the simple reason that the demands or purposes have not even been formulated and won't be until after the next meeting, which is expected to be held at New York the second week in March, and even then there may be no **demands.**

It is true that a tentative program has been planned of which the following are designated as the principal points:

Lower entry fees and all entry fees added to the purse.

No deductions from money winners.

Owners and drivers (members of the Harness Horse Association) on the Board of Appeals of the National and American Associations.

Tracks, stalls and conveniences kept in proper shape.

Track managers controlling feed and draymen, to prevent extortion.

In short, to aid Associations to stage an ideal racing card with proper compensation and treatment for horsemen.

That these conditions are not driving race tracks out of business is evidenced by the fact that every week brings reports of associations that are adopting the plan, without any demand being made but recognizing the fairness of the plan are subscribing to the proposition of their own volition.

The following is from the Goshen Secretary in the Horse Review:

"Decision has been reached on a good many more than 14 points), concerning our next August meeting at Goshen. There will be ten classes; all races of uniform value of $2,000; briefly, with $2,000 reserved for drivers' and caretakers' prizes, a $22,000 offering. I hope Mr. Flaws and others will think this is enough to offer for a three-day meeting in a village of 3,000 inhabitants; 'a sport meeting,' without a fair and without betting!"

Yes, this is certainly magnificent, but at the same time I am satisfied that the horsemen would be better pleased to have Goshen and the other great half mile tracks in that combine follow Huron's example and make the entry fees nominal and add only $1,200 to the purse with no deductions from money winners. And if that is too much I believe the horsemen would be better satisfied with the added money even less. The Huron 2:14 pace was for $1,200 with entry fees covering three payments of $10 each added and they raced for $2,100, or $1,050 net to the first horse.

The numerous smaller associations that are adopting the plan are making their program about as follows: In cases where $400 purses have been the rule, they are giving $250 added money with $5 to enter and $10 to start, these fees added to the purse and no deductions from money winners.

To illustrate: With 12 entries at $5 and 6 starters at $10, the purse has a value of $370, or $185 net to first horse, and give the fourth horse $37 or $22 more than his entrance fee, which is the whole story in a nutshell and the best feature is that for $5 cash a horse can be entered and there are no further liabilities if anything goes wrong, while under the old plan he was suspended for $20.

Most associations, however, are taking the sensible view of meeting the horsemen half way, realizing that what affects one is the concern of both.

In any event, associations must give the matter consideration, as judging by the way new members are being added to the roster of the Harness Horse Association the horsemen are terribly in earnest and mean at last to have at least a hearing.

MAGNUS FLAWS, Secy.,
Harness Horse Association.

ANOTHER HORSEMEN'S AUCTION

The Horsemen's Protective Association perfected its organization at a meeting held in the Minneapolis Horseman's Club, 112 South Third street, Jan. 14th, the following officials being elected: President, E. J. Kellay, Minneapolis; vice-president, C. D. Brown, Rochester, Minn.; secretary, S. A. Butler, Sparta, Wis.; treasurer, Robert Larsen, Minneapolis.

The association originated in Sparta, Wis., being sponsored by S. A. Butler and O. E. Maxson, and was recently chartered under the laws of Minnesota. Mr. Maxson acted as chairman of the meeting, and in a lengthy address told the thirty-odd horsemen present the object and purposes of the organization. Mr. Butler stated that at present the membership was close to 400. The initiation fee is $5 and annual dues $10. Messrs. Butler and Maxson claimed that their organization was launched previous to the action of Magnus Flaws of Chicago, who sent out his "fourteen points," but no facts were offered to support the claim. Edward Best, one of Minneapolis' most prominent horsemen, said that he thought that one big organization was calculated to do more good than was possible were the horsemen asked to divide their interests and form two separate and distinct bodies. In this he was supported by other horsemen. There seemed to be an impression among local horsemen that the H. P. A. was to be the western branch of the Harness Horse Association, of which E. J. Curtin, of Decorah, Ia., was elected temporary president, and Magnus Flaws, secretary. Several had joined with this impression as an inducement.

PETER KLYO BELL 62389

$1000 is the service fee this season at which mares can be booked to Peter the Great and only ten outside mares will be allowed at that figure, according to the advertisement of the Laurel Hall Farm. Peter the Great has been the leading sire since 1914 and is now the world's champion sire of extreme speed. His get bring the highest prices and belonging to the "Peter the Great Family" is a title of nobility in the equine world.

Peter Klyo Bell 62389, owned by Karl Glaser of Sacramento, is a good representative of this titled family of horses. He is a grandson of Peter the Great, being by Peter McKlyo 2:06, a son of Peter the Great. Peter Klyo Bell's dam is the strongly-bred Electioneer mare, Iran Bell, (dam of the Nearest Alto McKinley trial 2:11¾), by Iran Alto 2:12¼, who was one of the best producing sons of Palo Alto 2:08¾, and his second dam is Bell Bird 2:26¼, for 17 years holder of the world's yearling record to high wheel sulkies dam of Wildbell Mab 2:05½, and is a daughter of Beautiful Bells, one of the greatest of the great brood mares of her time. Peter Klyo Bell is a remarkably handsome young stallion, bright bay in color, stands 15¼ hands, weighs 1100 lbs., is a pure gaited trotter and gives every promise of being the high class race horse that he is entitled to be by inheritance.

Mr. Glaser has fixed the service fee for this horse at $30 and owners of good mares now have a chance to secure some of the popular "Peter the Great" blood at excursion rates.

EARLY RACING IN CALIFORNIA

(Special Correspondence)

One of the most notable horses of the 60's was Geo. M. Patchen, Jr. He broke no records nor did he create any sensations but he was famous because of his sire Geo. M. Patchen, and his driver, J. L. Eoff, who was ever boasting of the wonderful time that Patchen could make.

Regarding the stallion the story is related that Wm. Hendrickson coming to California in 1853 left behind him a future bride. Mr. Hendrickson prospered, had a number of good horses, and returning to New Jersey in 1861, married the girl of his young manhood. While there he saw a trotting race between a horse called Emperor and Geo. M. Patchen, Jr. A young man named Bud Doble drove Patchen, winning both heats in 2:27 and 2:29 Mr. Hendrickson was so pleased with the square trotting section of Patchen and his rich dark brown color, as glossy as silk, that he bought the stallion and together with two other trotters, Shoo Fly and Don't Bother Me, and brought them to this state.

At this time Eoff had been handling the dark chestnut stallion, Kentucky Hunter, imported from New York in 1861, and driving him in his races.

Hendrickson, however, persuaded Eoff to take charge of Patchen and he drove him throughout his trotting record. Both stallions were famous throughout the state and as a drawing card the directors of the 1862 Stockton Fair offered a citizens' purse of $300 free for all stallions in the state to wagon. Patchen and Hunter were entered, Eoff driving the big stallion and J. H. Dewey, his owner, handling the little chestnut. The trotting rules at that time were very loosely construed and Hunter, who was a dandy breaker, never losing any ground, had been educated to break and run as far as the law allowed. There was considerable feeling between the two owners regarding the race and both of them purposed standing their horses the following season in Stockton. In the first heat Patchen led to the quarter then Dewey began his jockeying, and between trotting and running he landed Hunter first under the wire. Patchen made not a break. In the second heat even the crowd were disgusted and they yelled "see him run." The judges, however, gave Hunter the heat. Eoff then withdrew Patchen saying "that he was not trotting against a running horse." Hunter then trotted around the track alone he taking the three heats in 2:38, 2:38, 3:05.

Thomas E. Merry, who reported this race for the Spirit of the Times, declared it the best race to wagon ever seen in California, as the track was very soft and both horses traveling on the outside trotted at least thirty yards over the mile.

In March, 1865, Patchen was matched against H. L. Armstrong's imp. stallion Calhoun for $500 a side. The race took place over the Lousian track, Sacramento, Eoff was to drive Patchen but he failing to arrive from San Francisco, Hendrickson drove his horse two heats, L. G. Butler driving Calhoun. Hendrickson then put his stable boy behind Patchen and to the surprise of everybody he took the second and third heat. Butler now began jockeying and easily beat Patchen the fifth in 2:37½, 2:41, 2:37, 2:37½, 2:41.

The poor showing of Patchen caused Armstrong to bet $1000 that Patchen in three successive trials could not beat 2:37. The trial took place April 1, 1865. Eoff had the stallion in "the pink of condition," and he trotted three heats in 2:31, 2:27, 2:29½.

Patchen was taken east in the spring of 1866 to trot against Dexter, the full brother of Dictator. Dexter at the time being the coming rival of Flora Temple. The first race took place June 15 of that year, Dexter winning easily 2:29½, 2:28¾, 2:27½. Eoff then made a bluff of matching Patchen with George Wilkes who two days previous had beaten Lady Thorn in 2:27, 2:25, 2:25¾. A hippodrome tour was now arranged between Patchen and Dexter throughout the middle west and thousands witnessed their races. Patchen was returned to California in 1869 and became the sire of Sam Purdy, Vanderlyn and Alexander. He was owned in turn by W. J. Matthews, P. A. Finegan, later the owner of Santa Claus, and J. E. Haggin, on whose ranch he died in 1889.

First and foremost of the California-bred trotters was the little grey stallion named Captain Hanford, later called Paddy McGee. He was owned by John P. Shear, a mining man and named after his partner, Hanford. Some years later Shear had some trouble with Hanford and renamed the stallion Paddy McGee.

The game little trotter was sired by General Taylor, dam Peggy McGee. She was brought across the plains and is said to have had a record of 2:36. Hanford driven by Charley Shear, was entered in the races in 1864, then six years old and for eight years he was raced in mile and two-mile heats single and double harness, for all there was in him, sometimes two and three races a week.

In his first race at the State Fair, October 17, 1864, he took straight heats defeating the big brown stallion, Latham, and distancing Geo. M. Patchen in the first heat. The time was 2:36½, 2:37, 2:34¾. Patchen was the favorite by long odds and he sold in the pools for $70, Latham $40 and Hanford $25. Pool-selling was operated for the first time "and everybody was enraptured with the new method of speculation."

Hanford and Latham were the only two classy stallions in the state at that time and in the free-for-all stallion race at the fair of 1865, for a purse of $500, these two were the only entries. Latham named after the ex-United States Senator was an eastern importation, handled by J. L. Eoff, and Shear drove Hanford. Hanford took the first heat and trotted a dead heat with Latham, second heat, and he was distanced in the fourth heat by bad breaking. Hanford reduced his record by three seconds trotting the third heat in 2:33½. The full time was 2:34, 2:34, 2:33½, the record state heats. None of the trotters were reliable and later Latham beat Hanford and Bellfounder in the slow time of 2:34½. Hanford in 1866 defeated the California-bred Ben Franklin, and the imported Hiram Woodruff, and reduced his record to 2:33¼. Two days later May Queen took from him the crown lowering the records to 2:29, 2:29½, 2:31. The little stallion was driven until 1879 in the big races but he was outclassed and was later raced at the minor fairs.

The fair directors of 1868 gave a $300 purse for California-bred trotters under six years of age. There were but two entries, Moultrop by McCracken's David Hill and Regulator by Signal. Moultrop took the first two heats and Regulator the race, Jim distanced. There was nothing noticeable about the time except the fifth heat, which was great, 2:33¼. 2:41½, 2:32, 2:32¾, 2:35¾, 2:33¼. Signal, the sire of Regulator, was said to be the son of Wisconsin Chief. He paced over the Sacramento track September, 1858, in 2:29½, 2:29¾, 2:30, driven by a woman of the half-world, Mit Raymond, his owner.

The first California-bred mare of any notice was Alicia Mandeville, named after a famous concert singer of that day. Sired by Boston Boy, dam Peggy McGee, she was foaled in San Mateo county. In the three-year-old trot of 1863 she took the second heat in a race with D. C. Broderick and Young Chrysopolis. It was certainly slow time, 3:45, 3:07, 3:06. In her four-year-old form she won out from Jersey Maid in 2:37¼, 2:38, 2:43. It was the best four-year-old record of that day. The mare, although a half-sister to Hanford, was no comparison whatever with May Howard sired by Captain Hanford. We will notice her in the next decade.

In that decade 1869 to 1879 we find a brilliant company of pacers and trotters the equal of any on the eastern tracks. Among them we find the pacers Defiance Nimrod, Ben Butler and Lady Sinclair; the trotting mares May Howard and Lady Blanchard; the geldings Col. Lewis and Occident; the native-bred stallions Alexander and Sam Purdy and the imported stallions Santa Claus, Black Bird, Nutwood and Judge Fullerton.

The pacing racers at this time were very few in number and scarcely worthy of notice. There were but few fast pacers in the state and for a number of years no fair purses were offered for pacing races.

Dan Voorhies holds the pacing record we remember, he defeating Defiance in 2:20, 2:20, 2:20¾ and later he was expelled from the track for some infringement of rules by his owner.

The fair directors were now offering a purse for the 2:22 class of pacers and that year, 1874, Ben Butler took the first money and Lady Sinclair second, with Fisherman distanced in the first heat. The record was broken, the heats being paced in 2:21, 2:19¾, 2:21¾.

Two days later the crowd saw the fastest seven-heat race ever paced in California. It was for a purse of $750, free-for-all. Defiance and Jim Brown to wagon. Six great pacers faced the wire. They were Ben Butler by St. Clair, Longfellow, Van Voorhies by Geo. M. Patchen, Lady Sinclair by St. Clair, Nimrod by Missouri Chief and Fisherman. Ben Butler took the first and second heats. The third was a dead heat between Longfellow and Nimrod. Longfellow took the sixth heat and Nimrod the fourth, fifth and seventh. The time was 2:21, 2:20½, 2:20¾, 2:20, 2:24, 2:21½, 2:22½. It was the fastest seven heats for never again was it possible for horses to pace that number as horse owners declared in 1880 they would no longer enter their horses in such grilling contests. Lady Sinclair that year and month, September, 1874, made her name famous by pacing the world's five-mile record in 12:54¾.

GEORGE H. TINKHAM.

STARTING IN NEW ZEALAND

There is a great deal of controversy in New Zealand over the methods of starting races. According to the clock system horses are given a handicap by being allowed to start so many seconds before their faster competitors and according to the yard system they are handicapped by being allowed so many yards standing start.

Mr. Norman, who is one of the leading starting judges in New Zealand, favors the yard system claiming that horses will stand and start when they are properly educated excepting the small proportion who are bad actors under any system. He is emphatic as his experience has convinced him that the yard system is the best and fairest and more satisfactory than the clock. He looks forward to a time when it will be generally adopted by all of the clubs in the Dominion as they are one by one abandoning the clock, eleven clubs having adopted the yard system in preference to the clock within the last two years.

THE CHAMPION STALLIONS

(By W. H. Gocher)

The recent deaths of Lee Axworthy and St. Frisco recalls the names of the champion stallions which thrilled race goers by their splendid performances since Ethan Allen started the list at the Union Course on Long Island on October 28, 1858, sixty years ago, when he defeated George M. Patchen, who was handicapped to a wagon, in 2:23, to October 8, 1916, when Lee Axworthy trotted in 1:58¼ at Lexington, a reduction of 29¾ seconds in fifty-eight years.

All of the early champions made their records in races, Maxey Cobb being the first to secure the honors in a trip against the watch when in 1884 he trotted in 2:13¼ at Providence and clipped half a second off the record of 2:13¼ which Phallas made in the fourth heat of a race at Chicago earlier in the season. After that date Directum and The Harvester were the only champions to earn their honors in races.

Sixteen years elapsed between the date on which Ethan Allen won his first race at Plattsburgh, N. Y. in his three-year-old form, until he was finally retired from the turf at the close of 1867, when in his eighteenth year with running mate, he defeated Dexter in 2:15, which was 10½ seconds faster than he was ever able to trot to harness.

George M. Patchen, who was foaled in 1849, the same year as Ethan Allen and Hambletonion, was the next champion. He reached his limit on August 2, 1860, when he won a heat from Flora Temple in 2:23½, George M. Patchen was the best race horse of the Clay family. He won to harness, to saddle and to wagon, at one and two mile heats. Of his descendants, Lucy 2:18¼, and in the next generation Hopeful 2:14¾, who was before the public from 1873 to 1881, were the best, while the Village Farm trotters Belle Hamlin, Justina, Globe and Nettie King, the dam of The Abbott 2:03¼, each carried a cross of his blood.

Fearnaught, the third champion, was foaled in New Hampshire and made his record of 2:23¼ at Buffalo in 1868 when he defeated a field of seven, including American Girl and Myron Perry. Like Ethan Allen he was a member of the Morgan family and while a handsome horse, his racing qualities were not of a very high order.

George Wilkes and Jay Gould, the next two champions, were sons of Hambletonian. The first named was raced from 1865 to 1872, making his record of 2:22 at Providence in a race in which he defeated Rhode Island and Draco Prince on October 13, 1868, when he was twelve years old. In 1873 he was taken to Kentucky where between that date and his death in 1882 he founded the greatest family of racing trotters in the world. The male lines tracing to him are also the only ones that have continued to produce champions at an increased rate of speed at each remove. The honor roll shows that his sons William L. and Jay Bird sired by Axtell and Allerton, the former reaching his limit as a three-year-old. Axtell also continued the line through Axworthy and his son Guy Axworthy to Lee Axworthy, the first stallion to enter the two minute list. In Guy Axworthy, the blood of the brothers, William L. and Guy Wilkes, are blended. They inherited the Golden Wilkes Mambrino cross on a foundation of Seely's American Star, whose daughters were in the early days represented on the turf by Dexter, Nettie and Jay Gould. The latter also succeeded George Wilkes in the list of champions, his record of 2:21½ being made at Buffalo in a third heat with William H., Allen and Huntress in the field. Jay Gould's memory was also kept green by the brilliant performances of Pixley 2:08¼, and Robert J. 2:01½, long after he died in obscurity.

Smuggler, the sixth champion, was a converted pacer. He owed his place in turf history to Charles Marvin. During his career Smuggles cut the stallion record from 2:20¾, where he placed it at Buffalo on August 5, 1874, in the $10,000 stallion race that was won by Thomas Jefferson, to 2:15¼ at Hartford in 1876. Mambrino Gift was the only rival for the honors in the interval. On August 13, 1874, the son of Waterwitch won a race at Rochester, N. Y. in 2:20 but he only retained the honors for a month as Smuggler equalled it in the stallion race in which he defeated him at Boston.

Eight years elapsed before another change was made, Phallas earning the honors in a race in 1884, only to lose it a few weeks later to Maxey Cobb. He had his revenge, however, the following year when he defeated the showy son of Happy Medium in a match race at Cleveland.

Axtell, the next leader, was the wonder horse of his day. Bred and developed by C. W. Williams, this horse in one brief season made him the most talked of man in America. As a two-year-old, Axtell trotted in 2:23, but few paid any attention to him as his performance was overshadowed by the record of Wildflower and its reduction that season by Sunol. The clouds were lifted, however, in 1889, when as a three-year-old he followed his mile in 2:15½ at Minneapolis in July with one in 2:14¾ at Cleveland, another in 2:14 in a race at Chicago, and finally reached 2:12 at Terre Haute, where he was purchased by W. P. Ijams, John W. Conley and F. T. Moran for $105,000 and earned $70,000 in stud fees the following year.

No one ever dreamed of anything like this or supposed that the next champion would come from Maine, the birthplace of Nelson. In some respects

he was the most remarkable performer ever foaled. From birth Nelson was a trotter and notwithstanding the handicap imposed on him by the manner in which he was trained and raced, he reduced the stallion record from 2:12 to 2:10¾, while he afterwards equalled the 2:10 of Allerton, when the resolute son of Jay Bird entered the list as a champion and continued until he reduced the mark to 2:09¼. The match between this pair at Grand Rapids on October 8, 1891, also brought out more people than were ever seen at a horse race in Michigan.

Nelson was called the Northern King and he was certainly entitled to honor as in form, gait and poise, either when in motion or standing, he was a superhorse. Still he failed to reproduce himself in the stud while Allerton became a splendid sire.

When Allerton reached the limit of his speed, he had another rival in the half-bred trotter, Palo Alto, whose mile in 2:08¾ over the kite shaped track at Stockton, Cal., on November 17, 1891, made him the champion. Death closed his career the following year, while Kremlin and Stamboul were preparing for the lead. Kremlin trotted in 2:07¾ at Nashville, Tenn., while Stamboul's mark of 2:07½ at Stockton was rejected, although it did not keep E. H. Harriman from paying $41,000 for him when he passed under the hammer in New York.

Another California leader also appeared upon the scene in 1893 in Directum. No one could question his title as after reducing the stallion record twice in trips against time, this gallant four-year-old won the third heat of a race at Nashville in 2:05¼. He was the best trotter of his year and remained the champion until 1900 when Cresoeus trotted Charter Oak Park in 2:04¾. The following year the sturdy son of Robert McGregor gradually moved the limit to 2:02¼, where it remained until The Harvester won a heat at Fort Erie on August 17, 1910, in 2:02. This also proved his greatest effort in a contest although later in the year he made a time record of 2:01 at Columbus. This restored the leadership to the Electioncer family and it remained there until 1916 when Lee Axworthy, an inbred Wilkes, was started on his record-breaking series, which culminated in a mile in 1:58¼.

PASSING OF THE HALS

(By W. H. Gocher)

The Hal family can be traced for a century in horse history. The tap root was a Canadian pacer that was purchased in Philadelphia about 1820 and taken to Lexington, Ky. He remained in that vicinity until he died in 1842. This horse was known as Shropshire's Tom Hal. He got Lail's Tom Hal or Bald Stockings, the sire of Kittrell's Tom Hal, which was taken in 1850 to Tennessee, where he died near Pulaski in 1863, after being seized by federal troops. This horse got Gibson's Tom Hal, the first sire of racing speed in the family, his name being introduced to the pages of turf history in 1881 by Little Brown Jug, when he reduced the world's record for pacers to 2:11¾ at Hartford, Conn. From that date to the present, the Hals have been recognized as one of the leading families of racing pacers, that came back regularly each year and won in the fastest company. But now after a reign of thirty-eight years, the honors are passing to others, as only three or four old stallions remain to represent the breed and no young ones are coming on to take the place of those who added so many turf honors to the annals of Tennessee.

The success of Little Brown Jug prompted Major Campbell Brown to purchase his brother Brown Hal. He also placed him at the head of his stock farm near Spring Hill, Tenn., after Brown Hal acquired the world's record for pacing stallions. The showing of these two horses and that of Hal Pointer, which Geers brought north in 1889, made the Hal family famous and sent buyers scurrying to Tennessee for racing material. They were fortunate in finding Hal Braden 2:07¼, Star Pointer 1:59¼, Hal Dillard 2:04¾, Storm 2:08½, and Hal Chaffin 2:05¼. All of them proved formidable race horses, while Star Pointer was the first horse to beat two minutes to harness. None of their careers, however, equalled that of Hal Pointer, which Geers pronounced the greatest race horse he ever drove. He also went still further and stated that no horse ever lived possessed more racing sense, gameness and endurance.

Hal Pointer reduced the world's record for pacers to 2:04¼, while in five campaigns he was started in forty-one races, of which he won thirty-three, was second in five, fourth in one, and unplaced in two. Flying Jib, Guy, Mascot, Johnson, Direct and Chapman were the only horses that defeated him from 1888 to 1893 inclusive, while in turn he defeated each of them in a number of spirited contests.

The second generation of the Hals were represented on the turf by Hal Braden, Star Pointer, Hal Dillard, Storm, Hal Chaffin, New Richmond and Argot Hal. They were followed in the next remove by Sidney Pointer 2:07¼, a son of Star Pointer, and the Hal Dillard pair, Hal B. 2:04¼ and Fanny Dillard 2:03¾, the first high class race mares in the Hal family. Hal B came down the line in 1899, when he won nine out of eleven races, his only defeats being at Lexington where he finished second to Eyelet and at Louisville, where he stood third to Arlington.

The leading sires in the third remove from Gibson's Tom Hal are Sidney Pointer and Hal B., both of which are now well along in years, while to date neither of them has a son that has been represented on the turf by any first class racing material. Sidney Pointer is remembered as the sire of Angus Pointer, a horse that in many respects is a formidable rival of Hal Pointer. In 1906 and 1907, he won eighteen out of twenty-three races, while in the other five he was second in four and fourth in one. Ecstatic, Bolivar and Baron Grattan are the only horses that finished in front of him in these two campaigns, which he closed with a record of 2:01¾ made at Syracuse when he defeated Argot Boy and Baron Grattan.

Wherever he was located, Hal B. proved a uniform sire of speed. His itinerary took him from Ohio to Ontario, then to Oregon and back to Ohio. The returns to the close of 1918 also show that he is the sire of seventy-five performers with Hal Boy 2:01, at the top of the list.

Until the fourth generation was reached, the Hals proved a male line racing family, the only exceptions of note being Fanny Dillard, 2:03¾, and Zulu Hal 2:03¼, both of which were got by Hal Dillard. Bessie Hal and Tom Hal also showed a fast mile for Geers. She went lame, however, and was bred to Direct, the mating resulting in the unbeaten pacer Direct Hal 2:04¼, that made a sweep through the Grand Circuit in 1902.

In the matter of getting mares that raced fast, Hal B. has proved the exception in the Hal family, his list presenting the names of such well known performers as Hal Raven 2:03¾, Lady Hal 2:05¼, Hal Edo, 2:06¼, Hallie Loo 2:07¼, Vera B. 2:07¼, and Daisy D. 2:07½.

It is with regret that the passing of this splendid family of racing pacers, which did so much to popularize Tennessee horses, becomes a matter of record. As sires, however, they have been rejected for trotting bred horses, which give the breeders a chance to get a Futurity winner like Etawah or a pacer like John R. Gentry or Joe Patchen, if the by-product should take to that gait.

ANTE GUY 2:03½

On public form, Ante Guy is a candidate for two minute honors on the trotting turf in 1919. She made her debut as a two-year-old when after forcing The Real Lady out in 2:08¾, she came on last season in her four-year-old form and won in 203¼, her separate time for the last half of the mile being 59¼ seconds. Should Ante Guy be so fortunate as to become the fifth member of the two-minute list of trotters, she will also be the first representative from Kentucky, as of the others Uhlan was bred in Massachusetts, Lee Axworthy in New Jersey, Lou Dillon in California, and Major Delmar in New York. In addition to being a high class race mare, Ante Guy is also one of the best bred trotters that ever appeared on the turf. She was got by Guy Axworthy, 2:08¾, one of the best four-year-olds of his day and one that also is the sire of Lee Axworthy 1:58¼, while her dam Anteash has six crosses of standard trotting blood, which makes her practically a thoroughbred trotter. She was got by Ashland Wilkes, the sire of John R. Gentry 2:00¼, out of Eoline 2:14¼, a filly by Anteeo that in her three-year-old form defeated Oro Wilkes, the first Kentucky Futurity winner. From Eoline the line of inheritance runs through Myriad 2:28½, whose sire Stranger was a son of Goldsmith Maid 2:14, while her dam Myra was by General Knox out of Sappho, the dam of Patience 2:28¾. Sappho was in turn got by the champion stallion Jay Gould out of Le Blonde, the daughter of Ethan Allen that Dan Mace won with in 2:34¼ at Boston in 1870, while back of this there is a strain of Abdallah, the sire of Hambletonian.

Ante Guy first attracted the attention of the public at Monroe, N. Y., in 1916, when Frank Phillips won with her over the half-mile track in 2:17¼. The following week at Goshen she forced Emma McGowan out in 2:13½ and was taken from there to Poughkeepsie, where she made The Real Lady trot in 2:08¾ to win. After winning in 2:13½ at Syracuse during the New York State Fair, Ante Guy was laid away until last season when she made a trip through the Grand Circuit in Murhpy's stable. Her first start was made at North Randall, where she was unplaced to Binland in 2:05¾. Also after being unplaced to Heir Reaper at Kalamazoo, she was started in two races at Toledo, winning both of them and acquiring a win race of 2:05¾. She also won again at Columbus, where she defeated Del Jolla and Tacita after a five-heat contest. A second to Alma Forbes at the North Randall August meeting and a third to June Red at Philadelphia preceded a lay up until the horses reached Syracuse in September, where she finished second to Prince Loree in the $10,000 Empire State Purse. She also finished second to Prince Loree in the Columbus $10,000 but balanced her account with the Prince McKinney gelding by defeating him in the Buckeye Purse during the second week at Columbus and also in the Walnut Hall Cup at Lexington, where she won in 2:03¼. Her last starts in 1918 were made at Atlanta, where she had two races placed to her credit, making her score for the season seven firsts, three seconds, and one third out of thirteen starts.

HARNESS RACING IN NEW ZEALAND

In spite of wartime restrictions, trotting has flourished exceedingly in the Dominion during the past twelve months, and now that hostilities have ceased, the clubs are looking forward to the re-establishment of the sport on its pre-war basis. The reduction in the number of days of racing by one-third has meant a considerable hardship to some of the clubs, and also to owners whose opportunities for competition have been restricted, in addition to which the increasing cost of transportation charges, feed, harness, and other necessaries have left little margin of profit even after races have been won. The past year has found the sport maintaining a very high standard, and when conditions become normal again we may expect to find trotting making very rapid strides. Some of the clubs have found themselves able to increase their stakes in a substantial manner, and their example will no doubt be followed by the other clubs that have done well in keeping the prize money up to the existing standard. The sport is growing in popularity from season to season, so that these increases are bound to come, and there will then be very substantial inducements offered for the breeding of high-class horses. The racing performances of the past year have shown that speed is being developed in very marked degree by New Zealand horses, and all things considered, we are not so very far behind the American standard. A new mile record of 2 min. 6 1-5th sec. was established by Our Thorpe in September last, but it would not be surprising to find this time lowered before long. When he won the New Zealand Trotting Cup in November, Author Dillon established a fresh record for that event, the time for which during the past fourteen years shows very plainly how the pace has improved.—New Zealand Referee.

POLO IN CALIFORNIA

Polo, the thrilling sport which originated in India hundreds of years ago, has been ushered into California for what promises to be the most active season ever enjoyed by the mallet wielders and their followers. The game is undergoing a marked revival, after its lapse during the war.

Practically all of the Pacific Coast poloists entered some branch of the government to do war work or serve at the front and it was only natural that the game suffered. Now the players are returning with war honors on their chest and they are directing their attention once again to their favorite pastime.

A new polo point will be added this year with the expected arrival this month of G. Maurice Heckscher, the enthusiastic Meadow Brook Club member from Long Island. Mr. Heckscher recently purchased the $500,000 Hope ranch at Santa Barbara and he intends to foster polo stock breeding, in addition to having a field where matches and tournaments will be staged.

Del Monte, as usual, will be the center of polo activity. With two regulation polo fields, matches are held every week-end and plans are already under way for promoting banner tournaments this summer. A feature will be provided in the entry of a team from Mexico City, another from Honolulu and several from Eastern points, besides the customary entries from Pacific Coast towns. G. Maurice Heckscher has already shipped fourteen ponies here and he will bring out a team of Eastern players, which will include C. Perry Beadleston of the Coopertown team of New York.

Polo is to be boomed in Southern California with the series of tournaments and matches. San Mateo and Burlingame are planning to improve and enlarge their fields and in another month or so the sport will be booming in California.

THAT WEIGHT QUESTION

Anchor—A heavy iron to hold a ship or other vessel—Webster. By all means let us have a weight rule, and have it high enough, not less than 200 pounds, the higher the better. Just think what a reducer a nice chunk of lead would be in the arms of a fat man lugging it around each day in search of the official weigher! Something very fascinating about that, isn't there? Also it would add to the amusement of the crowd, and, of course, speed to the horses. Since we want to promote speed, we might suggest our artful sulky manufacturers put on a little more iron, say 50 pounds, and the harness makers might do their bit as well. Arm and saddle numbers might be made of lead, 10 pounds each. The war is over and lead and iron are more plentiful.

Seriously now, what is the ideal weight for driver for the average horse and sulky of this day, horse to be properly hitched, and sulky balanced, according to weight of driver, driver to be considered as live weight, which he can shift, or use, as we often see our best drivers do when making one of those wonderful finishes for which they are noted. In this strenuous game, what advantage has the 135-pound man over the 165-pound man, under the above conditions? Which class holds the most world's records, the under weight or the above standard weight men? I think the under-weight man is handicapped enough, without compelling him to pack around a chunk of lead, reminding him of his shortcoming every day.—Abie, in Horse Review.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Sportsmen's Row

The New York State Shoot will take place at Travers Island this year, beginning April 26 and concluding May 1. The New York Athletic Club's annual shoot will begin May 2 and conclude May 4—giving a nine day's shooting program, the longest held in the United States in years.

The Atlantic City Tropshooting School has been so successful that it is a wonder more schools of the same nature have not been started.

Trapshooting clubs in every city should make it their business to interest the members of the Park Commission in setting aside a place for trapshooting. It is more essential to have traps in the parks than it is golf links, tennis courts and baseball diamonds, for one needs to know how to shoot in order to be of aid to his country in time of need. Shooters are the backbone of the nation.

Four thousand eight hundred and twelve deer were killed during the brief hunting season in Connecticut, Pennsylvania, Maine and Massachusetts.

In connection with its administration of the Migratory Bird Treaty Act and other work in game conservation, the Biological Survey desires to secure information concerning every hunting club or other organization whose object is the hunting or conservation of game of any kind. It wants the names of the officers, the location of their hunting ground if they possess property of this kind, and the number of members of the organization. The postoffice address of the secretary is particularly desired. Letters should be addressed to Chief, Bureau of Biological Survey, Department of Agriculture, Washington, D. C.

The Maywood Bird Club of Illinois has issued a splendid illustrated poster showing graphically the destructiveness of cats to song birds. Through the efforts of the club Maywood has now a cat license ordinance that should obtain in every village and city throughout the country. These posters can be had by addressing Mr. Roy M. Langdon, secretary of the club, at cost price, by similar organizations throughout the country.

"Roderigo Gladerigo," owned by Len Hawxhurst of San Francisco, won the membership stake of the thirty-sixth annual meet of the Pacific Coast Field Trials Clubs, which was held at the Country Club, Point Reyes, Jan. 17th. Alexander Hamilton's "Judge" was runner up. The judges were Fred E. Butler, Henry S. Bettens and Phil M. Wand.

It is worthy of comment that to the Du Pont Company, whose powder destroyed British supremacy on America's great inland seas in 1813, has been given credit by the British Government for saving that same Empire during the dire days of 1914-1915.

At the first shoot on the Olympic Club's new Lakeside trapshooting grounds which was held on Sunday, the 2nd, Mrs. Alfred G. Wilkes set a new coast record for women by breaking 92 out of a possible 100. At the same shoot Mr. Wilkes broke 97 out of a 100, and G. E. Stoll 92. Clarence A. Haight made the longest run which was 64 straight. O. N. Ford, under whose supervision the Olympic Club grounds were constructed and the traps installed, has been the recipient of many compliments on the success of his achievements. Trapshooting under Mr. Ford's direction is bound to become a very popular diversion with the members of the Olympic Club.

The number of butcherbirds that has infested the fastnesses of Sutro Forest, adjoining Golden Gate Park, in San Francisco, this winter, is greater than ever before and small song birds have suffered in consequence, not only wrens and wild canaries but tame canaries as well. When the butcherbird catches sight of a canary in a cage hung on some porch or window he swoops noiselessly down, thrusts his talons and hooked bill through the bars and pulls the luckless bird from its domicile and flies swiftly away. The butcherbird is a kind of first cousin to the hawk, about one-quarter its size and possesses a predatory bill and unbounded rapacity, and appears to kill for the mere pleasure of killing.

There should be more competition at doubles targets. This is real shooting, yet the only competition last year was the event for the National Championship.

Two Irishmen decided that they would enjoy a bit of sport on the occasion of the "opening of the quail season." They were provided with tremendous game bags, and, as it was their first experience, they were very enthusiastic.

Suddenly Callahan spotted a bird and, taking very careful aim, prepared to fire the fatal shot. But Casey seized him by the arm, crying frantically:

"Don't fire, Callahan, don't fire! Ye've forgotten to load your gun.

Van Campen Hellner, associate editor of "Field and Stream," has changed his outing place plans, and instead of going to Florida left for California. He and Zane Grey are going out for swordfish from Catalina Island this summer, and may go to Honolulu to try the tuna and other fishing there.

A series of trapshooting features will be staged at Del Monte this season, according to plans being discussed. It has been proposed to hold a team shoot here between the Olympic Club and the Golden Gate Club, two live gun organizations of San Francisco. An effort will also be made to interest visiting shooters from Southern California and the Pacific Northwest. Del Monte has a very desirable trapshooting grounds by the race track and polo field with two good traps ready to fly the clay birds into the air.

H. R. Eberding, an out-of-town member of the Olympic Club and a famous sportsman of the Northwest, has presented the club with a magnificent gold watch to be shot for at the trapshooting events during the season.

Two thousand three hunderd fifty four shooters won one trophy and 2934 shooters won the 3836 trophies distributed by the American Trapshooting Association in the registered tournament in 1918.

The Vernon Gun Club gives a registered tournament June 6, 7 and 8. Also a later registered tournament October 4, 5 and 6. Three hundred dollars cash and two hundred dollars in trophies will be added at each shoot.

VERNON GUN CLUB'S OPENING 1919 SHOOT

High scores, due to weather conditions, were not the order of the day for the opening shoot of the season of the Vernon Gun Club at Los Angeles Feb. 9th. Being cloudy and dark; it was difficult to mark the flight of the targets. The season trophy event was won by Halohan, who was high with 47x56, Fish being high with 86x100 in the Everding event and also in the Club Cup event with 43x50. This gives him two legs on the Club Cup. The following are the scores:

Name—	Hdp.	Season Trophies 50 Targets	Club Take Home Tro. 50 Targets
Rossback	19	38	42
Dodd	20	38	38
Tuttle	18	40	40
Bruner, A. W.	16	41	42
White	20	41	38
Halohan	20	47	39
Fish	20	43	43
Wilshire	17	42	41
Bruner, S. A.	20	42	42
Groat	19	17	....
Mrs. Groat	19	17	....
Evans	19	42	41
Pugh	18	35	44
Booth	16	19	....
Dierdoff	18	45	36
Nichols	16	20	....
Cornical	16	11	....

Trout	18	46x50
Fisk	18	47x50

NORTHWESTERN TRAPSHOOTING SEASON

From present indications the 1919 trapshooting season is going to be the greatest in the history of the sport in the Northwest. There will be more added money in the registered events and in consequence a greater attendance is expected.

Following are some of the big tourneys of the Northwest and the dates upon which they will be held:

Oregon State Championship, Pendleton, May 4, 5 and 6.

Inland Empire Championship, Spokane, May 18, 19 and 20.

Washington State Championship, Yakima, May 30 and 31 and June 1.

Northwest Tournament, Portland, June 21, 22, 23 and 24 (tentative).

Pacific Indians, Crescent Lake, Wash., first week in September.

In addition to these shootfests there will be the annual tournament of the Lewiston, Ida., Gun Club, the registered tourneys of the Seattle Trapshooters' Association and the annual fall tourney of the Portland Gun Club.

An effort is being made to arrange the Northwest dates so that Eastern trapshooters can attend all the big shoots, ending with the Portland event, which gives every indication of being the greatest event of its kind ever staged in the Northwest.

One of the features planned for the Northwest shoot is a return match between Frank M. Troeh, of Vancouver, Wash., high average amateur of the United States last year, and William H. Heer, of Guthrie, Okla., holder of the National Amateur Championship. Officials of the Portland Gun Club are working out the details of the match and will make their announcement shortly.

Portland trapshooters plan to add $1200 in cash to the program—the largest amount ever added to a program in the Northwest, which, with the trophies, valued at $1000, will make it the richest tournament ever staged on the Pacific coast.

The directors of the club have not definitely decided upon the dates of the shoot. Final action is being withheld, until it is decided whether or not a Rose Festival will be staged.

The Oregon State Championship shoot will be staged in the Eastern part of the State for the first time since the organization of the State Association and the officials of the Pendleton Gun Club are leaving no stone unturned to make the tourney one that will be remembered. Over $1000 will be added to the program, in addition to the American Trapshooters' Association trophies, the Multnomah medal and the Charles Leith trophy for the State doubles championship.

Yakima sportsmen are endeavoring to outdo the other Washington clubs in staging the championship tourney of that State.

The place and date of the Pacific Indians shoot has not been officially selected, but a large number of members of that organization favor staking the event at Crescent Lake, where the 1918 tourney was held.

WHAT FRANK TROEH DID IN 1918

Traveled 27,000 miles.
Shot in 15 cities, 11 states, and in two Canadian cities.
Won high average crown. He broke 6655 of 6845 registered targets—an average of .9722.
Won Singles Championship of Washington.
Won Doubles Championship of United States.
Won Doubles Championship of Canada.
Won International Doubles Championship.
Won all-around amateur and open championship of United States.
Tied for International Singles Championship.
Made 49 runs better than 50, of which 15 were better than 100.

Troeh was second in the averages to Harry Lorenson of Newman, Cal., when he went to San Jose, Cal., to shoot in September. When the shoot concluded, Troeh was leading and Lorenson second, for Troeh missed only nine targets in 350 and Lorenson dropped 16.

In an effort to compile an average to last for a long time, Troeh went to Los Angeles for the concluding registered shoot of the year. On the first four hundred targets he missed but three. Beginning the third day's shooting, Troeh's famous gun broke down and he had to rig up one with the old barrel and stock, and another breech block. He missed seven targets in the last 200.

There is an interesting bit of history connected with the gun that has helped Troeh make trapshooting history. He went into a Portland, Ore., sporting goods store in 1911 and asked for a gun for duck shooting purposes. He went away with a second-hand shotgun which set him back $19.

Troeh took up trapshooting in 1912, and never once until the gun broke down in Los Angeles did he ever use anything but the old gun purchased to bring down ducks.

Those who have tried the gun swear that no one else could shoot it but Troeh. Everyone is agreed that Troeh could handle the gun. His scores and average of six years attest this.

THE GAME BIRDS OF CALIFORNIA

The Game Birds of California (Contribution from the University of California Museum of Vertebrate Zoology). By Joseph Grinnell, Harold Child Bryant, and Tracy Irwin Storer: University of California Press, Berkeley, 1918. Large 8vo, pp. x-642, 16 colored pls., 94 figs. in text. Cloth, $6 net.

The volume of the above title is the comprehensive book on the game birds of California that sportsmen, nature lovers, and serious students of bird-life have long needed. The book aims to supply the naturalist with complete information to date regarding the life histories of California birds, to give the hunter useful facts concerning the birds he wishes to shoot, to furnish the legislator with helpful suggestions relevant to the preparation of game laws, and to give the conservationist information which will aid him in his efforts to perpetuate bird life. The authors took into account all four of these classes of readers and selected and arranged their material accordingly.

Every one of the 108 native game birds of the state is described in detail, these including the ducks, geese, swans, ibises, cranes, rails, snipe, sandpipers, curlew, plover, quail, grouse, pigeons and doves. The localities in which each is found, and the times of the year when it is found, are designated and its life history and habits are accurately described.

Introductory chapters are devoted to general subjects, as follows: Decrease of Game and its Causes; Natural Enemies of Game Birds; The Gun Club in California; History of Attempts to Introduce Non-native Game Birds; The Propagation of Game Birds; Legislation Relating to Game Birds in California. The sportsman and nature lover will find much of immediate utility in these general chapters.

The technical matter useful to the special student of birds is found condensed in small type at the head of each discussion. This makes reference to the finer characters of each species easy, and at the same time segregates this formal matter from the more readable text following.

The plan of treatment of each bird follows a regular sequence: Technical portion (in small type): Accepted common and scientific names; other names; description: adult male, adult female, juvenile, downy young; marks for field.

"The Game Birds of California" is well illustrated with line drawings and colored plates. Thirteen of the sixteen colored plates were made by the well-known artist, Louis Agassiz Fuertes, and the other three by Major Allan Brooks, now of the Canadian Army. In all, twenty-one different game birds are figured in colors. The 24 line drawings serve largely to illustrate characters of plumage, bill or feet, such as are especially helpful in identifying the different kinds of game birds.

All through the book especial attention is given to those distinctive characters of a bird that help to make it recognizable from other species when alive, at a distance. A useful field manual is thereby provided. A dependable key to the various species makes possible the identification of any specimen in hand. The index contains all the common as well as the scientific names, thus making it easy to locate any bird, provided some name is known, even though this name be a very local, popular one.

Every school and library in the western states should contain a copy of this work for reference use. For more and more is the natural history of bird life assuming importance as a subject of general popular culture. Individuals interested in the fascinating field treated in this work should waste no time in securing copies.

NOVEL DUCK DECOYS

Ben Woolner, a former city attorney of Oakland, loves to hunt ducks. He has a phonograph dictating machine in his office and his inventive genius prompted him to get a live duck and have it squawk in the transmitter and make a record of its remarks, then with his shotgun and the phonograph he repaired to the Suisun marshes several days before the closing of the duck season. After getting nicely located in his blind with the duck record on his machine he commenced to grind out the squawks and ducks began to mobilize from all points of the compass greatly to Woolner's delight. It only took him about 15 minutes to get the limit and he calls his new device the "duckwerfer" and claims it has a range of about 1000 yards.

Dr. Clyde S. Paine, the well known capitalist, apartment house builder, orange grower and shotgun expert, is also an inventive genius. Some years ago he devised a sneak boat that was to be equipped with mirrors all around the sides in such a manner that it would be invisible on the surface of the water at a distance. A raft of ducks on the still waters of the bay or in the sloughs would see themselves reflected in the mirror and would be deceived into thinking it was a friendly party swimming towards them, their reflected images acting as decoys. If this thing keeps up it looks as if the Game Commission would have to make some special legislation to suppress such inventive talent in case they want to conserve the ducks.

DUPONT NATIONAL CROW SHOOT

The purpose of the National Crow Shoot instigated and given by the Dupont Powder Company is to wage war against these pests in the interest of the conservation of grain, the promotion of agriculture generally and the protection of game and insectivorous birds. Anybody who can shoulder a gun is invited to take an active part in this 1919 National Crow Shoot.

It is generally recognized that the crow is not only an arch enemy of the farmers, but also a serious menace to the breeding and production of game. The crow's record is like his coat, as black as black can be.

A young crow while in the nest will consume an amount of food equal to three or four times its own weight, and only a small part of this food consists of insects. Most of it is made up of the eggs and the young of other birds which, if left alive, would be of benefit in the protection of crops.

Insatiable egg eaters, they scour the fields, hedgerows, thickets and orchards for nests of birds and even for the eggs of the barnyard fowls. They follow the wild ducks to their nesting grounds in the Far North to feast on the eggs and young. Prairie chickens suffer severely from their depredations and the pheasant preserves are the frequent victims of their marauding habits.

Agriculturists affirm that crows are also very destructive to growing crops, especially corn, melons, etc.

Crows are about as omniverous as anything could well be. They eat all kinds of carrion and are dreaded agents in the spreading of diseases, such as hoof and mouth disease, hog cholera, glanders, etc.

In its Bulletin No. 621, the Bureau of Biological Survey says: "The destruction of nestling birds of highly beneficial species is not to be condoned and constitutes one of the strongest arguments against the crow. On game farms, preserves and in suburban districts where it is the desire to foster small birds, the crow population must be kept within limited numbers.

The crow has the universal reputation of being a wise, wily and wary bird. Yet it is surprising how easily they are fooled by anyone who can properly manipulate a crow call. Indeed, the calling-in and shooting of crows by an expert is a revelation to many, who, all their lives, have known and hated these black marauders of the fields and woods. The crow call is a small wood instrument resembling a whistle and can be purchased from almost any sporting goods dealer or hardware store for from 75 c to $1.00. There are several good crow calls on the market. If any shooter or dealer is unable to buy them conveniently, we shall be glad to put him in touch with a source of supply. Directions for its use come with each call.

Preparatory to calling in the crows, the shooter should conceal himself carefully and remain as quiet as possible, for the crow has wonderful eyesight. Many crow hunters even try to wear clothing that will not contrast sharply with the environment. In using the crow call it is desirable to try to imitate the cry of a young crow in distress and to indicate to the older crows that their young are being attacked by some other bird, upon which they will immediately start flying toward the point where the caller is concealed. It is important to kill the first crow shot at as otherwise the crow will give a warning call that will alarm all the other crows in the neighborhood and they will not approach again for some time at least. The birds should be fairly close in, not over 35 or 40 yards, in order to insure a kill with a choke bore gun.

Among other methods suggested for luring the crows within range the following may be recommended: A stuffed owl with movable wings placed up in a tree and operated by cords brought down through rings to the concealed shooter, used in conjunction with a crow call, has proved effective in many instances. If a wounded crow is captured it will serve as an excellent decoy for attracting other crows.

"Any old load will kill a crow," say the sportsmen—and it is almost literally true. The following are the loads preferred by several very experienced crow shooters:

For a 12-gauge gun: 3¼ drams of Dupont or 26 grains of Ballistite, with 1⅛ oz. of No. 5 or No. 6.

For a 16-gauge gun: 2¾ drams of Dupont with ⅞ oz. of No. 6.

For a 20-gauge gun: 2¼ drams of Dupont, with ⅞ oz. of No. 7.

In view of the fact that conservation is the purpose of this war against the crow, the trophies offered in this contest do not represent any great monetary value. No incentive at all is really needed to get farmers and sportsmen to kill as many of these destructive pests as possible—and besides it is the spirit of competition rather than the value of the prizes that makes for a successful contest, particularly when results are helping Uncle Sam feed not only this country, but also many of the nations of Europe.

To every contestant in the National Crow Shoot who during 1919 shoots twenty-five (25) crows will be awarded a triangular bronze lapel button.

To the two bronze winners in each state (or province in Canada) who shoot the largest number of crows during 1919 will be awarded, respectively, the following trophies, each to be engraved with the total number of crows shot by the contestant:

First State Prize—Gold Trophy Button.

Second State Prize—Silver Trophy Button.

To the three gold trophy winners who shoot the largest number of crows during 1919 will be awarded, respectively, the following trophies, each to be appropriately engraved:

First National Prize—Gold Trophy Cup.

Second National Prize—Silver Trophy Cup.

Third National Prize—Bronze Trophy Cup.

Conditions of the Contest

1. Anyone in the United States or Canada is eligible to take part in the National Crow Shoot.

2. The National Crow Shoot will be conducted to conform strictly to the Federal and State game laws and nothing contained in our offer is to be construed as urging anyone to violate any game law. Each individual should inform himself with regard to his local game laws before taking part in this contest.

3. To receive credit in the contest, crows must be killed with a shotgun or rifle.

4. Evidence of crows shot is to be furnished by the contestant in the form of a signed statement, countersigned by an ammunition dealer, upon forms furnished for the purpose. It is expected that the contestant will furnish the dealer with evidence of his kills in the form of the bills or feet of the crows shot. The statement forms will be supplied to dealers and contestants upon request.

5. The contest will be open from January 1 to December 31, 1919.

LORENSON'S THREE REASONS

The longest run of the 1918 trap-shooting season was made by Harry G. Lorenson, of Newman, Cal. He broke 345 targets in succession at a shoot in Los Angeles. Once only has the feat been bettered. Sportsmen in general are always interested in those who do things exceptionally well, so we asked Lorenson to tell us something about his success and how it was achieved. Here is his reply:

There are just three reasons for my success—and they are by no means secrets.

The first one is that I have not changed my gun 1.100th part of an inch since I started to shoot it well. I have made some satisfactory scores; also some poor ones, but I never blame my misses on the gun.

The second is that I always use my single-barrel trapgun in the field and marshes. Consequently, I never have occasion to hold any other gun in my hands. The result is it seems to fit just right every time it goes to my shoulder. I was told by other shooters that I soon would give that up, but stuck to it, although I will admit it was hard to do after having shot a pump gun.

My third reason is perfect concentration. When at the traps, I never can tell, without looking at the bulletin board after finishing an event, what any other shooter in my squad has done, even if my real competitor happens to be a squad-mate. My mind always is centered on what I am doing—and I never lose targets worrying about the other fellow.

CONVICTED UNDER FEDERAL MIGRATORY BIRD TREATY ACT

The second conviction under the Federal Migratory Bird Treaty Act of one Phil Levy, charged with having egret plumes in his possession, is a notable one, in view of the fact that the trial was held before United States District Judge Trieber. He, it will be remembered, is the judge before whom the Shauver case was brought, the famous case which went before the United States Supreme Court to test the constitutionality of the original Weeks-McLean law. Extended comment is unnecessary.

ALL SHOOTS TO BE FOR TROPHIES

Thos. Wilkes, president of the California-Nevada Trapshooting Association, has announced that at a meeting of the governing body of the Association held at Fresno on the 8th inst., it was the decision of the directors that hereafter all money prizes will be eliminated from the future shoots of that trapshooting organization and that the sport of trapshooting in these two western states will be put strictly on an aamteur basis. This decision follows a two year old fight to place trapshooting on the same basis with ther amateur sports as regards prizes. It is believed that the elimination of money prizes will do much towards the advancement of the sport that it will place it on a higher plane and greatly increase the general interest in it, and that the substitution of trophies in all instances will be popular with the best element and the public generally.

The new rule will go into effect on the first session of the shoot of the year under the Association rules, which takes place at Visalia on the last week in April. The California-Nevada Trapshooting Association will take charge of the management in the state events which previously were under the management of the shooting clubs. President Wilkes, Secretary Clarence Haight, Orval Overall, G. H. Anderson and Frank Stall were present at the meeting. The dates of the second shoot have not yet been determined, but it is stated that it will probably be held in California.

FIFTH ANNUAL CONFERENCE OF THE A. G. P. A.

Monday and Tuesday, March 3 and 4, are the dates fixed for the annual conference of the Department of Game Breeding and Preserving of the American Game Protective Association. This gathering is now well known to the country's sportsmen. It affords an opportunity once a year for an exchange of ideas by those who are interested in increasing wild life, the game species particularly, and it is pre-eminently the largest and most important gathering in the interest of sport that is held in this country.

Game commissioners, sportsmen's associations, state and local, and shooting clubs will send large delegations and, finally, there will be an outpouring of individual sportsmen, eager to get into the atmosphere of the thing once again, now that the war is over.

The dinner, which invariably concludes the conference, will be held Tuesday evening, March 4, at 7 o'clock, in the Astor Gallery, Mr. William B. Boulton, chairman of the conference, presiding. Arrangements have been made for showing four wonderful moving picture films taken by Mr. William L. Finley, of Oregon, so well and favorably known to those who have attended these conferences. These are all intimately related to wild life and sport and one of them is said to be one of the best angling films ever shown.

A new feature of this year's dinner will be the provision of special tables for various sportsmen's clubs in the vicinity of New York, Boston and Philadelphia. Among the clubs that have already requested such reservations are the Flanders, Wyandanch, South Side Sportsmen's Clove Valley, and Blooming Grove Hunting and Fishing. It is certain that the big Astor Gallery will be taxed this year to hold the company that will sit down to dinner.

It is hoped that every sportsman who reads this will enter March 3 and 4 in his engagement book forthwith, and, further, that he will send his check for $5 to Mr. Tracy Dows, treasurer, 2271 Woolworth Building, to cover his dinner reservation. Any one interested in sport may attend the conference sessions and the dinner, but it will be impossible to accommodate any ladies at the latter. They are welcome to attend the business sessions.

MIGRATORY BIRD LAW STANDS

Great alarm was caused recently throughout the country by a report sent out by the Associated Press, which was so vaguely worded as to give the impression that federal control of migratory bird life had been declared unconstitutional by the United States Supreme Court. This is absolutely erroneous and the legislation by Congress under which the U. S. Department of Agriculture is proceeding in its protection of practically all species of migratory birds, whether game or non-game, is unquestionably secure.

The control exercised by the department is by virtue of the so-called Canadian treaty enabling act, passed last August by Congress, which was brought into being as the result of a clause in the treaty between this country and Great Britain, providing for the protection of birds that migrate between the Dominion of Canada and the United States. In this clause the contracting parties agreed to enact legislation suitable for the carrying into effect of its provisions. This action by Congress superseded the federal migratory bird law which it had passed a few years ago, and it was that law whose constitutionality had been brought into question before the Supreme Court.

The action in the Supreme Court on which the dispatch of the Associated Press was based was a request by the solicitor-general that his own motion before the court, which was to test the constitutionality of the original migratory bird law, be dismissed. No good purpose could have been served by arguing the test case that had been brought under that law, because it no longer existed.

RUNS OF 200 AND OVER

There should be an honor roll for trapshooters who compile long runs of 200 or over each year. Here is the honor roll for 1918:

Amateurs

Name	At	Run
H. G. Lorenson	Los Angeles, Cal.	345
J. F. Dobbs	Los Angeles, Cal.	255
F. S. Wright	Maplewood, N. H.	250
Dave Frauskee	Minneapolis, Minn.	249
F. H. Bungay	Los Angeles, Cal.	246
A. H. Winkler	Milwaukee, Wis.	233
E. E. Woodward	Douglas, Wyo.	214
C. H. Reilley Jr.	Salt Lake City, Utah.	204
H. G. Lorenson	San Jose, Cal.	204
E. F. Woodward	Toronto, Can.	203
Jay Clark Jr.	Maplewood, N. H.	200
P. H. O'Brien	Kalispell, Mont.	200

Professionals

Homer Clark	Sioux Falls, S. D.	247
Homer Clark	Chillicothe, O.	237
P. R. Miller	Houston, Texas.	209
E. H. Huseman	Alexandria Bay, N. Y.	200

AT THE OLYMPIC CLUB GROUNDS

At the first practice shoot on the new grounds, J. G. Heath broke 37 straight and at the next shoot held two days later, C. A. Haight went Heath 4 better with 41 straight, and on February 1st W. E. Landry established a new record for the grounds by breaking 58 straight, and Geo. Stall and Tom Wilkes tied on a 142 out of 150. In the 100 target event Mrs. A. G. Wilkes made the high score of 91. There was some good shooting on February 5th, Tom Wilkes leading with 147 out of 150, breaking 99 out of the first 100 and a running 114 straight and only losing 3 targets out of the 150. This is equal to any score ever made in San Francisco county and shows that the trapshooting grounds and appointments are all that could be asked. On February 6th there was not much shooting as it was a windy and rainy day. On February 9th, Jack Nelson came to the front, breaking 97 out of 100. One of the shooting contests so far was between Dr. Derby and Dr. McGettigan in the 100 target event, and won by Jack Nelson. Dr. McGettigan leading Dr. Derby by 2.

Arnold finished fine, 73 out of 75.

F. S. Bair made a run of 110 St. H. Hine, 88 St.

Notwithstanding the threatening weather and occasional showers in the afternoon, the Olympic Gun Club shoot on Washington's Birthday was highly successful. There were many shotgun enthusiasts in attendance. Competition for the trophies offered was keen and the number of changes in high guns occurred from time to time. Under the management of O. N. Ford there was not a hitch in the shooting which was conducted with the regularity of clockwork. The gunners in squads of five lined up to the rail and as soon as they had shot at their targets they moved back to make room for the next squad with no loss of time.

The new shooting lodge is rapidly approaching competition and when finished will be one of the most attractive buildings of the kind in the country. The location is ideal both in regard to the view and advantages in position for a trapshooting club house. It will be provided with ample locker rooms for members and the lounging room is large and will be most homelike.

The grounds and appointments have been pronounced by experts to be as fine as any in the country. Under the tutelage of Tony Prior, Clarence Haight, Billy Price and the management of O. N. Ford, the novice gunners are making rapid advancement, and the trapshooting division is becoming a most popular adjunct to the club.

KILL THE CROW

It is generally recognized that the crow is not only the arch enemy of the farmer, but is also a serious menace to the breeding and propagation of game. The crow's record is like its coat—about as black as black can be.

In the interest of the conservation of grain and the protection of game and insectivorous birds, you are invited to take an active part during 1919 in a national crow shoot, the chief purpose of which is to wage war against these pests, particularly in sections where they are numerous.

It is estimated that every year insects cause a loss of millions of dollars to the farmers, truck raisers and fruit growers. The farmers are the producers and whatever loss they sustain affects every consumer in the country.

Song birds are the natural enemies of all insect life—song birds alone can keep in check the ravages of insects. Crows destroy birds, birds destroy insects, insects destroy crops—therefore, kill the crows and save the crops.

It is certain that some concerted action on the part of farmers and sportsmen to reduce the number of these pests will conserve a large quantity of grain and thus prove an important factor in meeting America's obligation to feed the world during these critical years, at the same time giving practical support to the protection and propagation of game in this country. It is for this purpose that the national crow shoot is being conducted this year.

ON BEHALF OF THE DOG

When hostilities ceased some 18,000 dogs were on the Western front, fighting to make the world unsafe for dachshunds.

The Dog Owners' Association of England, therefore, is planning to have diplomas awarded to dogs that distinguished themselves as good soldiers during the war.

This is a movement worthy of commendation, for there are many things to be said in behalf of the dog. He is grave, honest and loyal. He is never a coward, a cheater or a liar. Even in the height of flea season he is a consistent optimist, not only looking on the bright side of life at all times, but possessing a happy sense of humor.

He can grin, smile or laugh. He is a good fellow. He knows how to take a joke. You can hit him with your fist hard enough to jar his back teeth loose, and if you do it with a smile he will respond by laughing heartily with his tail.

The dog is a real gentleman because he is equally at home in any company. It does not embarrass him even when thrown in the presence of persons he has never met before in a social way. With equal adaptability he can romp with the children, go hunting with the big boys, or sit quietly at home with the old folks and help them meditate in their lonely hours.

If born in poverty and obscurity he will never desert those he loves and cherishes for gayer scenes or the blandishments of more affluent associates. Even the blind and helpless beggar, shivering on a windswept corner, knows his dog would not forsake him if all the millionaires in the world went parading by with their arms loaded wtih dog biscuits, raw bones and alley cats.

THE ENGLISH-AMERICAN CROSS

(Chas. E. Brossman)

There is always a bright side to everything. Now that the war is over we can in an economic way contemplate and compare the results in relation to the horse breeding industry in the United States. From force of necessity our country is rid of thousands of nondescript horses that were sent over to the other side by the ship load because we had no better to offer and the Allies required horses for the armies and must get them where they could—we gave the best we had and all we had that were of age to be serviceable. We have purchased since the war began some of the best breeding stock of England and ultimately our general horse stock in this country will be immeasurably improved by these recent importations. Our wealthy racing men, ever alert to the best interests of the counry, secured regardless of cost breeding stock that will be of incalculable value to the breeding interests of the country. There never was perhaps a time when so much of the fashionable thoroughbred stock of England could be purchased at all. We have gotten our portion from time to time and a limited number of breeders here have produced a breed of horses excelled by none, but the breeding centers have been supposed to be limited and the output comparatively small for so large and wealthy country. Now numerous new men with plenty of money from new states hitherto not actively identified with the thoroughbred horse have gone to England to have purchased liberally, stallions, brood mares, and yearlings of the best in sight, regardless of the money consideration. Other than in war times some of this stock would never have been for sale or allowed to leave England. It would be presumptuous on the part of any turf writer to indicate how in his opinion these valuable importations should be mated, for each owner probably has a theory of his own and ought not to be persuaded, for the man that pays the money has a constitutional right to do as pleases him best. It is, however, a duty one owes to his generation to improve any breed of live stock or to try to make two blades of grass grow where one grew before; he who succeeds is a philanthropist and a benefit to his country. The public will easily forget any man's theories if they are not successful but it can never forget the records his horses establish. Therefore, is it not well to carefully look over the breeding of the great horses in the past and abide to a great extent; by what experience has taught? That these intensely bred Eclipse horses succeed best when crossed on our Herod and Matchem mares is admitted by all students of pedigree and proved so by the records, therefore it would seem best to breed the imported sires to native bred mares and the native bred sires to imported mares of producing families, for much of the Eclipse blood in this country has been here a long while so that it would virtually be an outcross. The last regular Derby that was run in England was won by Durbar II in 1914. Now Durbar was by Rabelais, a son of St. Simon, out of Armenia by imp. Meddler; second dam Urania by Hanover; third dam Wanda by imp. Mortemer; fourth dam Minnie Minor by Lexington; fifth dam Julia by Glencoe, etc. I am simply mentioning Durbar and his breeding to show that the Hanover, Lexington, Glencoe blood crossed on the St. Simon blood is potent enough to produce the latest regular Derby winner in England, and, while they have a very limited supply of this blood, we have it in abundance only waiting for the right kind of a cross to produce Derby winners in any country. Of course it all depends upon what a breeder desires to produce. If he wants to breed pedigrees that will be fashionable in England, he will stick to the Bruce Lowe number mares, but if he wants to breed real race horses that can go to England or any other country and win Derbies he must have some of the Ben Brush, Lexington, Glencoe, Australian, Boston blood—the old-fashioned American kind—to mix in somewhere in the pedigree, for this is approved blood and always has won. Iroquois, Orby and Durbar were all out of these stout bred American mares and their names are enrolled in the horse hall of fame as fit representatives of the English and American cross. The late James R. Keene, one of the most successful breeders of thoroughbreds in this country, selected imported mares that traced to Beeswing, Queen Mary, Prunella, Maid of Masham, Pocahontas and other celebrated English mares that produced famous winners and producers all along the line, bred them to rugged, stout American bred stallions full of blood of Himyar, Enquirer, Norfolk, War Dance, etc., and produced a larger per cent of great race horses—horses able to win stakes in this and foreign countries—than any other breeder in the United States of his time. The French government, always wide awake to the best interests of its people, secured from the late H. B. Duryea the celebrated stake winner Blarney, brown colt, foaled 1910, by Irish Lad—Armenia (dam of Durbar), to be used as a sire on one of the government breeding farms. Blarney is an ideal representative of the best American mixture of racing blood. Mr. Duryea had at different times refused offers of $60,000 and $80,000 for the horse, but on account of the hospitable manner in which American racing men were received by the French people, when the war against racing in this country was so bitter, fanatical and unpleasant, that many of our wealthy owners removed with their horses and money to other countries where they were received with open arms, gave Blarney as a present to the French government when he subsequently learned that the government desired the horse for breeding purposes to improve the blood stock of that country. At the recent Newmarket sales in England a yearling filly by Orby brought the top price, $31,200. Now Orby is out of a Hanover mare. It would appear that English racing men appreciate the American cross as well as we. In Australia during a meeting there in December last a two-year-old—Sand Dune—by Sands of the Orient, son of Rock Sand and Orienta, by Henry of Navarre, won the Nursery Handicap and is considered one of the most promising young horses in that country. Therefore we observe that the English-American cross is winning in every country where races are run, and it would seem wise to continue breeding along lines that have demonstrated superiority.—Thoroughbred Record.

DARK LEGEND MAKES GOOD IN INDIA

After having satisfactorily passed a veterinary examination, Sir William Cooke sold his then three-year-old colt Dark Legend on the Wednesday morning of the Second October meeting of 1917 to Mr. F. Tarrant, who was acting on behalf of an Indian owner, for 7000 guineas. In these columns a few days later I remarked that "he should prove a notable acquisition to the Indian Turf," and my estimate of his abilities has since been fully borne out, for he recently brought off the double event of the King Emperor's Cup and the Viceroy's Cup. The first-named contest is run over a mile, while the distance of the other is 1¾ miles; and in each case Magyar, who won the King Emperor's Cup in 1917, and a few days later was third to Kiltoi and Politian in the other race, was second. Dark Legend, who now belongs to Mr. J. C. Gaulstaun, was bred by Sir Wm. Cooke, and, foaled on April 10th, 1914, is a brown son of Dark Ronald (now in Germany) from Golden Legend by Amphion, out of St. Lucre by St. Serf from Fairy Gold. Sir William now owns a three-year-old half-brother by Marcovil (sire of unbeaten Hurry On) to Dark Legend in Golden Orb, who is likely to play a prominent part in this year's classic races, for he holds liabilities in the Two Thousand Guineas, Derby, and St. Leger. He has only been out twice in public, and on the last occasion was beaten a short head, on even terms, by Knight of Blyth for the 7-furlong Dewhurst Plate. Fairy Gold, the great-grandam of Dark Legend and Golden Orb, is a daughter of Bend Or, and in 1898 she won the Woodcote Stakes at Epsom for Mr. Leonard Cohen, beating Desmond, who was conceding her 6 lbs., by a head. She subsequently passed into the possession of Colonel Harry McCalmont for 2900 guineas, and when the latter sportsman died she was sold, mated to Icinglass, to Major August Belmont for 3600 guineas, and went to America. There she gained distinction as the dam of Friar Rock, one of the best three year olds in the United States in 1916, and for which Mr. J. E. Madden paid Major Belmont £10,000, and now owned by J. H. Rosseter.—"Audax" in Horse and Hound.

MR. ADOLPH SPRECKELS' GOOD TWO-YEAR-OLDS

The master of the Napa Stock Farm, Cal., will rely principally on the two-year-olds to make a good showing in the racing of the present year. Mr. Spreckels has at the Fair Grounds at New Orleans, La., ten youngsters and they are all considered above the average. The colts and fillies are under the charge of that sterling and capable trainer, William Carrol. The star of the stable is an exceptionally rangy youngster for one of his inches, a bay colt named Runnan by Runnymeade—by Voter, Georgia Girl by Sain. By the way, Runnymeade was purchased by Mr. Spreckels on the word of Barney Schreiber. Their names are as follows:

Runnan, b c, by Runnymeade—Georgia Girl.
Ziziz, ch f, by Runnymeade—Handsome Florry.
Metem, b c, by Runnymeade—Hymir.
Spencer Lady, ch f; Alulu, b f; Attaboy II, b c; Soscol, b c; Aurina, b f; Groce C., ch c.

Runnan has already won three races, and defeated amongst others, Foreclosure, owned by another famous California owner, Edw. Cebrian ⅜ in 37 sec., track heavy.

Ziziz, ch f, by Runnymeade—Handsome Florry, has all the ear marks of making a wonderful filly, bred as she is and looking like she does, this filly should have an excellent chance to grow into a really great race-mare.

Metem, b c, by Runnymeade—Hymir, won the first race the first of January, 1919, at the Fair Grounds, and beat a fair field. Judging by what the colts and fillies have done since he defeated them, shows that he possesses stake qualities. This colt is fast and beautifully balanced, and will surely make his mark. January 18, 1919, Runnan won the Lake Shore purse, beating a large field on a heavy track, ⅜ in 39 seconds, and taking it from a racing standpoint. Mr. Spreckels will, and so will every racing man in California agree, that California will still maintain its place as one of the greatest states for the breeding of thoroughbreds.

The rider for Mr. Spreckels this year is Jockey Metcalf, well known in former years in California.

ADVANTAGES OF THE TOTALISATOR

Mr. K. H. Frew, well-known to the sporting public as the trainer of Dainno, Donamo, Chelsea, Syrmaa, Boohgal and other noted performers, is an ardent advocate for the totalisator, of which he saw a great deal in South Australia and New Zealand. He writes to the Melbourne Leader as follows:

"I can endorse every word of your article in this week's (23rd inst.) issue of The Leader regarding the totalisator. The totalisator is used only on the day of the race. It does not encourage big betting, hence it is opposed by some owners and punters who wish to bet in thousands, and who always come to grief and ruin in the end. The tote will protect these people. The amount of money makes the favorite in the tote, thus it must be fair. There is no fear of the backer having to ask time for payment, because the money must be staked. Then, again, if the field of horses is over six the placed horses receive dividends. Lads under 21 are not allowed to bet in the tote. So long as we have horse-racing people will bet. Stop horse-racing and people will bet on something else, but worse will happen—the downfall of the thoroughbred horse, one of the greatest assets the country can have. We cannot have good horses unless we have races in which to try them. The best horses go to the stud to produce more good horses, the same thing applies to any other branch of sport. It is only by trial that excellence is proved. The best horses in the Southern Hemisphere have come from New Zealand—Carbine, the best of all horses; Trenton, Soultline, etc. New Zealand has the tote only. Some owners at first opposed the introduction of the machine because they thought they could not win enough money from the tote. Experience has proved otherwise. Stakes in New Zealand are big, and as everyone must bet on the tote, so the dividends have increased. For the benefit of racing, i. e., clubs, owners, and public, it is better that all the money should go through the tote. Stakes increase, the tone of racing is raised by good stakes, the breeder gets more money for his yearlings, and the charities secure a percentage that almost does away with the means non-tote countries have to resort to. In New Zealand and other places that have the tote legalized, the cost to the people is less, the clubs depending on the tote for revenue, not on the gates and caterers, who in many instances give but poor return for the money.

It has been proved in New Zealand and other countries where the tote is legalized, that, with the tote, betting has decreased. One reason given is that people must have the money in their pockets to bet with, and that the tote does not favor big betting, and it does not accept a less sum than 10s, and that people under 21 are not allowed to bet. With the legislation of the tote we only require strong police vigilance to ensure a healthier and more honest system of betting. Betting in a small way cannot do much harm, especially if the odds are legitimate, which must be so with the tote. It must be remembered the money, betted is money in circulation—it remains within our shores, so does really more good than harm. There are many people who have a mild bet on horses who could not speculate in any other way. Money "locked up" is no good to the people.

"We have now to face heavy taxation. The legislation of the tote would help to considerably reduce these taxes. Some folk connected with the big clubs say, "Look at the expense of providing buildings and working of the tote." My answer to this is in Paris, where twice as many people assemble at times as at Flemington, they have the tote, and it is worked smoothly. What is possible there or in any other country is possible here. Australians can do what others have done. We have held our own against all comers in every walk of life, and our brave soldiers at the front have proved that nothing is impossible to them. Many of these brave fellows who are tradesmen will help build the totes for us. The money paid in wages will be well spent."

THE GRAND CHAMPION STEER AT THE PEACE TABLE

Chicago—When Messrs. Lloyd-George, Clemenceau, Orlando, Wilson, and the diplomats and potentates from every other civilized nation sit down to the big feed after they have settled the boundary fences of the world, they are going to eat the choicest beef steaks America could produce. Fyvie Knight 2d, grand champion steer at the recent Chicago International Live Stock Exposition, which sold for the record price of $2.50 a pound on the hoof will furnish the "Peace Meet meat."

Wilson & Co., Chicago packers, who paid the big price for the Purdue University pure-bred Aberdeen-Angus that won the highest live-stock honors of the year, have already prepared the steaks and roasts of the grand champion and shipped it to President Poincaire of France, who will have it served at the banquet to follow the signing of the peace terms. Dean Skinner of Purdue University, from whose classic stables came the dusky Fyvie Knight, has sent word to President Wilson that this meat is the choicest product of the "Hoosier" State University.

Dean Curtiss of Iowa State College of Agriculture, some years ago stated that the beef-fed nations of the world ruled it and would undoubtedly always rule it. The fighting rations of the British "Tommy" and the U. S. Yank seems to bear out this assertion. In its anti-scrub campaign, Wisconsin has millions of acres yet to develop that may be utilized for beef growing in spite of the fact that since the discovery of the Babcock test, dairying has been its chief agricultural item, farm experts from Madison point out. The work with beef cattle in the last few years is now beginning to bear fruit, and farmers in all sections are taking more interest in the straight beef breeds as a means to cut labor costs, building expenses and market a product with a standard market at Chicago, Milwaukee and St. Paul.

HORSE HITCHES

A highly interesting article on Multiple Hitches appeared in the last issue of the Percheron Review. The hitch question has always been a perplexing one and the difficulties have multiplied as the number of horses that are in the hitch has increased. The article and the illustrations show how to make the most effective hitches for the plough, disk harrow and other soil preparing machines and for hauling work. The illustrations make the article easily understood and demonstrates the advantages of the various methods. Copies of the article may be obtained free of charge by addressing Wayne Dinsmore, secretary of the Percheron Society of America, Union Stock Yards, Chicago, Ill.

CATTLE NEWS

It has been definitely decided that both the annual sales of the Pacific Coast Hereford Breeders' Association and the California Shorthorn Breeders' Association will be held at the University Farm during the week of April 7th to 12th.

This will bring the sales of the Hereford and the Shorthorn Association on consecutive days, and it is probable that meetings of the California Cattlemen's Association and the California Sheep and Wool Growers' Association will be announced for the same week.

The annual election of directors was held by the Shorthorn Association in San Francisco this week. New directors are as follows: T. T. Miller of Los Angeles, Charles Hawkins of Hollister, Paul Foster of San Francisco, Thornton Glide of Davis, Professor Gordon H. True of the University Farm and Thomas Dibbles of San Francisco. Hawkins becomes President of the Association.

The veteran A. W. Foster retired as president after a number of years of service. Foster tendered a dinner to the members of the association.

SYMPTOMS OF HOG CHOLERA

If a hog has cholera, says Dr. O. S. Crisler of the University of Missouri College of Agriculture, one or more of the following symptoms will appear, depending upon whether the disease is acute or chronic:

Loss of appetite, partial or complete; sluggishness, lying in dark and secluded places; gaunt, unthrifty appearance and roughened hair; difficult breathing, commonly called "thumps," if the lungs are affected. Some animals have a cough. Diarrhea occurs if the intestines are affected; but in some cases, the sick hogs are constipated, and drop hard lumpy excretions, sometimes covered with mucus or blood. A discharge of mucus from the eyes and nose is often observed; and the eyes may be glued shut. The movements are unsteady, the gait is weak and wabbly, especially in the hind legs. The animal often reels when trying to walk. A dark red, blue or purplish discoloration of the skin on the under parts of the body, abdomen, neck and inside the thighs, is frequently seen in acute cases. When the disease is acute, death may occur in from four to seven days; and in some outbreaks the attack may be so virulent that hogs are found dead before the owner knows there is sickness in the herd. At other times the disease takes on a chronic form and the animals may linger for weeks, or death may occur in an infected herd from time to time over a period of several months.

In case of doubt in the diagnosis, as when the foregoing symptoms are not well developed, a post-mortem examination should be made. If a pig which has died quite recently is not available, a sick one should be slaughtered and the carcass carefully examined for lesions of cholera.

A "365" Day Liniment

YOU ARE SAYING TO YOURSELF—"If I only knew of something to stop that Backache—help my Rheumatism—cure my Neuralgia, I would send and get it at once."

Get It. Gombault's Caustic Balsam will give you immediate *Relief.* A Marvelous Human Flesh Healer and a never failing remedy for every known pain that can be relieved or cured by external applications. Thousands testify to the wonderful healing and curing powers of this great French Remedy. A Liniment that will soothe, heal and cure your every day pains, wounds and bruises.

Gombault's Caustic Balsam
The Great French Remedy Will Do It

It Helps Nature to Heal and Cure. Penetrates, acts quickly, yet is perfectly harmless. Kills all Germs and prevents Blood Poison. Nothing so good known as an application for Sores, Wounds, Felons, Exterior Cancers, Burns, Carbuncles and Swellings.

"I had a bad hand with four running sores on it. The more I doctored the worse it got. I used Caustic Balsam and never needed a doctor after that." —Ed. Rosenburg, St. Ansgat, Ia.

Mrs. James McKenzie, Edina, Mo., says: "Just ten applications of Caustic Balsam relieved me of goitre. My husband also cured eczema with it, and we use it for corns, bunions, colds, sore throat and pain in the chest."

A Safe, Reliable Remedy for Sore Throat, Chest Cold, Backache, Neuralgia, Sprains, Rheumatism and Stiff Joints. Whenever and wherever a Liniment is needed Caustic Balsam has no Equal.

Dr. Higley, Whitewater, Wis., writes: "I have been using Caustic Balsam for ten years for different ailments. It has never failed me yet."

A liniment that not only heals and cures Human Flesh, but for years the accepted Standard veterinary remedy of the world.

The price, $1.75 per bottle, at all Druggists, or sent by us express prepaid. Write for free booklet and read what others say

THE LAWRENCE WILLIAMS CO., Cleveland, Ohio

POST MORTEM EXAMINATION FOR CHOLERA

This procedure for a post mortem examination of a hog to determine the presence of cholera is advocated by Dr. O. S. Crisler of the Univers.ty of Missouri College of Agriculture.

Lay the dead pig on its back; examine skin fr purple splotches resembling a birthmark. Make an incision through the skin along the midline of throat, chest and belly; turn back the skin and adherent fat and examine for blood-shot spots and patches. Next open the belly and chest cavities, and examine the several organs.

Lungs or "lights"—In acute cholera the surface of the lungs frequently shows small red spots varying in size from a pin head to a small pea. Occasionally larger blood spots are found. These hemorrhages are beneath the thin, transparent covering of the lung and cannot be washed off. They are regarded as a good sign of acute cholera. Pneumonia frequently develops from these conditions; and in such cases portions of the lung, sometimes almost the entire lung, become solid or liver-like.

Spleen or "melt"—In acute cases of hog cholera, the spleen or "melt" is usually somewhat larger, darker, and softer than normal; while in chronic cases it may be smaller than normal and grayish in color.

Kidneys—Remove the kidneys, and peel off the thin fibrous covering or capsule. Do this carefully so as not to injure the substance of the kidney. Examine the exposed surface of the kidney for dark red spots, varying in size from mere points to the size of a pinhead or larger. These spots may be few or the surface of the kidney may be speckled as a turkey's egg. These blood spots on the kidney, when well marked, are regarded as good evidence of hog cholera.

Bladder—In health, the inner surface of the bladder is white or a faint pinkish white color; but in a cholera-infected animal, small red spots similar to those occurring in the kidney are often found. Occasionally extensive hemorrhages may be found within the bladder.

Large intestines—In acute cases of cholera the mucus membrane of the large intestines may be inflamed and show patches of hemorrhage. If the disease runs into the chronic stage, the large bowel often becomes ulcerated from concurrent infection with dirt germs.

Lymphatic glands—These nodular glands or kernels are found in various parts of the body. If in a healthy state, they are of a pearly white color; while in the acute form of hog cholera some of these glands become dark red from congestion or hemorrhage. The cut surface also shows dark red spots. The lymph glands in the neck at angle of jaw, in the groins, and in the intestinal fat are easily found and should be examined.

TO SURVEY EUROPE'S LIVESTOCK NEEDS

The United States Department of Agriculture has named three of its livestock experts to visit Europe for an indefinite period, and supply American livestock industries with official information on the present and probable future demand from European countries for American animals and livestock products.

The agricultural commission recently sent to Europe by the Secretary of Agriculture reported on livestock conditions prior to the armistice, since which the changing situation require further attention. The suggestion that the department send representatives to keep in touch with the European situation and furnish it with information for the producers has been made from various sources.

The department representatives are not to accept orders for animals or animal products, but the information they obtain is to be made public promptly by the department. Livestock and dairy associations in this country have been invited to suggest questions they desire investigated.

The department representatives are C. W. Larson, assistant chief of the Dairy Division, Bureau of Animal Industry, who now is in Europe doing special work; G. Arthur Bell of the Animal Husbandry Division, Bureau of Animal Industry; and T. R. H. Wright, of the livestock section, Bureau of Markets.

NEW CROPS FOR CALIFORNIA

Special crops are needed for conditions near the coast of California and in the mountain districts, where the weather remains cool at all seasons and many crops fail to grow or to reach normal maturity, and the United States Department of Agriculture is conducting experiments with a number of plants, many of which have been imported for this purpose. Of special interest attaches to the possibility of securing varieties of potatoes and other root crops from the high table lands of South America, which are able to grow under conditions of low temperature. Numerous other food crops, fruits and useful trees that grow successfully in the cooler mountain regions of South America are being studied to determine their possibilities of use in California. Among these are varieties of Indian corn from the cool table lands of Peru, including the remarkable large-seeded Cuzco type of maize.

Because he allowed one band of 1120 ewes, with their lambs, to wander casually over range which had not been assigned to him, while only a short distance away a second band paid a social visit to a nearby cattle range, C. H. Fee, sheep owner of Ft. Bidwell, Modoc county, California, was recently asked by the U. S. Forest Service to contribute to the public treasury.

"Mr. Fee has been guilty of other trespass cases which were all settled on an innocent bases," says Forest Supervisor W. G. Durbin, in commenting on the case, "and it is possible that his stock might have continued on the National Forest all summer, if he had felt that he might continue to settle on an innocent basis."

DON'T BURN BEAN STRAW

Farmers who burn their bean straw are destroying a valuable fertilizer. Various agricultural agencies are warning farmers against this form of destruction and are emphasizing that tests prove this straw to be a decided farm asset when properly utilized.

The relative value of bean straw and barnyard manure for fertilization is shown in the following:

Bean straw—Organic nitrogen, 28 pounds per ton; phosphoric acid, 6 pounds per ton; potash, 48 pounds per ton.

Barnyard manure—Organic nitrogen, 10 pounds per ton; phosphoric acid, 5 pounds per ton; potash, 10 pounds per ton.

During the war a ban was placed on burning bean straw, but this has recently been lifted.

HOG AUCTION SALES PROFITABLE

Hogs valued at $100,000 were sold at eleven fat-hog auction sales in November by the California Farm Bureau Marketing Association, which comprises the marketing departments of the farm bureaus in King, Tulare and Kern counties. The prices received are described as more than satisfactory, being much better than those paid by local buyers. The auction sales also have taught the hog-raisers the importance of raising better hogs, as they have seen that packers discriminate between hogs fattened on grain and those raised on skimmed milk and alfalfa pasture alone.

A Percheron society has been organized in England and a purchasing commission will be sent to America to buy high-class stock and place it in the hands of British breeders. It is expected that the results will be much better than as though this work were done by private speculators.

EGGS WITH WHITE YOLKS

One of the features of the University of Missouri College of Agriculture exhibit at the St. Louis Poultry Show was a number of eggs with white yolks. These were produced in experiments conducted by the Poultry Experiment Station at Columbia, upon the effects of different colored feeds in producing the yellow color in plumage, and shanks of birds, and the deep color in yolks of eggs. It has been found that the yellow pigment which gives the color to the shanks of birds, makes yellow yolks and causes creaminess in white plumage, is a substance known as xanthophyll. This is the principal pigment of yellow corn and is also found in green food and most other feed stuffs. By feeding a ration free from xanthophyll, Professor Kempster has been able to produce Leghorn pullets and cockerels with perfectly white shanks, beaks, earlobes and plumage. These pullets fed on the white ration lay eggs without any color in the yolks.

After seeing this exhibit poultry fanciers will realize the importance of reducing the amount of pigments in the rations fed to white birds intended for the show. Egg producers will see the advantage of feeding yellow corn and other feeds rich in color to laying hens to produce the deep colored yolks desired in market eggs.

PROGRESS WITH BLACKLEG VACCINE

As a result of continued demand for vaccine for immunizing cattle against blackleg the Bureau of Animal Industry is enlarging its facilities for making this important preparation so as to meet all demands promptly. During the last year more than 4,000,000 doses of blackleg vaccine were distributed free to stock owners of the United States. The bureau is prepared to assist stockmen in preventing blackleg in their herds, both through printed information and through vaccine for properly immunizing cattle.

WHY FRANCE NEEDS BEEF

Since the outbreak of the war France suffered a loss of 2,600,000 head of cattle. Moreover, the cattle greatly lost in weight. Before the war the average weight in meat of slaughtered cattle was from 770 to 880 pounds, whereas today it hardly exceeds 550 or 570 pounds. That is why France needs the American beef so much today.

THE Parker Single Barrel Trapgun

Price $150
The Gun With a Pedigree

The Greatest Scores Ever Recorded Were Made With
Parker Guns

Mr. L. S. German made the highest official yearly average ever recorded with his Parker Gun, scoring 6137x6285=97.64%.

At San Jose, Cal., May 19th, Mr. Orval Overall won THE CHAMPIONSHIP OF CALIFORNIA-NEVADA, scoring 44x50 targets with his double Parker Gun.

At same place, May 22d, Mr. Harry Ogilvie won the INTERSTATE CALIFORNIA-NEVADA HANDICAP, scoring 97x100 at 20 yards with his single barrel Parker, and Mr. Len. Hawxhurst won the Professional Championship, scoring 94x100 with same kind of gun.

At Los Angeles, Cal., May 28th and 29th, Mr. Ed. Garrett made the highest aggregate score on the Preliminary and Pacific Coast Handicaps, scoring 187x200 at 18 and 19 yards, with his single barrel Parker, and Mr. Len. Hawxhurst at same place won Second Professional Average, scoring 381x400 targets with same make and kind of gun.

The Grand American Handicap has been won nine times with Parkers.

If interested in small bore double shot guns, please write for New booklet which will be sent free, giving valuable information on this subject.

REDUCINE

THE HUMANE TREATMENT FOR

Lame, Sore, Worn, Wounded and Blemished Horses

and for Certain Uses By Human Beings

Be sure the Carton is like this, and see that the signature of A. T. STARK is on the box.

This cut was made from a photo of a package of Reducine. Of course it does not show the colors of the printing, red and green.

If you own a horse or keep house our Booklet will be valuable. We send it, postpaid, FREE to all who send name and address.

ASHOKAN, New York, Aug. 9, 1918.

The Reducine Co., Otsego, Mich.

Gentlemen:—I am writing to inquire the present price of Reducine. Some time ago I sent to you for a box and used it on one of my horses that was laid up with a bad spavin. It worked like magic and cured her. You would never know now that she had ever had one, as she is as good as she ever was. I cannot recommend Reducine enough. Respectfully,

JOHN HYSER.

CAMBRIDGE, Vermont, Sept. 23, 1918.

The Reducine Co.

Dear Sirs:—Five years ago I had a horse with a very bad shoulder. I tried everything I knew of, but could get no permanent cure. I heard of your Reducine and sent to you for a can. It did the work, curing my horse perfectly. Now I have a nice three-year-old colt with fistula—got hurt some way in the pasture—and I am in a hurry for some Reducine. Enclosed find P. O. Order for $5.00. Please send the can of Reducine by return parcel post, for I feel worried about the colt. Yours respectfully,

ANNIE R. HOLMES.

R. F. D. No. 1, BRISCOE, Missouri, Aug. 20, 1918.

The Reducine Co., Otsego, Mich.

Dear Sirs:—Enclosed find $5.00, for which send me a can of Reducine by parcel post. With the last can of Reducine I removed a bog spavin as large as a pint cup, and never left a scar or scratch.

Yours truly, M. O. SHANNON.

MARTIN LYNCH,
EXPRESS AND BAGGAGE.
No. 4 JOHN ST., AUBURN, N. Y., Aug. 9, 1918.

The Reducine Co.

Dear Sirs:—Will you please send me your latest booklet? I have been using your remedy on my horses' feet and it works good. I want to read more about it. Yours truly, MARTIN LYNCH.

THORNE, North Dakota, Aug. 1, 1918.

The Reducine Co., Otsego, Mich.

Dear Sirs:—I have just bought a four-year-old mare that got a wire cut last winter in the front quarter. No care was taken of her, but she is a nice beast. I have used Reducine before for wire cuts and bog spavins, and I know what it will do. Enclosed find $5.00. Send me a can of Reducine at once.

Yours respectfully, FRED RHODES.

KINDER, Louisiana, March 5, 1919.

The Reducine Co.

Dear Sirs:—Enclosed find P. O. Order for $5.00 for another can of Reducine. I have used one can of your Reducine and had good results. I had one mule who had not worked for over a year, and is now working right along and sound. Cured a spavin on another. Very respectfully,

HENRY UNKEL.

1404 EAST FLANDERS ST., PORTLAND, Oregon, May 9, 1918.

The Reducine Co., Otsego, Mich.

Gentlemen:—In reading your pamphlet, which came with a can of your Reducine, I find where you want to hear from all dissatisfied customers, but I find no place where you want to hear from a satisfied customer, so I take the liberty of writing you and telling you what Reducine did for me. Eight years ago I fell backward downstairs and struck the back of my neck on the last step. In about a year I found a small kernel growing up near the hair on the back of my neck. The Doctor said it was caused by the fall. It grew to the size of a large walnut. The Doctor wanted to cut it out, but I had heard of Reducine, so I thought I would try it. I had so much trouble keeping it on, as my clothing rubbed it off, so I got a soft rubber ball and, split it in half and filled one-half with cotton, then poured Reducine over that and bound it over the tumor. I put it on fresh every day for twelve days. Today is the fifteenth day, and the tumor is almost entirely gone, being no larger than a very small hazelnut. My neck was sixteen inches over the tumor and now only fifteen, and I am very happy.

Respectfully yours, MRS. L. D. BOHN.

PERRY, Oklahoma, April 19, 1918.

The Reducine Co., Otsego, Mich.

Gentlemen:—I received the Reducine yesterday and write to thank you for your promptness. I forgot to mention in my last letter about three large tumor warts on a young jack I have. These were caused from wire cuts when he was first foaled. One was as large as a fair sized apple. I applied Reducine repeatedly and removed them. The places are all healed up and haired over nicely, showing no indication of them whatever.

Very respectfully, J. M. MACKEY.

MONTANA UNION TRANSFER CO.
BUTTE, Montana, Nov. 18, 1918.

The Reducine Co.

Gentlemen:—Please send me a few copies of your latest booklet. I have been a user of Reducine for some time with the best of results, and I will say there is nothing like it. I had a horse last winter worth $250.00. He got his shoe fast in the railroad track and tore his hoof loose more than half way around. Everybody said I would lose him. All I used was Reducine from the first, and in less than a month the horse was as good as ever. Thanks to your wonderful medicine, I am, Very truly yours,

C. H. MELKER.

R. F. D. No. 3, CLARE, Michigan, Oct. 17, 1918.

The Reducine Co.

Gentlemen:—Please tell me the present price of Reducine and send me an order blank. I got part of a can from my neighbor, Mr. D. Crouse, last spring, and used it on a terrible case of blood poisoning in my arm and face. I had wonderful results from its use, and I want to get another can to keep on hand.

Yours respectfully, J. C. WALSH.

VICTOR, New York, March 2, 1919.

The Reducine Co.

Gentlemen:—Immediately upon receipt of your letter of 20th ult. I started to use Reducine on my horse, and intend to follow the instructions religiously. I feel that I cannot refrain from expressing my gratitude for what, to me, was a miraculous cure of my colt with bog spavin and thoroughpin in the fall of 1915. He is now a fine animal—one to delight a true horseman's heart.

Yours truly, W. J. MANN.

REDUCINE

is kept in stock by leading druggists and horse goods dealers in every important town throughout the United States. The retail trade is supplied by the following wholesale firms, each of which buys of us in case lots and always has Reducine on hand. If your dealer does not carry Reducine, he can get it for you at once from either of the following wholesalers. Show him this list. Your retail dealer will furnish you Reducine at $5.00 per can or we will send It prepaid to anywhere in the United States on receipt of $5.00

DATES CLAIMED IN CALIFORNIA

Ventura County Fair, August 13th-16th.
State Fair, Sacramento, August 30th-September 9th.
Fresno District Fair, Sept. 30th to October 4th.
Riverside Fair, October 1st-4th.

There has been an attempt to bring about legislation that will tend to revive racing in California. Assemblyman W. J. Kenney has introduced a bill for state aid for county fairs. There is absolutely no question but that under the control of the District Boards of Agriculture county fairs tend to promote improvements in the agricultural productions of the locality where they are held and thereby add vastly to the wealth of the community and state. As an educational institution they accomplish much and not least is the social and neighborly spirit that results from such holiday gatherings. No county fair is complete without speed contests and Kenney's bill is aimed to promote horse racing in conjunction with the fairs and permit the pari-mutuel system of betting. There is another faction represented at the Legislature that is composed of men of influence and wealth who in the last few years have invested liberally and brought to California some of the finest thoroughbred horses in the world. They are alive to the opposition that will be made to any measure that will permit unrestricted betting and believe that the time will come when racing can be revived in California and made popular as it in many places in the east under legislative restriction that will keep it a clean sport. The Kenney bill has passed the committee and by the time it comes up the Legislature will probably have a better idea of just what each group desires.

THE HORSEMANS' ASSOCIATION

Over 200 horsemen attended the meeting held at Chicago last Wednesday, when the permanent organization of the Harness Horse Association was completed. President E. J. Curtin called the meeting to order, and in an enthusiastic address wound up with the telling fact that, while the new organization promises to be the best thing that ever happened for the harness horse game, yet if it never accomplished any more than it has already, it would be worth the effort and expense it has entailed. This seemed to be the keynote of all the speeches that followed.

Secretary Magnus Flaws presented his report showing that the Association had a membership of 320 covering about all of the states in the Union as well as Canada, New Brunswick, Ontario, etc. That outside of the grand circuit, which ignored the proposition, most state fairs and racing associations have subscribed to the views of the Horsemen's Association. So far the report shows $1600 receipts with disbursement $821.71, and a cash balance of $781.09.

The next regular meeting of the Board of Appeals of the American Trotting Association will be held at the Auditorium Hotel, Chicago, Tuesday, May 6, 1919, at 10 o'clock a. m., for the transaction of such business as may properly be presented to the board for its consideration. All new applications and written evidence must be received at this office not later than April 15, 1919.

WAKE UP MR. STALLION OWNER

(C. A. Harrison)

The February number of The Breeder and Sportsman came to hand today. It is a very attractive and interesting edition. I am pleased to see two elegantly bred standard bred stallions advertised as standing for public service. The Dixon owner offers Healani, sired by Zolock, son of the Great McKinney and out of that extremely fast mare Queen Derby by the great sire Chas. Derby. I never saw Healani, don't know his owner, but I do know that Healani is bred well enough to be a real race horse if trained and as to his blood lines for a sire, why his breeding is of the very best and a man who mates a well-bred mare to Healani and gives the resultant foal a good chance has every reason to believe that he is breeding for a champion, and I hope that every man who is game enough to breed his mare or mares to Healani will be the breeder of a World's Champion. Over at Sacramento I see the stallion Peter Klyo Bell, a son of the great trotter and sire of Peter McKlyo, this stallion is out of a mare by that good looking fast and game race horse, Iron Alto. Now I might write about the greatness of Peter Klyo Bell's blood lines till I covered an acre of paper but I won't for the merest novice on harness horse topics knows that Peter McKlyo Bell is one of the stoutest bred, most ultra fashionably bred and comes from the most wonderful sire ever foaled, Peter The Great. On his maternal side it's Electioneer McKinney and so on in lines that no critic dare question. So it is again reasonable to assume that any well-bred mare mated with this ultra fashionably bred young stallion should produce a foal that if properly developed should be a champion.

I note that Kenilworth, a once great race horse, and now a sire of stake horses is advertised. When it comes to a question of blood lines why Kenilworth is one of the greatest bred thoroughbred stallions living or dead. As a race horse he was superb, as a sire he is a success; as an individual he is all that the world asks for, being of perfect conformation, having great size (16 hands) and weighs 1250 pounds, so that a breeder who mates a mare to this great thoroughbred stallion can at least be well assured that the foal will be of elegant blood lines and will have size, good bone and substance. Such a stallion as Kenilworth is a credit and a valuable asset to California and should be well patronized.

Many men wonder why Peter The Great, Gen. Watts and Moko and all the other good sires are so well patronized and are so successful. Well I will tell the reason. Its first they are great horses, second they are well managed, third they are owned by business men who believe in publicity and get, and pay for it. In every issue of the Eastern horse papers we see tabulations and pictures and paid for statistics of what the get of a great stallion Peter The Great has done and are doing, likewise Gen. Watts and all the other notables. Those stallions are a positive success yet the astute owners don't stop the publicity—not on your life—they pay bright press agents to keep up the work of publicity and they also send their colts and fillies into the sales ring looking like young game cocks, ready for a battle and such men as Moody, Doc Curry, Theo. Macey and other colt experts go along to show the colts and believe me those Kentucky colt trainers and owners are some handlers and the greatest boosters in the world. Its boost every man's colt with those men and developing advertising and boosting your own and the other fellow's colts is why the Kentucky men are a success. Oh yes, those Kentucky men advertise. So when I see only two standard-bred stallions, one thoroughbred stallion and three pure bred Desert Arabian stallions I say to myself, this is all wrong. As every standard-bred stallion in California should be advertised in The Breeder and Sportsman, the horse paper of the Pacific Coast. Mr. Breeders, you are making a mistake. You are hiding your light under a bushel. Patronize your home paper, enthuse the editor and advertise your stallions. Enthuse the owners of mares to breed them. Don't die of dry rot. California is second to no state in the union as a place to raise race horses. Wake up, cheer up, get busy. Stay on the job.

VENTURA COUNTY FAIR 1919

TheVentura County Fair has tentatively selected the dates of August 13, 14, 15 and 16 for their fair at Seaside Park, Ventura, Cal., 1919. The officers of the association are Adolfo Camarillo, president; T. G. Gabbert, vice-president; T. Wm. McGlinchey, treasurer, and L. P. Hathaway, secretary. Secretary Hathaway is a live wire. He believes in advertising and is one of the best fair managers in the West. The Ventura County Fair Association has turned over to the Ventura County Red Cross its check for $1797.75, the share of the proceeds of the 1918 Fair contributed to the Red Cross as promised, and has money left in its treasury. Under the active direction of its efficient officers the association will give a good fair and race meeting this year.

Roy D. Mayes—Master Derby by Jim Logan, dam Ramona, Miss Logan P. by Jim Logan, dam Bally Pointer.

Farmer Bunch—Stockton Lad by Royal McKinney, dam Libby H.

F. R. Kohrs—Verna Dillon by Vernon McKinney, dam Miss Harris.

D. W. Wallis—Mary W. bred to Bondholder.

M. L. Woy—Alice W. by Expressive Mac, dam Strathalie.

PALO ALTO STOCK FARM

While attending the Von Herberg Holstein cattle sale at Kent, Washington, on St. Patrick's Day, I had the pleasure of meeting Mr. M. H. Tichenor, a man who formerly bought and sold many millions of dollars' worth of high class harness and saddle horses and was chief owner and manager of the great Tichenor Horse Sales Co. of Chicago.

Mr. Tichenor is now operating the Palo Alto Stock Farm, and has the great farm stocked with pure bred Holstein and Guernsey cattle and in addition to the pure bred cattle Mr. Tichenor, true to his old love, has a thoroughbred stallion and a small but select band of brood mares and is raising some first class thoroughbred horses and a few standard breds.

Meeting Mr. Tichenor was a pleasure to me and the fact that Bro. Tichenor is operating the great Palo Alto Stock Farm in California will be joyful news to legitimate horse breeders in California, and I will spread out a bit and say the whole world, for I believe that no better man for the horse interests, taken by large and great, could be in California than this same Tichenor, and if a racing bill and a racing commission is ever to be had, such broad-headed, clean and practical men as Mr. Tichenor and his associates are the sort of men who can get it, and when gotten, operate a racing commission in such a way that the public at large will have to say that it's a valuable asset to the state and live-stock interests in general.

I hope to again see blooded horses adorning the fields, barns and paddocks at good old Palo Alto, and I am sure the real sportsmen of California are glad to know that Mr. Tichenor is operating the great farm, from which came so many kings and queens of both the running and trotting turf; in the language of the late and great Roosevelt, "I am DElighted."

C. A. HARRISON.

ABSORBINE does not blister or remove the hair and the horse can be used during treatment. Wind puffs, strains, sprains, bursitis, bog spavin, capped hock, swollen tendons, all are promptly reduced by the use of this valuable remedy which should be in every stable. At druggists, $2.50 per bottle, or sent prepaid upon receipt of price. Special instructions for treatment of your case will be sent upon application.

Thoroughbred Matters

The Spanish racing season this year will commence on April 20th with the meeting in Seville.

With a view to the early resumption of racing in France, horses belonging to Mr. W. K. Vanderbilt which competed in Spain last year have returned to their old quarters.

J. H. Willman, manager of the Dupont Powder Co. at Seattle, owns Yukon, one of the best bred registered saddle stallions on the Pacific Coast. Yukon is a handsome black stallion and has style, action and all of the qualities that go to make up a high class saddle horse.

It is reported that an offer of $40,000 has been refused by Mr. P. A. Clark, of Boston, for his now three-year-old Dunboyne, which only cost him $1500 as a yearling. The colt is by Celt out of Workmaid, and last season he won three races of an aggregate value of $30,430. His principal success being his easy victory in the Futurity Stakes. Dunboyne will have a doughty opponent to meet in the big events of America this year in Eternal.

The newly formed Kentucky Jockey Club, which now owns the four big race tracks of this state, namely, Churchill Downs, Latonia, Douglas Park and Lexington, held a meeting here this afternoon and elected the following officers: Johnson N. Camden, president; Matt J. Winn, vice-president and general manager and Sherman Goodpaster, secretary and treasurer. Colonel Winn will be the general manager of all the Kentucky tracks and in order to devote his entire time to their management will be probably sever his eastern connections, although no announcement to that effect was made today.

The Kentucky Racing Association has 315 entries to the six stakes for the spring meeting. This is an average of 52½ entries per race. Last year the total was 214 entries to five stakes, an average of 43. The increase this year is eleven for the Ashland Oaks, four for the Canden Handicap, four for the Ben Ali Handicap, seventeen for the Idle Hour and twenty-one for the Hianta Stakes. Robert L. Baker, general manager predicts a great season for horse racing in Kentucky this year and that the stakes for Louisville and Latonia will receive a big entry list.

Several of the Kentucky Derby candidates are quartered at Oaklawn Park, Hot Springs, Arkansas and among them is the antepost favorite Eternal. Interest in the big event is at a high pitch among turf followers and every move of the eligibles closely watched. Naturally Eternal has the largest following and his racing work indicates that he justifies it. Willis Sharpe Kilmer's turf candidate Mormon gave indications of being a racer that will go by his victory on the opening day which was a good performance for a horse making its first start of the year, getting away as he did from behind and going away in front at end of the three-quarters of the race.

1919 FOALS AT WIKIUP TO DATE

Jan. 12—B f, Disguise, dam Mauretania.
Feb. 3—Ch c, Friar Rock, dam Bold Girl.
March 4—Ch c, Disguise, dam Make Good.
March 12—Ch c, Friar Rock, dam Sweet Marjoram.
Feb. 18—Blk f, Disguise, dam Imp. Santa Malta.
March 3—Ch c, Friar Rock, dam Rose of Gold.
March 19—B c, Disguise, dam Las Flores.

CALIFORNIA HORSES TO RACE IN KENTUCKY

Two of the most prominent of California's turfmen and thoroughbred horse breeders are to send their stables to Lexington for the Kentucky Association spring meeting, which opens April 24. They are John H. Rosseter and Edward Cebrian. The Rosseter horses are at Hot Springs in charge of Trainer Charles J. Carey and the Cebrian string, which has been racing at New Orleans, has been sent to Hot Springs in charge of Trainer Hugh Farrel.

Rosseter has nominated a couple of maiden three-year-olds, Farmingdale and Ragarock, for the Blue Grass Stakes, and the four-time winner, Passing Shower, for the Ashland Oaks. For the Idle Hour Stakes, for two-year-old colts, he has named Madrone by The Manager-Fancywood, and Squire Charley by Squire Jack-Berrill's Choice, while for the Hinata Stakes, for two-year-old fillies, he has entered Pappoose by Von Tromp-Make Good; Wedding Cake by Rock View-Latona.

American Ace, the three-year-old son of Von Tromp and Rosegal, is the brag horse in the Cebrian string, as indicated by the fact that he has been named for the Blue Grass Stakes, the Camden Handicap and the Ben Ali Handicap. Three of Von Tromp's two-year-old sons—Ace of Trumps, The Pirate and The Leopard—have been entered in the Idle Hour Stakes, and one of his daughters, Frivolty has been named for the Hinata Stakes.

FOALS AT THE NEVADA STOCK FARM

George Wingfield's Nevada Stock Farm, home of the imported horses Honeywood (son of Polymelus and Honey Bird by Friar's Balsam), and Atheling (son of Desmond and Wood Daisy by Cyllene), reports the following foals:

February 10th, Chestnut filly by Honeywood-Lady Vera by Woolsthorpe. Mare bred to Atheling.

February 13, Bay colt by Atheling-Thistle Belle by Knight of the Thistle. This youngster is the first of the get of Atheling and his mother was a race mare of merit, being winner of nearly one hundred races.

February 18, brown colt by Honeywood-Lady Trinity by Star Shoot. Mare bred to Atheling.

February 25th, bay filly by Disguise-Maid of Avon by St. Avonicus. Mare bred to Atheling.

Mr. Wingfield is very enthusiastic over Atheling, and says he believes he is the finest looking thoroughbred in America today. He stands 16 hands 2 inches high and weighs 1305 pounds. Is as sound as a dollar, not a pimple on him, and his legs seem as hard as wood. Mr. Wingfield thinks him one of the best, if not the best, bred son of Desmond.

Other mares at the Wingfield farm to foal shortly are St. Aelwena by Chaucer-Santa Regale by Royal Hampton, with foal by Disguise; Celesta (holder of world's record for one mile and a sixteenth in 1:42¾), by Sempronious-Rezia by Meddler, next dam Urania by Hanover, to Atheling.

The Nevada Stock Farm people had the misfortune to lose a fine brown colt out of Fairy by St. Frusquin-Cretan Belle. This colt was by Honeywood and died shortly after being foaled. Fairy is the dam of For Fair and Jim Heffering and naturally Mr. Wingfield feels this loss keenly.

HISTORY OF SWEEP

Unusually interesting is the fact that Sweep, the son of Ben Brush—Pink Domino, by Domino, stands at the head of those sires that produced winning two-year-olds in the season of 1918. For the history of Sweep is a veritable equine romance. In the first place, he was foaled at the famous Castleton Farm of the late James R. Keene in 1907 and his dam being by Domino he is a typical descendant of that most marvelous of all American racing strains developed by this prominent turfman. Sweep had a splendid racing record. As a two-year-old he won the rich Futurity and the National Stallion race, and, developing in a superb manner, he later achieved victory in the Belmont Stakes, the Carleton Stakes and the Lawrence Realization. Sweep was the leading money winning two-year-old of 1909. In 1915, at the Keene dispersal sale, he was bought by Dr. J. C. Carrick and J. S. Barbee for the comparatively small sum of $17,500 and was at once placed in the stud. Failing to attract much attention with only one winning two-year-old to his credit in 1916, the following year he surprised all the breeders by springinig into the lead with nineteen two-year-old winners, but even with that number of successful two-year-olds he failed to figure prominently in the winning stallion list that includes the total representatives of each stallion. What made his record the more striking was that with these nineteen winners he headed the famous Star Shoot, which, in 1916, had made a new American record by siring no less than twenty-seven winning youngsters, the quality of which was shown by the fact that twenty-three went on to win as three-year-olds.

Not only did Sweep in 1918 head the list of sires producing the largest number of winning two-year-olds, but he also headed the list of money winners when his youngsters realized the magnificent total of $97,947, of which, however, it must not be overlooked that J. W. McClelland's marvelous speed merchant Eternal, dam Hazel Burke, accounted for $56,137. Such is the record of Sweep, which may be said to stand almost alone in American turf history. It should be noted that other stock of the virile strain evolved by the late Mr. Keene also lined up well, for Arthur B. Hancock's Celt, by Commando—Maid of Erin, by Amphion, was second in money winnings with $47,706, of which Burton S. Castles' good colt Dunboyne, dam Workmaid, scored $32,030, while J. H. Rosseter's Disguise, by Domino—Bonnie Gal, was seventh with $20,156, of which Harry K. Knapp's Elfin Queen, dam Sprite, won $15,936 before she went amiss in midsummer with a troublesome skin disease from which, I am glad to say, she has entirely recovered.

As somewhat of an aside from the main topic it may not be uninteresting to recall that shortly before Domino was about to be retired to the stud, Mr. Keene purchased a number of finely-bred English mares at a cost of nearly a quarter of a million dollars and when at his invitation I had inspected them he casually asked my opinion. After I had given this I asked if I might make a suggestion, which was that he should take a similar amount of money and buy the best stallion he could procure in the world. For several minutes he stood in his characteristic way with his head bent forward, poking the dust at his feet into a heap with his cane, and then, suddenly shooting a sidewise glance at me, he said tersely: "I'll breed one." And he undoubtedly kept his word.

So of the hundred and forty-five sires of winning two-year-olds represented, the first two on the list of money winners are owned by men who breed for sale and not for their private racing purposes, and this also is the case with Rome Respess' Dick Welles, by King Eric—Tea's Over, by Hanover, the sire of Billy Kelly, which won $33,783, and also in the case of John E. Madden's Ormondale, by Ormonde—Santa Bella, by St. Serf (sire, dam and grandsire all English stock), which two sires stand respectively third and fifth on the list of large money winners. And all of these, let me repeat, are owned by public breeders.

This, in my opinion, is a remarkable illustration of the steadily increasing democracy of the American turf. It negatives, once and for all, the moss-grown idea that the so-called "private stallions" owned by rich men practically controlled the situation and that outsiders, who had not the fine mares and the privilege of breeding them to these exclusive stallions, stood little chance of winning any great number of the rich stakes for two-year-oolds in one year, or of the corresponding valuable events for three-year-olds the following season. In those circumstances it was rather hard for even a wealthy man to break into the charmed circle unless he formed his own stud and—after being lucky enough to obtain a fine sire and good mares—waited several years before he could so much as hope to stand on an equality with the "private stallion" clientele of a decade or more ago. Today, as shown in the case of the leading two-year-olds in the past two years, Eternal, Dunboyne, Billy Kelly, Sun Briar and Papp, it is possible to go to the open market and purchase high class stock that is capable of heading or standing high on the list of winning owners of the corresponding year.

Quite naturally there arise the questions of what has happened to the once important private farms, what was the secret that apparently was buried with James R. Keene, and why are the best yearlings of today in the hands of those who breed to sell rather than in the hands of those who breed to race as in days gone by? As an illustration of what this means, let us look back to the time when the Belmont stable was in its prime as the finest in the land. In 1888, of twelve horses ten were home-bred; in 1887, no less than twenty-one of the twenty-three raced were home-bred; in 1890, when the late August Belmont headed the list of winning owners, it was conceded that Potomac was the best colt and La Tosca was the best filly in the United States, and, by most good judges, it is believed that had he lived through 1891 his home-breds would have taken every great stakes and made an exceptional record with the great two and three-year-olds that would have raced under his silks. As it was, the animals representing the Nursery Farm, which by his decease passed into other hands, won no less than $250,000, and under his keen judgment and able management probably would have exceeded this vast amount.

Good judgment, of course, is one of the great foundations of racing success, and money plays the second fiddle. Linked together as an harmonious whole the two made it possible for the late William C. Whitney in his day and A. Kingsley Macomber in the present day to burst like comets across the racing sky and by the purchase of animals which later fulfilled the highest expectations held regarding them, both Mr. Whitney and Mr. Macomber were, at a single bound, as it were, placed in the front rank of America's prominent turfmen long before either of them had time to breed a single foal to race under their colors. Yet today a majority of the stock raced by Harry Payne Whitney is from the stallions and mares selected by his father, and within a measurable time Mr. Macomber will be racing colts and fillies he has himself bred in California. And it must not be overlooked that it is to the men who breed their own horses that one must look for the higher development in racing interest. Not only are there produced two-year-olds which each season mark the value of the sire and the dam indelibly on the most important page of turf history, but there is also the long list of thoroughbred stock that is not subjected directly to the racing test, and these are the hunters, the cavalry and polo mounts, the high-class saddle horse strains and the innumerable outcrosses that make the thoroughbred so valuable. This is totally apart from the indescribable pleasure that a man feels when, having planned the scientific "nick"—as it is called—that shall produce the wonder working foal, he sees the said foal canter home a winner under the colors of the man who bred him.

This is one sweet drop in the racing cup that is, perforce, denied the man who in the open market buys his yearlings or his two-year-olds ready made. Using the same good judgment he may, with luck, head the winning list and have in his possession the scintillant stallion with which to found a breeding establishment, but whether he elects to do so, or to continue to buy, year after year, his ready-made racing material, his chances for success for greater and brighter than ever has been the case in the turf history of the United States.

Notwithstanding these basic changes regarding the public or private ownership of the stallions, or under whose colors the youngsters may race, the vitally important fact is that the crack two-year-olds of each successive season are still furnishing magnificent sport, and the best of it all is that the door to success is wide open to anyone who cares to enter. This, it will be seen, is a different situation to that which existed a few years ago and there is not the slightest doubt that the change is good and sufficient cause for nation-wide congratulation.—W. P. Pond in The Spur.

COMMANDER ROSS' HORSES IN TRAINING

Commander J. K. L. Ross has assembled at Yarrow Brae Stock Farm, near Laurel, Maryland, one of the greatest and most expensive collections of race horses that ever went into winter quarters in this country. Commander Ross is an enthusiastic horseman and it is doubtful if any one ever assimilated more enjoyment from his turf experiences than he has. During the time he has been concerned in racing, which is but a few years, he has been a liberal buyer and he paid big prices. The few times when his horses have been beaten he took defeat with the spirit of a true sportsman. He has unbounded confidence in Mr. Bidwell, who is manager of his stable and who has gathered about him a string of horses comparable with any other in the country.

The following is the list of horses owned by Commander J. K. L. Ross and being trained by Mr. Bidwell:

Four-Year-Olds and Over

Early Light, b g, 9, by Peep o'Day—Miss Marconi.
Sixty-four, b g, 9, by Migraine—Merry Papoose.
Uncle Bryn, br h, 7, by Bryn Mawr—Aunt Belle.
Damrosch, br h, 6, by Rock Sand—Dissembler.
Dramaturge, ch g, 6, by Ethelbert—Drama.
Cudgel, b h, 5, by Broomstick—Eugenia Burch.
Monomoy, br g, 5, by Bryn Mawr—Winifred A.
Priscilla Mullens, b m, 5, by Armeath II.—Princeton Girl.
Boniface, b c, 4, by Transvaal—Cerina.
Bonnie Dance, b c, 4, by Lomond—Lawn Dance.
Canso, b c, 4, by Lemberg—Wife of Bath.
Corn Exchange, b c, 4, by Buckwheat—Glimmerglass.
Foreground, ch c, 4, by Fugleman—Sketches.
Hilhampton, ch c, 4, by William Rufus—Estate.
Motor Cop, b c, 4, by Uncle—Xarco.
Wigstone, b c, 4, by Bayardo—Blue Tit.

Three-Year-Olds

Billy Kelly, b g, 3, by Dick Welles—Glena.
Czardom, b c, 3, by Royal Realm—Zoara.
Dottie Vandiver, ch f, 3, by Trap Rock—Hortensia.
Milkmaid, b f, 3, by Peep o'Day—Nell Olin.
Roselyon, br c, 3, by Sunstar—Desmond's Rose.
Sir Barton, ch c, 3, by Star Shoot—Lady Sterling.
Sweeplet, br f, 3, by Sweep—Eyelet.
War Marvel, ch c, 3, by Spanish Prince—My Dolly.
War Pennant, br c, 3, by Jim Gaffney—Maltha.
Welshman's Folly, br c, 3, by Llangibby—Lady Mischief.

Two-Year-Olds.

Bryngar, by Garry Herrmann—Brynwood.
His Choice, by Hessian—Melee.
Irish Dancer, by Celt—Ballet Girl.
King Thrust, by Thrush—Silent Queen.
Misty Bryn, by Bryn Mawr—Misty Morning.
Princess Myrtle, by Prince Ahmed — Myrtle Marion.
Royal Jester, by Black Jester—Primula II.
Smite, by Prince Ahmed—Smirk.
Trench Motor, by Flint Rock—Topiary.

THE HILDRETH STABLE

Samuel C. Hildreth will come to the races this year without a two-year-old, but what he lacks in that department will be made up in older horses. Of these he has thirteen, including one, Mad Hatter, the property of Major August Belmont. This appears to be the only horse that will carry the Belmont colors this year. It is a powerful stable that will be presented, every horse being well up to the average as horses go.

There is Stromboli, which has been a handicap horse in the upper division for four or five years, and though eight years old promises to come back to his labors in healthy condition.

Next in importance is the good three-year-old Purchase, for which Mr. Hildreth has been offered huge sums, but he listens to none. He has another three-year-old, Cirrus, which gave such a good argument with War Pennant at Empire City.

Following these comes Sunflash II., winner of many races, in which he beat good handicap horses, Lucullite is also in the barn. This is the horse that showed wonderful two-year-old form, but received an injury at Saratoga which interfered with his career.

Out the Way is another which will surely earn brackets. He showed at the fall meeting at Empire City he is better than the average by beating such horses as Star Spangled and Ultima Thule. Following these come Lord Brighton, Regal Lodge, Arrah Go On, Poacher, Princeps and Mad Hatter, all of which will make their opponents step along in their respective divisions. There is not a bad horse in the band. Another addition to the establishment is Eddie Taplin, who will do the saddle work when the weights permit.

Following is the roll call of the S. C. Hildreth stable:

Stromboli, ch g, 8, by Fair Play—St. Priscilla.
Sunflash II., br h, 5, by Sunbright—Napthalia.
Alibi, blk c, 4, by Tracery—Amicitia
Arrah Go On, br g, 4, by Sweep—Ellangowan.
Lucullite, br c, 4, by Trap Rock—Lucky Lass.
Out the Way, br c, 4, by Peter Pan—Sweepaway.
Poacher, ch g, 4, by Star Shoot—Partridge.
Princeps, ch c, 4, by Fair Play—St. Priscilla.
Regal Lodge, br g, 4, by Reppo—Oriana.
Cirrus, b c, 3, by Tracery—Morningside.
Lord Brighton, ch c, 3, by Ballot—Miss Crittenden.
Purchase, ch c, 3, by Ormondale—Cherryola.
Property of Major August Belmont:
Mad Hatter, br c, 3, by Fair Play—Madcap.

DATES FOR BELMONT PARK STAKES

Following is the schedule of stake races to be run at the Belmont Park spring meeting:

May 22—New York Steeplechase, Metropolitan Handicap.
May 23—Garden City Handicap.
May 24—Fashion Stakes, Withers Stakes.
May 26—International Steeplechase.
May 27—Bayside Handicap.
May 28—Hollis Selling Stakes.
May 29—Freeport Handicap.
May 30—Juvenile Stakes, Toboggan Handicap.
May 31—Meadowbrook Steeplechase, Ladies' Handicap.
June 2—Searingtown Handicap.
June 3—Bouquet Stakes.
June 4—Douglaston Handicap.
June 5—Grand National Steeplechase.
June 6—Elmont Handicap.
June 7—Amateur Cup, Suburban Handicap, Coaching Club, American Oaks.
June 9—Keene Memorial Stakes.
June 10—Plattsdale Handicap.
June 11—Belmont Stakes, Harlem Selling Stakes.

LAST CHANCE FOR GELDINGS

The last stand of the gelding is the Kentucky Derby, the only race for three-year-olds of the best class that will admit him to participation this year, even bids fair to be a memorable one, for Billy Kelly, the superb gelding, the greatest unsexed two-year-old American racing has developed since Salvidere, the juvenile hero of 1908, whose prospective meeting with Eternal, last year champion colt, invests the renewal of Churchill Downs' great race of May 10 with unwonted anticipatory interest, is not the only gelding of good class preparing to take part in it.

Ten or a dozen two-year-old geldings have been named for the Derby, and of this number Harry Payne Whitney's Blue Laddie, Cornelius M. Garrison's Be Frank, B. J. Brannon's pair, Colonel Livingston and St. Bernard; Colonel Ral Parr's Esquimau, Frank D. Weir's Toto and Mrs. Walter M. Jefford's Kerensky, to mention no others, are horses of high promise. All have speed of the highest order, all have shown under colors some disposition to go on.

On demonstration form the best of the seven is Colonel Livingston. This prepossessing son of Handsel and Axis, she a fine daughter of Tom Cromwell and Plumeria, won $19,623 last year, which was something to boast of. After taking the Harold Stakes in Kentucky in the spring he went up to Saratoga and finished third to Billy Kelly and Lion d'Or in the Sanford Memorial, and third to Billy Kelly and Sweep On in the Grab Bag. Then he came back to Kentucky to win the Breeders' Futurity and the Fort Thomas Handicap. He showed that he was something of a manager of weight by shouldering 128 pounds in the Fort Thomas' to Linden's 112½ and Sennings Park's 117. And later still he beat that reliable performer of maturer years, Opportunity, in an overnight race at three-quarters of a mile.

Colonel Livingston is good to look at and an easy horse to manage. He comes honestly by his quality. No three-year-old in the country has better connections. Axis is a half-sister to Sir Wilfrid, a good class horse of his day, and the sire since he took up stud duty at Henry T. Oxnard's Blue Ridge Stud in Virginia of Trojan, a Futurity winner; Headmast, and other horses of note. A crime against thoroughbred production was committed when Colonel Livingston was gelded. He should have been left entire to carry on the blood of Hanover, which is threatened with extinction.

St. Bernard, Colonel Livington's stablemate and possible running companion in the Derby, did not make so much of a reputation as a race horse. Nevertheless, there are possibilities in him. He is the son of Ivan the Terrible and Beatrice K., she a daughter of Handsel and Miss Eddie, by Fordham, a horse of robust physique, unusual speed and apparent stamina. He is the best son of Ivan the Terrible that he raced since Hodge was in his heyday, and Mr. Brannon believes that he will go on as well as the next man's horse.

Billy Kelly, of course, is the gelding that will come this way from the east to start in the Derby, but good class horses are both Be Frank and Blue Laddie, one of which is wintering at Mount Washington, near Baltimore, the other at Mr. Whitney's Brookdale Farm in Monmouth county, New Jersey, whence came Regret a few years back to win a Kentucky Derby and upset the forty-year tradition that accomplishing such a feat was beyond the powers of any three-year-old of the softer sex. If Blue Laddie, a half English, half American son of Cylgad and Blue Girl, the champion American two-year-old filly of the season of 1901, had stood up through the season and raced to the promise of his Havre de Grace, Pimlico and Belmont Park spring form, racing folk, possibly, would be talking of him now as they are talking of Billy Kelly.

A horse of unusual size and bone and splendid balance, Blue Laddie matured quickly and won three of his first four races. In his first race he played with Esquimau, a two-time winner at the time. Then he made a show of James W. McClelland's The Wanderer—a $10,000 yearling—in the Pimlico Nursery, and he would have won the Spring Juvenile—another Pimlico special—if he had not been left at the post.

His last winning race was scored at Belmont Park over Hannibal Richard T. Wilson's Olambala colt, which was destined a few days later to win the Keene Memorial, and at Saratoga in August to canter home first in the Special, the most sportsmanlike of American races. Blue Laddie, with Cresson as running mate, started in the Special. But they should not have. Both were lame. Neither was ready. They started because Harry Payne Whitney wanted representation. That James Rowe believes Blue Laddie will train this year is evident from the fact that he has engaged him liberally in stakes for three-year-olds and over to be decided through the coming racing season, as he has the promising colts Bayard and Vindex.

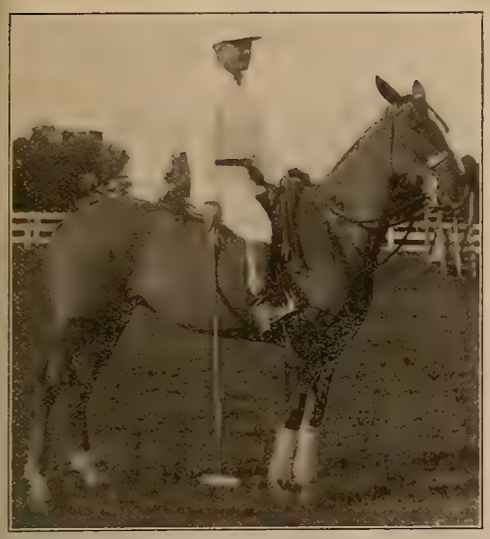
Be Frank, a son of Sir John Johnson and Frankness, a half brother of Straight Forward and a near relative of the Bowie Cup winner Everest, is nearly as highly thought of in Maryland as is Billy Kelly. He is a sixteen-hand giant of rugged construction and splendid underpinning. After making a new record for five and a half furlongs at Saratoga in August, in a race in which he beat the fleet-footed Tascaloosa, Be Frank went down to Maryland and won the Potomac Handicap, Laurel's best mile special for two-year-olds, after being left at the post. He wound up the season by beating sprinters of good class in a six and a half furlongs dash at Bowie. Sprinting is not Be Frank's game, either. Be Frank is getting a special preperation for the Derby and he is training handsomely.

Kerensky, a son of Plaudit and Resolt, and Esquimau, a son of Theo. Cook and Northern Girl, were good geldings throughout the year. Esquimau's career last year was somewhat like Tippity Witchet's of the year before. He began at Bowie on the first of April and wound up at Bowie in November, beating better horses than anyone dreamed he might vanquish earlier in the year. He wintered in Virginia and is training at Pimlico. Toto, a son of Hippodrome and Tripping, won six races last year, finishing a creditable year by trimming Linden at Latonia. Frank Weir wintered him in Cuba and thinks mighty well of his Derby hand.

STAR HAWK

Mr. A. K. Macomber's good stallion Star Hawk by Sun Star, dam Sweetfinch, winner of the Lawrence Realization and St. Leger Handicap of 1916 appears to have fully recovered his soundness. He is being given light work at San Jose and shows every evidence of being able to stand training and racing this year. It was not Mr. Macomber's intention to race Star Hawk after he went lame but to retire him to the stud. However, the horse having recovered he was encouraged to enter him in this year's stakes and he will probably be a formidable contender for the Kentucky Handicap. The article that appeared in some of the eastern papers that the horse was in training at Belmont Park is a mistake as he is at San Jose.

Mr. Macomber has leased Elmwood Park from Chas. T. Boots and has at that establishment twenty-eight brood mares and is interested with Mr. Renshaw in a number of other brood mares that are being quartered at the same place.



$200,000 PAID FOR A STALLION

It is reported that the champion Argentine race horse Botafogo has been sold by Senor Diego Alvear to the well-known owners and breeders Benito Villaneuva and Martinez de Hoz for $200,000. Senor Alvear reserving the right to send two or three mares to Botafogo during his first two seasons and that the horse is not to leave the country. There is no doubt about his pre-eminence over all his contemporaries in South America, for he was never beaten but once, and then, he was quite off. All the same they are bold speculators who have stobd $200,000 on him as a stallion, for he will be an exception to the almost universal rule if he succeeds, inasmuch as he and his sire before him were bred in that country. It is undeniable, however, that Old Man, the sire of Botafogo, was a champion sire; but he came from imported stock on both sides, his sire being Orbit (by Bend Or), winner of the Eclipse Stakes, and his dam, the Frenchbred Moissonneuse, by Dollar.

Korea, the dam of Botafogo, is an imported mare, although from the United States to the Argentine. She is by Raeburn—Ulla, by Barcaldine, her dam, Springwell, by King Tom—Wildflower, by Springfield—Marie Galante, by Macaroni. This is a good branch of No. 2 family. Korea, with a number of other mares and bloodstock, was exported from Kentucky to Buenos Aires by Thomas Carson in 1910 during the anti-gambling troubles, and she, with a filly-foal by Ben Strome at foot, was sold to the Stud El Moro for about $2,500 by Messrs. Bullrich at Palermo. The price paid for Korea and foal was the highest in that catalog, which included also the Cesarewitch winner Scintillant.

J. M. Thomas of Port Townsend, Washington, owns a handsome and very promising two-year-old filly by Cavalier Gale 2:08¼, dam Nella J. 2:14 by Jayhawker, grandam Hazel Patchen 2:13¼. He calls this filly Hazel Gale and she has not only good looks but has lots of pep and is greatly admired by all who have seen her.

POLO AT DEL MONTE

G. Maurice Hechscher

The Del Monte polo season opens Saturday, March 29th, with the first tournament and runs, until Sunday, April 13th. During that time there will be ten matches with play on Saturdays, Sundays, Tuesdays and Thursdays of each week.

To start the ball rolling, Burlingame and San Mateo come together the first day in a junior event. These junior events are open to all teams of four whose aggregate handicaps do not exceed twelve goals. Then on Sunday comes the big senior match with Del Monte lining up against Coronado. The rest of the first week will find contests in the junior, novice and consolation events.

Five sets of cups are at stake—the Del Monte, W. H. Crocker, Junior, Consolation and Novice. The prospects are that five, and possibly six teams will be entered. They will be the Del Monte, Coronado, San Mateo, Burlingame and a four to represent the United States Army. A team from Vancouver, B. C., has also written in asking about conditions of the tourney and an entry may be received from that quarter.

Some crack players from the East and the best on the Coast will be seen in action on the field. It will be a treat to watch Malcolm Stevenson, the nine-goal man, in his daring riding and accurate shooting. Colonel Max Fleischmann, Reggie Weiss, Major Ross and Alvin Untermeyer are others who will get into the fray against the poloists well known in Northern California.

Starting the first of the week the polo players and the polo ponies will start arriving from Coronado. There will also be a big following of enthusiasts from many quarters. The famous Indian sport has been revived with a bang this season and California is getting on the map as the winter and spring polo center of the country.

Fred A. Purner, sports manager at Del Monte, has returned home after taking in the first matches in the South, and he was impressed with the large crowds and enthusiasm which greeted the first serious competition of the season. Polo has become not only a fashionable but a popular sport, and spectators view the game with great enthusiasm and interest, as by their increased knowledge they are able to appreciate the fine points of the game. It is essentially a sport where the players must be men of leisure and wealth and who are willing to pay good prices for the best ponies, two thousand or even twenty-five hundred dollars not being too great a price for a cracker-jack polo pony. This should offer a profitable field for owners of pure bred Arabian stallions who are capable of selecting mares to breed to that will produce good polo ponies.

A GREAT SADDLE MARE

Mr. Geo. E. Plummer of Seattle is an enthusiastic horseman and owns the prize winning chestnut saddle mare "Joan Sawyer," by Bohemian King, dam Lady Dare. She is one of the most ultra fashionably bred saddle mares ever brought to the Northwest. She came from the famous Long View Farm, Lees Summit, Mo., and won the blue ribbon at Denver, 1917, and firsts at Tulsa, Okla., 1917, Chicago, Ill., 1916, Topeka, Kans., Illinois State Fair, Iowa State Fair, Burlington State Fair and was the champion three gaited mare at the show in Mexico, Mo., and other places. She is not only bred in the purple, beautiful to look upon, but has the intelligence and disposition that makes her highly prized by her owner and greatly admired by all who have seen her.

Trainer Harry Squires, the man who brought out Hal Boy 2:01 and sold him to Lew Childs for $3000 for Ed. Peterson, died at Canby, Oregon, on the 11th of this month. The last horse Mr. Squires raced was Lena Patch 2:07¼ by Oregon Patch out of the same dam as Hal Boy. Mr. Squires leaves a widow and was well known as an excellent trainer and a man of many good qualities.

EARLY RACING IN CALIFORNIA

(Special Correspondence)

The second decade was ushered in at the State Fair in a fast seven heat race for a purse of $1,000. The starters, all except Blackbird, were California bred. They were F. F. Low, by St. Clair, named after the Governor; Primus, the sire of Magdallah; Regulator by Signal; Harvest Queen, whose race with Venture created a sensation; Alexander, by George M. Patchen, dam by Bellfounder, grandsire of the pacing wonder Yolo Maid 2:12½, and the imported stallion Blackbird, by Old Blackbird.

The first and second heats were won by Low with Venture second. Alexander took the third and fourth heats, driven out by Low, and Blackbird the last three heats with Low close up. The time was 2:34¾, 2:36½, 2:35¾, 2:39, 2:37, 2:41, 2:42.

Blackbird was imported to California to improve the stock and was first owned by J. M. Reavis of Sacramento. He was not a success, however, either as a sire or a trotter. His only good son was A. W. Richmond, and as a trotter the native bred were soon throwing dust in his eyes. In his race recorded above he was driven by James Eoff and in the following year, 1871, with Dan Dennison in the sulky, he trotted in 2:28. In a trot with George Treat, Ella Lewis and Mary Davis, 1873, the judges called it a dead heat with Treat. Blackbird then stepped the mile in 2:22, and made the coast stallion record.

The first mare to beat the record of May Queen 2:29 was Lady Blanchard, a grand daughter of General Taylor. In 1872 at the State Fair she took straight heats from Addie Lee in 2:39, the best time. Three days later she distanced the entire field of five starters, trotting in 2:26. This shutting out of all competitors was rather peculiar, and later would have been considered very discourteous by the other drivers.

The greatest little mare on the California turf in that day or in this was the game little trotter May Howard. She was sired by Captain Hanford, dam the McCommick mare. Her owners kept her speeding in three in five, two mile and five mile heats, single and tandem, as long as she was within the money. In 1873 she took first money in a trot with Highland Mary and others after trotting a dead heat with Mary in 2:36½. The same year for a purse of $1,000 she took straight heats, defeating Sam Purdy and Westfield, her best time being 2:24½. In 1874, trotting with George Treat and others, she trotted a third heat in 2:25½, winning the race. Treat took the first two heats in 2:31½, 2:28½.

Tecumseh, imported to this state in the early 50's, was presumed to be a trotting sire. His only showing was Pat Hunt, who took straight heats in a very singular race because of the varying of the time a quarter of a second only. Starting with Doty Coquette, Startle, Dutchman, Cairo, Nellie R. and E. H. Miller, he trotted in 2:26½, 2:26½, 2:26¾.

Sam Purdy, by George M. Patchen, dam Whisky Jane, came into the spotlight in 1872. He was bred by Wm. Hendrickson and named after the Democratic politician and ex-Lieutenant Governor. That year he was entered at Sacramento in a free for all, Occident and Harvest Queen barred. He won out from May Howard (Dennison) and Westfield (Pat Farrell), May taking the first heat in 2:23¼. The State Fair directors in 1874 put up a purse, the largest in State Fair history, save one. It was a free for all stallion trot, 3-5, for a purse of $5,000, $3,500, $1,000, $500, provided Occident and Sam Purdy start. Occident, then owned by Governor Stanford, was the attraction and he drew 10,000 people to the track. Of course so speedy was Occident with his time record 2:16½, would take first money, but there is many a slip. The wonderful gelding took the first two heats and Sam Purdy the big end, Blackbird third, time 2:21, 2:24½, 2:25¼, 2:28¾, 2:28. Later Sam Purdy was sold to James Keene, the New York stock broker, for $50,000, and taken East, made a record of 2:20½.

The history of Occident reads somewhat like a fairy tale. That a gelding should be taken from a peddler's wagon on the streets of Sacramento and under the skillful training of James Eoff trot in 2:16¾ and 2:18¾, seems at least remarkable. These were exhibition miles made September 17, 1873, over the Sacramento track. Foaled in 1863, Charles Marvin learned after much labor that he was sired by Doc Morgan, he by St. Clair. His first ability to trot was noticed by a trainer named Elred. He obtained possession of the horse and developing his speed he was sold to Governor Stanford for $5,000, and named Occident, and was given into the hands of J. L. Eoff.

Old timers will remember the coming to California in 1872 of the famous mare Goldsmith Maid, driven by Budd Doble, and Lucy, piloted by Orrin Hickok. They gave exhibition races for the gate money and crowds attended each race. The Maid in every race won out and her best coast time was 2:17½. A match was made October 16 between the Maid and Occident. Eoff believed that he could beat the Maid if Occident would keep his feet. The Maid trotted the heats in 2:20½, 2:20½, 2:22. Occident was up in the air. In trotting with Lucy, October 26, the result was as in the former race, Lucy trotting under the wire in 2:25½, 2:20, 2:22. Large crowds attended these races, they paying from 50 cents to $2.00 admission.

Smuggler 2:15¼, the world's champion stallion, was brought to California in the fall of 1878, by its trainer and driver, Charles Marvin. Here the

...success

Willis H. Parker, the trainer of Vernon McKinney 2:01½, he driving him in 2:05 over the Stockton track.

Why Judge Fullerton was brought to California is a puzzle. Not as a money winner surely. He was outclassed in almost every race by the "natives," although he was in the great Eastern races with Goldsmith Maid, Smuggler and Bodine. Sired by Edward Everett, he was a stallion of very peculiar markings, a dark chestnut with four white legs and a blaze face. In charge of Orrin Hickok and then 11 years of age, he came here with a record of 2:19½. Starting at Oakland in September, 1878, he was beaten three straight heats by Col. Lewis by the trunner Rifleman. Occident was second and the Judge third. The Colonel, although a half breed trotter, lowered the state record heat and heats in 2:18¾, 2:19½, 2:21½. The Judge redeemed himself at Stockton, however, by again lowering the record to 2:18¾, 2:19¾, 2:19¾, Nutwood second.

In that year John Splann, the great Eastern driver, came to the coast with Rarus and the pacer Sweetzer, and gave exhibition miles. Rarus at Stockton with running mate trotted in 2:16½ and alone in 2:14½. Sweetzer paced three heats in 2:16¼, 2:16½, 2:17½. The big crowd paid a $1.00 admission and thought it a wonderful performance. It was for a midwinter day, December 12th.

Nutwood, the sire of Manette, the daw of Arion, the fast mare Manon, the speedy trotter Lockhart 2:08½ and the pacer Manager 2:06¾, both Eastern bred, was brought to this state by his owner and driver, J. W. Knox, in 1877. Then seven years of age, he was sired by Belmont, dam Miss Russell, she by Boston, the great four mile runner. His first race was at Oakland September 21, 1877. It was a good field of starters, Frank Ferguson, Dirago, Cairo by Chieftain, Lou Whipple's Hambletonian, Gov. Stanford by John Nelson, Nellie Patchen by Alexander, and Sission Girl, owned by Charley Sission, the popular stage proprietor.

Frank Ferguson took the first two heats in 2:26½, 2:26, the fastest of the race. Nutwood the last three heats, his best time 2:26½. The next year over the same track Nutwood met Dirago and the Los Angeles horse Tommy Gates. They made Nutwood trot in 2:25, 2:24, 2:25. At Sacramento there was a purse of $1,000 hung up for Nutwood. Tommy Gates by "The Moor," Pat Hunt, Doty and the Eastern horse St. James. The race was hotly contested, Nutwood taking the race and Tommy Gates, driven by his owner, L. J. Rose, taking the third and fourth heats in 2:24, 2:24½, 2:27¾, 2:26½, 2:26½. Nutwood was beaten at Oakland in 1879 by Graves, the best time 2:22½. Two weeks later, September 13, at Sacramento, there were four moneys hung up $900, $450, $150. Nutwood took the $900 away from the great St. Julian (Hickok), Occident (H. R. Covey), Tommy Gates (L. J. Rose), and Grave (Samuel Gamble). Occident trotted out the first and Graves the third heat, St. Julian that heat distanced. They were timed in 2:23 2:20¼, 2:23¼, 2:24½, 2:26. Traveling to Stockton, St. Julian, Graves and Nutwood started for a special purse of $1,200. St. Julian broke the coast records by trotting in 2:17½, 2:19½, 2:18½, 2:24, Graves taking the third heat.

Knox had been offered $13,000 for Nutwood, but refused to take it. He concluded to remain at Stockton and start Nutwood at the November record meeting against his Oakland record of 2:19. He was driven by John Williams and on the third trial trotted in 2:18¾. The stallion was not very favorably received by breeders, although standing at $75, and two years later, returning to the East, his book was filled at $500.

The decade closed with one of the best and most closely contested trots of the season. There were but three starters and six heats. L. J. Rose drove his horse, Tommy Gates, Magdallah was handled by his owner, the Stockton farmer, J. M. Learned, and Hickok drove Commodore. It must have been humiliating for the expert Eastern driver, Hickok, to be defeated by a farmer, but Magdallah took the third and sixth heats, the third being a dead heat with Commodore, he taking the first heat. Tommy Gates took heat number five. The judges called 2:23, 2:25, 2:25½, 2:26¼, 2:24, 2:28.

GEO. H. TINKHAM.

Mrs. Suzanne Kohn loves horses and likes seeing them go. She owns Bradmont with a pacing record of 2:13¼ and will start him in the matinee races this year. She has pensioned Alfred D., who for the rest of his existence will lead a life of ease and plenty.

At the meeting of the board of directors of the Fresno Fair Association, September 30th to October 4th was selected as dates for the Fresno District Fair this year. Further than claiming dates no other business was transacted at the meeting and it is yet to be determined what will be offered in the way of premiums for exhibits and purses for races.

Baron Graton 2:03¼ that was campaigned by Mr. Geers and won many a hard fought race, died February 27 at Memphis, Tenn., at the age of twenty.

Dick McMahon has fourteen head in training at Memphis, Tenn., including Peter Look p 2:01:¾; Belle Alcantara p 2:04¼; Esperanza 2:03¼; Miss Perfection 2:06¼ and a number of other good ones.

I. L. Borden has sent his entries in the Stanford-Occident and State Fair Futurity Stake No. 8 to C. A. Durfee at the Sacramento track to be prepared for the State Fair races this year.

Jack Cahill drove "Baron Hal" 2:07¼ a quarter mile on the ice at Cazenovia, New York, on February 20th in 27¼ seconds in an exhibition against time. The distance was carefully measured and proved to be 440 yards to the inch.

There are about 125 horses in training at Billings Park, Memphis, Tenn. Mr. Geers is a busy man and is in good health and never misses a day jogging. Among the other trainers that are helping him is Ben Walker.

Martin Blote at the office of the East Bay Water Company, Broadway and Ninth streets, Oakland, Cal., announces that he has about thirty volumes of Hereford Records that he wishes to dispose of to some cattleman that is interested in that breed.

Jacob Brolliar, who has been a prominent figure in California as a trainer and driver, is now training horses at the Midway Farm, Kearney, Nebraska. The Midway Farm has a good man in Jake, who is a good handler of colts and was a successful trainer and driver in California.

A pari-mutuel bill is pretty certain of passage in Montana, while the West Virginia, Delaware, Tennessee, Michigan and Washington legislatures are sitting tight for the time being. Universal legalized racing is bound to come if we will but be patient and industrious.

A special meeting of the Board of Review of the National Trotting Association, will be held at the Murray Hill Hotel, New York, N. Y., at 10 o'clock a. m., on Tuesday, May 6, 1919. All communications intended for the consideration of the meeting must be forwarded to the Secretary not later than April 22nd.

Two hundred and seventeen horses were sold at the Chicago March sale. These averaged right at $280, the highest average on that market for years. The two stars were Betty Thornton (4) 2:09¼, and Eloise Worthy (4) 2:09½. The former went to a customer of Ned McCarr, of Arden, Pa., for $4500, and the latter to Lou Randall, of Chicago, for $3500, who was also the contending bidder on the other mare and incidentally their owner, T. Willard Ready, established a record by selling two green aged trotters for $8000.

Harry Smith has quite a string of horses on the track at Fresno. He has Dr. Dwyer, trial 2:10 as a three-year-old, which he is training for Leo Lynch. Dr. Dwyer is by Vernon McKinney. He has also Vesta Vernon by Vernon McKinney. This mare has a time record as a three-year old 2:14¼ at the Sacramento track. He also has her full sister, Vina McKinney, who got a two-year-old time record 2:19¼ last year at the Sacramento track. Both fillies are out of the mare Oh So. Vesta Vernon belongs to S. S. Bailey and Vina McKinney to T. D. Sexton, and she is entered in the three-year-old Futurity Stakes to take place this year. Among other promising prospects he has a three-year-old filly that is a full sister to Guy Boy that raced last year and a bay stallion by Hal Boy that has paced a mile in 2:12.

There are quite a number of horses in training at the Sacramento State Fair grounds track. Walter Tryon has seven, belonging to S. H. Cowell, including Zeta Lucille (3) 2:09¼, Butte Hale 2:03¼, Rastus 2:04¾, a Peter the Great colt and several others. Dr. M. C. Delano has Chas. Silva's string which includes Bondaline 2:06, Teddy Bear 2:06½, Little Jack 2:07¼, Dixon Boy, by Patch and several colts entered for this year's stakes. Todhunter has three horses, M. M. Henry two, and Chas. Durfee is preparing several colts belonging to I. L. Borden for the stakes. Dr. Herspring has Dan Logan 2:07½, Don Rosine and four others. C. Harrington from Woodland has five head. Geo. Wingfield has nine head of runners at the track that are being prepared for the races.

Fred Ward will race east this summer, returning in time for a few late California meetings. He has O. U. C., p. 2:02¼, eligible to the 2:11 classes over mile tracks and 2:15 over half-mile tracks; Allie Lou 2:06½, a 2:08 trotter over mile tracks and 2:12 over half-mile tracks; Edith Carter 2:13; Louise de Lopez, two-year-old record of 2:19½, and a record of 2:14¼ at Phoenix in 1916; Little Jack 2:09, eligible to the 2:19 trots; Emma M., p. 2:11¼.

DOINGS AT DIXON

(Special Correspondence)

Owing to unsettled conditions rain and mud horses are just now beginning to be worked some for speed on the Dixon track. Montgomery is working the following:

Jim Logan is being worked slowly and seems to be doing satisfactorily.

"Demonia," 5-year-old pacer, looks and acts good. A mile in 2:35 is about as fast as he has been.

Two-year-old trotter by Jim Logan, dam Winnie Bond, by the Bondsman, promises to make quite a trotter, nice going colt, and a ¼ in 40 seconds is easy for him.

Three-year-old pacer by Jim Logan is working good and no doubt will pace fast when asked to later on. The balance are colts just receiving their first lessons in work and are being nursed along educational lines more so than for speed.

Lou Matavia has BonCres looking good and receiving light jog work, while El Paso and Verna McHenry are repeating slowly but both in fine shape.

The two 3-year-old Jim Logans are working nice and easy, although slow, and while staked have had to have the hobbles adjusted and act as though fast marks were in sight for both.

Louis Carrillo has Healani 56150 doing jog work, while Vera Hal is repeating slowly. Miles in 2:35 is about as fast as she has been.

Miss Helmont, 3-year-old pacer, is big and strong and while a bit unsteady at present, with more work will settle down, as she does not like slow work.

Jim Beegal, 4-year-old trotter, by Cavileer Gale, dam Bernice Marshall, by Oyhee, is without a doubt one of the best green trotting prospects in the country, has a fine way of going and miles in 2:35 and 2:40 with halves in 1:15 are all that has been asked of him as yet, but before fall is over will be ready to mix with the best of them.

R. D. Mayes of Susanville and Fred Chadbourne of Pleasanton, were visitors at the home of "Peter Lincoln," Miss Nutonia's latest foal, by Peter the Great.

Mr. Mayes is just having broke two yearling colts that are sure beauties—a filly by Jim Logan, dam Leota, by Diablo; 2nd dam Trix Marshall, by Nutwood Wiles, and a horse colt by the Anvil, dam Madeline M., by Demonia; 2nd dam Mamie Comet, both as sure beautiful specimens of horse flesh.

Meeting of the May Day Committee for the yearly celebration to be held here May 3, 1919, comes on March 24th, when a program will be announced for the races for said date. Arrangements seem to favor a free-for-all pace; 2:20 pace and a 3-year-old mixed race for one-half mile heats, three heats to the race and entrance money added to the purse.

WM. M. FERGUSON.

HAWAII'S SECOND ANNUAL TERRITORIAL FAIR

Special Correspondence

Hawaii's second annual Territorial Fair is to be held in the capital city, Honolulu, from June 9 to 14 inclusive, and is already interesting Pacific Coast and other mainland breeders and stockmen, as well as ranchers and owners of animals throughout the islands. Entries from overseas are expected to be numerous this year for, if it was not evident before, last year's fair demonstrated the fact that Hawaii is a good market and a growing field for improved stock; in short, a developing territory whose future is replete with large possibilities along livestock and agricultural lines.

Up to a year or so ago, Hawaii had not paid much systematic attention to possibilities of "feeding herself"; having depended very largely on imports; but the great war brought to the islanders a lesson by which they have since been profiting, and now the determination of her thinking men of resource is to, as far as possible—as far as the land affords—so develop the livestock and agricultural opportunities of the five main islands of the chain, as to make Hawaii vastly less dependent on cold-storage and canned and other preserved foods, than she has been in the past.

Shortage of shipping during the war, and the diversion of provisions to places where they were more urgently needed, taught Hawaii that she should be in a position to depend more on her own herds and on her own fields. It was with this realization that the first Territorial Fair, last year, was held, and held successfully, in spite of the fact that it was a time of war, and in spite of the fact that the Fair Commission was risking a loss; for the resources of the people were all the time being most liberally given from, for Liberty Loans. Red Cross, Belgian Relief, War Savings Stamps, and the several other patriotic causes. It was felt that Hawaii MUST take stock of her larder; that the people of the islands must be made to realize that it was high time to begin to make the islands self-supporting in an emergency.

The first Fair was a thorough success, financially as well as in every other way, and it taught its lesson. It demonstrated to the islanders, generally, what certain of their number were doing in the way of raising blooded stock, or in the way of supplying beef to the market, or in the way of putting vegetables in the pantry. What man had done, man could do, and at once an enthusiasm swept the islands for development along these lines. People from abroad, some of them exhibitors, were surprised at what Hawaii could do at her first fair. Hawaii was herself somewhat surprised.

Such was the healthful financial condition of the islands that Hawaii "went over the top" in her first fair enterprise, just as she went over the top in all her patriotic drives. Her records as to Liberty Loans, Red Cross campaigns and other drives for raising money to help along Victory, are matters of history.

With good memories of her first fair, therefore, Hawaii enters upon preparations for her second annual exposition with enthusiasm and confidence, inviting the rest of the country, across the seas, to take notice, and to take a hand, too.

There are to be horse races covering the six days of the fair, and this feature alone will draw a large number of visitors from California and other states.

There have already been received many inquiries from abroad relative to this year's fair plans, particularly from farmers and stockmen. To all the Fair Commission makes reply that Hawaii is a profitable field for exhibiting, in that interest is growing here in the betterment of cattle, that the population is on the increase, and that the commercial development of Hawaii is on the eve of a very considerable advance in this era of reconstruction and reorganization of the world's business. As the crossroads for many important steamship lanes—and their number will increase with the impetus given American shipbuilding—Honolulu will soon be more in the public eye than was dreamed of before the war.

It was with these possibilities in view that the Territorial Government—for Hawaii's annual fair is not the enterprise of private individuals or interested promotors—established the Territorial Fair Commission, consisting of five citizens, men of affairs, with the welfare of the islands at heart. These commissioners are appointed by the Governor. The various islands are represented on this commission, and they vie with one another to excel. Nor, in the matter of the exhibition of livestock this year, are local exhibitors afraid to compete with imported breeds. In the livestock division there is to be no distinction made between Hawaiian-bred and Coast-bred stock.

All horsemen who are interested in the races next June should communicate with Robert Horner, chairman of the committee in charge of the meet, at 1024 Bethel street, Honolulu, and he will be glad to furnish any information desired.

In the matter of transportation and freight rates to the islands, inquiry can be made of the Hawaii Promotion Committee agency, at 201 Monadnock building, San Francisco.

For any information concerning livestock or other exhibits, or for any data on the fair, application may be made to J. Walter Doyle, executive secretary, Territorial Fair Commission, Room 303, Kauikeolani building, Honolulu, T. H., and reply will be cheerfully and speedily forthcoming.

Posters are now being prepared for distribution throughout mainland centers, proclaiming the time of the big fair. They draw attention to the fact that the attendance last year (under adverse conditions), was 100,000, and announce the slogan for this year's fair—"BIGGER AND EVEN BETTER!"

ABOUT THE MIDWAY STOCK FARM

E. D. Gould, proprietor of the Midway Stock Farm, Kearney, Nebraska, has the proud distinction of being the second largest owner and breeder of standard bred horses in America. Mr. Gould's premier stallion is the great trotter Bingen Silk 2:07¼. This superb son of Bingen has been mated with thirty ultra fashionable bred mares and every mare is nominated in the Horse Review Futurity and all of the other futurities.

Mr. Gould's other Bingen stallion, Gold Bingen, was mated with 25 Midway mares, all of which are nominated.

Judge Maxey, a grandly bred Axworthy stallion, comes next with 25 mares, all named in the futurities. E. D. Gould believes in the future of the standard bred horse and believes in the principle of futurities and shows his faith by putting up his dollars and with them such stallions and the one hundred elegantly bred standard and registered matrons owned and kept on the great Midway Stock Farm.

It is to be supposed that when the European market opens up again, as it surely will, Mr. Gould will be ready to market many scores of the most desirable young trotters ever offered by any stock farm in America, and the best of it all is, to me, the fact that Midway Stock Farm is in the great West, just out where the West begins.

I congratulate Mr. Gould on his judgment and on his nerve as a great American breeder.

C. A. HARRISON.

THE STORY OF SWEET MARIE 2:02

The humble origin of some of our greatest trotters was never better exemplified than in the history of the noted race mare, Sweet Marie 2:02, who died a few days ago at the farm of James R. Magowan of Mt. Sterling, Ky. The story of her life reads more like a fairy tale than a reality.

Twenty-three years ago Sweet Marie first saw the light at Los Angeles, Cal. She was bred by Frank C. Schumacker of that city, but was foaled the property of a colored man named William Smart. Lady Rivers, the dam of Sweet Marie, was bought at auction by Schumacker for road driving, but when he found her so cranky and balky he decided to breed the mare, so sent her to the court of McKinney 2:11¼, at that time one of the most prominent stallions.

Later he sold Lady Rivers to Smart, who wanted a cheap animal to pull a truck wagon. The price was $60 and the agreement was that Smart should pay Schumacker the equivalent of that amount in hauling rubbish and junk. Smart kept Lady Rivers in an old ricketty shack adjoining the small house in which he and his family lived. Short rations and plenty of work had tamed the haughty spirit of Lady Rivers, who did her daily work up to the day that Sweet Marie was foaled in this dilapidated old building.

Such were the events which antedated the birth of Sweet Marie. She was taken from her mother when four months old and spent the next two years in a yard adjoining the home of her colored owner, whose wife then broke the young mare to harness and used her occasionally for the next few months when she and the children went to the city on pleasure or business.

When three years old the filly was turned over to a trainer at the Los Angeles track and after a few weeks' work could trot a mile in three minutes. Milo M. Potter of that city took a liking to her, bought her for $500 and named her Sweet Marie, that being the time the famous song of that name was on the tongue of the American people.

Potter trained the young mare himself until she could trot a mile in 2:12 or thereabouts, then sold her three years later to William A. Garland of Los Angeles, who bought the mare for pleasure driving. Sweet Marie seemed to have so much speed, however, that she was again placed in the hands of a trainer, and in 1903, when seven years old, began her racing career.

Her first appearance was at Seattle, Wash., where she took a record of 2:17½. In four weeks she won six races, displaying so much class that it was decided to bring her East the next season. In the spring of 1904 the followers of the Grand Circuit began to hear things about the "California wonder" that her trainer, "Bob" Smith, was going to bring East.

Their first chance to see her in action was at Detroit the last week in July, when she took the measure of a classy field. Then came a succession of victories at Buffalo, Empire City track (New York), Brighton Beach and Readville. In the Readville Sweet Marie's trainer, Smith, drove her the first two heats, which she lost to Direct View 2:08¾. The judges then put Alta McDonald up behind the mare and she won the next three heats.

Tiverton 2:04½ was the trotter she had to beat the next week at Narragansett Park, Providence, where, with Smith driving, she lost the first two heats and then won the next three after Alta McDonald was again given the reins. Tiverton turned the tables at Hartford a week later, but her record for the rest of the season was a string of victories, closing the season with a mark of 2:04½.

Sweet Marie was taken back to California that winter, but early the next spring was again brought East and placed in McDonald's stable. She and her old rival, Tiverton 2:04½, locked horns on several occasions that year, the gelding emerging from the series the winner of a majority of the events. He defeated her in a wagon race at Philadelphia, but two weeks later at Readville she turned the tables after he had won the first heat. At Buffalo and Poughkeepsie she had to take the dust of the Iowa-bred trotter, but at Narragansett Park she defeated the gelding in the last race they met that year. The mare started against time at Readville in October and lowered her mark to 2:04¼.

The next appearance of Sweet Marie occurred in a match race at Readville on July 7, 1906. Tiverton and Wentworth and the mare had been matched for $2500 a side, but owing to lameness Tiverton did not start and the daughter of McKinney romped away with the big purse. Two weeks later at Albany she again defeated Wentworth, and at Poughkeepsie in August she established a new race record for trotting mares when she stepped one heat in 2:04½. The former mark was jointly held by her and Lou Dillon 1:58½.

Without a pacemaker, Sweet Marie trotted to her record at Columbus in September, the first half being negotiated in 59¾ seconds. A break in the last quarter of the mile prevented her from taking a mark which today would still have stood next to the 1:58½ of Lou Dillon. During that season she started in seven races, all of which she won.

In the fall of 1906 Sweet Marie was put up at auction in Madison Square Garden. J. M. Johnson of Boston started the bidding at $5,000, but she went to E. T. Stotesbury of Philadelphia at $14,000, the highest price paid for a mare at that sale. Mr. Stotesbury's avowed intentions were to use her as a show mare, but the next spring found her in the stable of W. J. Andrews.

After several exhibitions against time in the Middle West, Andrews brought the mare east and established two world's records at Allentown, Pa., where she trotted in 2:07 to sulky, clipping off a second from the previous mark, and to wagon she negotiated a mile in 2:08½, a slice of 3½ seconds from the best previous performance, then held by Cresceus 2:02¼.

At that time Major Delmar 1:59¾ was one of the great trotters, so the pair were matched for a $10,000 purse, the race to be held at Allentown. The mare easily defeated the gelding, but a week later at Poughkeepsie the Major turned the tables in a $2,500 match race. Andrews trained Sweet Marie at Poughkeepsie in the spring of 1908, and in her first start of the season at Readville she defeated Major Delmar and Wilkes Heart. She appeared six times that season, the last at the Brockton Fair, where she was defeatd by Delmar.

William Bradley of New York bought the mare from Mr. Stotesbury. She later passed into the hands of David M. Look of New York, who used her for breeding several years, then sold her to James R. Magowan, her last owner. While a great race mare and well bred, Sweet Marie did not prove to be a successful brood mare. Although mated to the best stallions, she has produced but two standard performers, one of which is a pacer.—Bernard Austin in Trotter and Pacer.

ORIGIN OF THE PARI-MUTUEL

The French pari-mutuel system was invented on the Parisian race courses, or rather, in the paddocks, when those who had come down to the races drew the names of the horses running, and the winner scooped the pool. There was no deduction made, and the full amount was paid over without commission. Thus encouragement was given M. Oller to exploit the national taste for lotteries by the invention of that huge caravan and offices on the boulevards in Paris, where the winners' gains were only taxed at 5 per cent, while now the initial stakes lose 8 per cent on their value before the dividend is declared. The system has been officially sanctioned by special vote of the French chamber of deputies and legalized by a presidential decree.

THE WAY TO REDUCE

Curb is the easiest of all the blemishes which Reducine is called on to repair. Curb is always caused by a strain of the hock, and this strain is immediately followed by pain, lameness, and the appearance of the enlargement. A horse may "throw out" a well-defined curb in ten minutes. Any man who knows anything about horses can correctly diagnose a case of curb when the injury is recent. The size of the curb has little or nothing to do with the degree of unsoundness which it may cause. After the acute lameness, which is caused by the injury, has subsided, some horses with big chronic curbs work and race sound, while others with small curbs may continue to be lame, or may become lame after every severe exertion. From the moment of injury, no method of treatment can be more certain and satisfactory than Reducine. Apply Reducine as soon as psssible after a curb has started. Nothing else will so quickly relieve the pain, reduce the swelling and inflammation, and prevent formation of a permanent enlargement. Rub in at once a heavy coat of Reducine, and paint heavily each day for ten days—nothing else. Do not keep the horse confined in idleness; give him some moderate exercise. For old curbs, apply a heavy coat of Reducine and rub it in briskly by hand for not less than ten minutes by the watch. Paint on another heavy coat at once. Get as heavy a plaster of Reducine on as possible in the next ten days. Work the horse every day as usual.

Reducine is a reducer of all enlargements, not of curbs alone. It is certain in its curative power on all inflammatory complaints, a perfect tonic and strengthener of strained tendons, and for curing suppuration troubles of the feet, has no superior, if an equal. Used for inflammatory troubles in the human subject. Reducine is as good a remedy as can be applied. The booklet distributed by the Reducine Co. not only enters into particulars concerning Reducine, but has special articles of interest and value to horsemen and stockmen in general. Copies free.

JOHN E. MADDEN

By W. H. Gocher

Having retired as a public breeder of thoroughbred race horses, John E. Madden can now pause and look over the record which he made during the past thirty years in the annals of the American turf. As a dealer, racing owner and breeder, his success in the language of Dominie Sampson has been "prodigous." No magician from "hither Barbary" [illegible] claimed for it, especially from a trapshooting standpoint.

Among the highest 10 amateurs of the West in the 1918 trapshooting averages were three Californians and one shooter from Washington. The Madden first attracted attention in the racing world at the Cleveland Grand Circuit meeting in 1887 when he started the gray gelding Class Leader and gave him a record of 2:22¼. He was a rather weak reed to lean on but his failings taught his athletic owner what to avoid in subsequent purchases. In 1890 Madden appeared again on the firing line with the Electioneer mare Suisun, which to all appearances had the $10,000 M. & M. at Detroit won when the race was postponed and Walter E. landed the event the following day. He was also ready to make another bid for the event the next year with Wyandotte but the Indiana bred trotter died from an attack of colic a few days before the race was called. In the interval Madden had also given the public notice of his operations as a dealer by paying $35,000 for Robert McGregor.

Abbie V. was his next prominent performer, and while Turner was racing her on the Grand Circuit, Madden decided to go over to the gallopers. It was not long before he made a place for himself in that sphere, his thorough knowledge of balancing and fitting giving him an opportunity to make good with horses which others had discarded. This, with that undefinable quality of being able to select future champions in the rough, soon carried his name into the list of winners. While Hamburg was his greatest selection, the laurels won by Yankee, King James, Fitz Herbert, Plaudit, Sir Martin, Ormondale, Salvidere, Star Shoot, The Finn, Ogden and a host of others, which he bred, raced or owned, will be recalled as long as racing folk refer to the leading horses of their day. But even with them, the limit was not reached as the returns for the past two years shows that Madden sent out from Hamburg Place five hundred and forty-seven winners, his nearest rivals in that respect being Harry Payne Whitney with two hundred and ninety-five and August Belmont with two hundred and eighty-eight.

Notwithstanding his success as a breeder of race horses, John E. Madden has always had a fondness for the trotters and whenever he started one, it was found in the first flight. In 1906 he won the Kentucky Futurity with Siliko and had Brighton ready to make a bid the following year when he went amiss. In 1908 he made a sweep with Hamburg Belle, her three winning heats in the $10,000 Charter Oak Purse at Hartford being the best on record up to that date. The following year she also defeated Uhlan in 2:01¼, the world's race record. Her sale for $50,000 also gave the world an idea as to the value of a good trotter, while her campaign was followed by the splendid series of races won by Tenara and Soprano in the same colors.

After they were sold for export to Europe, the progeny of the little band of trotting-bred mares at Hamburg Place began to appear on the turf. All of them were speed marvels, the group including Brighton B., Nancy McKerron, Dagastan, Margaret Parrish, Straight Sail, as well as the flying two-year-olds Walnut Tree and Periscope.

Among our turf men who have always been willing to buy or sell racing speed for the high dollar, John Madden will always find a place. He has, in all probability, sold more race horses for big money than any man who has ever been identified with the industry in Kentucky and it is just possible that his two sons will succeed him in the business. One of them, Edward, who was a leading all-around athlete at Princeton, is now a captain in the Army of Occupation in Europe, while his brother Joseph, after doing his bit in the war, is now at the same university.

OF INTEREST TO HORSEMEN

The Eighth Annual Charity Horse Show for the benefit of poor but worthy boys who are being trained and educated at Hillside School, Greenwich Village, Mass., will be held at The Park Riding School, Ipswich St., Boston, on Saturday, March 29th, with a matinee at 2 o'clock, and an evening performance at 8 o'clock.

The vice-president of the Hillside School has manifested his interest in Tuttle's Elixir by the following testimonial received today:

February 25, 1919.

TUTTLE'S ELIXIR COMPANY,
Boston, Mass.

Gentlemen: I take great pleasure in writing you that having used your Tuttle's Elixir in my stable consisting of from seventy to seventy-five horses, for the past 12 years, have been more than pleased with the results obtained from same. It has been not only a great saving to me on Veterinary expenses, but has been very beneficial to my customers. I also have used your Tuttle's Elixir for years at Greenwich Village and it will do all you claim for it and more, too.

Wishing you continued success, I remain,

Very truly yours,
(Signed) F. O. EMERSON,
Brookline Riding School,
Brookline Village, Mass.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

The next regular shoot of the Olympic Gun Club will take place March 23rd on the Club's grounds at Lakeside.

A very successful practice shoot was held Sunday, March 9th, on the Golden Gate Gun Club grounds at Alameda.

There are 1842 active trapshooting clubs in the world, of which 1703 are in the United States, 70 in Canada, 25 in the Philippine Islands, the Bahamas, Hawaii, Cuba, China, New Zealand and Australia, 7 in Alaska and 1 in the Canal Zone.

Trapshooting, hard hit by the war, weathered the big shootfest better than any other sport, and is now reaping the harvest, for everyone wants to know "how to shoot." The "sport alluring" will be on a firmer basis when the 1919 twins cash in than ever before, for at least 100,000 new shooters will be developed.

O. N. Ford, the popular manager of the Olympic Gun Club sees that the novice trapshooter at the Club grounds will get personal instruction. The fair sex is invited to the shoots. Trapshooting is proving a popular woman's sport in the east and no doubt it will become so on this coast.

About sixty artists at smashing clay pigeons and a goodly number of spectators assembled at the opening of the new traps at Visalia, Sunday, March 9th. Geo. Small made the biggest score, breaking 49 out of 50. He was followed by H. Ogilvie and C. Yocum, who tied at 48, while C. P. Arthur, O. Overall, C. Barrieu, W. Savateer and Dr. Sutherland all got along by only missing three each.

R. Cadwell was highest in the 25-bird limit and at that he only succeeded in shattering 20.

The Club has made plans for a merchandise shoot twice a month until the date of the California-Nevada State Tournament, April 25, 26 and 27.

THE OLYMPIC CLUB TRAP SHOOTING SEASON PROGRAM

The following is the program from March 1st to September 1st at the Lakeside trap shooting grounds of the Olympic Club:

Official Club Shoot—Every Second and Fourth Sunday at 10 a. m. First event—Olympic Club handicap, 25 birds. Second event—Lakeside handicap, 25 birds. Third event—McConnel handicap, 25 birds. Fourth event—Rucker handicap, 25 birds—yard hop, 16 to 22 yards.

Eight best scores to count for season trophies.

Shooters are divided into Classes A, B, C, D and novice.

All ties decided on day of contest.

Special cup to novice showing most improvement in season.

Specials—Everding watch to be shot for on the third Saturday of each month at 2 p. m. 100 birds. Automatic hop. Best four in six shoots to count.

C. W. Lindemann trophy will be shot for at end of season and has to be won three times for permanent possession. Highest two in each class to compete.

Doubles championship—100 pairs to be shot at. Entrants may shoot at 12 pair or more at any time during season until 100 pairs are completed.

A cup will be given to the shooter making the greatest number of 25 straights in season.

Juveniles and juniors will shoot twice monthly on second and fourth Saturday afternoons at 2 o'clock.

The Trap-shooting Commissioner is Dr. C. D. McGettigan. Committee—Clarence Haight, J. B. Brady and Dr. Edward Topham. Manager—O. N. Ford.

WHAT'S THE MATTER WITH THE GAME LAWS?

One of the correspondents of the American Game Protective Association sends an extract from a letter written from one of the wilder portions of Alaska, under date of January 15th, withholding however, the exact location and the name of the writer, who says:

"The caribou passed about twenty miles from here, this year, but I did not know it until after they had gone. However, we are in the middle of a good sheep pasture and can see them from the camp nearly every day. I would like to have got some caribou meat for dog-food, for it is a shame to feed them sheep."

The correspondent comments: "It is a pity, but as my friend told me once 'the dogs are necessary; there is nothing but sheep or caribou to feed them. The brutes won't eat spruce.'"

OLYMPIC CLUB SCORES

At the Olympic Club grounds at Lakeside a highly successful shoot was held on Sunday, March 9th. It was well attended, a beautiful day and fine scores were made. Hugh E. Posten broke 116 straight. Four twenty-five bird handicaps which are a series of events that will be shot for twice a month for the next six months were given. These handicaps are the Olympic, Lakeside, Rucker and McConnell and are from a sixten to twenty-yard rise. At the end of the season a shooter can take his eight best scores to win.

The score shows five ties in the first event, George Thomas, H. C. Peet, S. B. Gracier, J. Harlan and J. Grove smashing every target thrown.

The following are the scores reported for the shoot:

	Olympic	Lake-side	McCon-nell	Rucker
George Thomas	25	24	25	23
H. C. Peet	25	24	25	24
S. B. Gracier	25	25	25	..
J. Harlan	25	25	25	..
J. Groves	25	..	22	..
C. Lindemann	24	23	..	..
C. D. McGettigan	24	25	23	..
T. C. Peterson	24	22	24	24
William Ohlandt	24	25	25	..
J. Derham	24	25	..	22
C. C. McMahon	24	25	25	22
J. R. Miller	24	23	22	..
J. D. Gordon	24	23	..	..
Ed. Garratt	23	24	23	24
W. H. Eckhardt	23	24	25	..
W. A. Lendry	23	25	..	21
Nat Boos	23	..	22	..
J. B. Howell	23	24	25	..
C. C. Nauman	22	..	24	23
W. A. McGee	22	..	..	..
I. C. Backman	..	25	24	21
W. G. Loomis	..	25	22	..
F. Steel	..	24	24	24
J. Nelson	..	24	24	..
Paul Burnes	..	24	24	22
Dr. E. Topham	..	23	24	22
Dr. Eaton	..	22	..	22
H. H. Neustadter	..	..	24	..
W. A. McGee	..	..	24	..
B. A. Libby	..	..	24	..
B. Worthen	..	..	..	24
W. E. Cooley	..	..	..	24

At the practice shoot on Feb. 26th, the following high scores were made on a 100 targets. Fred Bair, 98; W. A. Joslyn, 96; Tom Wilkes, 96; Frank Stall, 94; C. A. Haight, 94; H. T. Bassett, 90.

At the practice shoot held Feb. 27th, Tom Wilkes ran 75 straight, Morgan, 50; J. Nelson, 50. The following are the scores: Tom Wilkes, 96; E. J. Morgan, 94; Jack Nelson, 92; Frank Stall, 91; Geo. Thomas, 90; J. Hostetter, 85; J. Harlan, 85.

The following are the high scores for the practice shoot on March 2nd, which was held despite the threatening rain with a large crowd in attendance. Jack Nelson was high gun, breaking 99 out of 100. Out of 100—Jack Nelson, 99; Frank Stall, 93; Charles Nash, 93; Paul Burns, 91; N. Neustader, 90; J. Hostetter, 90.

Out of 75—E. E. Bosqui, 57; B. E. Nixon, 66.

Out of 50—J. Harlan, 41; J. Howell, 41; W. Metson, 40; E. Mathy, 38; C. Beckman, 38.

Out of 25—Joe Nelson, 23; A. Libby, 19; Dr. A. C. Collins, 15; W. Metson, 14.

Professionals—Hugh Posten, 195 out of 200; Clarence Haight, 47 out of 50.

Manager O. N. Ford is delighted over the showing made by the Junior Class, which consists of boys 10 to 16 years old, and predicts that some of them are going to become wonders. He says the Pierce boys, young McGettigan, Brick Moran and in fact all of them take to the shotgun like a duck to the water.

This is the only gun club in the world teaching boys as young as 10 years how to shoot and properly handle firearms. It is a good work and one that will build up the sport, train the eyes, nerves and give confidence to the young fellows.

At the first shoot they broke from 2 to 23 out of 25 thrown and at the second shoot from 4 to 18 in a hurricane of wind on a very disagreeable day. Brick Moran with a 20-gauge gun broke 10 and P. Bancroft 12 out of the last 18.

The following is the score—W. Pierce Jr., 18; B. McGettigan, 13; N. Pierce, 13; C. McGettigan, 12; P. Bancroft, 12; P. McGettigan, 11; R. Flood, 11; B. Moran, 10; W. Welch, 7; R. Hinkel, 7; P. Wright, 7; G. Vonder Lieth, 7; B. Werdell, 6; H. McKenna, 6; F. Wulquen, 4; V. Koehe, 4; L. Dubray, 4; J. Bunyan, 4.

FIFTH NATIONAL GAME CONFERENCE

(Alexander McD. Stoddart)

Waldorf-Astoria Hotel, March 3 and 4, 1919.

Taps for Theodore Roosevelt, big game hunter and patriot, were sounded on Tuesday night, March 4, in the Astor Gallery of the Waldorf-Astoria Hotel, New York, at the dinner which concluded the two days' National Game Conference of the American Game Protective Association.

Three hundred or more sportsmen arose, and in the impressive silence between the bugle notes paid their tribute to the former President and sportsman, and to American sportsmen who had given their lives in the world's war.

Previous to the sounding of taps, William B. Boulton, chairman of the conference, asked Dr. A. K. Fisher, of the Biological Survey of the Department of Agriculture, to read a resolution which stated, that in the death of Theodore Roosevelt, all outdoor lovers and conservationists have suffered a deplorable loss.

Patriotism and sportsmanship were the keynotes of the dinner. Nicholas Everitt, Fellow of the Zoological Society of England, who like Col. Roosevelt, desired to organize with Col. Selous at the head, a fully equipped regiment of rough-riders and sportsmen, and being rejected, worked as a member of the British Foreign Secret Service, where his dangerous calling in war brought him bodily injuries, urged the necessity of the English speaking peoples standing together in future world's work.

At the afternoon session that day, Everitt, who has hunted big game all over the world, in displaying magic lantern slides showing how Norway, by protection and propagation of game and destruction of vermin, had made that country full of game, told a thrilling story of being charged by a moose, the largest specimen he had seen in thirty years' hunting on the Scandinavian peninsula.

He and his Norwegian guide were close upon the moose, when an Austrian with a Norwegian guide, whose only means of intercommunication was the sign language, mistook Everitt and his guide for the moose. The Austrian's explosive bullets took the left arm and right leg from the guide killing him.

As soon as the moose saw the hunter, the beast charged, and Everitt's first shot struck the animal in the lungs. To the hunter's dismay, he found that the second barrel was without a cartridge, and the first bullet had failed to stop the animal. Finally, Everitt managed to put another cartridge into the gun, and as the animal charged for a second time, the bullet wound merely infuriating it, the hunter reasoned that aiming for the brain, the bullet might glance off the forehead, so he dropped on his knee, and when the animal was a dozen feet of him, shot it through the heart, the animal dropping within six feet of him.

A novel feature of hunting in Norway, of which Mr. Everitt told, is the employment of a bird-reporting dogs. The hunter explained that in the forests of Norway the cover is so thick that it would be easy under ordinary circumstances to lose a dog, so dogs are trained to seek the birds, and when they find them, whether it is within a radius of a quarter of a mile, a half-mile, a mile or two miles, to come back to the master, and then the gunner follows the dog to the place where the animal first discovered the game.

Quite as thrilling as Everitt's story of his big moose, was Carl Akeley's experience with big game in Africa in hunting the leopard, elephant, lion, rhino and buffalo. Akeley, who was with Roosevelt in the African jungles, told of the dangers when his hunting party came upon a herd of seven hundred elephants, and when he had dropped one of the bulls, the animals circled in a larger growing area each moment, seeking to find where the danger lay, while the other elephants tried to bring the animal to its feet and thus carry it out of the danger zone.

His fight with a wounded leopard, which for a time threatened to end in favor of the animal, also carried a thrill. Akeley had been following the animal from ant-hill to ant-hill for some time, his only companion being a Somoiland boy, who carried a hunting knife. Akeley, of course, had his rifle.

The big game hunter did not see the leopard distinctly, but shooting at the shadows in the bush he wounded the leopard, and following it closely he was somewhat startled by the animal leaping at him. The animal was so close that there was not time to shoot before it was upon him. The leopard's claws caught one arm and sought to bring its mouth into play. Not quite suceeding in this, it did manage, however, to seize the free hand in its mouth, badly mangling it.

Both man and leopard went to the ground together, happily the man on top. The beast sought by its hind claws to get a firm grip upon the ground and to change positions. The bullets, however, had cut the tendons of the legs and the animal thus was unable effectively to use its hind claws. Akeley called for the boy with the hunting knife, but the boy in terror had dropped the knife and was nowhere to be seen.

As man and beast struggled for supremacy, the hunter realized that with his knees, by slightly rising and putting as much force as his strength would permit, he could crack the ribs of the animal. For a time it was a question of enduring strength, and the moment that Akeley felt the beast relax, although desiring to relax himself, he put additional force into his knees and continued to break the animal's ribs, in the meantime, struggling to thrust his hand as far as possible down the animal's throat in order to strangle the beast. Finally, as the strug-

gles of the animal grew less and less, Akeley's voice reached the Somoiland boy, who came forward with the recovered hunting knife, and Akeley carved out the leopard's heart.

Colonel John H. Wallace, Jr., Fish and Game Commissioner of Alabama, struck a national and international note in his address, and called attention to the necessity of broadening the scope of the migratory wild fowl treaty to include Mexico and the Central American states.

William L. Finley's motion pictures of wild life showed a close range blue herons breaking the shell and coming into being; kildeer, avocet, skunks, porcupine, the sage grouse, with its interesting dance of the males before sunrise; and intimate pictures of the pelican.

Finley's angling pictures, particularly those of fishing in rough waters, had a charm about them that brought memories of pleasant days on rapid streams.

Dr. George Bird Grinnell, who was the first advocate of the no-sale of game, interested the New York and out-of-town sportsmen at the Game Conference, by telling of shooting woodcock, quail, rabbits, duck and snipe on the marshes of the Harlem River, which is now a section of the city with a million people within a very brief radius. He also told of passenger-pigeons nesting in his father's yard.

Dr. Grinnell who participated in many hunts with the Indians for buffalo, told of the preparations made for such a gathering, and of the pleasure when the news came that the scouts had found a herd, the young men going forward on their ponies with their bows and arrows, the white men with their then modern guns, and the old men and women following along with the implements for the cutting up and preserving of the game. As the line of hunters moved forward toward the last hill, the sign was given for every man to get into the game, and the start over the top of the hill was made in such a way as to give every one an even break. The Indians would ride close to the animals, and with their arrows knock over the bisons. When the hunt was concluded, the old men and the women with their knives would begin the work of preparing the carcasses, and Dr. Grinnell stated that nothing was wasted. He remarked it was the theory of the Indians that when the white man had swept the buffalos off the plains, they merely had driven them to certain sections of the country where they might have the animals for their selfish use.

Discussing hunting conditions in the past and for the future, Dr. Grinnell predicted that the sportsmen of the future, fifty years from now, will have better shooting than their grandfathers knew.

Lee S. Crandall, Assistant Curator of Birds, New York Zoological Park, announced that three species of geese had been bred for the first time in the history of these birds. H. J. Jager, of Owatona, Minnesota, bred the first snow-geese. Arthur M. Barnes, of the William Rockefeller estate, bred the first barnacle-geese; and in New York Zoological Park had been bred the first Magellan upland-geese. The National Park bred American coots for the first time.

John T. Nichols, of the American Museum of Natural History, entertained the fish and game commissioners who came from all parts of the country, conservationists and sportsmen, by telling of the habits of shore birds, and whistling the calls of big and little yellowlegs, dowitcher, stilt, sandpiper, curlew, willet and other members of the family.

The Chief of the Bureau of Biological Survey, E. W. Nelson, said it was the desire of his department to build up the state game resources and to cooperate with state officials, that the game of every state be kept up to a high mark. He pointed out that the Federal government has the men available for investigation work of every kind, and when there is need for it, these men can be sent to any state or to the neighboring countries at the north or south for such work. He thought an investigation might be profitable of the shore birds that winter in Argentine, and that a treaty with that republic similar to the Canadian understanding would be well worth while.

Mr. Nelson believes that the controversy regarding elk in the Yellowstone region could be stopped, if his program made in consultation with H. S. Graves, National Forester, could be put into operation.

That program calls for the purchase of additional lands at a cost of $300,000, which for the time being would provide ample feeding grounds for a perpetual herd of from 40,000 to 50,000 elk, which would give 8,000 animals yearly available for shooting. For the additional purchase of land at a cost of $500,000, such elk shooting could be given to sportsmen for all time, and the continued settlement of the region round about, and the increasing zone of the cattle rangers would not in any way interfere with this herd.

The program would also call for the co-operation of the Biological Survey, the National Forestry Bureau and the state, for the purpose of determining the number of animals to be killed, and the state then could issue resident and non-resident licenses to sportsmen to kill in certain districts a given number of the animals.

The Nelson-Graves proposal would be applied in the same manner to the surplus of the Roosevelt elk now in the Olympic National Forest, and to big game shooting in certain districts in Wyoming where there are deer and mountain sheep.

Alex. G. MacVicar, head gamekeeper of the Firenze Second Farm of Major M. Robert Guggenheim, discussed the careless indifference that in the Colonial days destroyed the salmon fisheries of the New England rivers, and believes that these rivers can be reclaimed by ceasing to make sewers of the waters, giving proper protection to fish, and in the building of dams to see that opportunity is given to reach fresh water to spawn.

George H. Graham, Fish and Game Commissioner of Massachusetts, told of the introduction of three and five-inch salmon in the Merrimac river during the past three or four years, and he looks forward to the taking of mature salmon weighing from fifteen to forty pounds each either this year or in 1920, the salmon requiring four years to reach the adult stage.

The Fish Culturist of New York, John W. Titcomb, stated that an Atlantic salmon had been taken off Montauk Point, L. I., last year, and he advocated federal control over the anadromous fishes, thus giving an opportunity to salmon, striped bass and shad to ascend the fresh waters to reproduce their kind.

Mr. Graham pointed out to the assembled sportsmen and fish and game commissioners the value of organizing sportsmen's clubs, and told how to go about doing it.

A paper was read for Aldo Leopold, of Albuquerque, N. M., which brought out a discussion that led Mr. Graham of Massachusetts to say, that wherever cheap lands could be purchased for a public domain for the benefit of the man who does not belong to a hunting or fishing club, it would be a good policy for the states to pursue.

John B. Burnham, President of the American Game Protective Association, pointed out that New York already had pursued that policy in giving free hunting in the Adirondacks and the Catskills to every lover of the outdoors.

Conservation on a business basis was the subject of the talk of George D. Pratt, Conservation Commissioner of New York, who showed that forest, fish and game more than pays for itself in full value for every dollar expended. He instanced the case of fur-bearing animals whose pelts will bring this year to trappers $2,000,000. Of this amount, $1,000,000 alone was paid for 260,000 skunk skins.

Ottomar H. Van Norden, of the Camp Fire Club, who is a Y. M. C. A. worker in France, told of the St. Mihiel offensive; Duncan Dunn, superintendent of the New Jersey State Game Farm, told of the successful pheasant raising; Harry T. Rogers, superintendent of the New York State Game Farm, talked of game farm activities; John Hair, head gamekeeper of the Hempstead estate, spoke on game breeding on Long Island; Dr. James G. Needham, of Cornell University, discussed agriculture at the University's fish cultural experimental station; and a paper was read from George MacReynolds, of the Bucks County Fish, Game and Forestry Association, on what such a club has done for game birds.

A visitor to the Conference was Carl J. Lomen, of Nome, Alaska, who is a pioneer in introducing reindeer meat to northern cities in the United States. The first shipment was made last year to Minneapolis and New York, and the venison met with favor. This reindeer meat is a surplus of the animals originally introduced by Uncle Sam in Alaska in 1892. The first herd consisted of 160 animals, which ten years later was increased to 1280, and reindeer have been so prolific that there are now 100 herds consisting of 130,000 animals, and it is intended that the surplus of this stock be sold yearly in America to increase the food supply

Two men were missed from the Fifth Annual Conference, Emmet A. Quarles, who is now in France as secretary of a reconstruction committee and Frederic C. Walcott, who is engaged in war work.

A resolution was passed saying that vagrant and unrestrained cats constitute a great destructive agency to the song and game birds, and are a source of danger to the public health, and urging adequate laws to control this menace.

William B. Boulton, of New Jersey, who says that he would rather be the chairman of the National Game Conference than any other office that could be given him, was re-elected chairman. The vice-chairmen include E. C. Henshaw, Iowa; R. A Childs, Kentucky; and W. B. Mershon, Michigan. Tracy Dows, of New York, was re-elected treasurer; Emmet A. Quarles, Connecticut, secretary, and George M. Fales, New York, acting secretary.

THE DAY OF THE COYOTE

Stefansson says that coyotes for the first time in history have appeared in Arctic Red River within one hundred miles of the polar ocean. This statement has excited the wonder of the naturalists, because it shows an unexpected extension of the northern range of the prairie wolf, but the progress of this animal into the formerly forested eastern section of the United States is just as remarkable. Coyotes have been killed as far east as western New York and Pennsylvania and in Michigan their invasion has been so rapid as to warrant apprehension. Instead of being a "Western plains animal," as the dictionaries state, they are today making the continent of North America their own.

CALIFORNIA TRAPSHOOTERS EXCEL

High-class trapshooters abound on the West Coast.

Trapshooting averages the past few years show more California shooters in the select circle of amateurs than those of any other state, and Los Angeles is credited with the greatest number of high-honor men and women.

The Los Angeles climate must be all that is claimed for it, especially from a trapshooting standpoint.

Among the highest 10 amateurs of the West in the 1918 trapshooting averages were three Californians and one shooter from Washington. The Californians were H. J. Pffirrman, of Los Angeles; H. G. Lorenson, of Newman, and O. N. Ford, of San Jose. Frank Troeh is the Washington representative. These four also made the "All-American" team of amateurs.

Incidentally, Troeh was high average shooter and won more championships than any other scattergun artist in 1918. Lorenson was second in the averages and compiled the longest run of the year. To make the list complete, Mrs. C. E. Groat, of Los Angeles, won high average honors among the fair Dianas of the traps, being the only woman to shoot for better than a 90 per cent average. To sew up things more completely, Troeh and Ford compiled more long runs than any other half-dozen trapshooters.

In the high 10 trapshooters on the Western team in 1917 California had four shooters, three of them from Los Angeles, and Washington had one. The Los Angeles shooters were H. J. Pffirrman, Otis Evans and Frank Mellus. The other Californian was H. G. Lorenson, of Newman. Frank Troeh, represented Washington. Pffirrman, Evans and Troeh made the "All-American" team. Among the highest 10 professionals this year were C. G. Mitchell of Los Angeles; Hugh Posten of San Francisco, and L. H. Reid of Seattle, Washington.

In 1916 H. J. Pffirrman and Frank Mellus, both of Los Angeles, were among the highest 10 amateurs, as was Troeh represented Washington. Pffirrman made the "All-American" team, also. This made three years in succession that Pffirrman won a place on the mythical "All-American" team, which is about as great an honor as can be conferred on a trapshooter.

RABBIT PROTECTION

Some people have stated that the cotton-tail rabbit will be the only game of the future in this country. We do not believe this, because in very many localities the low water mark has been passed. Game conditions are brighter than they were ten years ago. Better game laws and better sentiment, game farms and the federal migratory bird law are some of the causes. The sportsmen of the country have brought about the change.

Be that as it may, the once-despised cotton-tail is looked upon as a valuable game animal over a good deal of the more thickly populated part of the United States today. Some of the states are breeding cotton-tail rabbits, others are buying them from sections where they are plentiful and turning them out in depleted covers. They are given the protection afforded by closed seasons and many of the states which formerly permitted the use of ferrets in taking them have now withdrawn this privilege. The rabbit has generally been the one game species the sale of which was permitted. Today, some of the states are even curtailing this privilege.

A very general provision in the game laws of many states is one which permits the killing of rabbits, at any time of the year, which are destroying fruit trees or crops. Under the guise of this blanket provision, many rabbits have been killed for the market and in thickly settled sections the supply has often become nearly exterminated.

The sportsmen of western New York and of Ohio are protesting against the wholesale slaughter of rabbits by the use of ferrets, and are taking action to put an end to the practice. There is very little evidence to show that rabbits do any damage to farmers. The proprietor of one of the largest nurseries in western New York states positively that rabbits do not girdle young fruit trees. He says that the damage to orchards is entirely the work of field mice and that in his experience, covering many years, he has never known an instance where rabbits have been the offenders.

The varying hare of the North eats the bark of small poplars and other trees which have been cut or blown over, but it never attempts to eat the bark of standing saplings. This is a fact which has been commented on before in this department, and the theory has been advanced that the varying hare cannot successfully feed with its neck in a twisted position. May not this fact also be true of the cotton-tail rabbit? Where trees have been girdled, it would be an easy matter to determine whether the work had been done by rabbits or by mice by an inspection of the teeth-marks on the tree. At any rate, all young trees should be protected by paper or otherwise around their bases, or they will certainly be girdled by mice.

We believe that the legislators in giving these special privileges for the taking of rabbits out of season and without limit have gone too far. There are just as many sportsmen—if not more— among farmers as any other class of our population. Let the farmers investigate and find if the cotton-tail rabbit is doing any particular damage.

THE NEW FISHING CLUB

(Special Correspondence)

Del Monte, Calif., March 15.—Sportsmen of California are going to launch one of the finest fishing clubs in the country on the shores of Carmel Bay at Still Water Cove. It will consist of a large and cozy yarn room, a spacious locker room with showers and fishing paraphernalia and a long quarter deck facing the bay waters. With Del Monte Forest and the new No. 2 Del Monte golf course in the background, the fishing lodge will be placed in a wonderful scenic setting.

Plans for the construction of the lodge, to be ready for the fishermen in May or June, took definite form when Capt. John Barneson of San Francisco, a devotee of the rod and line with a national reputation, visited Del Monte Lodge a few days ago and met with Carl S. Stanley, manager of the Hotel Del Monte, and Fred A Purner, sports' manager.

Captain Barneson is taking the lead in getting the fishing club organized. He has already rounded up fifty well-known sportsmen who will be charter members of the club and assurance is given that two hundred will sign up when the call is issued. Captain Barneson has been anchoring his yacht in Still Water Cove for the past several seasons and he has passed the word that the finest fishing of any place in the world is to be had in Carmel and Monterey Bays. Inasmuch as the Captain has fished the waters around Catalina Island and other great fishing grounds, his enthusiasm over Still Water Cove has interested the disciples of Isaac Walton.

According to tentative plans, the fishermen will have a club that will compare favorably with any of its kind in the country. There will be trophies and buttons for the big catches and competitions at stated times. The members will have their own yachts, launches and boats in order to enjoy the fishing sport on a large scale. A pier has already been constructed right at the site selected for the Fishing Lodge and a sandy beach in the cove will afford wonderful swimming for the fishermen who might care for that sport.

A few of the prominent sportsmen who have accepted invitations to be charter members of the Fishing Club are Captain John Barneson, F. B. Anderson, J. Henry Meyer, Charles Meyer, John D. McKee, Percy T. Morgan, John Lawson, W. L. Hathaway, R. J. Hanna, K. R. Kingsbury, J. Leslie Barneson, C. R. Blyth, F. E. Booth, J. D. Grant, A. L. Weil, Roy Bishop, S. F. B. Morse, M. W. Heischke-Smith, Harry Scott, Drew Chidester, Ed Christenson, J. H. Baxter, Carlton Miller, Commodore A. C. Pell, Herbert Fleishhacker, Wm. Pentz, H. W. Alexander, G. P. Home, Carl S. Stanley and John Hanify.

CALLING THE CROW

The crow has the universal reputation of being a wise, wary and wily bird. Yet it is surprising how easily he is fooled by any one who can properly manipulate a crow call. Indeed, the calling-in and shooting of crows by an expert is a revelation to many, who, all their lives, have known and hated these black marauders of the fields and woods. The crow call is a small wood instrument resembling a whistle and can be purchased at almost any sporting goods or hardware store. There are several good crow calls on the market. Directions for its use come with each call.

Preparatory to calling in the crows, the shooter should conceal himself carefully and remain as quiet as possible, for the crow has wonderful eyesight. Many crow hunters even try to wear clothing that will not contrast sharply with the environment. In using the crow call, it is desirable to try to imitate the cry of a young crow in distress and to indicate to the older crows that their young are being attacked by some other bird, upon which they will immediately start flying toward the point where the caller is concealed.

It is important to kill the first crow shot at, as otherwise the crow will give a warning call that will alarm all the other crows in the neighborhood and they will not approach again for some time at least. The birds should be fairly close in, not over 35 to 40 yards, in order to insure a kill with a choke bore gun.

Among the other methods suggested for luring the crows within range, the following may be recommended:

A stuffed owl with movable wings placed up in a tree and operated by cords brought down through rings to the concealed shooter, used in conjunction with a crow call, has proved effective in many instances. If a wounded crow is captured, it will serve as an excellent decoy for attracting other crows.

A farmer informs us that by placing a large piece of meat or the carcass of some animal in a field and then getting under cover at a distance of 40 or 50 yards, he has seen from 50 to 75 crows gather around the meat in a short time, and has been able to kill ten or more with a single shot.

Crow shooting in the winter when snow is on the ground is good sport, according to another writer. Decoys are placed in open fields close to the edge of woods or a ditch and the crow call used. After one or two crows have been brought down, they are set up in the field on a couple of pointed sticks and as they soon freeze, they make excellent decoys.

GROWTH OF TRAPSHOOTING

These figures give you an idea how trapshooting has advanced as a sport and recreation in ten years:

	1909	1918
Active shooters	35,000	200,000
Active shooting clubs	400	4,610
Active leagues	4	15
Tournaments*	150	365
Targets thrown*	1,750,000	5,164,949
Targets per tournament*	12,500	14,150
Trophies given*	300	874
Contestants*	3,000	7,057
Average entrants*	20	52
Entries	457	620
Women shooters	200	5,000
Club tournaments	200	5,000
Traps in parks	none	10
Country and yacht clubs	none	190
State associations	15	45
State championships	25	45
Runs of 50 or over	300	4,325
Resort hotels with traps	none	48
Clubs in industrial plants	none	65
Guns in use	200,000	2,000,000
Invested in accessories	$10,000,000	50,000,000
Invested in houses, grounds targets and traps	5,000,000	30,000,000
Spent for shells, etc	500,000	5,000,000
Spent for railroads, hotels, etc	200,000	3,000,000

*Registered.

REGISTERED TOURNAMENTS FOR APRIL SANCTIONED BY A. T. A.

The American Trapshooting Association has announced the granting of sanction for a number of registered tournaments to take place in April. The Tournament Committee will meet April 1 to act upon the full list, but in order that clubs which had applied for dates in April might comply with the rules, it was necessary to grant some sanctions prior to the committee meeting.

Among the registered tournaments sanctioned was that of the California-Nevada State Tournament to be held at Visalia April 25, 26 and 27.

Sanction will be granted 200 gun clubs to hold a registered tournament to which will be contributed one twenty-five dollar trophy.

Sanction will be granted such additional clubs as meet with the requirements of the Association governing registered tournaments.

It appears that some gun club secretaries and individuals are laboring under the impression that the American Trapshooting Association will register only 200 tournaments this year. That is a mistake. The Association **will register as many shoots as the Tournament Committee approves**—but only 200 clubs will be given a trophy.

Applications for registered tournaments from gun clubs which desire to have the trophy contribution of the Association, must be filed on or before April 1. All secretaries are urged to immediately file applications so they may be passed upon when the Tournament Committee meets April 1. However, after that date, requests for registered shoots **without a trophy contribution** will be received and acted upon—provided they are filed at least 30 days prior to the date of the shoot.

On page 13 of the Registered Tournament Information Booklet for 1919, a copy of which is in the hands of all gun club secretaries, there appears a rule passed by the Executive Committee of the American Trapshooting Association under this caption, "Tournaments Officially Conducted." The rule in full follows:

"The American Trapshooting Association is determined that all registered tournaments, held under its sanction, shall be **official** in all that the word implies. To that end, it will appoint special representatives to attend sanctioned shoots in all sections.

"It shall be the duty of a special representative to visit the gun club at which the tournament will be held, at least 24 hours prior to the time for holding the shoot. He shall satisfy himself that the club has the proper facilities for conducting a registered tournament—club house, traps, targets, etc. If he finds that the club has not properly provided for an official shoot, he shall notify the officers of the club that unless the club live up to its agreements the scores will not be recorded by the American Trapshooting Association.

"At least one hour prior to the advertised time for starting the tournament the special representative shall be on the grounds of the club holding the shoot. He shall supervise the regulation of the traps so that they will throw a legal target (not less than 45 yards nor more than 55 yards, with a flight between six and twelve feet high at a point ten yards from the trap). He shall examine and instruct the referees, scorers, trappers, pullers, and in every other way shall satisfy himself that the targets are legal and that the tournament will be conducted in accordance with the rules of the American Trapshooting Association.

"If the special representative finds a club lacking the necessary facilities for the conduct of a tournament, and, after giving the officers of that club 24 hours notice to provide that which is lacking, this is not done; or

"If the club does not conduct the tournament in accordance with the rules of the American Trapshooting Association and refuses to correct that which is contrary to the rules, then

"The special representative shall notify the officers of the club holding the tournament, and the shooters attending said tournament, that the scores will not be counted in the official averages, and shall so notify the secretary-manager of the American Trapshooting Association.

"Blanks will be furnished on which the special representative must certify that the tournament was held in accordance with all the rules and regulations and that the scores may be officially recorded by the American Trapshooting Association."

It is a fact that lax methods have been common in the management of registered tournaments. The traps were not ready, the necessary paraphernalia was missing, boys or old men who knew nothing about the rules and perhaps never saw a clay target shot at before, made a mess of the scoring, refereeing, pulling and trapping, or else there were no paid officials and the club was depending upon the shooters who were there to compete in the events. This is not a reflection on the old Interstate Association. But the new Association believes it has found a way to overcome that which was taking away from the enjoyment of the contestants.

The special representatives will, for the most part, be professional shooters. But the Executive Committee desires it to be clearly understood that it is not asking the special representative to act as a trap mechanic, a clerk or a man-of-all-work around a trapshooting club. Rather, he will act in the capacity of a tournament manager, with all the dignity that the words imply.

One of America's prominent amateurs, who was discussing the new rule recently, had this to say:

"If this rule is followed out, it will mean a wonderful improvement in the registered tournaments held this year. Last year, there were a lot of one-day tournaments held throughout my section and some of them were a farce, so far as the management was concerned. At one of them, they did not have anybody who knew how to figure the program. At one or two others, it did not look as if the trap house had been opened, or the trap examined, for a year up until it was time for the first squad to go to the mark. The consequence was that the trap was continually breaking down, etc., and with this new idea put into effect, a condition such as this will be entirely eliminated; and I wish to compliment the Executive Committee upon this innovation."

CALIFORNIA FISH AND GAME PROTECTIVE LEAGUE

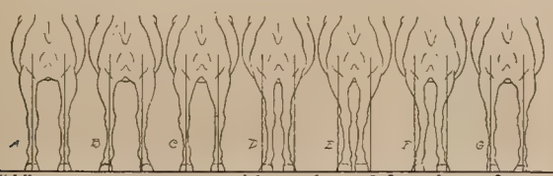
The annual meeting of the California Fish and Game Protective League was held in Oakland on February 28th, and in his address President Hauer stated that the League was prevented from holding its annual meeting at an earlier date by the State Health Board rules which prevailed at that time during the influenza epidemic. In his address he referred to the meeting held at San Jose last year as being one of the best meetings the League ever held and that the effect of the action taken at that time was very great and the influence far reaching. He stated that the big newspapers took up the League's cause in support of saving the wild life of the field and waters of California and in being opposed to all legislation that might be proposed in the interest of the privileged few. He read extracts from the San Jose papers, the San Francisco Examiner and other papers supporting the stand the League had taken. He commended the Governor for the appointment of a committee with power to investigate the affairs of the State Fish and Game Commission claiming that it was through recommendations made at the meeting in San Jose and the newspaper publicity that the Governor was induced to appointed this committee, and he further complimented the committee on its recommendation to place the State Fish and Game under control of the State Department of Agriculture.

He went on to refer to the tremendous income of the Fish and Game Commission, claiming that its expenditures were extravagant and without results, that the fish and game was constantly decreasing in amount notwithstanding the Commission were expending the daily sum of $1000. After his arraignment of the California State Fish and Game Commission he spoke at length on the economical and political situation of the present time.

The officers of California State Fish, Game and Forest Protective League are:

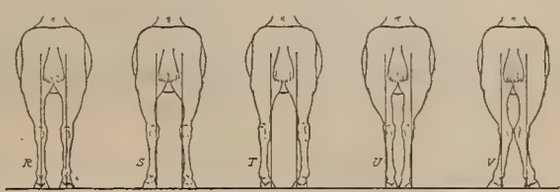
President, J. B. Hauer, San Francisco; vice-president, H. C. Hall, Corte Madera, and secretary-treasurer, N. A. Martin, San Francisco.

Board of Directors—R. A. Laurin, San Francisco; J. C. McCaughen, Burlingame; L. A. Joseph, Homewood, Lake Tahoe; Dr. A. M. Barker, San Jose, and J. Scott Johnson, Visalia.



Law and Legislative Committee—R. A. Laurin, M. A. Hawkins, Jos. Redding and H. C. Hall.

A new gun club has been organized at Douglas, Ariz., and in writing about its progress, the secretary stated: "So far, we have shot nothing but the 3 drs., 1⅛ oz. load and we have yet to receive our first complaint of a lame shoulder." This is the load which the Executive Committee of the American Trapshooting Association has recommended as a standard and it has been tried and found ideal in other clubs.

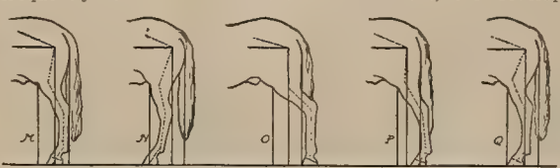


Spokane, Seattle and Portland gun clubs have completed arrangements for a series of telegraphic trapshooting matches. The entire membership of each club will participate in each match, the high five shooters making the team. The teams will exchange scores by telgraph after each person shoots.

THE FEET AND LEGS OF A DRAFT HORSE

The make-up of a draft horse capable of working hard throughout a long life time depends upon a great many essential factors. Correctness of underpinning with respect to set of feet and legs, the shape, size and quality of the different parts may be considered both literally and figuratively to be the foundation upon which "good-using" horses are built. The study of the feet and legs of workers which have been on heavy duty on paved streets will prove illuminating to the breeder. Good feed is always essential to best development. It is well to remember, however, that it is quite largely wasted when put into specimens which are faulty in the underpinning because of a bad inheritance. Mere scale does not make a valuable horse.

"A" represents correct position, others, defects in conformation, all of which interfere with straight action and the usefulness of the horse. British and American Army buyers flatly refused to buy animals showing such defects as B, D, E, F, and G, and were very apt to reject C.



"R" shows correct position, the others, defects which are only too common, all of which reduce the power the horse may exert.

Diagrams and score cards may be said to be out of thought entirely by the skillful judge who is at work. The illustrations used here, however, will help to make some points clearer in connection with rules governing the correct set of feet and legs. Both power and the facility with which it is applied must be studied. Conformation which combines to the greatest extent strength to do work and action to "get there" with the use of the least possible energy is ideal.

In front it is desirable to have the legs set squarely under the body. Both should not appear to come from the same hole in a too narrow body; neither should they be "clapped on" to the outside of an already too wide front.

"H" gives conformation generally accepted as best, others are common faults to be avoided.

"M" presents a strong normal conformation, the others, defects, of which "O" is the worst. All deviations from a correct position of the legs, whether front or hind, reduce the utility value of the animal and the price obtainable.

The forelegs bear more weight than the hind, their function being largely that of supporting the body and dispersing concussion (lessening jar when the feet come in contact with the ground) rather than propulsion. The long, sloping shoulder heavily and smoothly muscled, properly combines strength with a long, easy stride. The arm should be heavily muscled, relatively short, and carried forward, and the forearm long and heavily muscled.

The knees should be of good size, broad, deep, straight, clean, and well supported from below. Standing too open at the knees, knock-kneed, knee-sprung, and calf-kneed are terms applied to some of the more important defective deviations in the set of the knees. Such defects decrease strength, sure-footedness, and speed. Defects of this sort do not improve with age and length of service but grow worse.

The cannons should be short and flat with the tendons well set back. A "tied-in" condition of the tendons below the knees is a serious defect. No draft horse ever had too much clean, flat quality bone below his knees or hocks. Long, slim cannons generally go with a "weed." Weediness has no place in any kind of horse and least of all in the draft type.

Clean, smooth, and well-supported fetlocks of good size are desirable. Draft horse pasterns should be of moderate length with plenty of slope and good quality. Proper length and slope of pasterns go with spring and sure-footed action; these qualities act as "shock-absorbers" and give the horse good control of his feet. The opposite condition means a short, hard stride and a short period of usefulness.

Properly placed feet which are medium in size, rather circular in shape, wide and deep at the heels stand wear best. Flat feet, i. e., those with wide, flaring hoof walls and lacking in depth, are not of long avail in withstanding the punishment hard-footing metes out to them. Furthermore, to add to the trouble, the horn is generally shelly with this type of foot. The high, narrow-heeled foot is subject to contraction. Feet toeing either in or out cause bad action and hence a waste of energy. Users of draft horses on the streets have more trouble with horses going wrong in their front feet than in any other place. Very frequently forefeet a bit and the toes of the hind feet out, thus givinig more freedom for movement at the stifles. Hind legs thus placed insure a horse in going with his hocks well together and well under him. "Outbowed" hocks do not permit of proper delivery of power. Horses with hocks of this sort have a hard job in standing on "slippery" going, and the condition becomes worse with service.

The hock is an exceedingly important center of movement. The pull of the extensor muscles which propel the body are concentrated here. The hocks should combine good size with clean-cut quality and should be wide, deep, point prominent, and have plenty of support below. Sickle-hocks, hocks too straight, cow hocks, and hocks bowed out are defects with result in bad action and consequently undue strain and unsoundness. The remarks made respecting fore cannons, pasterns, and feet apply very much to the hind ones.

Cocked ankles, or a tendency thereto, will depreciate the price of an otherwise good drafter from $75 to $100, no other objection being raised. Any tendency to this must be avoided in sires, and mares showing an inclination to this fault should be bred only to sires that are especially good in slope and length of hind pasterns. Horses that stand with their hind legs out behind the normal position, as in O, are liable to this, and to other unsoundnesses. Sires of this kind should be castrated without delay.

Correct underpinning goes far toward insuring soundness. Furthermore, the development of unsoundnesses on good limbs is generally of not nearly so serious a consequence as when it occurs on the coarse, misshapen limbs. Horse breeding at best is slow when compared with the meat- producing animals. This makes imperative the necessity of obtaining good foundation stock.

There is a compensating factor which must always be taken into account and that is the temperament of the individual. Some "rattle-brained" horses wear out a good set of feet and legs in much shorter time than the individuals favored by nature with good brains and only moderate underpinning. While we are striving hard to breed model conformation, we ought to keep in mind that a "good head" is of inestimable value in a horse.

THE LETTER HORSE

(By W. H. Gocher)

Single G. is one of the few horses that lived up to the owner's statement after passing through the auctions. He was foaled in 1910, being bred in partnership by L. D. Commons, Centerville, Indiana, and his present owner, W. B. Barefoot of Cambridge City, in the same state. They also bred a sister to him called Grace D. She made a three year old record of 2:10¼ over a half-mile track in 1911 and was with Single G. consigned to John S. Lackey's sale in the spring of 1912, after L. D. Commons' death. At that time the following statement was made for the colt:

"Single G. is a nice bay with almost a perfect G in his forehead, left hind foot white. He is a brother to Grace D. (3) 2:10¼, has been driven a few times with the harness on, is of nice manners and should be a sensational colt when developed, as he showed a lot of natural speed in the pasture. If you want a prospect worthy of the name, do not let this colt get away without a bid on him."

Ed Hallenbeck paid $3150 for Grace D., while Single G. was knocked down to H. S. Beard for $275, the colt being purchased for Barefoot. That he also proved a "prospect worthy of the name" is shown by the returns for the past six years during which he was started in seventy-seven races, of which he won forty-four, was second in twenty-two, third in six, fourth in three, and unplaced in two. In these races, he also paced two hundred and twenty-six heats, of which he won one hundred and twenty-seven, the fastest being finished in 1:59½, when he won the only three heat race in which each mile was below two minutes.

The uniform and extreme speed of Single G. in all of his races is also clearly defined by the fact that twenty-eight of his forty-four victories were won in straight heats. He also won sixteen split heat races, while of the thirty-three races that he lost, there are only six in which he won heats and one-half of them were on the three heat plan.

Single G. made his debut on July 24, 1913, as a three year old at Terra Haute, Ind., where he met William and made him pace in 2:11½ to win. The pair also met again at Springfield, Ill., in October, where William won again in 2:07½, Single G. finishing second and Russell Boy third. In the interval Single G. had won four races over half-mile tracks and acquired a record of 2:12½ at Washington, Pa., where the late Fred Jamison prepared him for his record breaking campaign last season.

In 1914 Curt Gosnell made a sweep through the Michigan Circuit with Single G. At Detroit, Eel Direct made him pace in 2:08¼, while Doctor M. forced him out in 2:07¼ at Saginaw. He also won at Lima, Toledo and Parkersburg, before May E. Pick took his measure at Clarksburg, W. Va., in a six heat contect, the pacer Isaac B. that defeated him at Canal Dover in his first race that year also getting a heat. Later in the season Flower Direct and Florence McKinney also defeated him in very fast races for two lap tracks.

During the past four years Single G. has been one of the bright lights of the Grand Circuit. In 1915 Gosnell won the $5000 Chamber of Commerce Purse with him at Detroit in 2:03¼, as well as his engagements at North Randall, Kalamazoo, Hartford, Syracuse, Columbus and Lexington, Russell Boy, It Will Tell and Earl Jr. being the only horses that showed in front of him that season. In 1917 he also became Indiana's fourth two minute performer, Prince Alert, Dan Patch and William having preceded him on the trip across the Rubicon of the turf. His first mile in even time was paced at Kalamazoo, where he defeated Napoleon Direct, and while the pair met in seven other events that season it was the only time that he was able to defeat Geers' horse. The splendid series of races between them is also a striking example of class in racing, as Napoleon Direct's tremendous flight of speed enabled him to tame Single G. whenever they met after their first race, whether the miles were in 1:59¾ or 2:04. During this campaign Single G. was also handicapped by losing the skillful hand of the man who developed him after the second meeting at North Randall, where Gosnell met with an accident which resulted in his death.

Single G. made twelve starts in 1917, when for the first time in his career he failed to get in the money, his two slips being in September at Columbus, where he was defeated by Miss Harris M. This account, however, was balanced at Toledo last summer when, after forcing the Peter the Great mare out in 1:58¼, he repeated in 1:59½ and 1:59¾. Geers drove him in that race, while Allen had the mount when Single G. paced his third heat in 2:01 over the half-mile track at Des Moines and by so doing equaled the world's record for a two lap course made by Dan Patch at Allentown, Pa., in 1905.

ANOTHER CALIFORNIA WORLD'S RECORD COW

There are only six cows in the world that have produced over 30,000 lbs milk each in one year, and only one cow that has exceeded this amount on two different occasions. All these animals have been of the Holstein-Friesian breed. In two cases these big yearly records have been made under strictly official test; which means that the animal is constantly under the observation of a supervisor appointed by the state college of agriculture, or other state agency having control of cow testing. At each milking the supervisor is present; sees the milk weighed, and takes a sample which he forwards, together with his report, to the state college of agriculture.

Within the past few weeks a large number of new records made by Holstein cows in America have been reported and the most recent one comes from California, where Raphaella Johanna Aaggie 3d 185125, a 7-year-old cow owned by the Napa State Hospital, Napa, California, has annexed the world's championship for a year's milk production under strictly official test. Her milk record for 365 days is 30,641.2 lbs. (1,033 lbs. butter), and she displaces Zarilda Clothilde 3d De Kol 133840, the British Columbia Holstein, whose strictly official figures for one year are 30,427 lbs. milk (1,070.22 lbs. butter). In establishing this yearly record Raphaella Johanna Aaggie 3d also made a 7-day, 30-day, and 60-day milk record for a United States cow. For seven days she is credited with 910.8 lbs., 30 days, 3,785.1 lbs. and for 60 days, 6,876.7 lbs. milk.

Raphaella Johanna Aaggie 3d received practically the same feed as the rest of the cows in the Napa Hospital farm herd. She was allowed to roam the alfalfa fields during a portion of each day. For each pound of grain she consumed a return of 5½ lbs. of milk was given, and she gained 300 lbs. during the test, turning the scale at 1,615 lbs. at the end of the year.

The sire of Raphaella Johanna Aaggie 3d is King Pontiac Hengerveld 53297 (24 A. R. O. daughters and four proven sons), a son of the only double century sire, King of the Pontiacs, and out of an A. R. O. daughter of the first century sire, Hengerveld De Kol. Her dam is Raphaella Johanna Aaggie 74216, an A. R. O. cow with four A. R. O. daughters to her credit.

Raphaella Johanna Aaggie 3d is due to calve from service by King Morco Alcartra, a son of that wonderful producer, Tilly Alcartra, whose extraordinary records for milk and butter production (156,776 lbs. milk, 6,141 lbs. butter in six years), have earned for her the undisputed title of Queen of the Dairy World. "Raphaella" was bred by T. A. Page, of West Edmeston, N. Y., and was later owned by John L. Smith, of Spokane, Wash., from whom she was purchased in 1917 by Business Manager Owen Duffy, for the Napa State Hospital

EFFICIENCY OF MILK FILTERS

Although emphasizing that clean milk depends primarily on sanitary methods of production, dairy specialists of the United States Department of Agriculture report that milk strainers as commonly used also have a direct bearing on the quality of commercial milk. Certain kinds of strainers cause milk to appear clean, but fail to remove all impurities. Of all the milk filters in common use, only two—absorbent cotton and filter cloth—are reasonably efficient, according to the department, in actually improving the commercial quality of milk. Even these filters must be kept clean and changed frequently to insure satisfactory results. Detailed information on the proper care and use of strainers is given in a new Farmers' Bulletin No. 1019, "Straining Milk," which may be obtained on request from the Department of Agriculture.

According to reports from about 40,000 farms, wire-gauze strainers are in more general use than any other kind, but studies with the miscroscope show plainly that the meshes are much too large to hold back any but the very coarse impurities. One thickness of cheesecloth or other cotton cloth is only slightly more effective than a wire-gauze strainer, but when the cloth is folded to about eight thicknesses its ability to remove dirt in milk increases somewhat, but is still inefficient as compared to absorbent cotton or filter cloth.

Filter cloth, a specially made cotton cloth, smooth on one side and "fuzzy" on the other, was found reasonably effective. This cloth can be obtained from leading dairy supply houses. The milk should be poured on the fuzzy side, the fibers of which stand up like the nap of a carpet and remove all but a small percentage of the solid impurities. The most effective strainer of all, however, according to the experiments, was a layer of absorbent cotton placed between two thicknesses of cheesecloth.

At best, straining milk is a practice that makes milk appear clean and, therefore, more easily salable, but no strainer removes either the bacteria and objectionable flavors or the very fine dirt. As a consequence, straining milk fails to improve its wholesomeness to any noticeable degree. Clean milk is best obtained by sanitary methods which prevent, so far as possible, the entrance of dirt into the milk. This can be done best by having clean cows in a clean stable and milking with clean hands into sterilized small-top pails.

HORSE STILL A GOING CONCERN

Horses are hardly maintaining their number on farms in this country, in consequences of the autotruck, the automobile, and the needs of the war, and yet there are nearly as many in the country now as a year ago, according to the Bureau of Crop Estimates of the United States Department of Agriculture. Furthermore, there are now one-third of a million more than at the beginning of the war. It was expected that the war would stampede the horse market in this country and would send prices high enough to rob the farms of a large number of much-needed work animals, but there was no such shock as was expected. From 1910 to 1915 horses on farms increased a little each year, usually over 1 per cent, and since 1915 the increase of four years has apparently been over 300,000. The present total, according to the estimate, is 21,534,000 horses. The exports of horses during the war to December 31, 1918, have been slightly more than 1,000,000; at the prewar rate the normal exports would have been about 120,000. As far as covered by domestic exports, the war made an extra demand on farmers for almost 900,000 horses. To this must be added the extra demand of the United States Government. By January 11, 1919, the War Department had shipped overseas nearly 39,000 horses, and on November 2, 1918, that department had in this country nearly 165,000 horses. The apparent figures of extra demand on the farmers of the United States by this country and the allies for horses on account of the war make a total of about 1,100,000 horses in exports and in the service of the War Department. The actual number is greater by the normal exports, and hence about 1,200,000 horses are indicated as the horse contribution of the farms to the war, not including private purchases and the United States Government outside of the War Department.

Gombault's Caustic Balsam

The Worlds Greatest and Surest Veterinary Remedy

HAS IMITATORS BUT NO COMPETITORS!

SAFE, SPEEDY AND POSITIVE.

Supersedes All Cautery or Firing. Invaluable as a CURE for

FOUNDER,

HORSES AND MULES LOST IN WAR

This country was not long enough engaged in war operations in western Europe to suffer very large losses of horses and mules. To December 25, 1918, the total losses overseas amounted to 36,189 horses and 6,122 mules, and on that date there were with the American Expeditionary Forces 26,023 cavalry horses and 109,528 draft horses, a total of 135,551; and 48,614 draft mules and 7,466 pack and riding mules, a total of 56,080.

BETTER HORSES IF THEY HAVE

Spohn's Distemper Compound

When your horses are subjected to changing weather conditions of winter and spring, their systems become run down, with the result that they are very susceptible to DISTEMPER, INFLUENZA, PINK EYE, COUGHS and COLDS. SPOHN'S will keep your horse in good condition, so his system can ward off disease. Buy of your druggists.

SPOHN MEDICAL COMPANY, GOSHEN, INDIANA, U.S.A.

KENILWORTH

A Great Stake Horse and a Great Sire

BY IMP. SIR MODRED, DAM IMP. QUEEN BESS, BY MARDEN; 2nd DAM LIZZIE, BY PETRARCH.

Description and Performances.

KENILWORTH is one of the grandest stake horses ever bred, and a great sire. He is a brown stallion, standing 16 hands and 1 inch high, weighing over 1,300 pounds in stud condition, and is now in superb condition. He raced at 1,240 pounds. He is a winner of 94 races, having met nearly all the best horses in training in America during the years of his racing. He ran six furlongs at Tanforan in 1:12½, beating Waring. He holds the mile record of 1:39½ of Ingleside track, and at Oakland carried 132 pounds and ran three-fourths of a mile in 1:13. He defeated the great Articulate every time he met him, and has beaten every horse that has met him as many as three times. He has been a consistent winner as a two, three, four, five, six and seven year old. His sire, imported Sir Modred, was a great race horse, a winner at two, three, four and five years, his Australian victories including the Canterbury Derby, Canterbury Cup, Metropolitan Stakes, etc. Idalia, dam of Sir Modred, also produced the high-class stake winners Betrayer, July, Liverpool and Cheviot. Since being imported to America by the late J. B. Haggin he has led the winning sires several years. Imported Queen Bess, dam of Kenilworth, has had six foals since reaching America. Prince Tyrant and Tyran by Tyrant were both road winners as two, three and four year olds. Old England, her foal of 1899, was one of the best stake winners of 1901 and 1902.

Among KENILWORTH'S consistent winning get are Coopertown, Kiang, Eel, Warefare, Katie Gleason, Pay Streak, Halworth, Envy, King Worth, Real Worth, Clark M., Ada Anne, Midsummer, etc.

A GREAT PETER THE GREAT

The Standard and Registered Trotting Stallion

PETER KLYO BELL 62389

California Pure Bred Stallion, License No. 1088

WILL MAKE THE SEASON IN SACRAMENTO, CAL.

PETER KLYO BELL is by Peter McKlyo 2:06, by Peter the Great 2:07¼, the world's greatest sire of extreme speed, leading sire of Futurity winners and leading sire of Grand Circuit winners 1918. Peter Klyo Bell's dam is the strongly bred Electioneer mare Iran Bell, dam of Nearest Alto McKinney 2:11¾, by Iran Alto, sire of Dr. Frasse 2:11¾ and 22 others in the list. His second dam, Bell Bird 2:26¼, holds the world's yearling record to high wheel sulkies, and is the dam of Wildbell, matinee record 2:05½, Chico.

PETER KLYO BELL represents the most popular blood lines at the present time. He is a remarkably handsome young stallion, bright bay, 15½ hands, weighs 1100 lbs. He is a pure gaited trotter and gives every promise of being the high-class race horse that he should be by inheritance. Owners of good brood mares can make no mistake by breeding to this grand young horse, as his produce is sure to be in great demand.

The best care taken of mares in any manner that owners may desire, but no responsibility assumed for accidents or escapes which under the conditions and care exercised are almost impossible. For further particulars address

THE STANDARD TROTTING STALLION

HEALANI 56150

WILL MAKE THE SEASON 1919 AT THE

DIXON RACE TRACK

WITH RETURN PRIVILEGE

FEE, $20 FOR THE SEASON

HEALANI is by Zolock 2:05¼ (McKinney's fastest son), dam Queen Derby 2:06¼, by Charles Derby (sire of Jim Logan 2:01¾, Don Derby 2:04¼, and 8 others in the 2:10 list); second dam Addie Ash, by Indianapolis; third dam Addie H., by Ashland Chief.

HEALANI 56150 is not only highly and fashionably bred, but is a handsome and stylish individual. He has size, style and quality. Without doubt he is one of the fastest speed inheritance stallions (if not the fastest) on the Pacific Coast. He is coal black and absolutely sound, without a spot or blemish, and one of the best mannered horses living, so gentle a lady or child can handle him. Will stand with his head over stall door and pays no attention to mares being cross tied in front of his stable door. This horse was worked some last summer and fall, after 14 months without having a harness on him, and trotted miles in 2:26, halves in 1:09, and has and can now show two minute speed and better for ⅛ of a mile. Has been jogged 5 or 6 miles a day all winter and looks and feels good and, no doubt will trot a mile close to 2:10 or perhaps better this fall. He is a nice going line trotter and can carry his speed. He is only 8 years old.

Best of care taken of mares, with no responsibility assumed for accidents or escapes. Address all correspondence to

Statement of the Ownership, Management, Circulation, Etc., Required by the Act of Congress of August 24, 1912.

Of Breeder and Sportsman, published monthly at San Francisco, Cal., for April 1st, 1919.

State of California,)
County of Marin.)ss.

Before me, a Notary Public in and for the State and county aforesaid, personally appeared F. W. Kelley, who, having been duly sworn according to law, deposes and says that he is the proprietor of the Breeder and Sportsman, and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management (and if a daily paper, the circulation), etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in section 443, Postal Laws and Regulations, printed on the reverse of this form, to wit:

1. That the names and addresses of the publisher, editor, managing editor, and business managers are:

Name of— Post Office address

Publisher, F. W. Kelley, 239 Pacific Bldg., San Francisco.

Editor, F. W. Kelley, 239 Pacific Bldg., San Francisco.

Managing Editor, F. W. Kelley, 239 Pacific Bldg., San Francisco.

Business Manager, F. W. Kelley, 239 Pacific Bldg., San Francisco.

2. That the owners are: (Give names and addresses of individual owners, or, if a corporation, give its name and the names and addresses of stockholders owning or holding 1 per cent or more of the total amount of stock.)

F. W. Kelley, 239 Pacific Bldg., San Francisco.

3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities are: (If there are none, so state.)

None.

(Signed) F. W. KELLEY.

Sworn to and subscribed before me this 1st day of April, 1919.

(Signed) J. H. KELLEY,
Notary Public in and for Marin Co., Cal.
(My commission expires Feb. 7, 1922).

Sixty thousand dollars was appropriated at the meeting of the legislature for county and district fairs for the next two years in California. While it is but a drop in the bucket it should do some good to encourage the district boards of agriculture to take advantage of it to give some fairs. If it is divided in six fairs for each year each one of them would receive $5000 to use for expenses and premiums for live stock, agricultural and industrial exhibits and if each district fair gave a race meeting in connection with it, including the State fair there would be seven weeks on which there would be racing.

The new buildings on the State Fair grounds are rapidly approaching completion and will be ready for occupancy before the State Fair. The track is in good condition but there are not many horses in training there at the present time. The most conspicuous figure is C. A. Durfee who is preparing Mr. Borden's colts for the Futurity Stakes. Secretary Paine is busily employed with the general supervision of things and will soon be ready with the premium list for the livestock, agricultural exhibits. Members of the board declare that the Victory State Fair, 1919, will be the biggest and best fair ever held in California.

MAY DAY RACES AT DIXON, MAY 3

The races for May Day are filled with the following entries for the three-year-old paces:

Miss Logan Pointer by Jim Logan, dam Bally Pointer, entered by R. D. Mayes.

Miss Helmont by Alton, dam Helen Kelley, entered by Wm. M. Ferguson.

L. B. D., bay gelding by Jim Logan, entered by J. E. Montgomery.

2:20 Mixed

Teel Tate (owned by Sonoma).

Dolly D. by Demonio, entered by J. E. Montgomery.

Merrill by Teddy Bear, entered by Chas. Silva.

Free-for-All

Teddy Bear, 2:05, and Bondeline, 2:05½, entered by Chas. Silva.

Vera Hal, 2:05, entered by Wm. M. Ferguson.

The 3-year-olds are working halves in 1:11, 1:12 and thereabouts, with a heat in 1:09 occasionally, while Dolly D, in the 2:20 class, has made a half in 1:03¼, which has been the fastest time yet this spring over the track.

Vera Hal has been a mile in 2:20; half in 1:09 is as fast as she has been.

Teddy Bear has been a half in 1:08, while Bondeline has been in about the same.

All the colts other than the above have been working slowly, while Verna McKinney and El Paso are being worked slowly, with a possible chance of going over the Oregon and Washington circuit this fall.

A feature of the May Day parade will include a display of standard-bred horses owned here and elsewhere, including Jim Logan, Bon Cres, Miss Nutonia and Baby Peter Lincoln. Verna McKinney, El Paso, the yearling by The Anvil; Madeline Marshall and the yearling by Jim Logan, Leota, besides several other 2-year-olds by Jim Logan and Carlokin.

The marine band of 60 pieces, with flying machines and other attractions, will make the 3rd of May a larger and more attractive May Day than usual.

Respectfully,

WM. M. FERGUSON.

WALNUT HALL FARM

Walnut Hall Farm is to continue as a great trotting horse nursery, and Harry Burgoyne is to continue to be its genial and highly efficient manager, while its sole owners are to be Dr. and Mrs. O. M. Edwards, of Pittsburgh. They have purchased the interest of Mrs. Myrtle Harkness Macomber, only sister of Mrs. Edwards, and Mrs. Florence Harkness, widow of the late Harry Harkness, the only brother of Mesdames Edwards and Macomber, who are the only daughters of the late Lamon V. Harkness, founder of the great establishment. Walnut Hall now contains 5,200 acres of the best land in the vicinity of Lexington, and on which there is a stud of six stallions and 140 brood mares, which become the property of Dr. and Mrs. Edwards, along with every building, implement, vehicle and all other things thereon, except, of course, the mares, weanlings and sucklings belonging to patrons of the farm.

The deeds of conveyance have been made and lodged with the county clerk for record. Dr. and Mrs. Edwards and two of their children now are at Walnut Hall Farm. They are accompanied by Dr. Arbuthnot, whose place Dr. Edwards filled as dean of the Medical College of the University of Pennsylvania during his absence in France, and Dr. Blair. It is the intention of Dr. and Mrs. Edwards to spend much time in Kentucky in the future, though they will continue to make their home in Pittsburgh. Mrs. Edwards is much esteemed by the people of the Blue Grass, and they are very happy in the knowledge that she and her husband now own the great farm and that it is to be devoted to trotters, fine sheep and cattle just as her father planned it, and that Harry Burgoyne is to remain, just as he would have remained had Mr. Harkness not died, and just as he has remained since Mr. Harkness' death. The six stallions are Moko, Walnut Hall 2:08¼, San Francisco 2:07¾, Guy Axworthy, 4, 2:08¾, Manrico 3, 2:07¼ and Native King 2:11¼. Manager Burgoyne, at a propitious time, will sell about forty of the mares. It is the farm policy to have between 90 and 100 mares, but during the war the number moved up to the present quota.—Horse Review.

MAGNITUDE OF RACING

(By W. H. Gocher)

Very few of the people who sit in the grand stand at a race meeting or fair and applaud the light harness performers at the finish of a closely contested heat have any idea of the magnitude of racing or the millions invested in race tracks or fair grounds between the Canadian track at Edmonton in the Province of Alberta, where the horses appear in the long summer days, and the sandy tracks in Florida or the perfectly appointed grounds at Phoenix, Arizona, where a race meeting could be held on any day during the winter months. At the present time there are over two thousand race tracks in the United States and Canada, but only about one-half of them are used regularly for race meetings each year.

Upon these courses and those which preceded them, the development of the trotter and pacer has been in progress for over seventy years. In that period a new breed of horses was established, while thousands enjoyed their spirited contests. Also that the memories of those turf battles never fade is evidenced by the remarks of gray-haired men and women, who had the pleasure of seeing the old-time champions over courses that have long since become part of the cities, near which they were located.

The magnitude of light harness racing in North America may be gathered from the fact that during the past two years one thousand nine hundred and fifteen meetings were held in the United States and Canada. The returns for 1917 show one thousand and fifty-six meetings, while in 1918 the number fell to eight hundred and fifty-nine. The reduction, however, was not altogether caused by the war, as many may surmise, as while a few meetings were not given on account of it, the actual cause was the wet weather in September when so many fairs are held and the epidemic of influenza which caused practically all of the fairs and race meetings in the east and south after the first of October to be abandoned.

Of the 1917 meetings, nine hundred and seventy-six held over half-mile tracks and eighty over the mile tracks, forty-five of the latter being race meetings and thirty-five time record meetings. At these meetings there were seven thousand, two hundred and forty-one races in which nine thousand, three hundred and eighty-four horses made forty-one thousand and ninety-four starts, while four hundred and seventy-seven time records were also reported. The premiums distributed amounted to $2,922,593.24, of which $2,279,042.79 were paid out on the half-mile tracks and $643,568.55 on the mile tracks.

Of the 1918 meetings, eight hundred were held on the half-mile tracks and fifty-nine on the mile tracks, thirty-three of the latter being race meetings and twenty-six time record meetings. At these meetings, there were five thousand, eight hundred and forty-two races in which seven thousand, seven hundred and sixty-five horses made thirty-one thousand, eight hundred and eleven starts, while two hundred and forty-eight time records were reported. The premiums distributed amounted to $2,468,203.10, of which $1,848,251.77 were paid out on the half-mile tracks and $619,951.33 on the mile tracks. By comparing these figures it will be found that the September rains which caused many associations to cancel their race programs and the epidemic prevented the distribution of almost half a million dollars among horse owners at race meetings last year.

NORTH PACIFIC FAIR CIRCUIT

The horsemen of the North Pacific Coast are largely indebted to H. C. Browne, the enterprising secretary and treasurer of the North Pacific Coast Fair Association, for a harness circuit this year. For seventeen years, through good times and bad, the members of the North Pacific Fair Association have never failed to offer every dollar their resources would permit, and their purses have always been paid. The purses for 1919 are liberal, considering all conditions, and visiting horsemen will be assured of fair treatment and that everything will be done to accommodate them.

The horsemen of the western states should endeavor to stick to this old reliable fair circuit, especially as in connection with the Canadian Circuit it furnishes them a very good string of race meetings.

THE DEADHEAD MAN

(By W. H. Gocher.)

The manager of every race track has met the deadhead man. He comes in all sizes and colors, from the portly individual wearing a high hat and Prince Albert coat to the good-natured son of Ham, who at some time in his career took care of a trotter. All of them have some kind of a claim on racing or someone connected with it. Like George Washington's proverbial body servant, the deadhead man never dies. A few may wilt in autumn and blow away in winter but the announcement of a meeting will bring the fifty-seven varieties out of the shell on race day.

The reasons advanced for a complimentary are without number. A card index of them would prove interesting reading for the next generation when some clever manager may devise a plan under which everybody will pay. Such a day would be the beginning of the millennium of racing officials, while the men who are now handling the complimentaries would no longer become glorified handshakers for two or three weeks prior to the meeting or fair and be damned up hill and down dale for the balance of the year.

It is a waste of time to tell the deadhead man about the cost of keeping up the grounds, track and buildings, to say nothing of the chances of the weather and other items which are constantly nibbling at an association's bank balance. That does not interest him, as he believes that if he is willing to give his time to see the races, he should be admitted free.

Those who follow the races can at any time name a squad of deadhead men, who flit from town to town, stop at expensive hotels and call a taxi if they have to travel three or four blocks, that consider it a crime to purchase a badge. At each stand one is detailed to take care of the party. If he is turned down, another makes the assault and if all fail, drivers are canvassed for owners' badges. Failing there, they have been known to make a deal with grooms at a race meeting or employees at a

(Continued on Page 7)

Notes and News

For many years Dixon has celebrated May Day, and Saturday, May 3, promises to be one of the biggest events it has ever pulled off. The management has already booked many entertainments, and as there are a lot of good horses that have been trained on the Dixon track, harness racing will be one of the principal amusements of the day.

Mr. R. C. Storrie of San Francisco will send three mares to be bred to U. Forbes, 2, 2:12¼, one from New Mexico and the other two from Oklahoma. Mr. Storrie thinks well of this stallion to be shipping mares from such distant points.

Thos. Murphy will race Peter Chenault 2:04¾, again this season. He did not race last year.

Dick McMahon will have Esperanzo 2:03¼, this season.

The famous Brooknook ranch, Home Park, Montana, has been sold by the C. X. Laribee estate to a livestock syndicate. Mr. Laribee was a prominent breeder of heavy and light harness horses during his lifetime and took an active interest in racing.

Fred Ward is about to ship his racing string East in which will be included O. U. C. 2:02½ and Allie Lou 2:06½.

Around $500 is the average price being paid for American army horses in Europe and thousands of them are being sold. If this country had the material an unlimited number of American horses could be marketed at these prices. But as it is we are unable to take advantage of the situation, as good horses are scarce in the United States. Now is the time to get in and breed all the mares you can get hold of.

The Laurel Hall catalog for 1919, the third issue of its annual series, cover-garbed in white and black (the Laurel Hall racing colors) and descriptive of the trotting stock at the big manorial breeding establishment at Indianapolis, where Peter the Great is king, is being distributed by owner Stoughton A. Fletcher and farm-manager H. Greely Winings. It is an interesting and handsome work.

John E. Madden, master of Hamburg Place, at Lexington, reports a star yearling trotter by Peter Volo, 4 2:02, dam by Siliko 2:08½. So promising does the youngster look at the present time that the astute Madden rates him a 2:30 trotter very early in the season.

Eight hundred and twenty-seven nominations were made for the Kentucky Futurity, $21,000, for foals of 1919 on April 1. The news will be gratifying to all horsemen, as it is to the Association.

J. H. Nelson of Selma is advertising Expressive Mac 41513 for public service. Expressive Mac is not only a wonderfully well bred horse but ranks as one of the best sons of McKinney 2:11¼. His dam is Expressive (3) 2:12½ and is one of the best daughters of the great Electioneer. Expressive Mac is not only a fine individual but is a sire of race horses as will be seen by his advertisement in another column. Mr. Nelson has already booked a good many mares and is receiving many inquiries in regard to engaging the services of his horse.

Charles A. Spencer, formerly of Palo Alto, for many years in charge of Alex Brown's horses and superintendent of the Woodland Farm is going East to train horses the property of M. Freund of St. Louis, Mo. Charlie Spencer has been a prominent figure among the trainers on this coast and has an excellent reputation for being an honest and competent driver. He has been highly successful with colts as well as with aged horses. Mr. Freund has displayed good judgment in securing his services.

The United States Department of Agriculture has recently published Farmer's Bulletin No. 1030, "Feeding Horses." The bulletin tells how to compute balanced rations for horses, lists a number of feeds and the value of each, and suggests maintenance rations for idle horses and for horses doing ligh or heavy work. It will be sent on application.

Up to the end of March Secretary Flaws reports that the Harness Horse Association has received a total of 320 members and that the only circuit to practically ignore the proposition has been the Grand Circuit. The Pacific Coast is represented by three members in California and one member in Oregon. The largest membership comes from the state of Illinois which is seventy-two.

BROOK NOOK LIVESTOCK RANCH SOLD

Cyrus Gates of South Bellingham, Washington, representative of the estate of C. X. Larrabee, has just sold to the Gilbert Livestock Co. of Dillon, Montana, the 14,000-acre Brook Nook ranch, situated at Home Park, Madison county, Montana. This wonderful ranch was owned by the late Mr. Larrabee. At one time he had over 1,000 standard bred horses and a large band of pure bred Morgans, and such stallions as the King Red, Alcone, Alfonso, Vice Regent, Jubilee de Garnett, Le Trado and the prize-winning Morgan horse Frank Allen. In the deal just closed the Gilbert Livestock Co. became the owners of over 200 head of standard bred horses, and the stallions Frank Allen, the King Red and Le Trado. Also 600 head of pure bred shorthorn cattle and 150 head of grade shorthorns. This ranch has 45 first-class barns, a half-mile race track and 75 miles of first-class fencing without any barb wire. This farm is watered from five rivers and borders on the Madison National Forest Reserve, which contains over 500,000 acres of first-class grazing land and is in a valley that is free from snow. The writer has been on some places where he thought he had seen first-class hay, oats, barley and alfalfa raised, but to my mind the Larrabee ranch is the greatest place for grain and hay and stock raising that I have ever visited. In addition to all these qualities, the place is a sportsman's paradise. Trout can be taken in great quantities from three rivers within five minutes' walk from the dwelling house. C. X. Larrabee bought this property in 1888 and expended over $650,000 on it. It was the apple of his eye, and he was a most critical horse fancier. Everything on his place had to be pure bred and registered, and as individuals the stallions and matrons had to be up to a high standard before they were permitted to set foot on Brook Nook. Mr. Larrabee died one day, and neither one of his two sons nor his wife were ever interested in the ranch that was the pride of the great business man, financier and philanthropist, C. X. Larrabee. Under the guidance of Henry L. Miller, who was the manager of this ranch for over 13 years, and with the aid of Mr. Gates, this great ranch has been a paying investment. The Gilbert Livestock Co. of Dillon, Montana, are old settlers in Montana and already own a ranch adjoining the Brook Nook, on which they have 1,000 head of cattle and 25,000 head of sheep, and for them to make the large investment which goes into the six figures and take over all the cattle and pay cash for it, goes to show that land, cattle and horse values in the great West are not on the decline. The Gilbert Livestock Co. will continue in the raising of cattle, sheep and standard bred horses. The standard breds left on the ranch consist of the very best mares that were owned by Mr. Larrabee. All of the dry mares and unproductive animals were sold by Mr. Miller, and the writer again hopes to see the great Brook Nook ranch sending out trainloads of standard bred horses. Mr. Gates, who closed the above deal today and took lunch with me, told me many wonderful incidents regarding the late Mr. Larrabee and his horses, and how much he enjoyed them, and that he knew the names of every mare on the place and also named every colt and kept the most up-to-date and strict account of the birth, breedings and markings of every horse ever on the ranch. In addition to the Brook Nook ranch, Mr. Larrabee was the owner of the Ruby Dell ranch. This ranch consists of 1,280 acres and adjoins and abutts on to the great Ruby mines on Ruby river. There has been taken from the Ruby mines 150 million dollars in money and today the Harvard Mining & Dredging Co. is taking out myriads of gold from the land adjoining the Ruby Dell ranch. This ranch raises the greatest oats, wheat, barley and alfalfa that I have ever seen, and I would like to be able to buy it and stock with the kind of standard bred horses that I would like to own. It consists of 1,280 acres of as good land as ever laid outdoors, and the best water system to be found in the world.

A PAIR OF HIGH CLASS SHOW MARES

Mr. Geo. E. Plummer of Seattle, Wash., has purchased a stable mate for his show mare Joan Sawyer. The name of Mr. Plummer's now purchase is Alice K. Dare, brown mare, sired by My Major Dare, dam Alice King by Forrest King.

Alice K. Dare is quite a prize-winning show mare. As a 2-year-old at the Missouri State Fair she won first in stallion, mare or gelding class, and to win first in this class Alice K. Dare had to be a topliner. At the same fair she also won first for mares in fair gaited class. At Springfield, Ill., she won first in stallion, mare or gelding class, 2 years and under 3, to harness. Also first for five gaits, 2 years and under 3. At Minnesota State Fair, for mares under 3 years old at three gaits, she won first, and for champion mare, three gaits, she won first. Also won second in harness for stallion, mare or gelding. So Alice K. Dare was a star at the Minnesota State Fair. At Denver National Western Horse Show Alice K. Dare won second in class for 2-year-olds or under in a field of seven. She was a bit out of fix at Denver. Mr. Plummer has in Alice K. Dare and Joan Sawyer a pair of saddle-bred show mares that from a point of elegance of breeding, conformation, blue ribbon winnings, soundness and character that surely give him much pleasure. I have seen some nice saddlers, and I class Mr. Plummer's mares as being of the very best I have yet looked at.

C. A. HARRISON.

EARLY RACING IN CALIFORNIA

(Special Correspondence)

The red letter decade in California racing dates from 1879 to 1889. During that time there were records broken, both state and nation; more hotly contested and faster heats, and a larger number of trotters and pacers of nearly equal speed than at any other time in the history of the state.

The breeding stables of Leland Stanford, Wm. Corbitt, Monroe Salisbury, L. J. Rose and Count Valensin were then well established and they were raising colts and breaking records, each stable endeavoring to produce better and faster horses than his rivals.

As we look over the list of horses then in the spotlight, what a splendid class it numbers. Among the pacers there were Arrow, Adonis, Almont, Patchen, Cricket, Homestake, Goldleaf, H. C. Lee from Montana, Killarney and Yolo Maid. Among the stalions and mares there were few better—the imported trotters Dictator, Guy Wilkes, Santa Claus, Echo, Electioneer and Dexter Prince, the imported mares Elaine and Sweetness, and the native-born Direct, Palo Alto, Adair, Antevolo, Ashley, Lot Slocum, Woodnut, Stamboul and Ashley, and the fast mares Enchora, Nellie R. Manon, Sunol and others not quite so speedy.

As I have previously stated, there were but few pacing races programmed in this decade—so few, in fact—one reason, a prejudice against the side-wheelers—that for several years the directors of fairs hung up no purses for that class of racing. And in 1886 at the state fair three only out of 32 races, 17 running, were for pacers.

At the state fair, Sept. 22, 1887, the little pacer Arrow, by A. W. Richmon, dam Ceichton, then owned by Charles F. Durfee, and the Spaniard Corrubias lowered by 3½ the record of Prussian Maid, 2:19. The starters were Arrow, Killarney and the very fast but erratic Denver (Colo.) pacer H. C. Lee. Few owners had dared enter the circuit against this so-called "whirlwind pacer." At the word Lee was leading, but the driver of Arrow, driving "at terrific speed," passed Lee, went to the quarter in :33½, the half in 1:08½ and came home in 2:15½. Lee took the third, and was distanced in the fourth heat. Time, 2:15½, 2:19½, 2:24, 2:16½. It was a wonderful heat, said the editor, for so young a horse. This was Arrow's second race within eight days, he having taken first money in a race September 15 against Homestake, by Gibraltar. Both horses owned by Monroe Salisbury. Homestake took the first two heats; time, 2:21¾, 2:16½. Later, Arrow, contending with Killarney and Homestake, paced three straight in 2:16½, 2:14, 2:19½.

The year 1888 produced three of the most wonderful three-year-olds on the Pacific Coast, if not in the world—Adonis, by Sydney, dam Venus, by Venture; Goldleaf, by Sidney, dam Ferndale, and Yolo Maid, by Alexander Button, dam by Deitz St. Clair. Goldleaf started at Oakland in the 2:27 class for a purse of $700. It was one of the severest three-year-old races of the coast. Goldleaf won the first, fourth and seventh heats, Little Hope the fifth and sixth heats, and San Diego the third heat. Time, 2:19¼, 2:19, 2:23¼, 2:21½, 2:23¼, 2:26, 2:20. Three days later Goldleaf was beaten by Adonis, he taking the second heat in 2:18; Cricket third money.

On arrival at Sacramento, Sept. 6, there was a purse hung up for the 2:30 class of $600. There were seven entries: Yolo Maid (Goldsmith), Goldleaf (McDowell), San Diego (Walsh), Ned Winslow, Elwood, Cricket and Little Hope. Yolo Maid took the race in straight heats, pacing first and best heat in 2:19.

Yolo Maid, at Stockon, Sep. 20, started in a special race with Almont, Patchen and Goldleaf, Patchen making the Maid pace in 2:16½, 2:16½, 2:18. Was it this race that caused the sale of Yolo Maid, then owned by Mr. Hayward of San Mateo, to Marcus Daly of Anaconda, Montana, for $15,000? Probably it was, for soon after this race Daly wired to Adolph Ottinger, then in partners with Keating in a number of trotters and pacers, to learn the price of Yolo Maid. The price was named, Daly wired his check and the mare was sent to Montana.

The following year she again appeared under Daly's name and started at the state fair for a special purse of $1,200. Quintin was behind Yolo Maid, Hickok drove Adonis and McDowell was still piloting Goldleaf. The two experts last named figured to wear out the Maid, this being their only chance of beating her. Quintin knew this, and going from the wire at a terrific gait was passed by McDowell on the backstretch, driving Goldleaf to the half in 1:03½. He then pulled back and Hickok going up drove for the heat, but failed. In the second heat Hickok trailed the Maid and down the stretch was gaining inch by inch. Near the wire Adonis went into the air. McDowell, now scoring very fast, led the Maid to the backstretch, but it was to fast and Goldleaf broke. The Maid then passed the half in 1:05½ and came in jogging. Time, 2:12½, 2:14½, 2:15½. Goldleaf that year is said to have paced in 2:11¼. Adonis, in 1890, took a record of 2:11½, and in 1891 Cricket paced in 2:10.

When in 1877 J. M. Conley, the well-known Chicago horseman, brought Santa Claus to this coast none dreamed that he would be the grand sire of Lou Dillon, 1:58½, the world's fastest mare. Santa Claus was sired by Strathmore, dam the fast-trotting mare Lady Thorn Jr. On arrival in California the young stallion was purchased by P. A. Finnegan. He was entered in the circuit in 1879, and starting

at Oakland in September easily won in the 2:40 class and the free-for-all stallion stake in the easy time of 2:25. At Sacramento the following week he met the same class of horses as at Oakland and again easily won out in 2:26½. At Stockton, Sept. 18, there were eleven entries for the $800 purse, with six starters. Santa Claus took straight heats, but was driven out by Magdallah in 2:22, 2:20, 2:21. In 1880 Santa Claus defeated Nutwood at the state fair, trotting a third heat in 2:18.

His sensational race was with Elaine, an Eastern mare, imported by Governor Stanford at a cost of $7,000. She was by Messenger Duroc, dam Green Mountain Maid, and with a world's record of 2:24½ at 3 years old was purchased by Stanford because of her victory over Santa Claus. Elaine, September, 1880, in a 3-5 with Enchora, Gibraltar and Reliance, trotted in 2:21¼, 2:22½, 2:24. About this time Elaine and Santa Claus were started in a three-in-five trot for a purse of $7,500, the winner to give the money to the San Francisco charitable institutions. Santa Claus won the race. This is the statement of John Rowan, then keeper of Santa Claus and now over 80 years of age still driving colts over the Stockton track. Santa Claus was then returned east and made a record of 2:17½.

The trotter known as Ashley, from way up in Plumas county, was the talk of 1881, he rotting an eighth heat in 2:26½ Owned and driven by John Corcoran of Sacramento, he was entered in the 2:22 class for a purse of $1,000. The starters were Ashley, Crown Point, by Speculation (G. Valensin), Echo, by Hambletonian (E. H. Titus), and Del Sur, by The Moor (L. J. Rose). It was on Saturday and five heats only were driven out because of darkness. Then came the news of the death of President Garfield, and Monday being declared a legal holiday, the race was finished on Tuesday. Echo took the first and sixth, Del Sur the second, Crown Point the third and fourth and Ashley the fifth, seventh and eight. Time, 2:25, 2:28, 2:26, 2:26¾, 2:29, 2:23¾, 2:26½. That was a race.

Another sensational race of eight heats, not fast but tragic, was that of September 13, 1883, when Bonny Wood dropped dead near the three-quarter pole after taking two heats. The entries were Telegraph, by Tilton Almont, fourth, seventh and eighth; Adair, by Electioneer, fifth and sixth; Tilton Almont, seventh, and Bonny Wood, by Nurwood, second and third heats. Sister, by Admiral, owned by Monroe Salisbury, ruled out. Time, 2:26, 2:34½, 2:34½, 2:38½, 2:39½, 2:40¾, 2:38½, 2:40¼.

The so-called Occident stake, an annual state fair event since 1881, this year, I understand, has been discontinued. It has seldom been an attractive or profitable event, for, although at times the purses have exceeded $3,000 and as high as fifty colts entered on the day of the race, one or perhaps four only were fit to start.

The Occident stake was the outgrowth of Stanford's fast gelding and the popularity of the ex-Governor. At the state fair of 1880, while Occident was being given exhibition spurts in front of the stand, Stanford stood at the gate watching him. A few minutes later the president of the board accompanied by all of the directors, marched from the clubhouse to where the ex-Governor stood and President P. A. Finnigan presented Stanford with a large and costly cup suitably engraved and bearing upon one side Occident making his record of 2:16½. It was then decided to offer this cup for all future three-year-olds as a prize. The society at that time owed Stanford $1,500 and he made them a present of the amount, to be used as the foundation of the Occident stake. The first colt to take the stake was Albert W., in a walkover. Antevolo, in 1884, took the race, with Robert Lee second, Griselda distanced in the first heat. Time, 2:28, 2:29¾, 2:31¼. Alcazar, in a good contest in 1886, took the first, second and fifth, Transit the third heat, in 2:25½, 2:24½, 2:25½, 2:26¾, 2:26¼. In 1889 Sunol had a walkover in 2:16½.

Great events are ofttimes the result of a very trivial affair, and the great popularity of the Dictator family was due to a four-year-old race at Sacramento in September, 1881. The four-year-olds in the contest were Belle Echo and Annie Lawrie, by Echo; Honesty, by Priam, and Alexander Burton, by Alexander. Belle won out in 2:27¼, 2:25½, 2:25. Monroe Salisbury stood watching that race. He was not ambitious for fame, but for money along trotting lines, and although he owned Sister, Gibraltar, Homestake, Bateman and several others, he was not successful. Seeing this race, however, he resolved to go east and purchase a trotter that would outclass that bunch. The result was the four-year-old black stallion Director, by Dictator, dam Dolly, by Mambrino Chief. At the same time he made a contract with John W. Goldsmith, one of the most expert drivers of that day, to train and drive his stable of trotters. Director was entered in the circuit of 1882 and first started at Oakland September 8. He there met such horses as Enchora, Honesty, Cairo, Del Sur, Ashley, Starr King and Reliance. Enchora took the first heat; time, 2:22½, 2:24½, 2:24, 2:24½. At Sacramento, September 12, Starr King took the first heat, the fastest of the race, in 2:23½. At Stockton Director started against Enchora, who took the first heat and Starr King the second heat. It was the fastest track over which they had trotted, and the time called was 2:23¼, 2:23¾, 2:23¾, 2:23½, 2:23¾, 2:23¾, 2:25½, 2:26. At San Jose he trotted a fifth heat in 2:26½. The following year Salisbury sent Director east, and making big money, one purse being $10,000, he was returned to California with a record of 2:17.

One of the most consistent and reliable trotters on the California circuit was a dark chestnut mare called Nellie R., by Gen. McClelland Jr. Her first race, at Petaluma, September 8, 1881, was easy, her best time 2:41 second heat. Up against a better class at Oakland September 8, she outfooted Albert W. and Vandelyn in (best time) 2:21½, third heat. Then going to Sacramento, in the free-for-all purse of $1,200, Manon and Vanderlyn were in the race, Nellie trotting the second and third heats in 2:21½, 2:21¼. At Stockton, Albert W., her only contestant, took the race. Nellie wasn't feeling well and took only the first heat. Time, 2:22¼, 2:20, 2:22¼, 2:24. In 1882 she was not on the circuit, but in 1883 at Oakland she won easily from Albert W. and Vanderlyn in 2:21½, best time. At Sacramento it was easy money for the $1,200 purse with Manon and Vanderlyn as competitors, Nellie again trotting in 2:21¼, best time. When the trio came to Stockton Brigadier, by Happy Medium, made her trot a third heat in 2:20. In 1885 she made tht race of her life, for she met a fast combinationfi headed by Iuy Wilkes; Adair, by Electioneer, dam Addie Lee; Manon, by Nutwood, and Arab, an imported stallion handled by Orrin Hickok. At Petaluma, September 3, Arab got the first money, Nellie and Arab, however, trotting a dead heat in 2:19. When they reached Stockton the fight was to a finish. It was a $1,000 purse, 50, 25 and 10 per cent. Nellie R. (S. Sperry) took the first, second and seventh heats, trotting the sixth heat dead with Guy Wilkes. The big bay stallion (J. W. Donathan) took the fourth and fifth heats, and Adair (A. F. Smith) the third heat. On the sixth heat, according to rule, Adair and Manon (Goldsmith) were ruled out. Time, 2:18¼, 2:17½, 2:19, 2:19, 2:20, 2:21, 2:21¾.

Three stallions and a mare, it was probably the fastest seven heats ever trotted in California.

This article is already too long, with some of the best ones of the decade—Guy Wilkes, Direct, Stamboul, Palo Alto, Lot Slocum, Dawn, Sunol and Sweetness—not yet noticed. I must continue this decade next time.

Wm. R. Ruggles, an inspector of streets and former running-horse owner, is exceedingly proud of his three months' old colt by Bon Watt, dam a black mare by Mechanic, with an untrained matinee record of 2:21½. He intends to breed the mare to the Anvil. GEO. H. TINKHAM.

NEWS FROM OREGON—WHAT'S DOING AT THE STATE FAIR GROUNDS

(Special Correspondence)

On my arrival at the State Fair grounds at Salem, Oregon, I was not only delighted with the conditions of the track, which is like velvet but more than pleased with the enthusiasm manifested by the horsemen gathered there and the condition of the horses. Everything looks good to me and the general outlook is excellent for high-class racing throughout the North Pacific Fair District this year.

The different associations have offered attractive programs and the prospects are the races will fill well and, as there will be but a few race meetings in California, many of the horsemen from that section will no doubt take advantage of the situation and race on this circuit instead of going to the greater expense of shipping East.

In my peregrinations around the track and talks with the different owners and drivers I picked up the following items relative to the horses in training here and news concerning them.

Fred Woodcock's stable consist of the following horses: Hal Paxton, pacer, 2:07¼, bay stallion, by Hal D., dam by Allmont.

Cavalier Gale 2:08¼, trotter, by Baron Gale, dam Nella J., 2:14, by Jay Houkes.

Jim D'Ora, pacer, 2:15½, by Capo D'Ora, 2:01¼.

Hal Paxton, Jr., 2-year-old, trial 2:22, Nov. 3. His speed is out of dam of Capt. Mack, 2:05, and Nifty, 2:07¼.

Hal May, black gelding, by Hal B., dam by Alexis II.; Bulah, dam of The Zoo, 2:09¾.

Yearling, full brother to Hal Paxton, Jr., and yearling by Hallimont, 2:05¼, out of Nellie Convert, dam by Grey Hal, 2:10½, Grey Ghost, 2:07¼, Hal Grey, 2:08.

Mr. Woodcock is now a breeder and has the dam of Capt. Mack in foal to Cavalier Gale 2:08, and at her side.

Frank V. McCarthy, of 860 North Cottage street, Salem, Oregon.

Cherry Hal, bay mare, pacer, by Hal B.; dam, Diablo, by Diablo. Mr. McCarthy has a real pacer in Cherry Hal and McCarthy is a regular first-class fan. Cherry Hal is bred well, her second dam is Tuliby D., by Allmont, third dam by Hambeltonian Mambrino.

W. K. Shinn has a small but select stable—just one—and this one looks good to me, being a 5-year-old, a near bay by The Great Bondsman and out of Olatto, the dam of Mr. McCarthy's pacer.

Bob Stetson is at Salem but all of Bob's hay destroyers are owned in and around Centralia, so Bob is moving to Centralia in a few days. The names of Bob's speedsters are as follows:

Helen B., 2:24½, pacer, by Hal B.; dam by Del Norte. This 5-year-old is about as beautiful a Hal B. as ever lived and the way she can step makes me say she is a coming 2-minute pacer. She is owned by Bertrand and West, Oloqua Stock Farm, Oloqua, Wash.

Early Voyage, black gelding, 5-year-old, by On Voyage; dam by Zobel, by Zombro. The steed is just barely broke but acts and looks like a trotter. Is owned by W. West, Oloqua.

The Magnet, 6-year-old pacer, by Magnet, son of Allerton; dam, Dora Electata 2:11¼, by Electra, owned by Toney Barrey, McLevy, Wash.

Sunset, brown gelding, 7-year-old, by Sunny Jim; dam by Tumwater. This pacer is owned by Ralph Mackey, Centralia. This steed is charged with 2-minute speed.

Mr. Stetson will take over Chief P. McGrail's black pacer, Hallie McGrail, by Hal B., dam a thoroughbred. This is a real pacer and an elegant mare in every way.

H. D. Cox of Lady Hal 2:04¼ fame, has just one pacer and, believe me, this young miss can pace fast and does not wear a boot or strap except her harness. She is by Hallimont, 2:05¼, and to see this filly pace an eighth in 15 seconds would belie Mr. Gocher's statement. The passing of The Hals, and, while I am at it, let me say that The Hal Paxton, owned by Fred Woodcock, and out of the dam of Capt. Mack, would make the Gocher theory that the Hals are passing look sick, for I will now go on record by saying the Hals are not passing nor passee.

John B. Stetson is here with May Day Hal, 2:13¼, sister to Hal Boy and the writer owns a half of this hussey and, believe me, that if she wants to live long she better make good this year.

Western Scout, 5-year-old, brother to King Brook, is a trotter in Mr. Stetson's stable. I own all of this steed and I wish some friend would tip this bay steed off that he better make good or else I will send his hide to the tannery.

Perry Mausey, the debonair Salem trainer, has three head of hay destroyers.

B. & M., brown stallion, by Zombro, dam by Alcone. B. & M. has a record of 2:15¼, but he can outtrot this, and is charged with miles below 2:14.

Salem Boy, bay gelding, by Lord Lister, by Zombro. Salem Boy has been miles in 2:12 last year.

Also a full sister to Salem Boy. This 5-year-old mare is a nice one and acts like a trotter.

W. F. Shults, of Forest Grove, is here with a beautiful 3-year-old by Cavalier Gale 2:08, dam Silphon by Silver Bow, and if ever I saw a grand 3-year-old trotter the above is the one.

Hal Brown VI., brown gelding by Hal B.-Granger Rose. This young pacer has speed, good sense and good looks and manners.

Josh Merril, of Corvalis, Oregon, is here with two full sisters, 5- and 6-year-olds, by The Bondsman-Hazel Patchen 2:13¼. These young mares are green but have the Bondsman-Patchen Boy finish and are good gaited. Mr. Merril has the one fine champion in the 2-year-old trotting mare Lottie Ansel II., 2:14¼, here being bred to Cavalier Gale 2:08. Lottie has been a first-class plow horse for the past two years and she looks well and it was like meeting an old friend to see Lottie Ansel. Lottie should make a great brood mare and especially mated to such a stallion as Capt. Mack, 2:08.

Alex. Grant is here and now owns Francis J. 2:08 by the Patchen Boy. Mr. Grant has also the stallion Alkader 2:09¼, by McKinney, dam, a producing mare by George Wilkes.

This stallion is a counterpart of Carlokin, and when I say he is a fast, good-looking, beautiful and elegantly bred stallion I need not be afraid of any critic saying I am looney, for Alkader is a high-class stallion in type, in breeding and in speed, and for an owner he has a man whom I am proud to say is doing more for the harness horse interests of the North Pacific today than any man in a similar position I have ever met. This man is A. H. Lea, secretary Oregon State Fair. Mr. Lea is also the owner of Boneray, brown gelding, by Bonaday 2:11¼, dam by McKinney and Boneray; trotted in 2:15 last year for his then owner, Mr. T. L. Davison. Mr. Lea has the Salem track in velvet condition and is out working on it and doing wonderful things for the encouragement of the harness horse and every owner and trainer, and caretaker at Salem have a kind word to say about A. H. Lea. For myself, I wish I knew ten thousand such men as Mr. Lea.

Eddie Brain is here with May Davis, 2:08¼, pacer, by Barado, 2:20.

Complete, 2:11¼, one of the gamest, sweetest little trotters that ever graced a race track. This mare is by Palet.

Hi Ho, 2:11¼, brown stallion, pacer, by Keeler, dam by Alcone. This pacer is a really classy looking pacer.

Gresham Boy, 2:24¼, is a pacer by Don Hal, full brother to Hal Boy 2:01¼. Gresham Boy is a real pacer and if W. H. Gocher were here he would be apt to refute his statement that the Hals are passing, for the coming on crops of Hal B.'s sons show that the Hals are not passing.

Rockwood Hal, a full brother to Sandy Hal, is a grand, stout, fast, sound pacer and will do to watch this year.

Hal C. is a bald-faced bay gelding pacer from the wilds of Oregon. This wiggler reminds me of Gold Medal, a pacer brought North years ago from California by Dutch Dave, Wasco Girl, 5-year-old, by Prince Lovelace, is a fast green trotter.

A 3-year-old green pacer named Madge J. is by

Francis J. 2:08. This filly is a good pacer for the work done on her, and if she is as game and fast as her sire, Francis J., she will do.

I am glad to say that I have met more enthusiastic horsemen, owners and trainers, at Salem this spring than for many years. Mr. Lea has such fine stock and is doing so much to please everybody that the men who are interested in harness horses are all happy.

John Kirkland is due to arrive here Monday with Mr. Geo. L. Parker's good pair of Hal B. pacers, Helen Messelton, 2:11¼, and sister, Janice L. B. Green. The above are a beautiful pair of mares and no pair ever had a better owner than is Geo. L. Parker.

Mr. Kirkland has two other hay destroyers, McAlpin, 2:14¼, is a big, fast pacer, has a trial of 2:08. This pacer was sired by Prince Seattle 2:18¼, and a good game race horse was Prince Seattle.

Sim Lindsay is due here tomorrow with a stable of hay destroyers whose lineage I will not now write of, as this yearn is about long enough now and at that I am glad to send it in because I can say the smile of satisfaction is on every horseman's face at Salem and it's three cheers for Secretary A. H. Lea.

C. A. HARRISON.

Thoroughbred Matters

RACING DATES

Harford Agricultural and Breeders' Association, Havre de Grace, Md.:
April 16 to April 30 (12 days). Mutuels.

John S. Troy, formerly of Louisville, Ky., and a well-known turfman who was associated with Col. W. E. Applegate in the older days, died at Point Richmond, Cal., on April 3.

Arrangements have been made in England this year for 181 days' flat racing and, with the exception of Croxton Park and Thirsk, all the race courses will again be in use.

Sam Hildreth has his string well advanced, though they might appear high to the average man. With the aid of Jockey Taplin and a pair of big Mexican spurs the three-year-old Purchase is becoming more docile and tractable. He may give up his bad habits under the present treatment, though it is possible he will return to his evil ways when he gets into racing society again.

Frank Midgley, a brother of Willie Midgley, trainer of the horses belonging to G. A. Cochran, died yesterday after a short illness due to stomach trouble. Frank had been employed by the government for the past winter, prior to which he assisted his brother. Both were riders of prominence years ago.

The [illegible] revenue Australia from the totalizator in this state continues to grow. From the beginning of July 1918 to the end of February this year £478,755 [illegible] against $191,190 for the corresponding [illegible] 1917-18. In betting taxes the return for the first [illegible] months of the government's current financial year [illegible] $202,025 against $236,72[illegible] from the beginning of July, 1917, to the end of February, 1918. The sum of $770,790 for eight [illegible] contributed from the race course as [illegible] the public's sporting [illegible]

H. H. Devereux's [illegible] chestnut filly by Star [illegible], the first foal out of that sire, at Parkland [illegible] Red Rose, [illegible] by Curtis Judd, was [illegible] by Tony Berrera at Overland Stud.

Mrs. T. L. Johnson, who is one of the most enthusiastic horsewomen on the Pacific Coast and who breeds and shows high class saddle horses is training "King of Air" for exhibition at the Horse Show at the State Fair. She also has a number of others that are destined to take blue ribbons when they are exhibited.

Mr. A. K. Macomber has engaged Jockey Bob Harrington to ride for his this year. Harrington will probably ride Star Hawk and Liberty Loan in the big races. He is not only a first-class jockey, but has the reputation of being absolutely fearless and honest, besides of having the advantage of being one of the smallest jockeys in the business.

A new jockey club has been organized at Sheridan, Wyoming, for the purpose of holding two twelve-day running meetings this season. The first meeting will be held during the latter half of June and the second probably in September. The program will consist of six races daily with purses of from $200 to $400 each. With Cheyenne, Wyo., Reno, Nev., and Sheridan, Wyo., forming a circuit horsemen will have some sixty days of racing in this section before the 1919 season ends.

Horsemen who witnessed the work of Eternal at Hot Springs are ready to back him liberally to win the Kentucky Derby, for which he is being given a steady preparation. He was only asked to go a half mile at top speed and covered the distance hard held in 46 3-5, galloping out the three-quarters in 1:14. An idea of the high speed the colt possesses is gained from the fact that he traveled the first quarter in 22 1-5 and the three-eighths in 34 2-5. Owner McClelland, after the gallop, was all smiles and, barring a mishap, regards his representative as the certain winner of the coveted Louisville race. The Wanderer, Eternal's stablemate, was sent three-quarters in 1:17 easing up. The colt is still on the high side and will require much work before he is in condition for his first start this year. Exterminator also attracted the horsemen's attention this morning in his mile work-out, which he made in 1:43 hard held.

OPENING DAY AT HAVRE DE GRACE, MD.

Chilling winds and rains had no effect on the enthusiastic thousands who came from Philadelphia, Washington and Baltimore to attend the opening at Havre de Grace, April 16, and to witness the hollow victory of the great Billy Kelly, whose sensational victories as a 2-year-old are still fresh in mind. In every way Commander Ross' candidate displayed that bulldog courage and gameness which made him a popular idol last year. His victory today indicates that he will be shipped to the Blue Grass State after fulfilling his Havre de Grace and early Pimlico engagements

The clubhouse stand and lawn were filled to overflowing. Starter James Milton sent the fields away with his usual dispatch. The Glen Riddle Farm Stable uncovered a speedy youngster in Peter Combs in the opening race, in which several newcomers caused Starter Milton seven minutes' care, but they were finally dispatched to a good start. Peter Combs ran away from his opponents, and won by four lengths.

The fields were greatly reduced by withdrawals on account of track conditions, night rains having converted the course into sloppy going.

Jack Hare Jr. was given an easy race in the feature.

All the Jeffords and Glen Riddle candidates appear close to their best racing condition.

Commander Ross scored a double victory. Dottie Vandiver winning in addition to Billy Kelly. Sande rode both of them and also had the mount on Indolence, which won the last race of the day.

In the event of a resumption of Canadian racing, it is Commander J. K. L. Ross, intention to send a division of his large establishment to his native country in charge of Fred Stevens. The stars of the string will fulfill their metropolitan engagements under H. G. Bedwell's direction.

GREAT BOTAFOGO IS HALF YANKEE

It seems that the actual price paid at Buenos Ayres for the great race horse Botafogo to his former owner, Diego Alvear, by M. A. Martinez de Hoz was $200,000 and the privilege of breeding ten mares to the horse.

Only one other horse in the world has been sold for $200,000. This was Prince Palatine, winner of the St. Leger and other great races in England eight years ago. J. B. Joel paid $209,000 for the son of Persimmon, but the privilege of breeding ten mares to Botafogo would more than overbalance the excess of $9,000 in money paid for Prince Palatine. If stud fees in the Argentine Republic are anything like they are in England, where Mr. Joel's horse commanded $2,000 before he ever got a foal.

Botafogo is a 4-year-old colt by the wonderful native South American horse Old Man, that outranked the English Derby winner Diamond Jubilee among winning sires there a year or two ago. He was by Orbit, son of Bend Or, and was out of the French mare Moisonneuse, by Dollar, the horse whose life-size statue in bronze stands at the entrance to the Empire City track in Yonkers, N. Y. Korea, the dam of Botafogo, was sent to South America from Kentucky in 1910, and was sold there with a foal by Ben Strome for about $1,200. She was foaled in England, but raced mostly at St. Louis for T. P. Hayes in 1904 as a 2-year-old, winning four races and being placed three times in thirteen races. That was Korea's only racing season in this country. She was retired early and sent for sale to South America a few years later when the racing slump came. H. P. Headley of the Beaumont Stud Imported Korea and after her racing, until sent to South America, she was one of the band of brood mares at the Dixiana Stud of Mrs. T. J. Carson of Lexington, Ky.

The new owner of Botafogo is perhaps the best known breeder of fine horses and cattle in South America. He enjoys the distinction of having twice won the championship of the London Hackney Show with Hopwood Viceroy, a stallion he had shipped from Buenos Aires to England for the exhibition and was afterward about to ship to New York for the National Horse Show of America, when the breaking out of war caused the abandonment of the annual exhibition at Madison Square Garden. When Craganour was disqualified after finishing first in the Epson Derby of 1913 Mr. de Hoz paid $150,000 for the horse to head his stud of the Haras Chapadmalul in South America.

South Americans have long been setting the pace in making the prices of great race horses. More than thirty years ago they established a record by paying $86,870 to the Duke of Westminster for Ormonde, and in 1893 they raised the limit again by asking and getting $150,000 for the unbeaten son of Bend Or. W. O'B Macdonough of California being the buyer. Since then they have paid British breeders such fabulous prices as $150,000 for Craganour, $151,200 for Diamond Jubilee and $125,000 for Cyllene, and now they have capped the climax by breeding one that brought more money than any of the importations.

It will surprise many turfmen to learn that of the nine horses ever sold for $150,000 or more Argentine breeders have purchased five and sold two. Botafogo is the first horse bred elsewhere than in the British Isles that has brought such a price. The largest sum ever received by an American was $125,000, paid by a syndicate for the imported English stallion Rock Sand, when Major August Belmont sold him to go to France in 1912. Flying Fox ranks as the highest priced horse ever sold at auction, $189,750 having been realized for him in the famous Kingsclere sale in England in March, 1900.

Botafogo must be a horse of phenomenal speed. Under high weight he has won over the Buenos Aires, Palermo mile in 1:37¼, and in his match with Grey Fox at one mile and seven-eighths Botafogo won by seventy yards in 3:07. This is ten and three fifth seconds better than Orcagna's American record for the distance—an unusual one, and Orcagna carried only 96 pounds for the record made at Oakland, Cal., March 2, 1909. Botafogo's time works out at a slightly better rate than 3:20 for two miles, or 1:40 for each mile.

The world's records for two miles, which give a fuller comparison for speed purposes, are:
American—Everett, 3, 107, Pimlico (1910), 3:25 3-5.
Canadian—Azo, 3, 90, Windsor, Ont. (1909), 3:29 3-5.
English—Pradella, 7, 116, Ascot (1906), 3:19 2-5.
Australasian—Downfall, 5, 108, Riccarton (1908), 3:23 2-5.

WEIGHT-FOR-AGE RACING

Since the Jockey Club has decided to contribute to an annual weight-for-age race it will no doubt be an incentive for all the major associations to lend a helping hand toward making this class of races more popular than it has been in late years. Such races have been out of date for almost a generation, excepting in a few cases, but the time has now arrived for their resurrection, if only to show that the improvement in the breeding of horses is the object contemplated by those in command of racing and its regulators. Weight-for-age races should now become popular, for they will disclose the best horses of the year and, in most cases, decide which is the champion of each year. This in itself will add greatly to the interest, not only from a public standpoint, but from a horseman and breeder's point of view. Victories in weight-for-age races will be coveted by owners of good horses, and what is more, high-class horses will have greater opportunities to earn what they deserve to earn.

The Jockey Club's effort to revive weight-for-age stakes is to be highly commended and, while the fields may be somewhat limited at times, it is safe to say that in the majority of cases a spirited contest will result, even should there be but two starters. With more weight-for-age races the greater will become the interest in the ranks of owners, the earning possibilities of their horses being so much greater than in handicaps. Nothing but good can come out of the impetus given to such races, especially in the fall season when the horses of the various ages can be brought together over different tracks. While there may be a horse which will win the majority of such races each year, it is not a sure thing, for the old adage, "Horses for courses," will unquestionably enter into the argument and fast or heavy going will have a bearing on the results in some instances. Weight-for-age races will undoubtedly do much good for the turf and its future.

A VALUABLE REMEDY

Gombault's Caustic Balsam, applied at once to any cut or flesh wound, will kill any germ or source of blood poison, and the wound will heal promptly with scarcely any soreness. In these cases apply without any rubbing, apply as soon as the flow of blood is stopped.

NOTABLE MARES AND THEIR RECORDS

The following is a list of the performances of notable English bred mares on the race track, showing the number of times they ran, the number of their successes and the periods over which their racing careers extended. As the names of many of these mares appear in the pedigrees of our imported stock this list should be interesting to our readers.

	No. of Seasons	Times Started	Races Won
Achievement (1864) by Stockwell out of Paradigm	4	24	16
Alice Hawthorn (1838) by Muley Moloch out of Rebecca	7	68	50½
Altisidora (1810) by Dick Andrews out of Mandate	4	19	13
Apology (1871) by Adventurer out of Mandragora	4	20	8
Augusta (1818) by Woful out of Ada's dam	4	22	13
Beeswing (1833) by Dr. Syntax out of Tomboy's dam	8	64	51
Blink Bonny (1854) by Melbourne out of Queen Mary	3	20	15
Caller-ou (1858) by Stockwell out of Haricot	6	86	44
Camarine (1828) by Juniper out of Phosphorus's dam	4	20	17
Canezou (1845) by Melbourne out of Madame Pelerine	3	22	17
Corrie Roy (1878) by Galopin out of Corrie	5	22	8
Crucifix (1837) by Priam out of Octaviana	2	12	11½
Eleanor (1798) by Whiskey out of Young Giantess	5	49	28
Ellerdale (1844) by Lanercost out of Colsterdale's dam	5	32	16
Fleur-de-Lis (1822) by Bourbon out of Lady Rachel	7	31	22
Formosa (1865) by Buccaneer out of Eller	4	31	12
Geheimnies (1879) by Rosicrucian out of Nameless	4	31	20
Jannette (1875) by Lord Clifden out of Chevisaunce	3	24	17
La Fleche (1889) by St. Simon out of Quiver	4	24	16
Lilian (1869) by Wingrave out of Lady Blanche	7	109	46
Lily Agnes (1871) by Macaroni out of Polly Agnes	4	32	21
Louise Victoria (1869) by Marsyas out of The Princess of Wales	4	26	7
Marie Stuart (1870) by Scottish Chief out of Morgan La Faye	4	19	11
Memoir (1887) by St. Simon out of Quiver	3	21	9
Mowerina (1876) by Scottish Chief out of Stockings	5	38	16
Pilgrimage (1875) by The Earl or The Palmer out of Lady Audley	2	8	6
Pretty Polly (1901) by Gallinule out of Admiration	4	22	20
Queen Bertha (1860) by Kingston out of Flax	3	10	3
Queen of Trumps (1832) by Velocipede out of Princess Royal	3	12	10½
Sceptre (1899) by Persimmon out of Ornament	4	25	13
Seabreeze (1885) by Isonomy out of St. Marguerite	3	22	10
Shotover (1879) by Hermit out of Stray Shot	3	14	5
Signorina (1887) by St. Simon out of Star of Portici	3	18	11
Signorinetta (1905) by Chaleureux out of Signorina	2	13	3
Spinaway (1872) by Macaroni out of Queen Bertha	2	16	11
Tagalie (1909) by Cyllene out of of Tagale	2	9	3
Thebais (1878) by Hermit out of of Devotion	6	48	27
Wheel of Fortune (1876) by Adventurer out of Queen Bertha	2	11	10

ETERNAL MAY RACE AT LEXINGTON

Eternal, The Wanderer and Sailor, the three colts belonging to J. W. McClelland that are being prepared for their engagement in the Kentucky Derby, will all be seen in a contest prior to the Churchill Downs big race, if the plans of their trainer, Kim Patterson, go through all right. It is being arranged for the shipment of the trio to Lexington next Tuesday morning if a car is available. Owner McClelland was not keen on starting Eternal at Lexington, being of the opinion that the crack colt was not in need of a race to tighten him up, but he has rearranged his plans, and the three colts will be sent to the Blue Grass track, where the public will be given an opportunity to see them in action. Jockey Andy Schuttinger will go along to ride the horses in their races.

H. G. Bedwell, Billy Kelly's trainer, authorizes the announcement that Billy Kelly will go to Kentucky presently to start, first in the $20,000 Kentucky Derby, Billy Kelly will also go in the Kentucky Handicap, and in the $15,000 Latonia Derby at Cincinnati.

THE SANTA BARBARA HORSE SHOW

Palms planted on the Belvedere Hotel grounds a third of a century ago were so arranged that they today afford a circular arena for the first Santa Barbara horse show, which will be the attraction May 2-3. It would seem as if the men who laid out the grounds had the horse show in mind when they planted the palms, so appropriate is the settting. This is to be the first of what promises to be an annual affair, and so great is the interest being shown by horsemen from both north and south, as well as from all portions of the state, that the success of the show is already assured. Being staged as a benefit for local charities, the patronage is sure to be generous. There will be sale for all of the boxes, and among the first buyers are Miss Lolita Ogden Armour, F. F. Peabody, C. K. G. Billings, G. O. Knapp, T. A. Scott, T. C. Walker, A. E. Brush, D. M. Linnard, Mrs. Esther Hammond and E. B. Selano.

Uhlan 1:58, owned by C. K. G. Billings, Peter Hastings up. This horse will be exhibited at the Santa Barbara Horse Show.

Among the horses promised to be exhibited will be Rifle, Thomas Mangan's premier jumper, who has a record of 6½ feet. Blue ribbon entries have also been made by S. J. Vallenty, Henry C. Ahlers and Etienne de Szymenske of San Francisco. Former Mayor T. H. Dudley of Santa Monica will bring his stable of polo ponies, and many entrants will be present to compete from Coronado and San Diego, while the pick of Imperial valley strings will be in attendance.

Alfred Erskine Brush of Montecito, horseman and polo player, has been made chairman of the Santa Barbara horse show committee. The show will be held on the Belvedere grounds, May 2 and 3. Dr. S. E. Kramer will serve as secretary of the committee and manager of the show.

Other members of the general horse show committee are Major F. W. Leadbetter, Reginald G. Fernald, G. W. Dabney, William R. Mygatt, Dr. E. J. Boeseke, Col. D. T. Perkins, Albert E. Smith, Captain C. Furness Hately, W. R. Edwardes, Lieutenant Charles F. Palmer, Frank Greene, Lieutenant Stephen W. Royce, Wolcott Tuckerman and George Hammond. With the combined experience of those men and their knowledge of horses and how to conduct an exhibition, the success of Santa Barbara's first horse show is assured.

If it had nothing else to commend it, Santa Barbara's first annual horse show would be notable for the fact that "Uhlan," the world's unbeaten trotting horse, with a record of 1:54½, will make his first show appearance there. This animal is owned by Cornelius K. Billings of Montecito, and a paragon of horseflesh perfection.

Uhlan is the only standard bred horse living costing so much—$50,000—which is used daily by his owner to ride merely for pleasure purposes, although he has many other excellent saddle horses in his stables. There being no competition for this character of horse, Mr. Billings has consented to bring Uhlan into the ring at Santa Barbara for exhibition purposes. He wil be ridden by Peter Hastings, superintendent for Mr. Billings.

Doubtless, Uhlan is the most traveled horse of the day. He has crossed the Atlantic half a dozen times and raced in England, Russia, France, Germany and Spain, prior to the war. Since that time he has not appeared on the track. Recently his owner refused $100,000 for Uhlan, so highly does he value the animal's companionship.

But the Santa Barbara horse show, which is scheduled for May 2 and 3, has other features to commend it. In the first place, it will be the first equine exhibition in half a decade. The arena has been built in a palm-enclosed circle on The Belvedere grounds, where Manager D. M. Linnard placed the site and all the facilities of his big hotel at the disposal of the horse show committee.

It will be an equestrian show, with eighteen classes. Entries are coming in from all over. Besides the splendid horses owned in Santa Barbara, horses will be here from San Diego, Pasadena, Los Angeles, Beverly Hills, Del Monte, San Mateo, Burlingame, San Francisco, etc.

M. WINN FOR $1,000 MINIMUM PURSE

General Manager Matt J. Winn of the tracks of the Kentucky Jockey Club, arrived in Lexington from Cincinnati April 15. It is his first visit since he was elected to the post of general manager over all of the Kentucky tracks. He expressed himself as well pleased with the progress that has been made here and the state of preparedness in which he found things under the direction of Manager R. I. Baker. Col. Winn said, with reference to his policies:

"It is my notion that the minimum purse at all Kentucky tracks should be $1,000, and that it should be maintained at that figure. Mind, now, I do not say the added money to every purse should be $1,000, but that should be the lowest. I think the distribution should average $10,000 per day, spring and fall. I think the recommendations made by the committee appointed by Chairman Camden of the State Racing Commission are excessive, though I understand fully that they apply only to the spring meetings of 1919. There are to be lean years in racing in Kentucky. It is in the nature of things that there will be. So I think it preferable to create a surplus fund to take care of those lean years. Why have great big purses in the spring and then smaller ones in the fall? Why not have average purses both spring and fall and keep up the quality of the performers and the performances?"

Col. Winn, stated that he has purchased a home at Fifth and Garrett streets in Covington and that he will shortly take up his residence there.

(Continued from Page 3)

fair in order to get into the grounds. With them, the deadhead badge is a disease and if at any time it comes to paying or looking through the fence, they go to the movies.

The deadhead man is, in his opinion, the last thought in the knowledge of racing. With him everything is wrong from the work in the judges' stand to the paint on the back gate. His hammer is always tapping, when he is not rocking the boat or looking for a divide on a sure thing.

At every meeting of race track officials, plans are suggested to tie a little bunch of crepe on the deadhead man but when the bell rings for the first race, he is up in the grandstand, frequently in a box, finding fault with everything and batting the pleasure out of the good old North American people who purchased tickets.

The baseball men made an effort to pass their troubles along to ex-President Taft but he declined. If the racing men could get Mr. McAdoo to take care of the deadhead man, there would be peace on the turf and good-will between the management and those who would rather look through a knothole in the fence than pay.

A DANGEROUS HORSE SITUATION

We can well liken the horse business to an ocean At times come tides, at other times come the ebb flow. Just now, the tide is setting very strongly in one direction—that of getting out of the horse business. Due to the inability of horse prices to follow the large increases in prices of wheat, corn, pork, beef and mutton, many farmers have quit the horse business. Their mares have been for sale to the horse buyer, in many cases, and even though mares were held, breeding has been neglected. The ebb flow of the ocean is just upon us

It takes a very strongly anchored person to stand against the flow of tide. It is also usually a rather thankless job to advise going against any popular or well-nigh universal practice or habit. But there is always a tomorrow to be considered.

To illustrate the way the draft horse business is going, a short review of the history of the last several years in Tazewell County, Ill., can be cited. Tazewill County has earned the fame of having more purebred Percheron horses per square mile of area than any other county in America. Old Louis Napoleon made history for the county in early days and the draft horse interests have always been very large in the county. To obtain an accurate opinion as to the decrease in breeding in Tazewell County, the Tazewell County Percheron Association a short time ago canvassed the men owning stallions for the years 1915, 1916 1917 and 1918. Direct questions were asked of each stallion owner as to the number of mares bred per stallion during these years. Enough replies were obtained to furnish reliable estimates. In 1915, there were recorded 155 stallions for public service. The average number of mares bred per stallion was 65. Counting a 50 per cent. colt crop, there should have been 5,036 colts of the 1916 crop. In 1916, the number of registered stallions decreased to 140 and the average number of mares per horse also decreased to 55. This would be 3,850 colts for 1917. In 1917, the stallions again dropped to 115 and mares per stallion to 45½. According to this only 2,616 colts could be expected in 1918. Last year, 1918, the stallions only numbered 88 and the owners reported an average of 41 mares per stallion. This year we can expect about 1,800 colts. From 1915 to 1918, the stallions decreased from 155 to 88. The number of colts decreased from 5,036 to 1,800 or almost 180 per cent. Here is food for thought. If one of the big draft horse counties cuts down its horse production in this manner, what is going to happen to the supply of horses for market three and four years from now?

A like decrease can be seen in the decrease in stallions registered in the entire State. In 1912, there were 9,677 purebred and grade stallions licensed to stand at public service. In 1918, there were 7,120 or a decrease of 36 per cent.

The result is already becoming apparent in Tazewell County. The other day, the secretary of the County Percheron Association was trying to find some real geldings to price to a buyer. In the course of his search, a considerable number of men were consulted. No one knew of any big sound geldings of market age. A buyer of express horses told the secretary, a short time ago, that he was finding it very hard to find any horses suitable for his trade. Last August in response to an inquiry for grade mares to over 500 men in Tazewell County, only 29 mares for sale were located.

In the light of these figures and from recent history, it begins to appear that there will be practically no horses soon. When that happens what will we do for work stock? And we will need work horses three, five, ten years from now.

CHESTER G. STARR,
Farm Adviser of Tazewell County, Illinois.

A CORRECTION AND AN APOLOGY

In the February issue Breeder and Sportsman appeared a report of the meeting of the North Pacific Fair Association and also a statement to the effect that the Billings (Montana) Fair Association had abandoned harness horse racing and would only permit runners on its track. The above may not be just my exact language but whoever has a February number of Breeder and Sportsman can read my report.

After I had mailed my report I met Secretary Robert Cosgrove and asked him as to his having given up harness racing at his meeting. In reply, Mr. Cosgrove said I was misinformed and that he never had such intention as doing away with harness racing. This statement of Mr. Cosgrove pleased me and I fully intended to send a correction to the Breeder and Sportsman. That I did not was an oversight on my part for which I now apologize to Mr. Cosgrove and his associates in the Billings (Montana) Fair and Racing Association, and I will also say that I am a believer in both running and harness racing for all fairs and race meetings and I also advocate State racing laws and racing commissions, when same can be had under proper conditions and operated by men of sterling integrity and for the real best interest of thoroughbred and standard-bred horses.

C. A. HARRISON.

HORSE OWNERS

(By W. H. Gocher.)

One day John Splan, when in a philosophical mood, said that it required more skill to train an owner than the horses on which he was paying the bills. Of all drivers, Splan was in a better position to give a correct opinion on horse owners than any man that ever sat in a sulky. In his day he had all kinds from Eph Simmons to L. V. Harkness, from Jerry Monroe to General Caldwell, and from Dan DeNoyells to C. F. Emery.

As Splan was rather careless in his business methods, especially during the racing season, owners experienced considerable difficulty in making settlements with him, but if they did not bother him he always saw that some day they had a chance to balance all of their expenses by landing a coup at attractive odds if they were willing to take a chance in the betting ring.

At one time Splan trained an attractive mare for an Englishman. She was in his stable for two or three years and he never seemed to be doing anything with her. Finally it was decided to give her the grand preparation but instead of the work beginning in the spring, it was started in July. She was ready in September and started at the Cleveland fall meeting. No one, however, supposed that she would be turned loose at that time of year, so the wise men backed what they considered the choice while this good trotter was sold for a trifle in the field. Someone had to buy them, and when she won, Splan gathered in enough to winter on. As for the owner,—well, he had the same chance.

In order to remain on the turf, there are three things that an owner must have. The first item is a horse. If it is one of the Joe Patchen or R. T. C. kind, he can cut out the other two. If it is a flash or apt to show the white feather when pinched, he must have the other two. They are patience and the means to settle, if the outfit slips a cog and it usually does. If there were no jolts in racing, there would be no thrills. If all the joy was in one outfit, there would be no field buyers.

While there are horse owners who believe that fortune favors the bold, the average man, who has been to the mill a few times, will tell you that the gentleman with the latest information can trim the old boy to a frazzle. None but children and fair maidens believe that all of the starters are out to win. While it would make merry racing, what would become of the helper, who never fails to collect, the weakkneed individual who is afraid of a mark, to say nothing of the man who is legging one up for a killing at the next town Each of these has a part to play in every race, and while all of them think that they are pulling the wool over the eyes of the judges, they usually find when they cut loose that they have drawn a blank.

Owners who race horses for the love of the sport and who take good and bad fortune with a smile are the men who are a credit to the turf. There are times, it is true, when they are forced to mingle with those that are just the reverse but public opinion and the strong arm of the racing officials are constantly putting the latter on the shelf. One day Senator Bailey declared that "the cheater must go." He did not say, where, however, and after a few years' experience one is prone to admit that he is more apt to drift towards the betting ring than the gate. What he gets there is his own business but what he does with it is another matter.

SOME FIGURES

Mr. Editor: Taking Secretary Gocher's compilations, do you know that the face value of the purses offered last year at 833 meetings was about two and a half million dollars? His figures, $2,408,203.

That half of this amount at least was paid back in entrance fees and deductions?—$1,250,000.

That nearly 8000 horses raced for this money and averaged for the year a little over one hundred and fifty dollars? To be nearly exact, $155.

That these horses started nearly thirty-two thousand times and earned less than $40 per start? To be nearly exact, $38.

It would be safe to figure nearly twenty thousand horses were trained, making an average annual earning capacity for each horse trained about $50.

The interest on the value of the horses in training at 6 per cent, figured on the value of $300 per head, would amount to $360,000.

The annual cost of keeping and training these twenty thousand horses would be not less than $4,000,000.

If we add the shipping and other expenses, it will be seen the horse owner has a chance to get back less than 25 cents of every dollar of his money, providing the appreciation in horse flesh equals the depreciation.

The organization of the Harness Horse Association was for the purpose of trying to better these conditions in favor of the campaigning horsemen and toward that end the board of directors has condensed the original 'fourteen points" down to eight, as follows:

1. Lower entry fees and all entry fees added to the purse.
2. Where entry fees are not added entry fees of horses outside the money be refunded.
3. Owners and drivers on the board of appeals of the National and American associations.
4. No deductions from money winners.
5. Track managers controlling feed and draymen, to prevent extortion.
6. Tracks, stalls and conveniences kept in proper shape.
7. Better arrangements with the railroads.
8. And in the interest of fostering breeding, that colt races be given wherever possible.

In short, to aid associations to stage an ideal racing card, with proper compensation and treatment for horsemen.

Nothing in the above can be construed as working an injury to any racing association, as there is no request or demand for any specified size of purse to be given.

It will, however, show the exact amount, large or small, any association wants to give, and show just how much of the horsemen's money and how much of the association's money is being raced for.

Article 7, as to better arrangements with the railroads, is a matter that all organizations, together with the Harness Horse Association, when it is strong enough, will get redress.

MAGNUS FLAWS,
Secretary Harness Horse Association.

WHY KINDNESS TO HORSES PAYS

(Walter Winans)

People buy a motor car and are very careful not to get it hurt. They would not have a chauffeur who wrenched the teeth off the changing gear or bumped the car up against a lamp-post. But with the horse very many people are from the first moment spoiling their property and doing themselves monetary damage. I know from experience. Through sending out an inexperienced man—whom I had been told was a good man with a horse—in ten minutes that man had absolutely ruined the animal. I had a very nice quality horse that I was just going to show in the hunter class, where the manners of the horses count chiefly. Because the horse got nervous of a passing train, this man hit him over the head. After that, the horse would duck his head and try to get rid of his rider every time he got a little bit frightened. People do that sort of thing if a horse slips, or stumbles, and after a time the horse runs away from fear. It shows that it is stupid to bully a horse, even from the low point of view of his value; for you can not sell him afterwards if you treat him like that.

There is another consideration of policy; I have several times had my life dependent on my horse. I have had a horse lying on top of me, and my head between his hind legs. If I had ill-used the horse I might have had my brains kicked out But my horse lay without moving until they got me out, then he got up and rubbed his head against my shoulder. Another thing. With a motor car, if the brake does not act when going down hill, the car will take you over a cliff. But if you are friends with your horse he will prevent such a thing happening. At Brighton, at "Black Rock," there is a steep hill which leads to the cliff. I was going down there one morning, and the horse was very lively. He cracked one of the shafts, and that broke the other shaft; but I shouted "Whoa" to him, and he stopped, and I got out and took hold of his head. I found that his hocks had been cut to pieces with the broken shafts, yet he pulled up and stopped. In both the cases I have told you of, kindness saved my life; and it shows how stupid a man is who is so cruel as to ill-treat a horse, or let him be ill-treated.

TRACTOR DEMONSTRATION

The second annual tractor demonstration will be held at Sacramento May 6 to 11, inclusive. Under the auspices of the California Tractor and Implement Association the leading wheel and caterpillar tractors will be on exhibition and their efficiency demonstrated by actual practice. The exhibition will be highly instructive to farmers, and experts will be present to show the peculiar advantages of the different styles, the different kinds of styles under different conditions. Like the previous demonstration, this event will draw farmers from all sections of the state.

FOUR GENERATIONS OF RACING FAMILY

Billy Garth is one of the fourth generations of the Garths to race horses. His father, grandfather, and great-grandfather owned race horses, and the hereditary trait has pursued itself through Billy and finally on to his son, Lewis, both of whom are training divisions of one of the most formidable stables which will be shown on the Maryland circuit. It is said that Billy was at one time a rider—this he will not admit—though the records prove that he is a first-class horseman, breeder and trainer.

It was forty-one years ago that Billy came into possession of his first race horse, and ever since he has been identified with racing. He has trained some of the best horses ever bred in the old Dominion State, and was for several years identified with Paul and Roy Rainey. For the last several years he has trained the Capt. Ral Parr thoroughbreds, twenty-three of which he has in training at Pimlico.

His son, Lewis, representing the fifth of the line, has another division of the Parr horses at Bennings. At Charlottesville, Va., the Garth family maintains a pretentious breeding farm.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Sportsmen's Row

Trolling for striped bass in Raccoon Straits on the Marin shore and up to San Quentin has been good for the last week and many fish have been taken with the Wilson spoon, weighing from three to eighteen pounds, most of them, however, being around five or six pounds. Bass are also reported plentiful around Black Point and Wingo.

Members of the San Francisco Striped Bass Club have voted to hold their annual outing on June 15th. The exact location has not yet been announced.

The past year was the best season for breeding ring-necked pheasants that has ever been experienced at the New York State game farm. Five thousand birds were hatched and reared and between 12,000 and 15,000 eggs were distributed for hatching by individuals.

Moose are becoming quite plentiful again in Wyoming; so plentiful that the Game Commission figures that within a very few years an open season can be declared. Minnesota is now the only State with an open season for moose.

Two hundred million rabbits are killed in the United States every year. This kill will make 300,000 tons of meat yearly. A lot of rabbits, however, are poisoned, for in some places they are pests to farmers. Others are shot for their skins, and the meat is wasted. Only a portion of the rabbit meat reaches hungry stomachs.

Twenty-four States have passed laws conforming to the provisions of the Federal law in relation to water fowl. Within a year or two every State in the Union will have enacted uniform laws for the protection of migratory birds.

To keep guns from rusting, nothing can be more effective than mercurial ointment, applied with a cloth. It is not necessary to have more than a trace on the steel. A cloth so saturated that it will slightly smear a mirror will answer very well. The ointment will also prevent the barrel from leading.

Sports Manager Fred A. Purner at Del Monte has added to the many other amusements that he is engaged in promoting at that fashionable watering place,—trapshooting, and is now arranging a series of trapshooting matches to take place there during the season. Between polo, swimming, trapshooting and golf, Del Monte will be a sports center and visitors are displaying a keen interest in the events.

It is pleasing to learn that the soldier dog is going to get a diploma. He will accept it with modesty and gratitude depicted in every wag of his tail.—The Thrift Magazine.

The director of military aeronautics of the U. S. Army has issued an order forbidding the shooting of wild fowl with machine guns from airplanes. He has directed that airplane flights where wild fowl may be found "be conducted in such manner as to interfere as little as possible with the habits and feeding of the wild fowl." Complaints of hunting birds in airplanes have come from several places.

Ben S. Donnelly of Chicago has again been named chairman of the committee on handicaps for the Grand American Trap Shooting Handicap, the big event of the year, which takes place at the G. A. H. at Chicago on August 15th. Among the other members of the committee is Fred S. Bair of Eureka, California.

Although the American Trapshooting Association has addressed a letter to the secretaries of gun clubs which will hold registered tournaments, urging that each contestant contribute ¼c per target to a fund which will pay the expenses of the All-American trapshooting team which will be sent to the Olympic Games in Antwerp, Belgium, next year, this contribution is not compulsory. It is expected that the great majority of the sportsmen who play the clay target game will want to share in the victory we expect to gain in the international competition by aiding in paying the expenses of the team. But if, for any reason, a shooter does not desire to contribute to the fund, no effort will be made to have him change his mind. All contributions should be entirely voluntary.

YOU AND YOUR DOG

(By George Gilbert)

There are probably no two human beings who have the same ideas about anything or who accept definitions of even familiar words on a parity, one with the other.

So much of the individual is there in us all that it is hard for one person to understand another's words. And when we come to understanding another's thoughts, or processes of thought, we are at sea.

Your dog is still more handicapped than are you when trying to understand the thoughts and unspoken intentions of a friend, when your dog tries his best to understand you. Certain elementary things he can be made to learn with comparative ease, such as to be clean, because his instinct teaches him to roam when answering the imperative calls of nature, to be in his place when ordered, because in his place are things that make for his comfort. And so on.

But when we ask the dog, whose whole being yearns to chase a grouse, to stand stock still and bring it in, without biting it hard, then resign the prize and go hunt another, to stand that and repeat the process over and over again, we are on other ground. We are making the dog go against all natural tendencies and no matter how many generations of dogs have so gone, each pup has some of the "old Adam" in him.

Yet very often that pup that has the most natural instinct to grab a bird has the very qualities that, rightly directed, make a good dog. For the laggard pup cannot be made to take on speed, while the speedy pup, having speed, has something yet in reserve, when brought under control. The over eager dog, like the boy that is mischievous, but not mean, is apt to turn out better than the average, if well handled.

When a Dog Is Best

If you have a dog that is speedy, disposed to break in ahead, work too close, do not be discouraged. In the first place, no dog is any good until he is four years old. A pup may do well, but that pup will do far better two or three years afterward than at first. The pup that is sedate, slow, will make a more sedate, a slower dog. Perhaps too slow.

Much of the fast dog's tendency to work in too close may be due to the dog's having too little regular exercise. Kept shut in a close yard for weeks, the dog is taken out on a brisk, snappy day, when even his master steps along as if in Seven League Boots.

The dog, boiling with energy, is too fast and is cuffed and curbed until he soon has more interest in watching the man and keeping within the bounds he sets, than in finding and standing birds. The well exercised dog will not commit the faults of the dog that is rarely exercised or if exercised, then exercised unsystematically.

The dog that is hunted often hunts best, if any good at all.

Another element making for good control over your dog is fairness. The dog, young or old, knows when he has committed a fault. If he is punished unfairly or when he does not know he has committed a fault, it harms him. If he is permitted to have his own way when in the wrong, his downfall is well begun.

OLYMPIC CLUB DOINGS

This has been a lively month at the Lakeside Olympic trapshooting grounds, and under the direction of O. N. Ford a series of most interesting events have taken place. Tom Wilkes heads the list of averages with a perfect score, 300 out of a possible 300, which places him at the top of class A. Frank Stall comes next with a score of 297. The scheme is that every score a shooter makes counts in his list, and if his twelve best at the end of the season totals 300 he has made the limit. Lists will be compiled every two weeks with the straights and the two longest runs.

Dr. E. Topham carried off first place in the first H. R. Everding Trophy tournament, breaking 94 out of 100 sprung. H. C. Peet ranked second, with 92 to his credit.

Dr. Barker was high gun at the second monthly shoot with 97 out of 100.

Young J. S. Talbot, in the boys' class, composed of boys of 10 to 16 years of age, is a wonder and promises to be one of the greatest trapshooters in the world. While he has only been shooting a few times, his performances are most consistent, he rarely missing more than two or three birds out of twenty-five.

Mr. Ford takes great pride in his boys' class and expects to develop some crackerjacks.

AMERICAN TRAPSHOOTING ASSOCIATION

State Association Trapshooting tournaments take on new significance this year because of the fact that the State championship event will be at 300 single targets, and will be shot on two days, 150 each day. This means that excitement will be running high all the time. Last year the championship was at 100 targets.

Furthermore, the contestants will have an added incentive to win in that the champion will have his railroad and Pullman expenses paid to and from his home to Chicago, where the Grand American Handicap tournament will be held August 11 to 15, inclusive. He also will receive a handsome gold trophy emblematic of the title.

Forty States have been granted registration for tournaments at which the State championship will be decided. Five States have selected the place, but have not asked for registration on definite dates. Two States are undecided, while the Western Canada Trapshooting Association is now being organized and will decide where the championship shoot is to be held, at a meeting this month.

The State tournament registrations granted by he American Trapshooting Association, together with the place, the date and the name of the 1918 champion, follow:

Arizona—Phoenix, April 12, 13; D. E. Morrell.
Arkansas—Texarkana, May 5, 6, 7; J. E. Chatfield.
California-Nevada—Visalia, April 25, 26, 27; F. S. Bair.
Eastern Canada—Toronto, June 12, 13; (No association).
Connecticut—Hartford, June 20, 21; Dr. B. F. Bishop.
Delaware—Wilmington, May 8, 9; W. M. Foord.
Florida—Jacksonville, April 16, 17; J. A. Hansbrough.
Idaho—Lewiston, April 28, 29; Guy Chiesman.
Illinois—Galesburg, June 12, 13, 14; C. M. Powers.
Indiana—South Bend, July 8, 9, 10; G. R. Shuck.
Iowa—Mason City, June 17, 18, 19; Chas. Hummell.
Kansas—Eldorado, May 5, 6, 7; E. W. Arnold.
Kentucky—Latonia, July 31, Aug. 1; W. H. Hall.
Maryland—Baltimore, April 23, 24; R. D. Morgan.
Massachusetts—Boston, June 16, 17; G. L. Osborn.
Minnesota—Minneapolis, June 27, 28, 29; F. A. Allen.
Mississippi—Vicksburg, May 12, 13, 14; G. M. L. Key.
Missouri—Joplin, May 20, 21; Geo. Nicolai.
Montana—Billings, July 14, 15, 16; E. W. Renfro.
Nebraska—Columbus, May 27, 28, 29; J. A. Nelson.
New Hampshire—Exeter, June 27, 28; Elmer E. Reed.
New Jersey—Plainfield, May 16, 17; F. S. Tomlin.
New York—New York, April 28, 29, 30, May 1; H. J. Pendergast.
North Carolina—Pinehurst, April 24, 25; C. C. Bates.
North Dakota—Grand Forks, July 8, 9; A. R. Chezik.
Ohio—Toledo, May 20, 21, 22; J. E. Cain.
Oklahoma—Okmulgee, May 12. 13, 14; W. H. Heer.
Oregon—Pendleton, May 5, 6, 7; F. Templeton.
Pennsylvania—Butler, June 17, 18, 19, 20;C. H. Newcomb.
Rhode Island—Providence, June 6, 7; W. J. Weaver.
South Carolina—Greenwood, May 27, 28; R. G. McCants.
South Dakota—Sioux Falls, June 12, 13; E. T. Myers.
Tennessee—Memphis, June 11, 12; B. F. Duncan.
Texas—Fort Worth, June 2, 3, 4, 5;H. E. Woodward.
Utah—Ogden, May 30, June 1; G. L. Becker.
Vermont—Springfield, June 12, 13; D. M. Barclay.
Virginia—Richmond, September 1, 2; E. C. Watson.
Washington—Yakima, May 30, June 1; F. M. Troeh.
Wisconsin—Milwaukee, July 19, 20; C. Larson.
Wyoming—Sheridan, June 14, 15, 16; W. R. Tarrant.

Five States have selected the city where the championship tournament will be held, but have not applied to the American Trapshooting Association for registration. They follow:

Alabama—Birmingham; W. A. Leach.
Colorado-New Mexico—Denver; R. A. King.
Maine—Portland; O. P. Weymouth.
Michigan—Muskegon; J. L. Bryant.
West Virginia—Huntingdon; G. H. Mead.

Georgia and Louisiana are States which have not held a meeting of the State Association officers this year, and no plans have been made for the State tournament.

The tournament committee of the American Trapshooting Association met at the New York headquarters last week and registered the tournaments for 1919. Practically every application received was approved. The recorder of the association is now engaged in preparing the official list, and it probably will be ready for publication next week.

No more tournaments will be registered with a trophy contribution. However, the association will be glad to receive applications and will register tournaments without a contribution throughout the year. Secretaries must remember that applications are to be filed at least 30 days prior to the date selected for holding the shoot.

Now that it has been definitely decided to hold the Olympic Games in Antwerp, Belgium, in 1920, trapshooters will strive more earnestly to win a place on the All-American Olympic team. The American Trapshooting Association has decided that the ten high average men among the amateurs who have shot at 2000 and more registered targets in 1919 shall go to the Olympic games in Antwerp.

The alternates for the trapshooting team will be the second ten high average men. Therefore, the clay target breakers who shoot at registered tournaments in 1919 will always be striving to win so that they may be among the first 20 in the official list.

The committee on the reversion of trapshooting rules has prepared a rule relating to "Shooting for Targets only," which is as follows:

"Shooting for Targets Only" is a term which shall be held to define the status of a contestant in any given event or events, or in an entire tournament program, and shall signify that a contestant who is 'shooting for targets only' has no interest in any trophy or trophies not contributed by the American Trapshooting Association (unless he is entitled to do so by a specific announcement in the program), nor any interest in the money or moneys the division of which depends on the scores made in said event or events, or in the entire tournament program."

At any tournament registered with the American Trapshooting Association a contestant who has declared his intention of "Shooting for Targets Only" shall be eligible to compete for and to win any trophy offered by the American Trapshooting Association for the competition at said tournament, and shall also be eligible to compete for and to win the American Trapshooting Association's amateur State championship decided at a registered State shoot, together with the right to represent his State in the American amateur championship event at whatever place and time may be set by the American Trapshooting Association for holding such championship event.

The price of targets will be fixed by the clubs holding the tournament, and would not be more than 3 cents.

PROFESSIONAL TRAPSHOOTING

There will be no championship event for professional shooters in the State trapshooting championship tournaments this year, and no arrangement has been made as yet for the holding of the national professional championship event. It may or may not be held. It has been suggested, however, that the professionals with an average of 92 per cent or better be allowed to shoot for the title at the Grand American Handicap Trapshooting tournament. This average would be on 1500 or more targets. If this suggestion is adopted the professionals will follow the amateurs through in the South Shore introductory, a 200-target event at 18 yards. The maker of high score would naturally become professional champion.

It would be well, too, for the American Trap-Shooting Association to consider the holding of a championship event for women trapshooters in connection with every State titular tournament, also a championship for boys in each State under the age of 16 years. This championship might be shot with 20-gauge guns.

NEED FOR A MEXICAN TREATY

Apropos of the proposed treaty between this country and Mexico for the protection of migratory birds, a gentleman who has spent much time in Mexico City in recent years writes:

"Such a treaty is sorely needed, as the slaughter of all birds, even innocent songsters, is atrocious, and in the streets of this city, not to speak of country roads, one can see boys and men with slingshots and small rifles; quail are trapped in great numbers, and duck shot from batteries of many guns, discharged at the same time, hundreds being killed at one discharge. As for snipe, there is no protection for them, their only salvation consisting in their solitary habits and talent in hiding themselves."

TRAPSHOOTING REVIEW IS READY

The annual review of the American Trapshooting Association, with the averages of the shooters who participated in registered tournaments in 1918, is now ready. Trapshooters and other sportsmen who have not secured a copy of the review can secure same by writing the American Trapshooting Association, 469 Fourth avenue, New York. One of the features of the book is the honor roll of amateur trapshooters since 1908. The honor roll comprises the leading 50 men each year. The records of trapshooting, a brief history of the sport, in fact everything worth knowing about the pastime is chronicled in this booklet.

GAME CONFERENCE RESOLUTION

At the national conference of the American Game Protective Association, held recently in New York City, a resolution was passed in favor of free hunting grounds. The resolution reads as follows:

"Resolved, That in consideration of the restricted areas upon which free hunting can be enjoyed by the residents of many States, it is the sense of this association that the several State fish and game departments be requested to take up this subject in the interest of the hunting and fishing public by an effort to obtain control of large areas of wild lands for the establishment of reservations on which the public may enjoy fishing and hunting privileges under proper regulations."

The subject of the resolution is commended to the serious study of game commissions and sportsmen's associations. States which have not free shooting lands should, by all means, take action to secure them where they can reasonably be acquired.

THE DRIFT OF THE MOOSE

While the advance of civilization has either exterminated or greatly reduced in numbers the moose of the United States, it seems to be the fact that in Canada and Alaska there are sections where this animal is not only increasing in numbers, but is also occupying a much larger range than formerly. Even in the nearby province of New Brunswick the moose within the memory of the present generation has occupied new territory. It has also crossed the height of land in northern Quebec and Ontario and moved down towards Hudson Bay, and for the first time in history moose are found around Lake Mistassini, in the latitude of the south end of James Bay.

Stefansson brings out with him the news of the most recent northern advance of this animal to the shores of the Arctic at Coronation Gulf. He talked with an old Indian woman at Fort Norman, who told him that when she was young no moose were known east of Bear Lake. During her lifetime they have occupied this eastern country and moved on to Coronation Gulf. The Esquimaux were terrified when they saw the first moose on their hunting grounds, but within the last few years they have learned to appreciate them as an addition to the food supply. The muskrat is also moving north.

Stefansson says that the moose are generally increasing in interior Alaska. There are less men in that country than at the height of the mining excitement and less killing. He says that at Fort Yukon last year, where forty men and two hundred dogs wintered, the moose were very abundant and few were killed. The dogs even were fed on white flour.

The drift of the moose into new country is one of the most interesting phenomenas of animal life. This fact, taken in connection with the increase in portions of its old range which have not been correspondingly abandoned, is most encouraging.

The reindeer of Alaska have increased in twenty years from 1000 to 125,000. Big game responds quickly when given a fair chance. The future of the game is brighter today in many ways than it has been in a long time. We all know more of the moose, and we have certainly gained in wisdom.

NATIONAL CROW SHOOT

The national crow shoot promoted by the Dupont Powder people promises to eclipse anything in national shooting affairs for the season.

The crow is the Hun of birds. The commendable qualities of the crow are so few that they are not worth mentioning, and there is no end to the damage they do to crops and livestock, particularly to livestock in the scattering of disease. Quite naturally, when a national campaign is on to eliminate as many of these pests as possible it should be successful.

Clubs have been formed over the United States and Canada for the express purpose of shooting crows, and in many sections teams are being chosen from among the members of the gun clubs to wage war on the pests, the members of the team killing the greatest number of crows being rewarded with a small trophy.

Individuals, as well as city and county governments, are aiding the "Kill the Crow" movement by placing a bounty on the crow, and in some places they are even offering a bounty on crow eggs.

National Crow Shoot records show that a few more than 2000 crows were killed in the first three months of 1919, and that more shooters are becoming interested each month.

The statistics show that J. D. Seabold of Harrisburg, Pa., is credited with the greatest number of kills—309. J. C. Doze of Conway Springs, Kan., has killed 200; A. B. Schwer, Grafton, W. Va., 153, and F. A. Graper, Custer Park, Ill., 146.

Prominent trapshooters and farmers are using their skill and knowledge in this worthy war. Woolfolk Henderson of Lexington, Ky., former national amateur trapshooting champion, is credited with killing 37 crows in one day. He is only one of many clay target shooting experts who are helping in the passing of the crow.

THINGS A TRAPSHOOTER SHOULD KNOW

A filled shell holder strapped around your waist will unabalance you.

When at the firing line, you should not stand on a board platform, but on the ground.

The referee's decision is final, and you must abide by it.

It is very annoying to walk down on the shooter next shooting before he has shot.

You should stand directly in back of your peg and not to the right or left of it.

You should never, even in practice, shoot at a broken target.

You can shoot with more comfort without coat or vest.

Talking even in whispers on the firing line is most annoying to your fellow squad mates.

There is nothing in the rules that permits leaving the question of a disputed target to the rest of your squad.

You can shoot just as well with a "crooked" stock as you can with a straight stock if you are used to the former.

One of the leading professional trapshooters in the country holds his gun at an angle when shooting.

There are more "straightaways" missed than angle shots.

A "straightaway" is easiest for the beginner, and the hardest shot for the "old timer."

The most remarkable trapshot in the world is a woman.

The record of 565 straight "kills" made by C. G. Spencer, in 1909, has never been equaled.

When your stomach is in perfect order that you will shoot much better.

That most good trapshooters are also good rifle shots.

There is no other game that will make one forget business worries and cares as will trapshooting.

It is very discourteous to leave the firing line until the last shooter has finished shooting.

After you have called "pull," and you have an accidental discharge, thereby missing your target, the referee must call "lost," and cannot allow you another target.

Most trapshooters are now using the single-barrel gun.

A trap loaded shell is the best shell for brush shooting.

In case of a "miss fire," gun should be handed unbroken to referee, who will open same, and examine shell.

The best way to prevent "trapshooters' headache" is to plug the ears before shooting.

WHAT TO FEED DOGS

"Foods such as table scraps, when not allowed to sour, can be fed safely. But it is usually a very hard proposition for a family of moderate size to accumulate sufficient scraps except for a very modest number of dogs," says a writer in All Outdoors.

"Hotel scraps have been used by some, but they have many faults, and unless one can see them from the moment they leave the table to the time they are gathered for the dogs, it is best that they should be left alone.

"A staple food, that can be blamed for most troubles peculiar to kenneled dogs, is corn meal. Corn meal itself is a fair food, abundant in carbohydrates, but it requires some other food rich in protein to balance it properly.

"Meat of some kind used for this purpose—principally beef or pork cracklings. Cracklings that are to be had in the cities lack much of being a suitable article for dog food. They are low in protein, and are frequently the by-product of packing house carrion. And, furthermore, to rid them of the grease, chemicals are used, and they will ultimately reap its toll on your string.

"Meals well baked and fed to dogs after being treated to a soaking in a stew of clean meat-scraps, is very good. But where meal has failed, and carried in its wake many evils, is when fed in the form of mush, or to a number of dogs together. Usually mush is only half-cooked—for it takes a long time to cook it properly—and when poured out in a trough it is bolted down by the dog as fast as possible.

"The animals all want to have a trifle more than their companions. Then the food is not digested, and its effect is shown in the form of skin diseases.

"Clean rice does not rank so highly as a food, but a food made from boiling the rice well with a small percentage of meat, and when this is cool poured on clean, stale wheat bread, there is no food that equals it. The dogs digest every particle of it, and can stand an enormous amount of work. They will also stay in nice, hard flesh when this is their diet. Another feature, which must not be overlooked, is that dogs seldom tire of it.

"With this as with other foods, it must be fed cool. Hot foods will cause digestion troubles no matter how carefully prepared.

"Bones or hard dog cakes should be fed regularly. They are the dogs' tooth brushes; and, as with man, that part cannot endure neglect. With a kennel cooking plant many variations of food can be prepared on short notice.

EVOLUTION OF BULLET AND RIFLE

The first bullets were round as a ball and shot from a smooth-bore barrel.

The rifling or grooves were invented by a Swiss, and a copper band, like a fingr ring, was slippd over the round ball to "take the twist."

These bullets turned over and over; so the next step was to make them egg-shaped, the pointed end traveling first.

The next advance was a round nose bullet (like our present revolver cartridge), with a hollow base, into which was inserted a tapered wood plug.

The force of the explosion drove the plug forward, and expanded the base of the bullet, so that it bit into the grooves of the rifle ball.

Then came the Minie bullet, with its small iron cup, tapered to expand the lead bullet, as the wooden plug had done.

The Snider bullet followed, with its base hollowed, or cupped, to do its own expanding.

The Germans discovered, about 1905, that the pencil point or Spitzer would increase the velocity between 400 and 500 feet per second.

Down to and including the Minie ball, practically all cartridges were half inch in diameter.

The egg-shaped or plumb-bob bullet would be an amusing curiosity today.

It fitted into a shoe of compressed paper, on the other side of which was the powder.

Mark this, that the percussion cap was between the powder and the ball. The gun was discharged by the hammer driving a needle up through the charge of powder, until it reached the fulminate primer.

Naturally the needle frequently burned off and fire came back through its aperture.

The range was only 500 yards, but this needle gun served the Prussians well in their wars of 1848, 1866 and 1870.

The sharpe rifle, an American invention, and the first of our breech-loaders, was patented in 1852.

A slide permitted the cartridge to be inserted, which when raised to close the breech, cut off the end of the cartridge, exposing the powder to the flame of the percussion cap.

The first type of repeating rifle was the Spencer in 1860. The magazine was a tube in the butt end of the stock, pushing them home with a spring and plunger.

Up to 1886, the military rifles were over .44-calibre, then the French brought out the Lebel rifle with a bore of .315 of an inch, made possible by the first use of smokeless powder.

Their early rifles contained eight cartridges in a fore end tube.

Since the present war began they have changed this to a breech-magazine, holding three cartridges.

The Enfield rifle took its name from the British Government rifle factory at Enfield Lock, just as our Springfield gun took its name from the Springfield, Massachusetts, Armory.

The Enfield is in reality a Mauser type, adopted in 1903.

The original Lee Enfield took its name from an American, Lee, inventor of the Lee action, which was combined with the Metford rifling, used in our navy as the Lee-Metford, and adapted by Britain in 1888.

The English had previously copied our Snider rifle in 1866 and the Martini in 1869.

Previous to the Springfield rifle our standard gun was the Krag Jorgenson, standardized in 1898.

United States once paid a royalty on the Krag rifle, but has never paid Germany any royalty on the U. S. Springfield Service Rifle, calibre .30, model 1903, contrary to some reports.

THE SABLEFISH, ALIAS "BLACK COD"

The Bureau of Fisheries states that the sablefish, which, for no reason of its own making, has lived heretofore under the alias "black cod," is not a cod, and is not related to the members of that family by lineage, structure, or edible qualities. When it was discovered on the Alaska coast in 1811 the only name which it bore was the barbarous one used by the Indians, and the early white settlers and explorers, with the unconventionality common in new communities, gave it a nickname based on superficial appearances. So long as the fish was practically unutilized the misnomer was of little moment, but now that it is entering into commerce it becomes deceptive and not only runs the risk of being banned under the pure-food laws, but is actually misleading to the consumer, who may buy it under the impression that in its edible qualities it resembles the cod. Until now its excellence has been known to but a few persons on the Pacific coast, but the time has now come when, on account of its edible qualities and low price, it should be made known to all. It is found in the deep water off the coast from San Francisco to Alaska, and is particularly abundant from Oregon northward. It has been caught more or less freely by the halibut fishermen for many years, but has been regarded as a nuisance rather than at its true worth, because, with the characteristic American heedlessness of the value of natural resources, it has been neglected by the consumer and there has been no market for it. Millions of pounds have been returned to the sea annually, while the people who should have been using it have been clamoring for investigations into the reasons for the high cost of living. Here is one question which requires no legislation for its correction.

The sablefish as caught averages about 15 pounds in weight, although it grows much larger. On account of its firm texture it "ships" well, and is therefore available fresh far from its home in the Pacific, and frozen (just as good) as far east as New York and New England.

The Rules Committee of the American Trapshooting Association, Ed. Banks, chairman, and E. R. Galvin, has made some notable changes and additions. The rules will be issued in booklet form and soon will be ready for distribution. One of the important additions is the definition of a registered tournament, which follows:

"A registered tournament is a tournament held by a gun club, or other organization, whose application to hold same has been approved by the American Trapshooting Association, and to whom a certificate of registration has been issued."

The definition of registered targets follows:

"At any registered tournament, all targets in certain specified program events which are shot from the standard 18-yard mark are known as 'Registered Targets,' and the records made on such targets form the basis on which the yearly average of each contestant is figured. No targets shot at in any ties in connection with the specified program events will be considered as 'Registered Targets,' or figured in the yearly averages."

Another interesting addition to the rules is that "no target shall measure more than 4 5-16 of an inch in diameter and no more than 1⅛ of an inch in heighth." This in no way changes the standard target now in use, but it definitely fixes a standard.

In trapshooting circles July Fourth will be more than a national holiday this year—it will be known as "Victory Shoot Day," and it is expected that every gun club in America will hold an event of some sort to which soldiers and sailors will be invited. Although no definite program has been prepared by the American Trapshooting Association, Secretary Stoney McLinn is preparing a letter which will be mailed to the secretaries of all gun clubs suggesting what may be done to make July 4, 1919, a memorable day in clay target history.

OREGON GAME COMMISSION

Recognizing the instinct of the blueback salmon to return to the stream of its nativity, the Oregon State Game and Fish Commission by an investment of $2,500 in 1914 brought a return in 1918 of 4,000 per cent.

Becoming alarmed in 1914 at the almost total cessation of the run of salmon in Columbia river, the commission purchased eggs of that species from Alaska waters. They were placed in the Columbia river, and in due course of time were hatched. As fingerlings they found their way to the Pacific, but in four years, the age of the maturity of a salmon, they returned to the Columbia.

Thousands of eight and ten-pound blueback salmon were noted running the river, and fishermen made hauls that brought $100,000, or 4,000 per cent on the investment of $2,500 for the eggs. To be sure that they were the fish from the eggs placed in the river in 1914, many of the fingerlings were marked. More than 200 of those so marked were taken in the different hauls.

Of this homing instinct, which makes possible the propagation of salmon, Charles H. Gilbert, professor of zoology of Stanford University, in his contribution to the report of the British Columbia commissioner of fisheries, writes interestingly of the sockeye, generally held to be the same species as the blueback. He holds that the destination of the adult salmon is determined by the locality in which the young were reared.

The native blueback salmon found its spawning grounds in Wallawa Lake. Then came civilization with its dams, and the result was they became stunted in growth and almost valueless as food from being locked in the lake. Those fishermen of the Pacific Coast who know the blueback salmon know that it must have its run or it deteriorates. They also recognize that instinct is the trump card and that they need no longer fear the extinction of the blueback species.

WAYS TO ENCOURAGE SHOOTING

There are a number of ways that the trapshooting organizations may encourage trapshooting—ideas that have been overlooked.

It would be a good scheme to put on every State championship program an event for men who have been in the service. The New York State shoot has put on such an event. Every other State organization should fall in line.

Then, too, it might be well at every important shoot to have a trap set aside for beginners, while a capable set of instructors, and offer a prize for a beginners' event.

And by all means Young America should be encouraged to shoot. Don't forget the boys. The boy of today is the man of tomorrow.

Have the Courage of Conviction.
You know it pays to save.
Buy W. S. S.

A. T. A. TO BE REPRESENTED AT ALL TOURNAMENTS

The American Trapshooting Association is determined that all registered tournaments held under its sanction shall be official in all that the word implies. To that end it will appoint special representatives to attend sanctioned shoots in all sections.

It shall be the duty of a special representative to visit the gun club at which the tournament will be held at least 24 hours prior to the time for holding the shoot. He shall satisfy himself that the club has the proper facilities for conducting a registered tournament—clubhouse, traps, targets, etc. If he finds that the club has not properly provided for an official shoot, he shall notify the officers of the club that unless the club lives up to its agreement the scores made will not be recorded by the American Trapshooting Association.

At least one hour prior to the advertised time for starting the tournament the special representative shall be on the grounds of the club holding the shoot. He shall supervise the regulation of the traps, so that they will throw a legal target (not less than 45 yards nor more than 55 yards, with a flight between 6 and 12 feet high at a point 10 yards from the trap). He shall examine and instruct the referees, scorers, trappers, pullers, and in every other way shall satisfy himself that the targets are legal and that the tournament will be conducted in accordance with the rules of the American Trapshooting Association.

If the special representative finds a club lacking necessary facilities for the conduct of a tournament, and, after giving the officers of that club 24 hours' notice to provide that which is lacking, this is not done, or

If the club does not conduct the tournament in accordance with the rules of the American Trapshooting Association and refuses to correct that which is contrary to the rules, then

The special representative shall notify the officers of the club holding the tournament, and the shooters attending said tournament, that the scores will not be counted in the official averages, and shall so notify the secretary-manager of the American Trapshooting Association.

Blanks will be furnished on which the special representative must certify that the tournament was held in accordance with all the rules and regulations, and that the scores may be officially recorded by the American Trapshooting Association.

TELEGRAPHIC TRAP LEAGUE FOR CLUBS

A movement is under way to form a telegraphic trapshooting league among the athletic clubs of the United States and Canada.

The New York Athletic Club, the Boston Athletic Association, and the Missouri Athletic Association have been approached on the subject and have taken kindly to it. Those interested hope to get the Olympic Club of San Francisco, the Kansas City Athletic Club, the Denver Athletic Club, and the Montreal Athletic Association interested in the proposed league.

The Olympic Club and the Montreal A. A. are going in for trapshooting this year. The Olympic Club has fitted up a magnificent resort with everything that a shooter needs, including an instructor. The Montreal Club has a membership of more than 3,000, and from such numbers should be able to form a fine trapshooting team. The other clubs have been engaged in trapshooting competition for years—in fact, the New York and Boston organizations are two of the most active trapshooting clubs in the United States.

The plan of the league would be for the teams to meet once a month and shoot, wiring their scores to the other clubs, the highest five or ten scores to count. The club winning the greatest number of matches in the course of a year being the winner. The American Trapshooting Association would provide a suitable trophy for such competition.

The Churchill Downs management has received word from William Hogan that he will arrive there April 29 with the Kentucky Derby candidate Dunboyne and three other horses belonging to P. A. Clark. Trainer Hogan stated that the winner of last year's Futurity was in excellent health and that he had recently worked three-quarters in 1:17.

So necessary do San Diego, Riverside and Orange counties consider the protection of the mountain watersheds that they contributed to such protection, during the past season, over $5,000. This money was spent for salaries of fire rangers, for the construction of lookout houses, for building fire trails, and to pay fire fighting bills.

GOOD FOREST FIRE PROTECTION

"History should record the fact," says M. R. Tillotson, Supervisor of the Cleveland National Forest, "that our fire season closed on the same date as did the Great War—November 11, 1918."

And as victory was achieved on the Western battle front, so was it achieved in Southern California. For the number of preventable, or man-caused, fires was reduced, in comparison with the season of 1917, by 50 per cent, while expenditures for fighting such fires were reduced from $4,000 in 1917 to $130 in 1918—a reduction of 97 per cent.

GOVERNMENT DAIRY HERD HAS NEW QUEEN

A new queen reigns in the herd of Holsteins on the Government experiment farm at Beltsville, Md. She is as unassuming and peace-loving as any of her subjects, although she bears the name Calamity Wayne Pauline II., and has just completed a test in which she produced in a year more than 11 tons of milk. In 365 days she produced 22,547.8 pounds of milk which averaged 3.805 per cent. butterfat, the total fat being 355.4 pounds. This animal was selected by dairy specialists of the United States Department of Agriculture from a Michigan herd in July, 1917. She was brought to the Beltsville farm, where she produced a heifer calf and was started on her test December 7, 1917, at the age of 8 years. The test was run through the coldest winter that section had experienced in 40 years, and a summer that was extremely hot. The test for advanced registry was conducted under the rules of the Holstein-Friesian Association. During the year the animal was handled by two different herdmen.

A son of Calamity Wayne Pauline II. has been placed at one of the government substations, and one of her half-sisters is making a fine record at the Michigan Agricultural College. Calamity's 305-day record was 19,256.6 pounds of milk, averaging 3.7 per cent. butterfat, making a total of 718.14 pounds of fat.

All the dairy cattle on the Beltsville farm are used for experimental purposes and will be given at least two advanced registry tests to determine their capacity for production.

BOYS SHOW PROFITS IN PIGS

Farmers in Contra Costa county, Calif., in the past have not raised many pigs. When the government asked last year for increased pork production in every section, difficulty was found in getting farmers interested, for they maintained that pig raising in their part of the country could be conducted only at a loss. The county farm bureau directors then decided to appeal to the boys and girls who belonged to the clubs organized by the Department of Agriculture and the State college. The invitation was accepted enthusiastically, and with the assistance of the leader, seven pig clubs, with a total membership of 42 were organized in the county. Each member pledged himself to raise at least two hogs. Through the effort of the junior farmers 42 demonstrations of better stock, better feeding, care, and management, with complete records to back up their success, were conducted on 42 farms in the county, and fathers have been shown that pig raising can be made to pay.

WHY A $5,000 BULL WAS SOLD FOR $50; TESTING VALUE SHOWN

When a certain farmer a few years ago sold his registered Holstein bull to his local butcher no records had been made by any of the bull's daughters. Within a year 11 of the daughters freshened at the ages of 2 and 3. Records were made of milk and butter-fat production, and to the astonishment of everybody the average milk production was 14,502 pounds and the average butter-fat production was 573 pounds.

But before these records were available the bull was dead and his hide had become leather. Because there were no records, a $5,000 bull had been sold for $50. The cow-testing association tests the dams and daughters, and the bull association makes it practicable to keep a bull until his daughters have been tested. These two associations would have saved that bull.

Registration alone cannot guarantee production. Registered dairy bulls should be backed by good production records. Without record backing they may be very well bred, but there is nothing to prove it.

A Sheboygan county, Wis., dairyman invested in a good pure-bred bull to head his herd and as a result the returns from his business have more than tripled. He produces milk for a cheese factory, and in 1911 delivered 44,229 pounds, but he did not regard his profits as satisfactory. He decided that he was farming with too poor equipment, so he purchased a pure-bred bull to cross with his scrub cows. Last year from the same number of cows he delivered 161,988 pounds of milk.

Another dairyman in the same county some time ago was milking 26 cows and got 600 pounds of milk a day. He tested his herd and then sold 17 of his cows—all scrubs—for beef. His nine grade cows are now producing the same amount of milk as his former herd of nearly twice that number. The owner is convinced that it pays to use only pure-bred bulls.

Debts deafen the ear to opportunity. Buy W. S. S.

Al De Baron 55652

By Golden Baron 29085, son of Baron-dale 2:11¼, out of Julia Blair by Nutwood Wilkes 2:16½.

He is a very handsome dark bay stallion, nine years old, solid color with black points. He stands 16 hands high and weighs in working condition 1150 pounds. He has a kind and cheerful disposition,—is always ready to eat and always ready for his work. He is stylish, symmetrical in conformation and shows great class in every respect. He can be relied upon to trot a full mile close to what he can rate for a quarter or an eighth of a mile. He is thoroughly broken. A woman could safely drive him up Market street, San Francisco or anywhere else. I worked him on the half-mile track at Ukiah. He has never taken a lame step and is absolutely sound.

A LITTLE STORY ABOUT SOME GREAT YOUNG HOLSTEIN CATTLE

(C. A. Harrison.)

When Jump Cauthorn, special representative of the Hartford Live-stock Insurance Company, came to Seattle two years ago and appointed the writer as resident special agent of the Hartford Livestock Insurance Company, I did not realize what pleasures and valuable information there was in store for me. During the two years I have been insuring livestock, I have insured some of the most aristocratic bred Holsteins in the world, and I have had the pleasure of meeting many of the best breeders and owners of the great Holstein-Fresian tribe of butter producing cattle in the world.

Just a few days ago I was called by Mr. E. A. Stuart, owner of the great Carnation Stock Farms, to insure a young heifer in the sum of $5,000, and when I sent in this heifer's (Carnation Albina Josie) application I said to myself that I had for sure insured a cow that is the aristocracy of Holstein breeding.

She was sired by the wonderful Rag Apple The Great, whose tabulated records I herewith present to my readers. Every great animal has to have, in addition to a great sire, a great mother, and this heifer has for a mother one of the world's greatest cows. In fact, I think I may safely say the world's greatest cow, Albina Josie, whose record I herewith attach, and I am going to ask the Breeder and Sportsman to publish it as I do not think that any insurance writer in this world ever insured a more aristocratic heifer than Carnation Albina Josie. With her individuality, which is, I am safe to say, as perfect as mankind has ever seen, and her breeding, which is ultra fashionable, and the fact tnat she is owned by E. A. Stuart, who

Rag Apple the Great

is one of America's greatest men, she, unless some ill befalls her, will be a greater cow than her great mother, Albina Josie.

It has been my privilege and pleasure to insure for the sum of

Carnation Albina Josie

MALE

Rag Apple the Great

Born Dec. 22, 1916.

The records of his two nearest tested dams average:
Butter 7 days 44.86

The records of his three nearest dams average:
Butter 7 days 42.71

The records of his four nearest dams average:
Butter 7 days 40.92

The records of his six nearest dams average:
Butter 7 days 37.41

The sire—"The Greatest Bull in the World."

The dam—Segis Fayne Johanna (50.68), the highest record cow in the world.

The dam's dam, Vikina Johanna (14y 39.43), highest record cow for her age in the world.

The sire's dam the first cow to produce 156 lbs. of butter in 30 days.

The sire—the first bull to sell in public sale for $25,000.00 is the sire of the only $53,000.00 bull and is the sire of the youngest 30-lb. heifer.

The dam, her dam and one of her daughters hold the world's record for three generations, their seven day butter records averaging 45.82 lb. His dam and her daughter average 49.015 lb. world's record for dam and daughter.

Carnation Champion Yearling Bull

$25,000 the great calf, Carnation Champion, whose picture and breeding I herewith attach and am going to ask the Breeder and Sportsman to publish the same because I think it will be a great benefit to many young men who are engaged in the breeding of Holsteins in the great West.

As an individual, Carnation Champion is hard to beat. The picture that I am sending you of him is not in any way a proper reproduction of him, as he is a superb individual. In addition to his perfect conformation he is a young bull of most kindly disposition, easy to handle and of the most pleasant temper. When we look at his breeding, his sire, Johanna McKinley Segis, a sire that stands out as one of the world's greatest, and, as I said before, every great animal has to have a great mother. This grand young bull is a son of Tietje Queen DeKol, and I admit that I am just a blunderer. However, I am going to say that no bull, living or dead, ever had a more aristocratic maternal pedigree than that of Carnation Champion. He was raised by Mr. Stuart and at his birth his dam, Tietje Queen DeKol, died, which was a terrific loss not only financially to Mr. Stuart but also to the Holstein-Fresian breeders of the whole world.

One thing that I have to say about this bull is regrettable to me, and that is that when I called for this data this morning at Mr. Stuart's office, I was informed by Mr. Watt, the secretary of the Carnation companies, that Mr. Stuart has concluded to send Carnation Champion to the National Sale to be held at Philadelphia, June 6 and 7 of this year. I had quite a talk with Mr. Watt on the subject and he told me that Mr. Stuart thought it was for the good of the dairy business that great animals be held not for exclusive private use but that they be put up at auction in different parts of the country so that the good work of producing butter may go on. And while this may be all true and is true, I feel that the Northwest is losing one of the greatest bulls that was ever bred or owned in America.

While I am at this story, I will say that it is my pleasure and privilege to look at the bull, Carnation King Sylvia No. 231,405, the animal for which E. A. Stuart paid $106,000 and on which he carries $97,800 insurance with the Hartford. I did not, however, write this policy, as it was written where the bull was sold—Chicago.

Men and women make pilgrimages to far-off countries for the privilege of looking at works of art and historic things, but I think every young dairymen in America should make the trip to the Carnation Farms at Stuart, Wash., for the privilege of looking at and studying not only the type but the blood line of Carnation King Sylvia. And, while they are at it, take a look at Mr. E. A. Stuart, one of America's greatest, best and plainest citizens.

I did not have the privilege of knowing Mr. Stuart until I became associated with the Hartford Live Stock Insurance Company., and if I never have done anything else, the fact that I have known Mr. Stuart and observed his character and his ways of doing business has amply paid me for all my work as an insurance writer.

The Carnation Companies mean much in this world's welfare. If I could take space and time to produce statistics of the immense amount of Carnation milk that is being sent to the uttermost ends of the world and the way it is produced and what it means to humanity, I would need two or three papers as big as the Breeder and Sportsman.

I am sending the picture of Albina Josie. It was loaned to me by the Carnation Company; also that of Rag Apple The Great, through the courtesy of Mr. Watt, the secretary, which I am asking the Breeder and Sportsman to reproduce and return the originals to me, and I have just sent in an application for reinsurance on the great cow, Albina Josie, which adds to my cup of pleasure—not the pleasure of the money that I have made but the pleasure of knowing that, as a new man in the Hartford, it has been my pleasure to insure the wonderful cattle that I have written about.

I might apologize to the Breeder and Sportsman for the amount of space I have taken, but I won't because I hope that my story will be read by many young men who are aspiring to be owners and breeders of Holstein dairy herds, and while I know that my story is a very poorly written one, yet I am sure it will inspire many an American boy to produce animals like the ones I have named above.

I will, in the next number of the Breeder and Sportsman, give the breedings and statistics of some other aristocratic Holsteins that I have insured, as, while I have stated Mr. Stuart is a great breeder, I know that it is within the province of every intelligent American farmer to own and raise as good animals as the ones I have named, because it does not take extreme wealth to do this. The man with one pure-bred cow who gives the cow and her projeny care and development, has the fighting chance to produce a world's champion that will bring to the same breeder much pleasure and great profit.

C. A. HARRISON.

PEDIGREE OF CARNATION CHAMPION

H. B. No. Registration applied for

BORN FEBRUARY 28th, 1918.

This young animal is a very fine individual, developing wonderfully. The sire was a remarkable animal whose daughters are making great records and whose sons are also making good, one siring the first 30 lb. junior two year old.

The dam was one of the greatest transmitting cows of the breed, Tietje Queen DeKol, with a record of 42.26 lbs butter in seven days, the only cow to have a daughter with a record of 43.29 lbs. and another with 42.36 lbs. butter in seven days, and one other 30 lb. daughter, all of these being under four years of age.

Considering the excellent producing and transmitting lines that this animal comes from, we believe he will develop into one of the greatest of the breed.

Sire: JOHANNA McKINLEY SEGIS No. 44367. 60 ARO daughters.
Oakfield Korn. Segis, 33.27.
Uneeda Korn. Abigail, 33.02.

You all know about Albina Josie. You know that she is the dam of Albina Josie King, sold for $25,000.00. You know that she is a granddaughter of De Kol 2d's Butter Boy 3d, one of the great Century Sires. You know that she is a granddaughter of King of the Pontiacs, the greatest son of the greatest bull that ever lived.

Add to all this wondrous breeding the fact that Albina Josie is one of the greatest individual cows that ever lived, and the further fact that she is safely with calf to Rag Apple the Great, the only son of the only 50-lb. cow and then tell me by your bid at the sales ring what you think this great cow in calf to Rag Apple The Great is actually worth.

PROPOSED CONFERENCE COMMITTEE OF THE LIVE STOCK INDUSTRY

At a conference held in Chicago on March 10th and 11th, 1919, the representatives of the Kansas Live Stock Association, Corn Belt Meat Producers Association, Missouri Live Stock Breeders' Association, Illinois Live Stock Association, Illinois Agriculture Association, and the Buyers' and Sellers' Association of Texas met with the five large packers and eleven other packers.

It is the sense of those participating in the conference that it would be to the mutual benefit of the live-stock industry, the packer and the consumer, that steps should be taken to bring about a closer co-operation between the various interests concerned.

Realizing that the live-stock industry is on the threshhold of an era of reconstruction, and with the prospect of removal of such control as has been exercised by the Food Administration during the war period, we are impressed with the importance of reaching a better understanding of the problems affecting the whole industry, and of effecting, if possible, more economic methods of production and distribution to the end that our businesses may be placed on a sounder basis, and in order that the finished product be furnished the consumer at a minimum price compatible with cost of production.

It is suggested that these ends may be obtained through the formation of a central committee composed of producers and representatives of the packing industry, the Bureau of Markets, and the National Live Stock exchange, which should meet in Chicago once a month, or oftener, if necessary, for the purpose of taking such measures as may tend toward stabilization of live-stock receipts at various markets, and for the further purpose of studying one another's problems, of adjusting grievances, and of inaugurating such systems as will be helpful to the producer, the packer, and the consumer. The greatest possible publicity should be given to all of the proceedings. It is understood that if this proposal becomes effective it shall not be construed as in any way restraining the activities of the parties hereto in working for or against the passage of ending or future federal legislation for the regulation of the packing and allied industries. Its purpose is wholly constructive, looking to a better understanding and fuller co-operation between all interests involved.

It is obviously to the best interests of all concerned that receipts of live stock at all markets should be stabilized and distributed as evenly as possible in order that a five-day market may be established for all classes of live stock, and to this end it shall be distinctly the function of the committee to make effective such measures as may be possible for the accomplishment of this object.

It is contemplated that the producer shall obtain and furnish the committee all important information concerning the supply of meat animals in the various sections of the country, shall advise the committee regarding feed conditions, and the amount of live stock which shall be ready for market during the various seasons, and in other ways be a source from which valuable information, including cost of production, may be placed at the disposal of the committee.

It is contemplated that the packers shall prepare and submit to the committee information relative to the amount of finished product on hand, the foreign and home demands for meat products, together with the cost of live animals and the expense of slaughter, packing, and distribution of the finished product. The packers shall recommend any plans which tend to reduce their expense of operation, such as the equalization of receipts, etc.

It is contemplated that the Committee shall carefully investigate the annual earnings of the packing industry, including all their subsidiary companies; it shall be the privilege of the committee to employ a committee of public accountants of recognized standing to audit the yearly statements of the packers. Any statements of figures furnished to the Committee by the packers, or by the producers, from time to time, may also be subject to verification by public accountants. Whenever duplication and unnecessary overhead expense are disclosed it shall be the duty of the committee to recommend the elimination of the same.

It is contemplated that whenever certain methods and systems used by the producers may be shown to be wasteful or detrimental to the industry it shall be the duty of the Committee to recommend the elimination of the same.

It is contemplated that in regulating the receipts of live stock during abnormal times it will be essential that the committee shall have the support of the Railroad Administration or the Interstate Commerce Commission to the end that the regulation of transportation as recommended by this committete may control the receipts at market centers.

We feel that the membership of this central committee should be composed of the following representatives: One from the Bureau of Markets of the United States Department of Agriculture, two from the National Live Stock Exchange, ten packers and ten producers, representing the cattle, hog, and sheep industries, with alternates—a total of twenty-three. This central committee shall have authority to add one representative of the stock yards and one of the railroads, if it sees fit.

It is understood that the producers here present will take steps as soon as possible to notify all live-stock producing organizations of the action here taken, and to call a general meeting of three delegates from each state, to be selected by the State Associations, and three delegates at large from each of the National Live Stock Associations and the Southern Live Stock Association; and it shall be the province of this meeting to select the ten producer representatives that are to serve on the Central Committee.

It is contemplated that the producers will exercise the utmost care and diligence in selecting their representatives, who will be men of unquestioned standing and ability, and that the packers shall name as their representatives the principals of the institutions represented.

It is understood that this committee, when appointed, shall formulate the rules and regulations governing its operation, and that a producer shall be selected as its chairman. The headquarters of the committee we feel should be in Chicago.

The permanent committee shall create the sub-committees at various markets and shall formulate the rules and regulations governing their operations. The purpose of these local committees in the immediate adjustment of any grievances, such as dilatory handling of the receipts, late buying, delayed weighing, and the avoidance of excessive variations in the purchase price paid for the same grade of live stock on the same day.

We suggest that the financing of this organization be divided equally between the packing industry and the live-stock associations, and that the methods of raising the necessary funds be left to the Central Committee.

WELL KNOWN ADVERTISING EXPERT GOES TO BROADMOOR HOTEL

Robert A. Turner, one of the foremost railroad advertising men of the West, until last week assistant secretary of the Denver Civic and Commercial Association, has accepted the position of resident advertising manager of the Hotel Broadmoor, Colorado Springs, and assumed his new duties last Monday.

Mr. Turner has recently returned from St. Augustine, Fla., where he had gone a year ago as general publicity agent of the Flagler or Florida East Coast System of Railroads. He was getting nicely started there when government ownership of railroads intervened and placed a ban on all railroad advertising. He then returned to Denver, where he accepted a position with the Civic Association.

Gombault's Caustic Balsam

The Worlds Greatest and Surest Veterinary Remedy

HAS IMITATORS BUT NO COMPETITORS!

SAFE, SPEEDY AND POSITIVE.

Supersedes All Cautery or Firing. Invaluable as a CURE for

NOTHING BUT GOOD RESULTS.

Have used GOMBAULT'S CAUSTIC BALSAM for more than 20 years. It is the best blister I have ever tried. I have used it in hundreds of cases with best results. It is perfectly safe for the most inexperienced person to use. This is the largest breeding establishment of trotting horses in the world, and use your blister often.—W. H. RAYMOND, Prop. Belmont Park Stock Farm, Belmont Park, Mont.

USED 10 YEARS SUCCESSFULLY.

I have used GOMBAULT'S CAUSTIC BALSAM for ten years; have been very successful in curing curb, ringbone, capped hock and knee, bad ankles, rheumatism, and almost every cause of lameness in horses. Have a stable of forty head, mostly track and speedway horses, and certainly can recommend it.—C. C. CRAMER, Training Stables, 990 Jennings Street, New York City.

Sole Agents for the United States and Canada.

THE HORSE AND ITS COLOR

One of the most interesting processes in the laboratory of animal creation is to be found in the skin, comments a writer in the "Horseshoers' Journal." It covers the whole outside of the animal and binds together its parts. In some places it clings so closely that it hardly admits of any movement; for example, about the bones of the knees and the forehead and on the back; in other places, as on the face, sides and flanks, it hangs in loosened folds. In the places where action is needed the skin is folded into various duplicates and can be extended or drawn up as necessary. By means of certain fibrous bundles attached to the true skin, the animal can shake off flies, insects, and even the harness. Between these fibrous bundles are interspaces which enclose cells, vessels, nerves, gland ducts, hairs, and in the deep layers fat.

The value of the skin to the horse and its owner may be guessed from the fact that any great disorder of its large surface may bring on disease and death. For instance, if one should coat the surface of the skin with glue, death would soon follow, for the breathing pores would be stopped up. This lets us into secret of many troubles where the groom does not keep the horse's skin pores clear of dirt and sweat, or dandruff. Or if a farmer finds disorders of the stomach that are not quickly cured, he may look for skin eruptions and closing of skin pores.

The skin consists of three layers—a cuticle, also called epidermis, or scarf skin; then a thin soft substance through which the pores of the true skin (the third) pass. This second skin is named rete mucosum, because it looks web-like and because of its soft, mucous consistence. Last comes the true skin, called cutis, or corium, or dermis. It is in this second skin that we find the cells which contain the pigment granules that give color to the hair and body of the horse. In horses with white hair the rete mucosum is white, in black horses it is black. The color of the hair determines the color of the horse. The true skin is always of a pale, white, and has no connection whatever with the color of the hair.

KENILWORTH A Great Stake Horse and a Great Sire

BY IMP. SIR MODRED, DAM IMP. QUEEN BESS, BY MARDEN; 2nd DAM LIZZIE, BY PETRARCH.

Description and Performances.

KENILWORTH is one of the grandest stake horses ever bred, and a great sire. He is a brown stallion, standing 16 hands and 1 inch high, weighing over 1,300 pounds in stud condition, and is now in superb condition. He raced at 1,240 pounds. He is a winner of 94 races, having met nearly all the best horses in training in America during the years of his racing. He ran six furlongs at Tanforan in 1:12½, beating Waring. He holds the mile record of 1:39½ of Ingleside track, and at Oakland carried 132 pounds and ran three-fourths of a mile in 1:13. He defeated the great Articulate every time he met him, and has beaten every horse that has met him as many as three times. He has been a consistent winner as a two, three, four, five, six and seven year old. His sire, imported Sir Modred, was a great race horse, a winner at two, three, four and five years, his Australian victories including the Canterbury Derby, Canterbury Cup, Metropolitan Stakes, etc. Idalia, dam of Sir Modred, also produced the high-class stake winners Betrayer, July, Liverpool and Cheviot. Since being imported to America by the late J. B. Haggin he has led the winning sires several years. Imported Queen Bess, dam of Kenilworth, has had six foals since reaching America. Prince Tyrant and Tyran by Tyrant were both road winners as two, three and four year olds. Old England, her foal of 1899, was one of the best stake winners of 1901 and 1902.

Among KENILWORTH'S consistent winning get are Coopertown, Kiang, Eel, Warefare, Katie Gleason, Pay Streak, Halworth, Envy, King Worth, Real Worth, Clark M., Ada Anne, Midsummer, etc.

A GREAT PETER THE GREAT

The Standard and Registered Trotting Stallion

PETER KLYO BELL 62389

California Pure Bred Stallion, License No. 1088

WILL MAKE THE SEASON IN SACRAMENTO, CAL.

PETER KLYO BELL is by Peter McKlyo 2:06, by Peter the Great 2:07¼, the world's greatest sire of extreme speed, leading sire of Futurity winners and leading sire of Grand Circuit winners 1918. Peter Klyo Bell's dam is the strongly bred Electioneer mare Iran Bell, dam of Nearest Alto McKinney 2:11¾, by Iran Alto, sire of Dr. Frasse 2:11¾ and 22 others in the list. His second dam, Bell Bird 2:26¼, holds the world's yearling record to high wheel sulkies, and is the dam of Wildbell, matinee record 2:05½, Chico.

PETER KLYO BELL represents the most popular blood lines at the present time. He is a remarkably handsome young stallion, bright bay, 15½ hands, weighs 1100 lbs. He is a pure gaited trotter and gives every promise of being the high-class race horse that he should be by inheritance. Owners of good brood mares can make no mistake by breeding to this grand young horse, as his produce is sure to be in great demand.

The best care taken of mares in any manner that owners may desire, but no responsibility assumed for accidents or escapes which under the conditions and care exercised are almost impossible. For further particulars address

KARL GLASER, 1703 G Street, SACRAMENTO, CAL.

Expressive Mac 2:25½

A. T. R. 41513. Licensed Pure Bred, Cert. No. 1041.
SIRE OF
Clara Mac 2:04½ Vera Hal 2:05
Madam Mac 2:07¼
Harry Mac 2:07¼

Only stallion offered for service in California to sire two in 2:05, four in 2:10 Also sire of Eddy Mac 4yr 2:20½, trial 2:12; Nellie Mac trial 2:09½ trotting, 1915, and others with fast trials.

Son of McKINNEY 2:11¼ (sire of 30 in 2:10) and the great broodmare, EXPRESSIVE (3) 2:12½ (dam of 6 trotters, 2 in 2:10) by ELECTIONEER 125. Ideal in color, size and conformation—seal brown, height 16½ hands, weight 1275 pounds. Permanently in the stud at my ranch three miles south of Selma at **$25 the season**, usual return privilege, or $35 to insure. Good pasture at $2.50 per month (no barbed wire fences), and best of care given mares but no responsibility assumed for accidents or escapes. Address for all
J. H. NELSON, Selma, Cal., P. O. Box 361.

THE STANDARD TROTTING STALLION

HEALANI 56150

WILL MAKE THE SEASON 1919 AT THE

DIXON RACE TRACK

WITH RETURN PRIVILEGE

FEE, $20 FOR THE SEASON

HEALANI is by Zolock 2:05¼ (McKinney's fastest son), dam Queen Derby 2:06¼, by Charles Derby (sire of Jim Logan 2:01¾, Don Derby 2:04¼, and 8 others in the 2:10 list); second dam Addie Ash, by Indianapolis; third dam Addie H., by Ashland Chief.

HEALANI 56150 is not only highly and fashionably bred, but is a handsome and stylish individual. He has size, style and quality. Without doubt he is one of the fastest speed inheritance stallions (if not the fastest) on the Pacific Coast. He is coal black and absolutely sound, without a spot or blemish, and one of the best mannered horses living, so gentle a lady or child can handle him. Will stand with his head over stall door and pays no attention to mares being cross tied in front of his stable door. This horse was worked some last summer and fall, after 14 months without having a harness on him, and trotted miles in 2:26, halves in 1:09, and has and can now show two minute speed and better for ⅛ of a mile. Has been jogged 5 or 6 miles a day all winter and looks and feels good and, no doubt will trot a mile close to 2:10 or perhaps better this fall. He is a nice going line trotter and can carry his speed. He is only 8 years old.

Best of care taken of mares, with no responsibility assumed for accidents or escapes. Address all correspondence to

The Greatest Scores Ever Recorded Were Made With

Parker Guns

Mr. L. S. German made the highest official yearly average ever recorded with his Parker Gun, scoring 6137x6285=97.64%.

At San Jose, Cal., May 19th, Mr. Orval Overall won THE CHAMPIONSHIP OF CALIFORNIA-NEVADA, scoring 44x50 targets with his double Parker Gun.

At same place, May 22d, Mr. Harry Ogilvie won the INTERSTATE CALIFORNIA-NEVADA HANDICAP, scoring 97x100 at 20 yards with his single barrel Parker, and Mr. Len. Hawxhurst won the Professional Championship, scoring 94x100 with same kind of gun.

At Los Angeles, Cal., May 28th and 29th, Mr. Ed. Garrett made the highest aggregate score on the Preliminary and Pacific Coast Handicaps, scoring 187x200 at 18 and 19 yards, with his single barrel Parker, and Mr. Len. Hawxhurst at same place won Second Professional Average, scoring 381x400 targets with same make and kind of gun.

The Grand American Handicap has been won nine times with Parkers.

If interested in small bore double shot guns, please write for New booklet which will be sent free, giving valuable information on this subject.

CARNATION STOCK FARMS [SEATTLE]

The Home of the $106,000.00 Holstein Sire

CARNATION KING SYLVIA

Carnation Stock Farms is the home of 600 Registered Holsteins—said to be the largest herd in America of this breed and "Registered." Because of the reputation and records of the ancestors of the foundation stock in this herd Carnation King Sylvia, the best individual son of May Echo Sylvia World's Record Milk Cow, will be given every opportunity to make good. No sire ever had such opportunity. His sons will bring increased production in the Holstein herds in every section of America. Read the World's Record of his dam. **Send for his pictorial pedigree.**

A few of the animals which will be bred to Carnation King Sylvia are as follows: Idleaze Pontiac Lass, highest record daughter of King of the Pontiacs. Glen Alex Tietje DeKol, daughter of the famous Tietje Queen DeKol, first 9-year-old cow to have two 42-lb. daughters. Albina Josie, cow that sold for $12,000.00 at Milwaukee Sale, 1918. Fifty daughters of Johanna McKinley Segis, son of the 40-lb. cow Johanna DeKol Van Beers. Forty daughters of Matador Segis Walker who is a 40-lb son.

Remember—All animals on the Carnation Stock Farms are under supervision of the United States Bureau of Animal Industry for health.

Above photo taken at age of eight months

Record of His Dam
May Echo Sylvia

Milk 1 day	152.10
Milk 7 days	1005.80
Milk 30 days	4196.90

Two of California's Best Cows---Mated to Him

Raphaella Johanna Aaggie 3rd. No. 185125

Raphaella Johanna Aaggie [illegible] owned by the Napa State Hospital, Napa, Cal., has created a great championship for milk production under strictly official test. Her record for 365 days is 24,641.2, 1032 lbs. butter. In establishing this yearly record, she also made a 7-day, 30-day and 60-day milk record for U. S. cows. For 7 days she is credited with 954.8 lbs. 30 days, 3,787.1, 60 days, 6,876.7 lbs. milk.

The judgment of the owners of this wonderful cow in deciding to breed her to Carnation King Sylvia, son of the World's Record cow, May Echo Sylvia, is certainly a wise one and no doubt the high producing records will be transmitted to the off-spring.

Tilly Alcartra—The Real Dairy Queen

Tilly Alcartra broke another World's Record when she produced 33,424.80 lbs. milk and 1323 lbs. butter, and by producing for 6 years 156,776.1 lbs. milk and 6,112.12 lbs. butter. She made a 40-lb. record in a short time test at her sixth freshening as a 9-year-old and broke the world's record for 6 months with 18,790.5 lbs. milk, and 771.82 lbs. butter.

Can you imagine what to expect from the off-spring of Tilly Alcartra and Carnation King Sylvia, the best individual son of May Echo Sylvia, that grand old cow who produced 152 lbs. milk in one day and 1005 lbs. milk in 7 days. She will be bred to Carnation King Sylvia in June, 1919.

Glancing at the advertising columns of the eastern horse papers shows that the public mind in that part of the United States has not lost interest in racing and breeding horses. The columns are full of announcements and programs of race meetings. The purses offered and terms of entrance are more liberal than ever before. Every eastern horse paper carries columns of stallion advertisements which indicates that the breeding business is prsoperous, that applies not only to harness racing but to thoroughbreds. Horses in the east, the really good ones, bring phenomenal prices.

There was a time when California ranked next to Kentucky as the leading horse breeding state in the union, now it is at the tail end of it. There are very few stallions being offered for public service and while a few wealthy men of California have gone quite extensively into the breeding of thoroughbreds the general public here seems to have lost interest in horses and horse racing. The prospects are that outside of the State Fair, Riverside and Ventura there will be very few meetings in California this year and outside of the stakes there will not be much racing in Sacramento.

If the Governor signs the bill for appropriation for District Fairs while the money appropriated is not used for racing, still as an attraction each fair will add racing to its programs and that will do much to encourage breeding and racing in California and revive public interest.

Nesmith & Sons have returned to Los Angeles and have at the Los Angeles track the string of horses they were racing in the east part of the last three seasons. They were in 98 races and behind the money eight times. The horses that they will campaign this year are: King Lilly Pointer out of the greatest pacing bred horse on earth, sired by Star Pointer, dam Lilly S. by Direct. Lilly S. is also the dam of Zomrect 2:03¾. King Lilly Pointer stepped his best mile in 2:08, ¼ in one minute. Is working fine this season, stepped a nice mile the 22nd and finished the last half in 1:04, last quarter in 30 seconds, 1-8 in 14 seconds.

Queen Pointer by King Lilly Pointer, the great colt that stepped 1-8 in 15½ seconds, at 14 months old, paced a mile the other day in 2:20 last ½ in 1:05—1-8 in 15 seconds is surely a credit to King Lilly Pointer.

Happy Clay by Clay Edwin the double-gaited horse that stepped his best mile at the trot in 2:13¼ paced in 2:14 is working fine this season, a mile in 2:18 at the trot, last ½ in 2:05½, eights in 16 seconds.

Zombro Clay trotter by Zombro by Zombro, dam Clay Edwin has stepped his best mile in 2:19, ½ in 1:07; 1-8 in 16 seconds, is doing fine this season, and everybody likes his way of going.

The New Zealand Trotting Journal in commenting on the horse carnival just concluded in that country publishes the following in regard to the leading sires in New Zealand for the season up to the present time.

Just quietly—enterprise in the breeding industry has developed into a civil war, so to speak. It appears the privilege of every studmaster to boost his own horses, sometimes at the expense of a fellow competitor. This, of course, is accepted as part of the game. Owners of brood mares are ever on the alert for likely sires to mate their mares. The stallion owners know this, and for this reason the Christmas and New Year fixtures are closely watched by those associated with the breeding of horses. The carnival just concluded brings more than one family whose credentials had previously been torn to threads into the limelight. The successes of their progeny are, under the circumstances, highly creditable, as during the slump their fathers have been poorly patronized. The "stars," too, have held their own—and so they should, as for seasons past those that have been at the stud long enough to produce winners have had the cream of the brood mares bred to them.

It is interesting to notice some of the lesser lights putting in their claims. Included in the list are a few locally-bred horses, who, after a brilliant career on the race tracks, have been retired to the stud. Their owners are fired with the prospects of their horses some day heading the list for the blue ribband. Most of them have called on the "Journal." Not that they considered their horses' performances were being overlooked, but more in a spirit of pleasure, and to obtain an opinion as to the possibilities of their horses' stock.

The diversity of opinion and the sidelights and temperaments of the various breeds are particularly interesting to the onlooker. An ardent supporter of Harold Dillon, who is again at the top of the list, describes the Dillons as coming early to their speed, and discusses the manner in which the tribe is sometimes mishandled by trainers, who expect too much of them when youngsters. Speaking of colors, the bay Dillon is first favorite, while the chestnut is an outsider. Though they are speedy, it is surprising the irregular showings given by the chestnut members of the family. While no reason can be assigned for it, it is a fact that few chestnut Dillons race on as they should do. But they are a great family, as records have proved.

The Dillon man having retired, the Wildwood supporter takes up the running. "They can stay," he said, "and go fast. They are cut-and-come- again jokers, but I don't like them for the one reason that it occupies nearly a day to work them. They take three times the preparation of any other breed. The colts are the best, but while the fillies show speed and stamina they are not nearly so genuine as the colts, though they usually turn out the best of matrons."

Here an old friend enters who has been hiding for a couple of years or more. His first remark was in praise of the Galindos, who had accounted for seven or more races during the carnival. It was certainly a fine achievement, as the imported son of the great McKinney has no doubt been under-estimated by breeders. The downfall of the family has been: "Too much work when young." They are good horses if left until three-year-olds, and then pottered about and turned out for a short period, and then taken up again. They are a type that race best when five-year-olds, and are all the better if they never sport silk until that age. Most of them dislike the over-check—a circumstance trainers have been quick to notice. No doubt they will come into their own again. Another family that has scored well is the Hal Zolocks. They are nice pacers, and, with few exceptions, can stay. Age appears to play an important part with them, too, as those kept at home until four-year-olds have so far rewarded their owners for their patience. Rothschild, notwithstanding his declining years, had four winners. The grand old horse is now on the retired list, but, when in his prime, established a record that the heads of the families, with all their opportunities, will take a long time to overtake.

The surprise packet of the recent gatherings was the winners sired by King Tracey. No fewer than four of his get saluted the judge. Marvin Wilkes and Young McKinney are responsible for three winners each, and thus are helping to restore the family reputation. They both possess high qualifications as progenitors, and their status is such as breeders cannot, and do not, overlook it when breeding a mare. Southland's champion winner-getter, Four Chimes, keeps adding to the list. They are a very solid family, game racehorses, and mostly good pacers and good stayers. Given reasonable opportunities, the son of the imported Abbey Bells will figure prominently in the list for several seasons.

Sires represented by 10 or more winners are as follows:

Harold Dillon	22
Rothschild	11
Wildwood, Jr.	11
Galindo	10

AT THE FRESNO TRACK

T. D. Sexton, who has just returned from a visit to Fresno, reports that there are many good horses in that section but few of them are being trained. The only horses being worked on the Fresno track are in charge of Henry Smith, who is the only trainer there at the present time. He has the following horses:

Hal Bingen, bay stallion, by Border Knight. Dam, Stella McEuen. This horse has been a mile last year in 2:23.

Bay stallion by Copa d'Ora. Dam, full sister to the dam of Allie Lou. This is the horse that Will Durfee gave to the man that owned Guy Borden.

Black mare by Bon Voyage, out of the dam of Berta Mac, owned by Mr. Parsons. This mare has been a mile in 2:21 last year.

Bay filiy, three-year-old, by Vernon McKinny. Dam full sister to Guy Boy. This filly has been a quarter in 35 seconds this year.

Brown filly, two-year-old, by Teddy Bear, owner at Hanford.

Two-year-old filly by Anvil. Dam, Raisin Girl. Owned by Frank Malcolm.

Bay gelding by Vernon McKinny. Owned by Leo Lynch of Danville. This horse has been a mile in 2:10. As a three-year-old.

Bay mare owned by Doctor O'Neil, by Best Policy. This mare is a full sister to J. C. L., and trotted a mile last year in 2:14.

Three-year-old by Mohammet Watts. Dam by Zombro. This filly was bought at Pleasanton by Dr. O'Neil as a yearling and in just a few weeks' work trotted a quarter in thirty-five seconds.

Black stallion, Sidney Borden, by Guy Borden. Dam, Minnie Mac, by Athadon. This horse was worked by Mr. Townsend, and just a day or so before Mr. Townsend left he drove him a mile in 2:12; last half in 1:04. This horse, last year, paced a mile in 2:09. He is owned by Mr. George Center of Hanford.

Gray gelding, Kirkfield, by Re-election. This horse is in good shape and if he stays sound should trot a mile in eight or nine.

Bay gelding, Grand Policy, by Great Policy. Dam by Athasham. This horse belongs to Mr. Clark, the man who owned Raisin Express.

Five-year-old stallion by Guy Borden. Dam by Athasham. Owned by Mr. Tom Wills.

Three-year-old stallion by Eddie G., out of the dam by Raisin Express.

Vesta Vernon, dam by Oh So. This filly paced a mile in her three-year-old form last year better than 2:10.

Mr. Smith is also training a two-year-old by Peter McKlyo, out of the dam of Lulu B.

He also has a three-year-old by Expressive Mac. Dam, Strathlie. This filly is entered in the stakes and Smith has been a quarter in 37 seconds with this one.

Mr. Sexton reports that W. L. Woy took him out to his ranch and showed him Stanford McKinney and mare Lulu B. 2:11, and the half sister to her by Expressive Mac. Mr. Woy has about twenty head of trotters and pacers and all of them are high class horses that if trained, any one of them could win in any company.

Mr. Woy's horses that will race in the east this season arrived at North Randall Sunday evening, May 11. The horses sent include the following: J. C. L., Nellie Mac, Lottie Express and one other.

Mr. J. C. Adams of Phoenix, Arizona, bought Harry Mac, by Expressive Mac, from Mr. Leggitt.

Mr. Gould of the Midway Stock Farm was at Fresno and bought several mares.

DRIVING CLUB HORSES

The first matinee of the San Francisco Driving Club will be held over the Stadium track, Golden Gate Park June 1st. The committee in charge will stage a number of events for that day which should prove to be exciting contests.

Richard P. Roberts, yclept "Shorty," has the fever, and Bold Harry Aeroite, all dolled up with a new set of harness, will be entered for the free-for-all. Bold Harry's underpinning seems to be much stronger, and, with the watchful care of Al Schwartz, ought to be well out in front when the eventful day comes to hand.

The Ryan brothers—Jimmy and Tom—always have a good-sized stable close to the Park. Pegasus, that was a trotter in 1917, and Directress Mac are the pacers in the Jimmy Ryan family, while he also will have entered Frisco Boy, Miss San Francisco and Sky Rocket.

Tom Ryan will hold the reins over Raisin Express.

Silver Logan, owned by T. Healey, is being sent around the track in some good miles, and George Machado is conditioning a green trotter that looks to be promising stock.

Secretary Bill Kenny will have the old reliable, W. J. K., while S. H. Cowell has promised Melrose.

Charlie Silva is to send down two horses from Sacramento for the June 1 races, and Oakland will likely be represented as well.

The club stables just across from the track are packed.

Notes and News

J. M. Thompson will train horses for Page J. Thibodeaux of Chicago at Aurora.

The Pacific Coast pacer Captain Mack 2:05, now owned by Fred Cline, of Indianapolis, is reported lame.

Zomrect 2:03¾, a great disappointment for two seasons past, is working nicely and may yet make good.

It has been officially decided that a Liberty Bond is "money." When horses race for them they get records.

Oniska, dam of San Francisco 2:07¾, has a bay colt at foot by Manrico, 3 2:07¼, at Walnut Hall Farm.

Miss Harris M., 1:58¾. Single G. 1:59½. Russell Boy 2:00¼, Verlie Patchen 2:02¼, and Lee Grand 2:03¼, will meet in the feature event at the Canton, Ohio, meeting the week of June 16 to 19.

Mr. T. D. Sexton's filly Vina McKinney (2) 2:19¼ is in fine shape and has worked a mile in 2:27¼. She is entered in the three-year-old stakes for this year and is a promising candidate.

G. E. Stickle of Lockeford is breeding five good mares this year to Royal McKinney. One by Dadalion, two by Sidney Dillon and one by Iran Alton. And another one, dam of a three-year-old whose colt will be heard from in the stakes this year.

Mr. H. C. Ahlers has added to his string of show horses and matinee stars the handsome pacer San Jacinto by George W. McKinney dam Dot by Del Norte with a record of 2:05¼ over a mile track and 2:08¾ over a half-mile track. Mr. Ahlers is an enthusiastic horseman and a good judge of horse flesh.

Peter McKlyo 2:06 was sold at the Chicago Horse Sale to J. J. O'Brien & Son of Chicago for $975. The four-year-old pacer Darvester 2:11½ by Harvester brought the top price at the Sale being knocked down to Riley Macey for $3450. Dan Logan 2:07¼ brought only $130. He would have brought more had there not been a suspension claim of over $800 against him.

The San Francisco Driving Club opens the season by giving Matinee Races at the Stadium on July 1st. Among the members of the club are a number of enthusiastic amateur reinsmen who are preparing their horses for contests for trophies and it is reported that there are more horses in training for the Driving Club races in San Francisco than there were last year.

Oakland Baron 2:09¼, by Baron Wilkes, the premier stallion at the Hudson River Stock Farm at Poughkeepsie, New York, died the last week in April, in his twenty-seventh year. He sired the Kentucky Stake winner Lady Gail Hamilton 2:06¼, Rythmic 2:06¾, winner of the M. & M., the sterling race trotter Baron de Shay 2:08½ and Baron Atta, pacer, 2:06. Oakland Baron was one of the fastest trotters of his age, being capable of trotting a quarter in 30 seconds or better. At two years old he trotted a half in 1:02½.

Dr. Delano left for the eastern Grand Circuit on May 11th with Charles F. Silva's horses where they will be raced this season. Under the direction of Dr. Delano the horses have been in training at the Sacramento track this winter and from the showing they have made in their work Mr. Silva is justified in expecting that they will do well in the best company. Bondaline 2:06 and Little Jack 2:17¼ look pretty good for the faster class while By Pass and Dixon Boy are good prospects in slower company. Charles F. Silva announces that he has refused an offer of $15,000 for his bay gelding Little Jack by Teddy Bear.

In several cases that came before the Board of Review of the National Trotting Association held the first part of this month in New York it was decided that a Liberty Bond as a prize given winners in amateur races is equivalent to money and that the time made by winners in such races would constitute a record. It was ordered that the parties who received such Liberty Bonds shall return them to the Driving Clubs and that the clubs shall purchase and deliver in lieu of the bonds suitable trophies of equal value and that records shall stand until verified proof of such delivery shall be made to the Secretary of the National Trotting Association.

C. Boyd of Long Beach has a two-year-old trotter that he calls King May Day by King Lilly Pointer that he is working on the Los Angeles track. This youngster has worked a mile in 2:23½, the last quarter in 34 seconds with less than six weeks training.

The attendance at Lexington on regular days was wonderful. Just imagine a town the size of Stockton or Fresno turning out an average of 10,000 persons to see the races each afternoon. The interest throughout the east in horse racing this season is great and within the last year the popularity has more than doubled.

The tractor interests are spending millions in advertising and horse interests are suffering because of this great propaganda but no proposition can eventually win out in American agriculture that is not economically sound. To substitute tractors for any considerable proportion of the horses on American farms is not a sound economic policy and in the end can only react on the farmers who are misled.

OREGON HORSES

Fifty years have elapsed since the first 2:30 trotter was foaled in Oregon and sixty since the state was admitted to the Union. When the New England pioneers appeared in the territory, after Marcus Whitman made his winter ride across the continent to convince President Tyler that the northern boundary of the territory from which Washington and Idaho were subsequently set off should be the forty-ninth parellel instead of the north bank of the Columbia River, they brought a few Morgan stallions with them. Of these the names of Vermont and Oregon Pathfinder have found a place in turf history. They were mated with the native stock, of which there was an ample supply even in 1805, when Lewis and Clark after locating the head waters of the Missouri followed the course of the Columbia to the Pacific.

Vermont got several trotters in Oregon, Ella Lewis 2:27, being the first. She was foaled in 1869 and did most of her racing in California, where she afterwards produced the pacer Saladin 2:05¾. Mike, a son of Vermont, was also the first sire of a 2:30 performer foaled in the state. He got the trotter Barney that made a wagon record of 2:25¼ at Oakland, Cal., in 1878, while he also sired the Gridley Mare, which when mated with Ophir, a son of Shenandoah, produced Bob, the dam of Klamath 2:07½, the fastest trotter bred in Oregon. Klamath was got by Morookus, a son of Altamont. Raymond raced him on the eastern tracks in 1895, when out of sixteen races he won eight firsts, six seconds, and two thirds from such horses as Hamlin's Nightingale, Kentucky Union, Jack, Lesa Wilkes, and William Penn. Klamath also appeared again in 1896 but after winning at Cleveland and making his record at Columbus, he trained off.

Vermont was bred in the state after which he was named, and arrived in Oregon by way of San Francisco, while Oregon Pathfinder was a New Hampshire product and got a few trotters before Pat Smith took him across the continent. He was by Morrill, the grandsire of Fearnaught, and left considerable good stock in the territory, where for a time he divided the honors with Milliman's Bellfounder. The latter was foaled in Washington County, New York, in 1850 and was well along in years when he was taken to Walla Walla, where he died in 1877. He was got by American Bellfounder, a son of the Morse Horse. Maine also contributed Champion Knox by Bismarck, a son of General Knox. He was foaled in 1873 and died at Baker City in 1879, a short time after he made a record of 2:31 at Boise. This horse sired Mount Vernon 2:26, and Blacksmith 2:30, both of which were foaled in 1878.

In 1876 trotting meetings were held at Portland and Salem. They were followed by Baker and Union City. At the same time the Menelaus colt Hambletonian Mambrino, which was purchased in Chicago in 1874 as a weanling, was located at Portland, while John Redmond made a trip to Orange County, New York, where he purchased Kisbar, the only son of Hambletonion taken to Oregon, and Prince Duroc from Charles Backman at Stony Ford, and Rockwood from E. S. Edsall of Goshen. Kisbar died in 1891, the year after he made his record of 2:27¾ at Portland. He left a few foals and while his traveling companions did not get very much racing material, they sired a number of mares that produced useful horses when mated with Hambletonian Mambrino, Altamont, and Hal B.

Hambletonian Mambrino, when his surroundings are considered, proved a fair sire of speed, Carlyle Carne 2:11½, being his fastest performer. Altamont, however, was a leader and while he stood at Vancouver in Washington, only the Columbia River separated him from Oregon, where the best of his get were either bred or owned. Like all the Almont sons, he sired a number of pacers of which Chehalis 2:04¼, Del Norte 2:08, Ella T. 2:08¼, and Doc Sperry 2:09, were the fastest, while of his trotters, Altao 2:09¾, and Alameda 2:09¼, took the word at Grand Circuit meetings.

Altamont prepared the way for Hal B, who was owned in Oregon for twelve years, during which he got Hal Boy 2:01, the fastest light harness performer bred in the state, as well as Lady Hal 2:04, Oregon Hal 2:04¾, Haltamount 2:05¼, Hal Edo 2:06½, Hal Paxton 2:07½, Gray Ghost 2:07½, Hal Gray 2:08, and a host of others.

While Altamont and Hal B in their day dominated the horse world in Oregon, there were several others that were represented at the races, the list including Prince Lovelace, Laddis Boy, Bonaday, Holmdel, and several sons of Altamont, as well as Zombro, who got The Zoo 2:09, Miss Jerusha 2:08¼, Zombronut 2:08½, Bellemont 2:09¼, as well as the dams of Bertie Seattle 2:08½, and Captain Apperson 2:08½, and The Bondsman who got Captain Mack 2:05. All located in the state.

W. H. GOCHER.

ZOMRECT, THE RANGE HORSE

Zomrect is the fastest range horse that has ever appeared on the turf. He was bred in Southern California, being foaled in 1910, and run out on the range with a band of horses in which there were a number of stallions until he was four years old. During that period he had many a battle with his mates. While he has a number of scars to show for the kicks and bites which he received, he arrived at maturity sound and when broken to harness trained on to a record of 2:03¾.

This fast horse was got by Zombro, the son of McKinney that sired San Francisco, while his dam Lilly S. was by the "little black rascal" Direct, the horse that reduced the high wheel sulky record for pacers to 2:06 where it is very apt to remain for all time. His second dam Lilly Stanley had a trotting record of 2:17¾ and appears in the turf records as the dam of Rokeby 2:13¾, Rect 2:16½, and On Stanley 2:17½.

Zomrect made his first appearance on the turf in the fall of 1915 when he made a time record of 2:12¾ at Los Angeles. This with the range horse story caused considerable attention to be paid to him the following year when he appeared at the Cleveland August meeting as a member of Alonzo McDonald's stable. Zomrect also made his first start in a race at that meeting, being unplaced in the event won by Allie Watts. He acted rather green in that race as well as in the next three which were trotted at Poughkeepsie, Hartford and Syracuse and won respectively by Allie Watts, Pittsburgh, and Brescia. By that time, however, Zomrect began to know what was wanted of him and in his second race at Syracuse, McDonald won with him cleverly in 2:09¼ from Dos Palos and Notice B. Two more victories were placed to his credit at the Columbus fall meeting, in one of which he reduced his record to 2:06¼. Lexington was the next stop and it was the scene of the best race of his career when he defeated a field of nine, including Lu Princeton, Brescia, Brisac, Grand Chimes and The Toddler in 2:05¼. This, however, was not the limit of his speed as the following week McDonald gave him a time record of 2:03¼ and in so doing deprived Ryland T. of the honor of being the fastest range bred trotter.

The winrace that Zomrect acquired at Lexington cut him out of all the engagements in the early closing events in 1917, when 2:07 was the limit for those purses. This forced him into the free for alls with St. Frisco and Mabel Trask and as they had three or four seconds more racing speed at their command he did not make a very good showing during the season. McDonald kept him going, however, and at the Cleveland summer meeting finished second to St. Frisco in the fast event. He was also raced last year but failed to come up to his true form.

FAST ONES EXPORTED

The Fasig-Tipton Company exported to English and Scottish destinations on May 3rd the following horses:

For A. H. Merrill, Danvers, Mass., for parties in Scotland: Carolyn M., p. 2:07¼, b m, by Lock Logan 2:07¼, dam Trilby Maid 2:18½, by Black Ralph Jr.; Jack Mooney, 3, 2:12¼, b g, by J. Malcolm Forbes, 4, 2:08, dam Mary Ray, by Jay McGregor 2:07¼; Strivefast, green stallion by Trampfast, 2, 2:12¼, dam Ellen Houser (producer), by Truman 2:12. For Vance Nuckols, Cleveland, O., to Adam Machattie, the fast pacing mare Kate McKinney 2:04½, by Wallace McKinney.

On the same boat were also shipped by Alex Gemmell, of England, the trotting gelding Toddy S., 3, 2:12½, by Henry Setzer, 4, 2:10¾, dam the great brood mare Nowaday, 3, 2:14¼; and Henrietta Guy, 2, 2:27¾, b f, 3, by Guy Axworthy, 4, 2:08¾, dam Lady Henrietta, 3, 2:21¾, by Peter O'Donna 2:08. Mr. Gemmell, who was formerly connected with hackneys, is now a trotting enthusiast, and considers these two, particularly Henrietta Guy, to be of the very highest type of horse flesh he ever saw, not even excepting such a noted thoroughbred as Pretty Polly. After disposing of them he will return to this country next fall and attend the big sales with a view of buying more like them.

On the same boat also went a bunch of polo ponies purchased in this country for Lord Northcliffe and other parties abroad.

The resumption of exporting trotters to Europe, after a let-up of nearly five years, closely follows the shipment of Truxton, 3, 2:08, Sandorra, 2, 2:24½, and Salinas, 2, 2:24½, to Denmark last month.

THE FLAGMAN

By W. H. Gocher

Nobody loves the flagman. He is the trade mark of defeat. The swish of his little red flag has blasted many a hope and put a big black spot on the career of what looked like a good horse until he made a mistake or got the worst of a hub rubbing affair at a point where the judges could not see who was to blame.

Every afternoon during a race meeting the flagman stands at his dusty station on the stretch ready to put a crimp in the joy of a few who thought they had a winner only to find after the word was given that their selection was either shy of speed or racing manners, both of which are always fatal on a race track. To them the flutter of the bit of red bunting rings down the curtain on what at one time looked like an enjoyable afternoon.

At all up to date race meetings, the flagman is a necessary evil. They come in all kinds of attire from a dapper old gentleman in a red vest and creased pantaloons, who apologizes whenever he is compelled to send a horse to the barn, to an ex-groom with a brand of conversation that is a cross between a few pages from the Year Book and a handful of tales from the Arabian nights.

The flagman's position is not a very interesting one, still there are a few people who make a bid for it. To them the manoeuvering of the drivers and horses when scoring has a fascination, while they never forget the crisp conversation that is used when a driver finds that an outsider has slipped into his position, or when the horses in the front tier rush off before the trailers have turned.

In racing, the flagman acts on the reverse. He is not expected to pay any attention to the leaders which supply all of the thrills for the spectators and quick work in the judges' stand when they are finishing heads apart. The tail enders are his prey. As the field spreads out on the second trip up the back stretch on a half-mile track or approaches the three-quarters on the larger ovals, those who begin to fall back make the cogs move under his hat.

The leaders flash by without a glance from the flagman. He is not interested in clever driving, whipping or shooing. His eyes are on the poor devils in the dust with an odd glance at the judges' stand for his signal. When it comes, the flagman is busy for a few moments, making mental memorandums of the numbers worn by the horses whose heads failed to reach him before he dropped the flag. Accuracy is a very important item with the flagman, as his report is always disputed by the friends of the faltering favorite. There are also days when a driver sweeps by with the remark "Ten in it for you if I am in," and some of them fall for it.

In due time the flagman plods to the judges' stand and makes his report. There are days when his portion of the announcement is awaited with more interest than the name of the heat winner, one of them being at Lexington in 1913 when Don Chenault after winning the first heat of the Kentucky Futurity in 2:05¼ made a series of breaks on the next trip and caught the flag, and another in the same race in 1917 when a bump at the three-quarters put Miss Bertha Dillon out of it. There was another of a very different character at Detroit in 1887 when Lowland Girl after winning the first heat was laid up to the long distance in the second, her driver overlooking the fact that it was changed on account of Gean Smith being distanced. This was the race that Domestic won, after the judges took a hand in the proceedings, and the one that closed his career.

In the series of races for the Charter Oak Purse, the flagman caught three favorites. Kenilworth was the first. He went down in the seventh heat of the event that Joe Davis won in 1885. Guy dropped out in 1888, Spofford's year, when he refused to strike a trot while scoring for the first heat. Sadie Mac was the third, her winning career being terminated when she dropped dead in 1905.

Bert Herr, the bouncing brother of Charley Herr, was the champion flag collector of the turf, the range bred trotter Ryland T. being a close second until Scott McCoy took him in hand. With Ryland T., however, it was not a question of him being out but how far he was out. His stand still breaks were never equalled except by the white pacer Argyle which Bob Anderson found in the sunny south. On race day nearly everyone was disappointed when this pair did not make a break but a thrill of a very different kind flashed through the spectators at Chicago in 1893 when Hulda stubbed her toe in the fourth heat of the $15,000 free-for-all. She was carrying a ton of money. In the first heat, Hickok drove for a position, letting Alix and Pixley fight it out. The next two were easy for Hulda. The jar came in the fourth when she pulled up lame near the half. The flagman caught her, and when her backers shifted to Pixley as a forlorn hope, they selected another loser, Alix winning after three days racing.

Ralph Wilkes was another favorite that pulled down his house of cards. He developed temper while scoring for the first heat of the Transylvania in 1894. Up to that time the race looked like a gift for him as he had won the Charter Oak Purse without being extended. Tommy Britton, however, caught him with his little red flag and Andy McDowell won with Azote.

THREE CHEERS FOR THE NORTH PACIFIC

I am just in receipt of a copy of Rural Spirit of Portland and also a copy of the Breeder and Sportsman, San Francisco, in both papers I read the announcement of the North Pacific Circuit and I am sure that harness horsemen all over the Pacific Coast and the Southwest will join me in saying,—Hurrah! for the North Pacific Circuit!

As it stands today the circuit opens at Centralia, Washington, on August 19th with a well balanced program of four days' racing. Centralia has one of the fastest, safest and best race tracks in the world. George Walker is one of the Secretaries who at all times accord every horseman a square deal and a pleasant word. His associate, Robert Sommerville, superintendent of the racing department is one of the best men on his job I have ever met, and horsemen coming to Centralia will find clean, comfortable stables, good water, electric lights and hay, straw and oats on hand and sold on a reasonable market basis, and also expressmen who won't rob the horseman. Bob Sommerville is a live wire, a man who knows his subject and it not afraid to enforce what's right for horsemen.

From Centralia to Elma is just a few hours run either by rail or over the highway. At Elma the horseman will find C. H. Palmer and associates on hand and all preparations made, stalls ready, feed ready and Palmer and his party are big men—not only in stature, but in ways—big as the big trees of Grays Harbor. Those lumbermen at Elma are a whole-souled bunch and the program of four days is a well balanced one. Palmer and party pay 100 per cent in money and good treatment.

After Elma the jump is to Vancouver, B. C., via Great Northern Railroad, and I can truthfully say that the Vancouver Association is composed of men whose hearts are in the welfare of harness racing. These men have stuck by the game in good times and bad and never once flunked on a payment. The Vancouver program is a good one, and I know that Messrs. Rolston, Knowlton, Brown and Alex Miller will have everything in apple-pie order for the reception of horsemen.

From Vancouver the horsemen have the choice of going to Washington State Fair at North Yakima, or to the Multnomah County Fair at Gresham, Oregon. Yakima is an all rail trip, no change of cars. The Washington State Fair is presided over by one of the best, most conscientious and accommodating secretaries in America, Frank Meredith. Big Frank will have the stalls all ready and fully equipped and everything in order. Honest feed men and draymen on hand and I know that no horseman has ever had a just kick on Mr. Meredith's treatment. The Meredith program is a good one and Yakima is a nice city so I am sure more than sure that horsemen will come in and go away from Frank Meredith's meeting satisfied. Mr. Meredith tries to, and does, do things just right.

Gresham, Oregon, is only a few miles from Portland, and while not big in population, the way C. D. Minton will treat visiting horsemen will make you all think you are at a Grand Circuit meeting. You will find stalls clean and ready, straw, hay and feed on hand for sale at most reasonable prices, good eating places for yourself and your men. When you look at the program you must say, "'Tis a good one." And you will say when you are leaving Gresham that you were never given better care and treatment at any race track in America than you received at Gresham.

After Gresham you drop over to Salem, Oregon, a fifty mile trip. This meeting will be a great affair. Oregon always gives a great fair and good purses and, I can say with pleasure that no man in America is trying harder to help the harness horse interests than is A. H. Lea. Mr. Lea is the bast all around man for the game that I have yet seen. He is always on the job, gives every horseman his individual attention, will have every stall clean and ready, always keeps a good track, always has a smile and a kindly word—not only for the winners, but also for the losers—and the Oregon State Fair has never yet failed the harness horse men. I wish I knew a million secretaries just as good as A. H. Lea of Salem.

Well, where do we go from Salem? Perhaps over to Eugene, about forty miles south and on the O. W. R. & N. This beautiful city always gives a good meeting and a good program of four days' duration. This meeting will be well managed by men who have at all times stood by the harness horse sport.

From Eugene? I can't say, but off-hand I will say, Medford, Oregon. Then to Marysville, California, then to Ventura, Riverside, Los Angeles, San Bernardino and then the grand finish at Phoenix, Arizona.

I could say—and it can be done—that San Jose, Salinas, Bakersfield, Santa Rosa, Marysville, Eureka, Oakland and Dixon could give an early circuit. It don't look hard to me, providing the men of those places who are interested in race track properties will yet busy and put some real jazz into the proposition. It can be made pay in each and every place. Street carnivals and other affairs are made pay because the merchants and bankers get behind and boost. The automobile and the good roads now bring out the people and any well advertised and well managed race meeting can and will pay the promoters and will pay the merchants and banks handsomely on the money and labor put into the meeting.

Get busy, old timers, get busy today and your town or city can give a paying race meeting!

C. A. HARRISON.

RACING AT HAWAII'S ANNUAL FAIR

(By Robert Horner, Chairman Racing Committee)

One of the big attractions of Hawaii's Territorial Fair this year will be a race meet of about thirty events, covering every day of the exposition, from June 9 to 14, inclusive. Purses will aggregate $6000 or more. Entrance fees are to be ten per cent of the purse, and where there are more than four entries in the main events, provision will be made for second prizes.

June 11, occurring about the middle of Fair week, is a great holiday in Hawaii, known as Kamehameha Day, and is considered the day of all days for horse races. It is estimated that, including Island and Mainland visitors, 200,000 admissions will be sold during the six days. Several horses will be entered by Mainland owners, who will, following the Territorial Fair at Honolulu, enter their animals in races to occur on Maui Island on July 4, and in September. Some livestock, including horses, is to be sent down from the Coast for exhibition purposes and sale.

John O'Rourke, for many years one of Hawaii's leading horsemen, at present visiting California, is sending down four runners, together with three horses (two pacers and a big stud), for R. S. Irvine, owner of Lanark Park. Mr. Irvine is also sending down a driver.

Mr. Irvine writes the Hawaii Fair Commission to this effect: "From newspaper clippings, and letters on the subject, together with what Mr. O'Rourke has to tell me, it seems to me that you are going to pull off something creditable in the way of racing at the second Territorial Fair. I am interested in horses of every description, and have decided to take this opportunity to show the people of Honolulu just what kind of stock we raise in Lanark Park."

Island entries in the June races will make a good showing. Animals from the five principal islands will compete on the Honolulu race track, and, with horses brought from the Continent, the meet promises well. It is expected that this year's track events will result in numerous importations by island horsemen, and that next year there will be considerably more entries from the mainland.

The June program, divided among the six days of the Fair, includes the following events:

Four-furlong free for all—$450; six-furlongs free for all — $300; three-furlong, Hawaiian-bred two-year-olds—$150; four-furlong, Hawaiian-bred, free for all — $150 polo pony, free for all—$50; trotting and pacing, best three in five—$1000; four-furlong, officers and gentlemen—$50; one mile, free for all, running, with $150 added if track record is broken—$750; four-furlong mule race, gentlemen—$50; one mile, four-foot hurdle, free for all—$150; individual high jump, free for all—$50; six-furlong, free for all—$300;—seven-furlong running free for all —$300; six-furlong, Hawaiian-bred; free for all — $200; 2:15 class, trot or pace—$500; one-and-one quarter mile, running, free for all—$500; six-furlong, running, free for all—$400; consolation race; and a ladies' half-mile, and polo races, for cups. Other events will probably be added.

A COLORADO FARMER'S EXPERIENCE

The demand for horses here this spring has been better than for sometime: I sold one team of grade mares for $600 and one for $575 and could have sold more teams if I had had them.

I cannot see how anyone who is a real farmer can figure that he can make more money farming with tractors than with horses if he keeps any set of books at all. Anyone who will play the game right with a good set of brood mares and a stallion can not help but derive an income from this source of power instead of an expense.

I have sold between seven and eight thousand dollar's worth of horses in the ten years I have been farming, all of which have been my own raising from just enough mares to take care of my regular farm work. The average number has been from four to eight head besides a stallion. I have never had a surplus at any time except in young stuff which was growing into money every day. The herd of horses I have at present overbalances the herd I started with for more than what I have paid out for new stock. Figuring on this basis my horses have returned me, for the ten years I have been farming, a net income of seven to eight hundred dollars per year, if the work which they did paid their feed bill and I don't believe even a tractor salesman could deny that. Instead of having to figure depreciation on my power I figure appreciation. I now have five full blooded Percheron mares and a stallion, some of the best Southeastern Iowa could produce, and expect my yearly income from horses to be more than doubled in a few years.

A number of farmers through this section are commencing to use tractors with the idea that they can finish their work sooner, but my work is done as soon as theirs, and I cash one to two teams of horses every spring, while all they have to cash is some old scrap iron.

I am not presumptuous enough to advise anyone but I would like to say to all true lovers of horses, sit tight for the next three years, raising as many colts as you can conveniently handle, and you will be selling teams to every tractor owner in the good old U. S. A.

L. F. BEIN,
Berthoud, Colo.

September 15 to September 27 (12 days). Oral.
Metropolitan Jockey Club, Jamaica, L. I.:
September 29 to October 11 (12 days). Oral.
Empire City Racing Association, Yonkers, N. Y.:
October 13 to October 25 (12 days). Oral.

ROYCE ROOLS SELLS FOR $11,500

A large crowd attended the dispersal sale of the horses of T. M. Cross, which was held in the paddock at Jamaica, Saturday, May 17, before the races. When the star of the sale, Royce Rools, was offered, it became evident the good horses would bring good prices. The first bid of $4000 was rapidly topped and spirited bidding, in which R. L. Bresler, John McKee and C. J. Fitz Gerald participated, saw the Salvation gelding advanced to $11,500, at which figure auctioneer Frank Bain's hammer fell and Mr. Fitz Gerald became the nominal purchaser. It was later announced that he had acted for A. K. Macomber and Royce Rools, the conqueror of Westy Hogan, Omar Khayyam and other good handicap horses, would go under Walter Jennings' care. Mr. Macomber's action proved highly popular among enthusiasts, who accepted it as an indication of a renewal of the interest which waned during his war activities last season. Kalitan, the Preakness winner of 1917, went to R. A. Smith, acting for the Woodland Stock Farm, after a bidding contest with Dr. R. H. McCarter Potter, former master of the Pequest Stud. Krewer, the good imported two-year-old winner, B. Davis fortunately secured for $3000. The prices for all were as follows:

Royce Rools, b. g, 4, by Salvation—Saintolat; A. K. Macomber	$11,500
Krewer, b. c, 2, by Alford-Keadean II.; B. Davis	3,500
Kalitan, b. h, 5, by Rey Hindoo—Dally; Woodland Stock Farm	3,500
Romany, blk. c, 2, by Ecouen—May Dora; R. H. McCarter Potter	3,000
Orleans Girl, br. f, 2, by Jack Atkin—Lady Installator; W. M. Congdon	1,000
Lucius, ch. h, 5, by Isidor—Roxane; M. F. Bonner	650
Cain Spring, b. g, 3, by Zeus—Boneda; G. Watkinson	100
Titanium, b. c, 2, Radium—Philistia; P. S. P. Randolph	850
Diomedes, ch. c, 2, by Voter—Fille de Guerre; T. O. Webber	350
Dominican, ch. c, 2, by Predicator—Love Apple; C. B. Williams	300

ALIEN HORSES BARRED

Following the action of the Belgian Jockey Club, it is proposed to bar alien enemy horses from the British turf. This is supplemented by an intimation to the keeper of the Stud Book, the famous old firm of Messrs. Weatherby, that any statements from Germany as to pedigrees will require special scrutiny and suspicion. The rule, as brought in by Lord Jersey at the annual meeting of the Jockey Club, reads as follows:

"That it be an instruction to the registry office that until further notice no entries for races under Jockey Club rules be accepted for horses the property of any persons being German, Austrian, Hungarian, Bulgarian or Turkish subjects, or in which such persons have any interest whatsoever. Also, that should any application for admission to the Stud Book of horses the property of such persons, or bred up or imported from those countries be received by Messrs. Weatherby & Son, they be requested to give special consideration to the circumstances under which horses have been stolen from Belgian owners and the doubt which must prevail as to the genuineness of any certificates received from Germany."

ENVIRONMENT AND HEREDITY

In an address delivered before the recent annual meeting of the American Genetic Association, the president, David Fairchild, said concerning the great subject of heredity and its relation to human welfare:

"Our propaganda should be against the almost universal fallacy which pervades society everywhere that acquired characters are somehow and in some mysterious way inherited. The non-inheritance of acquired characters is a well-established theory, but the general public does not know it. Through the educational propaganda, through the charitable propaganda, through the sporting propaganda, through the medical propaganda there runs everywhere the unspoken assumption that, given a good environment, any child is as likely to be great as any other, and everywhere we find people who are searching for all the causes of crime and degeneracy in the environment. The wayward son of the preacher, the deaf from childhood, the small sized boys of small parents who 'never got enough to eat when they were young,' the effect of hats as causes of baldness, the causes of longevity, and a host of others are now 'explained' by those who do not know. Millions of dollars are expended every year upon palliative remedies with the firm conviction of the givers that they are curative measures, whereas they end with the generation they assist."

The "sporting" propaganda" to which Mr. Fairchild alludes is based on the records of horse racing and breeding, as found in the turf guides and the stud books for trotters and runners, and concerns the propagation of winners. There is, perhaps, no other mass of statistics in existence from which scientists can so safely deduce the laws of inheritance as from the pedigrees and public records found in the stud books and turf guides of thoroughbreds, trotters and pacers. The speed capacity of more than a quarter of a million horses of known ancestry is there recorded, as authentically measured by the timing watch at the standard distance of one mile, and when analyzed these performances and pedigrees throw a veritable searchlight on the laws governing transmission of both physical and psychical characteristics of parents to their offspring.

The interesting question as to whether the environment of the parent influences the offspring, and acquired characteristics are inherited, or, in other words, whether speed laboriously taught, as distinguished from "speed that is born with the foal" can be transmitted, is almost as old as the speed lists of the thoroughbreds and harness turf.

And though the better opinion among breeders and students is in accord with Mr. Fairchild's views, there are now and always have been many horsemen who firmly believe that by developing the speed of the sire and dam you materially improve your chance of winning the Futurity with the colt.

A superficial view of the statistics of harness racing or running racing certainly seems to confirm this theory, for the percentage of great trotters and runners whose parents were winners before them is conspicuously large and constantly increasing. The real question is, of course, whether these great trotters and runners would not have been just as great if their sires and dams had never been trained. A public record demonstrates that the sire of the dam possesses the speed which the breeder is seeking to obtain in the foal, and thus is a valuable guide, but does the training create the speed, or does it merely reveal the fact that the sought-for characteristic is there, and would it not be transmitted just the same if it remained undeveloped. The verdict of horsemen and scientists is that it would—New York Herald.

FLYING CHILDERS AND A MILE A MINUTE

"Antisthenes" in the "New Zealand Referee" says: "A very old sporting friend takes me to task for my 'easy assumption,' as he says, that Flying Childers did not perform the marvelous feats popularly attributed to him, and produces as evidence for my discomfiture an extract from 'Portraits of Celebrated Racehorses,' 'together with their respective pedigrees and performances,' compiled by T. H. Taunton, M. A., and published in four handsome volumes no longer ago than 1887. It has been my privilege to look over the 'portraits' in the Parliamentary Library, where they recline year after year unheeded by our legislators, and they seem to me veritable triumphs of the printer's and engraver's arts. But I have never heard Mr. Taunton quoted as an authority on the history of the turf, and he tells us nothing of the nature of his researches into the traditions concerning Flying Childers. However, my friend is entitled to the publication of his evidence, which, by the way, will not be unfamiliar to some of the readers of 'The Referee,' it having been common gossip for a century or more. 'In his race with Almanzor and Brown Betty,' it runs, 'he was said to have moved 82½ feet in a second of time, which is close on to a mile a minute. He also covered the Beacon Course (4 miles 1 furlong and 128 yards, afterwards increased to 142 yards) in 7 minutes and 30 seconds, covering 25 feet at every bound. He is allowed to have been the fleetest horse that has ever appeared in the world.' 'Eighty-two and a half feet in a second' is impressive, but in the preceding page in 'Portraits' my friend will find a statement in which the time for the trial with Almanzor and Brown Betty is given as 6 min. 40 sec. This works out at 49.8 feet a second, equal, roughly, to a mile in 1 min. 40 sec., a tremendous pace to maintain over such a course, but not as a rate of speed up to a mile or even a mile and a half without a parallel in these later days. Desert Gold's record for a mile, 1 min. 37 3-5 sec., is a fraction better than 54 feet a second, and Poitrel's record for a mile and a half, 2 min. 31 sec., a shade better than 52 feet in a second. Several winners of the New Zealand Cup have galloped the two-mile course at an average speed of 51 feet in a second, and Warstep's record for the distance, 3 min. 24 sec., made at Trentham, is equal to 51.75 feet in a second. The marvel of the feats attributed to Flying Childers lies in the distance he covered, but I have seen one or two of the survivors of the watches that were used two hundred years ago, and they have left me with some doubt as to the reliability of their kind. It will be noticed that all Flying Childers's performances were done in even tens, which leads one to suspect there was a good deal of approximation about the times."

MORE HORSE SHOW FOR CALIFORNIA

Mr. A. W. Davis, formerly manager of the Horse Show Department of the Rockingham Fair, N. H., which under his direction has always been a successful and popular society event has come to California to live and will make his home in Los Angeles. Mr. Davis is a wealthy enthusiast, an excellent judge, connoisseur and lover of fine horses. He was a friend of the late William F. Whittier who owned the Hemet Stock Farm and who was also an enthusiastic breeder and admirer of horses. Mr. Davis feels certain that with the farsightedness of the Linnard hotel people and the big business men of the state that with the greatly increased tourist travel on the Pacific Coast, there is a big field in California for about four great Horse Shows every spring if they were conducted on a broad basis and did not degenerate in merely mutual admiration society affairs. A good start would be for some of the millionaires on this coast who are horsemen to get together and with several stables of show horses like Tom Lawson's or Jordan's such men would at once get other people to buy show horses and have out of town judges that would judge the classes on their merits of the horses and not on the size of the bank accounts of the local exhibitors. Start the Horse Show Circuit with San Francisco then to Santa Barbara, Los Angeles and Pasadena. Four shows would make it an object for the stables to show at all of the places. The gate receipts would be something tremendous and three-quarters of the trophies would be obtained as a contribution from local people whose business would be benefited and whose civic pride would be appealed to to beat the other towns. Cash prizes could be given sufficiently large to insure a big entry list. A project of this kind under the patronage of such men as A. K. Macomber, H. K. Devereux, C. K. G. Billings, J. H. Rosseter, A. B. Spreckles, C. W. Clark, R. L. English, T. L. Johnson, George Wingfield, Edward Cebrian, A. J. Molera and many others would be an assured success and a great benefit to the state and horse breeding interests.

A. W. COX DIES

A. W. Cox, the well-known owner of race horses, died in London, England, Monday, May 5. He was a rich man, having a large interest in Australian mines, of which he became possessed in a romantic way. The story has it that, playing heavily at cards, an opponent put up a number of shares in a now-celebrated mine against a sum of money named by Mr. Cox, and the latter winning, he became owner of a prolific source of income.

It was under the assumed name of "Mr. Fairie" that A. W. Cox gained fame on the turf as the owner of Aleppo, Bayardo, Lemberg, Eager, Galeottia, Gay Crusader, My Dear and other well-known race horses. His first start was made in 1887, under his own name, with, for colors, "orange and white hoops, orange cap," but in the following year, when he registered his assumed name, he altered his colors to "white, orange sleeves and cap."

Mr. Cox has thus figured in English turf annals some thirty-three years. During his racing career he had won seven classics as follows:

Galeottia—One Thousand Guineas of.....1895
Bayardo—St. Leger of 1909
Lemberg—Derby of 1910
Gay Crusader—Two Thousand Guineas, Derby and St. Leger of 1917
My Dear—The Oaks of.....1918

Since 1887 the Fairie-Cox stable has taken the enormous sum of $919,666 in turf prizes. In 1887, his first year, Mr. Cox's horses won nothing, neither did they in 1892, 1893, 1904 and 1915.

The growing popularity of racing, as is being strikingly illustrated at Churchill Downs, where the crowds in daily attendance surpass all previous records, has brought to the attention of general manager Winn and his associates in the Kentucky Jockey Club the fact that Churchill Downs is no longer large enough to accommodate the growing patronage. This phase is already giving manager Winn concern, and while no concrete plans have been formulated it is more than likely that before long the problem will be gone into fully.

THE HORSE SHOW AT SANTA BARBARA

(C. B. Irvine, Special Correspondent)

Santa Barbara's first annual horse show came to a close Saturday afternoon with a thrill that brought the thousand lookers-on to their feet when Charles W. Dabney's trio of polo ponies that won the championship were delcared by the judges to be without doubt a peer if not the superior of any similar group in America. As put through their paces by Charles W. Dabney, Jr., a youth who has barely reached his majority, these animals displayed form, speed and headiness the like of which has seldom, if ever, been seen in an exhibition ring.

"Murphy," seven-year-old chestnut gelding, was pronounced the champion polo pony of the Dabney string and show. His performance was nothing if not sensational. Young Dabney's fearless riding was the outstanding feature of the show's horsemanship and won him round after round of unstinted applause. Frank Snowenberg, Major Max Fleischman and H. Vanden Heuvel also gave excellent riding exhibitions on their respective mounts, which will cause this horse show to linger long in the minds of those who attended it.

In addition to Murphy, the Dabney trio included Dixie and Daisy, the three being perfectly matched chestnut ponies that look as like as three peas in a pod. Were they for sale, their owner might ask almost any price of five figures and a dozen horsemen in The Belvedere ring would have written their checks for it on the instant. But the Dabneys do not intend to part with their treasures; as they want to use them in promoting polo in Santa Barbara.

The saddle horse class for animals over 15 2 brought out a score of fine entries. It required many different tests to enable the judges to apportion the first three honors. In the end Mavis, was given the blue ribbon, thereby vindicating her former adjudgment as champion Kentucky saddle mare of the Pacific Coast, conferred at the San Francisco Exposition in 1915. Mavis is owned by Henry C. Ahlers of San Francisco and was ridden by George Pearson. Chameran Peavine, the splendid gelding belonging to Etienne de Szysmanski, also of San Francisco, was shown to second honors under the handling of Sylvan J. Valenty, veteran horse show rider of America. E. Palmer Gavit's Lady Mack won the third prize. She was ridden by Tom Mason.

But the big surprise of the show came when Confidence received the award of the premier saddle horse honors of the show. In the championship competition, the Pasadena entry belonging to R. L. English, outpointed Henry C. Ahler's Mavis, Etienne de Szysmanski's Chameran Peavine, and Palmer Gavit's Lady Mack. Mrs. A. G. Stevens rode the winner in all of its exhibitions and was largely responsible for the victory.

Three special exhibitions helped to entertain the afternoon crowd. One was by Helen Idlewood, Revel English's champion five-gaited mare, ridden by Mrs. A. G. Stevens of Pasadena. Peter Hastings piloted Uhlan, the world's unbeaten trotting champion around the ring; while Herbert G. Wylie's international champion Percheron stallion Dragonal won the crowd's admiration on account of his magnificence.

Fifteen spanking horses lined up for the hurdling class, over fifteen hands. Four successive jumps of four and four and a half feet were required to qualify. First honors went to Rifle, Thomas Mangan's crack jumper, who has just been bought by G. Maurice Heckscher. He was ridden to victory by Frank Snowenberg. Miss Murphy, under F. J. Bork, another Mangan jumper came in for the red ribbon; and Miss Elizabeth Hammond put Ginger over for third honors.

When it came to the hurdling championship Miss Murphy leaped away from all her competitors. F. J. Bork's peerless horsemanship was largely responsible for the winning. His competitors were Rifle and Altadena.

Charles Butters of Oakland, presiding judge, said at the conclusion from the success of Santa Barbara's first horse show, there was no reason why this could not logically be made the horse show center of the Pacific Coast and he predicted a much bigger event next year.

The initiative of Manager D. M. Linnard of The Belvedere in backing the initial exhibit was praised on every side. The horse committee under leadership of Chairman Alfred E. Brush is most enthusiastic for beginning at once to lay plans for the 1920 meet and Secretary S. E. Kramer, who is chiefly responsible for the excellent gathering of entries, will outline plans for it immediately.

The need of a larger ring is imperative although the one on The Belvedere grounds will serve for many other sporting needs.

Tod Ford of Pasadena acted as ringmaster at the final exhibition.

Lowering clouds and a fine mist did not dampen the ardor of people in Santa Barbara for the horse show, and the second performance began promptly the second morning in the exhibition ring on Belvedere grounds, in the presence of a good crowd. Fine as the sport was at the first day's opening, the initial events of the morning were still more thrilling.

The class for heavy-weight polo ponies drew out sixteen entries of as fine animals as have been gathered together in any ring recently. Considering that the government combed the country during the late war, it was doubted that such excellent specimens could be assembled. Charles W. Dabney, Jr., gave a splendid exhibition of riding Murphy, which the judges declared to be perhaps the finest polo pony of the day. Winning over the choice entries of Thomas Mangan's string was no easy matter.

Miss Esther Hammond of Montecito distinguished herself by riding five different mounts in the jumpers' class, owing to the shortage of ladies able to take the hurdles. She put over handily the winner, Miss Murphy, owned by Thomas Mangan. Mrs. A. G. Stevens of Pasadena on Altadena was a close second, with Miss Elizabeth Hammond on Ginger third. Mrs. A. K. Bennett of Pasadena made an excellent showing jumping Sweetheart. Although she has not been in the saddle for several years.

One of the most picturesque events of the entire horse show was the contest in Class Thirteen for officers' mounts, the riders being in uniform. Lieut. A. D. Langbourne of the British army won handily. He recently came to Santa Barbara to recover from the effects of being gassed in the trenches. Others who rode in this event were Lieut. Alfred Mudge, Sergeant Deering Davis, Lieut. M. D. Evans and Lieut. I. J. Williams. Owing to a shortage of military men, not all of the entries could be shown.

The three classes for juvenile riders developed some pretty contests and the young horsemen and horsewomen showed their pony pets in fine style. Little Margaret Rock of Montecito carried off the most honors, with Edna Vandever of Santa Barbara second.

Results of the morning's events follow:

Class Sixteen, for best girl rider under sixteen, C. W. Dabney trophy: First, Miss Edna Vandever, Santa Barbara, riding Cachuma; second, Miss Margaret Rock, Montecito, riding Romeo; third, Miss Betty Ann Vail, Los Angeles, riding Captain.

Class Seven, heavy weight polo ponies, Maryland Hotel Cup: First, Murphy, owned by Charles W. Dabney, Santa Barbara, ridden by C. W. Dabney Jr.; second, Flying Fox, owned and ridden by H. Vanden Heuvel, El Centro; third, Kitty, owned by Thomas Mangan, Thornton, and ridden by Major Max Fleischman.

Class Fourteen, children's ponies, Hotel Green Cup: First, Romeo, owned by Robert Gudgeon and ridden by Miss Margaret Rock; second, Blacky, owned and ridden by Miss Angie Keeney, Santa Barbara; third, Jasper, owned and ridden by Miss Mary Vandever, Santa Barbara.

Class Thirteen, horses suitable for officers' mounts, The Ambassador (Atlantic City) trophy: First, Lady Mack, owned by E. Palmer Gavit, Montecito, and ridden by Lieut. A. D. Langbourne; second, Miss Murphy, owned by Thomas Mangan, Thornton, and ridden by Sergeant Deering Davis; third, Jack Pershing, owned by Crown City Saddle Livery, Pasadena, and ridden by Lieut. I. J. Williams.

Class Fifteen, ponies not exceeding 14-2, riders under sixteen, The Huntington trophy: First, Lord Bobs, owned by Robert Gudgeon, and ridden by Miss Margaret Rock; second, Cachuma, owned and ridden by Miss Edna Vandever; third, Perfection, owned by Crown City Saddle Livery, Pasadena, and ridden by Miss Betty Ann Vail, Los Angeles.

Class Ten, hunters and jumpers, ladies to ride, Palace Hotel Cup: First, Miss Murphy, owned by Thomas Mangan, Thornton, and ridden by Miss Esther Hammond, Montecito; second, Altadena, owned by R. L. English, and ridden by Mrs. A. G. Stevens, Pasadena; third, Ginger, owned by Mrs. Fiske Hammond, Montecito, and ridden by Miss Elizabeth Hammond.

Following is a summary of this afternoon's events:

Class Eight, group of three polo ponies, Santa Barbara Press trophy: First, Charles W. Dabney entry, Santa Barbara; second, H. Vanden Heuvel entry, El Centro; third, Thomas Mangan entry, Thornton.

Class Eighteen, California stock horses, $35 purse: First, Marie, owned by C. W. Dabney of Santa Barbara, and ridden by Alfredo Guitterez; second, Lord Hobbs, owned by Thomas Mangan, Thornton, ridden by Frank Snowenberg; third, Chief, owned and ridden by H. Vanden Heuvel, El Centro.

Class Two, saddle horse over 15-2, Riviera Cup: First, Mavis, owned by H. C. Ahlers, San Francisco, and ridden by George Pearson; second, Chameran Peavine, owned by Etienne de Szysmanski, San Francisco, and ridden by Sylvan J. Valenty; third, Lady Mack, owned by E. P. Gavit, Montecito, and ridden by Tom Mason.

Championship polo class, post entries, Harold L. Arnold trophy: Murphy, owned by C. W. Dabney, Santa Barbara, and ridden by C. W. Dabney Jr.

Class Eleven, hunters and jumpers, George W. Becker trophy: First, Rifle, owned by Thomas Mangan, Thornton, and ridden by Frank Snowenberg; second, Miss Murphy, owned by Thomas Mangan, and ridden by F. J. Bork; third, Ginger, owned by Mrs. Fiske Hammond, Montecito, and ridden by Miss Elizabeth Hammond.

Championship, saddle horse class, post entries, The Belvedere trophy: Confidence, owned by R. L. English, Pasadena, and ridden by Mrs. A. G. Stevens.

Championship, hunters and jumpers, Hotel Alexandria trophy: Miss Murphy, owned by Thomas Mangan, Thornton, and ridden by F. J. Bork.

AVIATION AND POLO NEWS

Del Monte, California, May...—One of the most successful aviation stunts staged by the United States Air Service in its recruiting campaign took place at Del Monte on Saturday and Sunday, May 17 and 18. Spectators flocked to the polo fields from all sections of the country to see the United States birdmen from Mather Flying Field of Sacramento in action. There were eight machines in charge of Lieut. Colonel H. L. Watson and on the afternoons of both days formation and trick flying entertained and thrilled the spectators and at the same time gave them an idea of the work of our air force.

That aeronautics are coming ahead in leaps and bounds was indicated by the flying here when the machine flown by Lieut. James Krull made the trip from Sacramento, a distance of approximately 150 miles, in seventy-five minutes. It was equipped with a Liberty motor and gave exhibitions of its speed over the surrounding country.

Some of the residents in Monterey county had their first look at an airship. Several recruits were added to the Air Service and were given the pleasure of a ride back to Sacramento.

There were polo matches played on both days and it is doubtful if the exciting sport on horseback was ever surrounded with more thrills. Machines took off in between chukkers and while the players were chasing the ball about the field the aviators flew over head and enjoyed the sport as spectators. Winners in the Victory Loan drives in Del Monte and Monterey were carried as passengers during the meet and were the envy of all eyes.

In the polo match on Sunday, Senor de Parada of Mexico City, Hugh Drury, Jack Neville and Frank Coates teamed up to win from Eric Pedley, Oswald Pedley, Tom Mangan and R. Stewart, 6 to 4. It was an interesting contest with the features in the air adding to the excitement.

Del Monte is getting to be quite a center of activities in the air. Earlier in the week two seaplanes making a naval coast patrol were off Del Monte Beach for four days. The United States naval officers had their flight held up because of engine trouble but they finally got away on Saturday.

In the days to come Del Monte is looking to the air to receive guests who head this way on pleasure bent. It has an ideally located place at the polo field and plans are already being discussed for installing hangars and other arrangements to receive the visitors from the air.

HIGH CLASS BROOD MARE DIES ABROAD

The death in France of Mrs. H. B. Duryea's brood mare Frizette, by Hamburg—Ondulee, is reported. She died after foaling a colt by Prince Palatine, which also died. Being only fourteen years old her death was untimely. She was a capital racer, winning the Rosedale Stakes at Jamaica, and the Laureate Stakes at Belmont Park for the late James R. Keene when a two-year-old in 1907. For J. A. Wernberg she won many purse races in 1908, in which year she was bought by H. B. Duryea and sent to France for stud service. As a rule Hamburg brood mares are of the best order. Frizette was no exception. Her first foal was the capital race mare Banshee, by Irish Lad, which won the French One Thousand of 1913. Her second was the good colt Frizzle, by the great French long-distance horse Binou. He raced successfully, won over $28,000 and is now in stud service in Kentucky. Mary Maud, which raced so well last fall, and the three-year-old filly Frizeur are others of her produce which have been brought to this country, probably to become good brood mares in their turn.

"THE HORSE AND THE WAR"

We have received a copy of one of the most interesting books dealing with the war subject that has been written. The author, Captain Sydney Galtrey of the British Army had unusual opportunities to familiarize himself with the subject and his book is of such wide spread interest to the American horsemen that the Percheron Society of America has collaborated in its publication by securing copies for distribution in the United States. The price of the volume is $1.50 and orders may be addressed direct to the Percheron Society of America, Bloomington, Illinois.

SYSONBY

The great race horse Sysonby was foaled in 1902 and raced in 1904 and 1905. He started fifteen times and was beaten but once and that was by Artful and Tradition in the Futurity of 1904. He died of blood poisoning in 1906. He was bred in England and foaled in America. As a two-year-old in 1904 he won $40,058 and as a three-year-old in 1905 he won $144,380. His winnings amounted to a total of $184,438. His biggest winning was at Saratoga where he won the great Republic Stakes on August 12, 1905, his winnings in this event being $41,465.

Sometimes we can not prevent outbreaks of live-stock diseases on our farms, but we can and should always use every preventive measure and see that proper precautions are taken when the disease first makes its appearance.

COMMANDER J. K. L. ROSS LEADING WINNER

A total in stable earnings of $99,170 enabled Commander J. K. L. Ross to lead the list of American winning owners of 1918. Already he is so well on the way to that total this year that it is apparent he must reap a much greater return. Sir Barton's two lucrative victories in the Kentucky Derby and Preakness Stakes were the main factor in this swollen stable account, but it is otherwise formidably equipped and even if Sir Barton should go wrong it is now more than probable that the Ross stable would win much more than $100,000 and again figure as the leader. No other owner is now close to him, but R. Parr, K. Spence, H. P. Whitney and a number of others are doing well and have stable returns of $10,000 or more, which is pretty good this early in the racing year.

Sam Hildreth's big colt, Out the Way is built like a quarter horse of heroic mold, standing well above sixteen hands high and weighing 1200 pounds in training condition, with enormous muscular development over the loin and quarters. He was bred by H. P. Whitney at the Brookdale Stud, near Red Bank, N. J., and worked a half mile faster than any other two-year-old ever tried on the farm track. James Rowe, his trainer, said it made him sick when he found the fast colt's wind was affected. After racing him last year he was offered for sale for $5000, but nobody wanted him at the price. Mr. Whitney was about to send him to Havana in charge of Max Hirsch when he got cast in his stall and went lame. This mishap enabled Mr. Hildreth to buy him for $2500, or a little less. This gigantic son of Peter Pan is shaky in his knees and touched in wind, and his front ankles are dotted with marks of the firing iron, yet, on a clear, crisp day he is one of the most formidable sprinters in training.

C. F. Bunch at Stockton has worked a three-year-old bay colt that he calls Stockton Lad, an inbred Royal McKinney. This colt has worked a mile in 2:20 and a quarter in 33 seconds. He is entered in the three-year-old stakes for this year.

John Rowen at Stockton has a three-year-old filly by Royal McKinney that he has just taken up and he worked him a mile in 1:36 the first time he let him out and an eighth in 16 seconds. This colt is entered in the three-year-old stakes and looks promising.

The veteran trainer W. H. Williams is preparing Leata J. for the races this year if he can find a class for her. He is also handling Kate Bingen by Robert Bingen dam by Director a green trotter that worked in 2:12 last year. The balance of the horses worked consists of Modesto Maid, trotter by Sidney McKinney, she has made a mile in 2:19. Lodi Maid, a green trotter by Ora Wilkes that has worked in 2:20½. All of these horses will be ready for the State Fair.

LEXINGTON FIXTURES

The Kentucky Trotting Horse Breeders' Association has adopted a new idea in connection with its renewal of the Transylvania, Castleton, and Walnut Hall Cup races, which will be the feature events for aged trotters at its meeting September 30 to October 11. This year the Transylvania will be for the 2:06 class with a purse of $5000, the Castleton for the 2:07 class with a purse of $3000, and the Walnut Hall Cup for the 2:09 trotters with a purse of $3000. Each of them will be raced on the three heat plan and in each a nominator can name a horse on June 2 and have the right to transfer his nomination or substitute another horse that was eligible on that date up to September 10. Under these conditions all horses eligible to the classes named regardless of ownership or whether they were named on June 2 or not are eligible to start up to September 10 as the owners of those who are not named on the date of closing are in a position to purchase a nomination in the event of their horses showing that they have speed and racing qualities which entitle them to a start at Lexington. Also under this condition a nominator who has two or more horses eligible is only required to name one as he has the right to substitute the best prospect on September 10, while a man with but one horse, if it goes wrong, can sell his nomination and by so doing save the entrance up to the date of transfer. President Tipton also reports that the association is almost certain to have a fast pacing race for either $2000 or $3000 on the same plan.

WINS THE KINGS COUNTY HANDICAP

A. K. Macomber at the auction of the T. H. Cross horses in the paddock at Jamaica track on May 17th bought Royce Rools, the Salvation—Saintolat gelding for $11,500 and won the Kings County Handicap with his purchase that afternoon. The race was an excellent performance and Royce Rools did well at the end to hold safe a winning distance over the fast closing Straight Forward. The Kings County Handicap has been a popular feature of eastern spring racing since 1903. It skipped four years 1911 and 1912 and 1909 and 1914. Following is a list of the winners:

Year	Winner	A.	Wt.	Jockey	Val.	Time
1903	The Musketeer	5	120	Hoar	$1,880	1:13 3-5
1904	Florheim Queen	4	96	Hildebrand	1,800	1:52
1905	Rapid Water	4	120	Lyne	1,685	1:47
1906	Israfel	3	93	W. Miller	1,540	1:47
1907	Buttling	5	114	Notter	1,625	1:48 3-5
1908	Faust	4	88	Sumter	1,450	1:48 2-5
1910	Fayette	4	114	C. H. Shilling	1,050	1:45 3-5
1913	Lahore	5	115	Butwell	1,500	1:51 1-5
1915	Stromboli	4	124	E. Dugan	2,100	1:48
1916	Capra	4	98	R. McDermott	2,925	1:45 3-5
1917	Stromboli	6	124	J. Butwell	3,475	1:46 3-5
1918	Cudgel	4	130	L. Lyke	3,850	1:46 1-5
1919	Royce Rools	4	116	M. Buxton	4,850	1:45 4-5

A. T. Jackson has a two-year-old Royal McKinney, dam California dam of the Icicle that he has worked a quarter in 41½ seconds.

RACING AT LOCKEFORD

A big picnic was held at Lockeford on May 23rd. The attraction included a live stock show, baby show and horse racing. The cattle and hog exhibits were excellent but the main attraction of the show, however, was the horse racing. The following summaries show the results:

First Race

Icicle (A. T. Jackson)	2	1	1
Dexter Derby (C. Jones)	1	2	2
Ben Walker (Dan Lieginger)	3	3	3

Time—1:11, 1:09½, 1:07.

Second Race

Clements Maid (C. Jones)	2	1	1
Ben Walker (Dan Lieginger)	1	2	2
Royal McKinney (A. T. Jackson)	3	3	3

Time—1:12, 1:11½, 1:15.

The judges were Frank Lieginger, F. C. Bunch and Jerry Acker. The timers were F. H. Johnson and Charles Fagan.

UNIFORM LAWS TO PROTECT MIGRATORY BIRDS

Perhaps migratory birds will never again be seen in such vast flocks as when the early settlers pushed their way westward, but specialists of the Bureau of Biological Survey, United States Department of Agriculture, believe their numbers are now increasing year by year. Widespread interest in their preservation, prompted by American sportsmen who saw the birds would be exterminated by unchecked destruction, is thought well justified when it is considered that the birds' food and economic value amounts to many millions of dollars annually.

In 1900 only nine states had laws prohibiting all-spring shooting, while in 1918 there were thirty-one. Only three states now afford no legal protection. Uniform and adequate preservation was first given attention by the Federal Government in 1904, when a bill was introduced in Congress, but failed to become law. The subject, however, was kept before Congress almost continuously until the enactment of the migratory bird law in 1913.

This Federal statute merely conferred on the U. S. Department of Agriculture the power to fix closed seasons during which it would be unlawful to capture or kill migratory birds. This law did not provide for effective enforcement, but it exerted a wonderful influence upon the public mind, and its passage laid the real foundation for more adequate protection. Fully 95 per cent of the sportsmen abided by the regulations established under this law and refrained from shooting during the closed seasons.

The result was almost instantaneous. Waterfowl and other migratory game birds not only showed at once a marked increase in numbers, but, owing to the cessation of spring shooting, remained unmolested in ever increasing numbers to breed in places from which formerly they had been driven every

BUREAU OF MARKETS TO SEND LIVESTOCK COMMISSIONER TO SOUTH AMERICA

Realizing the rapid development of the livestock industry in various countries of South America and the need for the introduction of pure-bred livestock in order to grade up the herds, the Foreign Marketing Division of the Bureau of Markets has perfected plans for the investigation of the possibilities for pure-bred American stock and to stimulate interest in importations from this country.

Mr. David Harrell, of Austin, Texas, has been appointed as Livestock Commissioner to make these investigations. Until recently he was the representative of the War Trade Board in Spain. Mr. Harrell will sail for Buenos Aires on June 14 and will be accompanied by Mr. H. P. Morgan, of the Bureau of Markets.

Up to five years ago Mr. Harrell was engaged in the livestock business in Texas and Mexico and has had a wide experience in the industry. For some time he was an importer and breeder of pure-bred cattle, hogs, and Angora goats; and his stock won many first prizes in livestock exhibitions of national importance. For several years he was president of the Texas Shorthorn Breeders' Association, and did important trade promotion work in Mexico for both the National and the Texas Associations. Until his departure for Spain in 1917 he was a governor of the University of Texas.

TICK BADLY WALLOPED IN FIRST ROUND

If the annual battle against the cattle fever tick can be compared to a boxing match of nine rounds—each month from March to December being a round—it is true that the tick got a thorough trouncing in the first round, and the bell rang with the parasite figuratively hanging over the ropes.

March of this year brought more dippings of cattle for the tick than were recorded in any other March since the Federal and state governments began to fight the parasite in 1906. According to reports from all tick-infested states, received and compiled by the Bureau of Animal Industry, U. S. Department of Agriculture, 1,203,497 cattle went through "the canals to prosperity" in March, 1919. This compares with 996,505 in March, 1918, and 720,552 in March, 1917.

This year's results came from an effort to "Dip That Tick in March," with the object of preventing so far as possible the reproduction of the parasite. The ticks that were killed in March will produce no thousands and millions of descendants to suck cattle blood all summer. With the flying start in March, and with continued vigorous attacks through the dipping season, it is believed that the tick eradicators have good chances of reaching their aim of cleaning up 90,000 more square miles of territory this year—or more than ever has been released in one year from the Federal quarantine against the pest.

Healthy increases in the number of dipping vats available for use also are shown by reports to the Bureau. In March, 1917, there were 15,765 vats; and in March, 1918, there were 22,879. This year there were 29,255.

PROSPECTUS OF COLLEGE OF AGRICULTURE FOR 1919-1920 IS ISSUED

A prospectus of the College of Agriculture of the University of California has just been issued by the University Press, Berkeley, and may be had free of charge upon application. The prospectus outlines the activities of the college, taking up University instruction, University Farm School instruction, short courses for practical farmers, correspondence courses in agriculture, university extension courses in agriculture, research work, and graduate work.

The prospectus, which contains many illustrations, gives a splendid insight into the life of students and contains a summary of expenses that are ordinarily incurred.

Argentina, the United States, and Australia, in the order given, are the chief beef-exporting countries of the world, and Uruguay and New Zealand are of large, though of secondary, importance, while Brazil has started beef production and export that will assume enormous proportions if expectations are realized. These facts are shown in figures of the Bureau of Crop Estimates, United States Department of Agriculture.

FOR SALE

Two handsome bay geldings by King S, out of a handsome, registered thoroughbred mare, age five and six years respectively, and one bay mare by Monteo, out of a thoroughbred mare, aged six years. All three are halter broken and one of the geldings has been ridden a few times. They range from 15 to 15½ hands high and will weigh from 900 to 1000 pounds. Excellent material for polo ponies or general saddle horses. They are in good condition and absolutely sound, good lookers and would show in the ring. The whole lot or any one of them can be purchased for $100 each. These horses are at Marysville, Cal., and will be delivered to the purchaser at the railroad stock yards at that place. For further particulars, address F. W. KELLEY, care Breeder and Sportsman.

The New Zealand Trotting Journal

Published Weekly

Only Paper of its kind published in the Dominion interesting to Horsemen and Breeders all over the World.

Editorial and Reportorial Staff composed of horsemen of many years practical and administrative experience.

Subscription Price $6.50 per annum.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Sportsmen's Row

There is excellent fishing in Santa Cruz Bay at the present time. Smelt were caught above the mouth of the San Lorenzo river, an event said to be rare. Salmon are plentiful, 7,000 pounds being shipped in one day to San Francisco.

- - -

T. E. Doremus, former president of the Interstate Trapshooting Association, and now the general manager of the duPont interests in the Far East—address Shanghai—is as enthusiastic with the rod as with the gun. Before leaving for China "Ted" was an active member of many fishing clubs.

- - -

The registered trapshooting tournaments in California given registration thus far take place as follows: Los Angeles Gun Club, Los Angeles, May 19, 20 and 21; Vernon Gun Club, Los Angeles, Vernon, June 6, 7 and 8; the Olympic Club, San Francisco, June 14 and 15, and Eureka Blue Rock Club, Eureka, Sept. 6 and 7.

- - -

Beginners' day shoots are to be held in June and July and clubs all over the country should and probably will make an effort to initiate as many aspirants as possible in the art of trap shooting. As an encouragement to clubs and add to the interest of the beginners' classes the Dupont powder people have offered free trophies to all clubs that will apply for them.—See advt.

- - -

Salinas is figuring on a registered shoot the week ending June 21st. This will make quite a little competition for the scatter enthusiasts. There are a number of devotees of the shotgun in this locality and it is expected that interest will be received from all sections of the Pacific Coast. It is possible that at the occasion of the shoot, the Golden Gate, Olympic and Bohemian Clubs along with Salinas and Pacific Grove will stage team races.

- - -

The Del Monte Blue Rock Club has made formal application to the American Trap Shooters' Association for a registered tournament here on Saturday and Sunday, June 28th and 29th. According to the tentative program there will be a 150 bird race on each of the days with trophies for the five high guns in each event and a beautiful trophy for the high gun over all. Del Monte is equipped with a trap shooting grounds overlooking the race track and polo fields and the shooters should be able to make the smoke fly out of the tar hawks.

- - -

Work of construction has started on the new Fishing Lodge at Stillwater Cove near the Del Monte Lodge in Del Monte Forest. This fishing lodge will be modern and up-to-the-minute and will be the home of one of the most exclusive fishing organizations on the Pacific Coast. Captain John Barneson, the well known sportsman of San Francisco, has taken the lead in organizing the club and he is assured of a membership of 200. The Lodge looks out over beautiful Carmel Bay and the Pacific ocean and has a perfect scenic background of the Del Monte Number Two golf course and forest.

- - -

"One of the Oldest Fishermen in the Country" is the title that is bestowed upon Frank Moresco, a grizzled veteran who has been hunting the waters of Monterey Bay for fish for a period of seventy years. Monterey Bay, just off the fashionable Hotel Del Monte, has the reputation of being the best fishing waters any place in the world. The waters from the North and South Pacific oceans meet at this point. Professors of Stanford University in their research work have established that fact which accounts for the great variety of fish to be found. Moresco, although he is now a pretty old man, occasionally takes a boat and tries his luck. He proves of much interest to the fishermen who come to Del Monte from all sections of the country.

- - -

Frank M. Troeh, of Vancouver, Wash., won about everything there was in the way of trapshooting titles last year, also gathered the greatest number of watches from the American Trapshooting Association for making the greatest number of long runs. Troeh won three of the 14 watches awarded. O. N. Ford, of San Francisco, Calif., and George N. Fish, of Lydonville, N. Y., each won two watches. The other winners were Jay Clark, Worchester, Mass.; L. F. Curtis, Newton Highlands, Mass.; H. G. Lorenson, Newman, Calif.; C. H. Newcomb, Philadelphia, Pa.; P. H. O'Brien, Butte, Mont.; F. S. Tomlin, Pennsgrove, N. J.; E. F. Woodward, Houston, Tex. Troeh was also the greatest winner of fobs, with 4, and bars, with six. The Trapshooting Association awarded 835 fobs and 80 bars.

Dr. A. H. Aber of Dravosburg, Pa., and Sam Sharman, of Salt Lake City, have each shot at 550 targets and have broken 535, for an average of .9727. The other shooter over 97 per cent is R. A. King of Colorado.

- - -

Frank Troeh, of Vancouver, Wash., who gets his name in the papers nearly as often as Jess Willard, defended the Hercules all-round trapshooting championship trophy twice during the past few weeks, defeating Charles Leith, of Portland, Ore., 176 to 175, and Hugh Posten, of San Francisco, 184 to 181.

- - -

There will be five traps for clay target shooters on the Navy Rifle Range at Caldwell, N. J., during the National Rifle matches and through the preliminaries, which begin about July 4. There will be a program of shooting with all kinds of firearms. The idea is to make the tournament a real shoot—a shoot for all. The Caldwell Rifle range is the largest in the world, and the most modern. One hundred teams can be accommodated at one time.

- - -

More than 200 country, golf and athletic clubs are equipped for trapshooting. Such clubs as the Illinois A. C., Chicago; the Olympic Club of San Francisco; Del Monte Country Club, of Del Monte; Baltusrol Golf Club, of Springfield, N. J.; the Crescent Athletic Club, of Brooklyn; Whippany River Club, of Morristown, N. J.; the Pinehurst Country Club, of Pinehurst, N. C.; the Chicago Athletic Club and the Tulsa (Okla.) Country Club, all of considerable importance in the athletic and social life of our country, go into trapshooting on a large scale.

DISCRETIONARY POWERS FOR FISH AND GAME COMMISSION

Legislation should give discretionary power to the Fish and Game Commission, in order that emergency measures may be instituted to care for unusual situations.

This is a very wise and necessary measure, especially in states subject to floods and forest fires. Had not Minnesota been able to prevent the shooting of deer after the forest fires in that state last fall, an undue slaughter of the animals would have followed during the open season.

On the patches of timber left standing in and near the burned area, hundreds of deer congregated. Many were singed and scorched, testifying too plainly the fate of less fortunate animals cut off by the flames. An order was immediately put into effect restricting hunting in or near the burned over section and this undoubtedly saved the lives of enough animals to constitute a breeding stock to, in time, replace the death toll shown by the hundreds of charred carcasses found after the fire.

In a similar way, floods have often driven large numbers of both animals and birds into a limited area, where unless protected by quick and positive methods, an unwarranted slaughter is sure to take place.

THE SAN FRANCISCO DOG SHOW

The Golden Gate Kennel Dog Show which closed Saturday, May 10th, was one of the most successful dog shows ever held in San Francisco, both from a point of attendance and exhibits.

Champion Seedley Blue Sky, an imported collie owned by Mrs. E. F. Brown of the Browndale Kennels, was awarded the honors as the best dog of any breed in the show. The best of opposite sex, as determined by the judges, was Mission Silvie, cocker spaniel, entered by the Mission Cocker Kennels of San Francisco.

Other special awards were announced as follows:

Best sporting dog—Wire-haired fox terrier, Tallac Talisman, owned by W. W. Stettheimer.

Best non-sporting dog—Old English sheepdog, Lord Chester, owned by Mrs. F. K. Brown.

Best puppy in show—Collie Brae Brook Butterfly, owned by Brae Brook Kennels.

Best dog bred in California, Oregon, Washington, Nevada, Montana, Utah, Idaho or Hawaii—Mission Silvie, cocker spaniel, Mission Cocker Kennels.

Best brace any breed, open to all Brookdale collie kennels—Champion Seedley Blue and Browndale Delinder.

OF INTEREST TO TRAPSHOOTERS

A Junior Championship will be one of the new features at the Twentieth Grand American Handicap Trapshooting Tournament which will be conducted on the grounds of the South Shore Country Club, Chicago, August 11 to 15. The Junior Championship race will be open to boys under eighteen years of age. It will be contested on Championship Day, Wednesday, August 13, and one trap will be set aside for the event. A trophy emblematic of the championship will be presented the winner. Boys always have been in evidence among the contestants at the Grand American Handicap, but heretofore there has been no event in which they might compete among themselves. The championship for the juniors is expected to attract a number of boys who can handle a trapgun equally as well as some of the "dads." In 1918, at Chicago, H. E. Woodward of Houston, Tex., was a contestant in the National Amateur Championship at Single Targets, he being the champion of his state. There were other boys shooting over the South Shore traps, George A. Miller of Brewton, Ala., shooting in the Grand American Handicap although he was but nine years old and seemed barely able to lift a shotgun.

A championship for women will again be on the Grand American Handicap Tournament program. The two women contestants who make the two highest scores in the big handicap race on Friday, August 15, will each receive a trophy presented by the American Trapshooting Association.

In the trapshooting rules the word "Competition" appears in a number of places and there has been some question as to the proper interpretation of the word—whether it referred to a single event, one day of a tournament lasting several days, or the entire program, no matter what its length.

An illustration of this may be found in Rule 10, Section 2 of the Revised Trapshooting Rules, prepared by the Rules Committee. This reads "A protest concerning a score or scores must be made before or immediately after the close of the competition to which it or they relate."

In order that there might be no misunderstanding as to the interpretation of the word, Chairman Banks has prepared this definition: "Wheresoever the word 'Competition' may be used in these rules, said word is to be understood to refer to either a single event on a program, to an entire one day's program, or to the program for any one tournament, and must at all times be so construed by the management to whose charge the carrying out of such 'Competition' has been entrusted."

Lieut. Commander F. P. Williams, U. S. N., has completed arrangements for the Army-Navy Championship Shoot which will be held on the grounds of the Montgomery Country Club, Washington, D. C., July 4th. The tournament will be registered and and will be open to all trapshooters, but the winner of the championship event must be a man who is actually in the service. It has been suggested that similar championship shoots for army and navy men who are in the service might be held in the Middle West and on the Pacific Coast. If this can be accomplished, it is just possible that the three champions will meet to fight it out for supremacy at the Grand American Handicap Tournament in Chicago.

Secretaries of gun clubs are prone to forget that when they make application for a registered tournament they agree to abide by certain conditions which appear on the application blank. One of these conditions (No. 2) is as follows: "That we would print in the program of our tournament the registration certificate issued by the American Trapshooting Association. It is not the desire of the American Trapshooting Association to work a hardship on the secretaries of gun clubs holding registered tournaments, but if the sport is to grow and continue to be one of America's most popular outdoor games, all must live up to the rules.

RARE FISH

Will F. Thompson and Elmer Higgins, well-known fish experts, have been busy identifying specimens of various fishes secured by the new patrol boat "Albacore" which is making a scientific investigation of the Southern California fisheries. For example, one rare fish which recently came into the laboratory was a specimen of Tetragonurus cuvieri Risso, which these experts termed "The squarehead" for lack of a better name. This fish was found near Catalina, and is, according to reports, the first of its kind found in North Pacific waters. Although we hear this species mentioned as a rare fish existing in the Mediterranean by the naturalist Rondelet as early as 1554, and although since that time it has been taken several times in the Mediterranean and near the Madeira Islands, yet never before has it been caught off the western coast of North America. In her finely meshed nets, the "Albacore" has taken a specimen of Stylophthalmus paradoxus, a native of the Indian ocean, also a member of the genus Trachypterus (king of the salmon,) which is supposedly very rare. Nor did the Exonautes rondeletii, a kind of flying fish, formerly found only in tropical seas, escape the Albacore's nets. She also obtained from the deep a species of sanddab hitherto confined solely to Mexican waters.

STEFANSSON EXPLORER AND SPORTSMAN

While V. Stefansson, the great Arctic explorer, is primarily a rifle shot, he handles a shotgun and breaks the elusive clay targets with a skill that old-time trapshooters well may envy.

Because of his inherent modesty, newspaper men have found it difficult to get Stefansson to say very much about himself in relation to his explorations. Suffice it to say that this man is one of the greatest living Arctic explorers. His first trip was made under the auspices of the American Museum of Natural History and he remained in the far north for about five years. His last trip consumed about five and a half years and was made under the direction of the Canadian Government. The net results of his explorations have been to add extensively to our knowledge of polar geography, including the discovery of new lands in that region.

During his last trip (and here is a fact that will interest all sportsmen) Stefansson secured TWO TONS of meat for every pound of metallic cartridges utilized. As he travels he lives on the resources of the country. This record may be compared with the tragic end of the Sir John Franklin expedition many years ago in the same region covered by Stefansson, when the Franklin party of 120 men met death from starvation. Sir John Franklin's party died in a region that possessed food resources upon which the Stefansson expedition would have thrived.

Since his recent return from the Arctic, Stefansson has taken up with the American and Canadian Governments the question of domesticating the musk ox both for its wool and its meat. The musk ox gives about three times the amount of wool as the sheep, and in view of the present shortage in the world's wool supply this animal might become an asset of no mean proportions. Peary, in an interview in the New York Sun, said recently their meat is better than beef. Stefansson says it is indistinguishable from beef.

FREE SHOOTING

Some persons believe that this country is on the verge of becoming Europeanized to the extent that in a very few years we will have no shooting except by land-owners or lessees on their private preserves.

This is something which no patriotic American wants, because we believe that one of the keystones of our national prosperity is the free shooting which our citizens have enjoyed.

There is no question but that free shooting over large sections of the country is seriously endangered and that in some places it has disappeared. Already states like New York, Pennsylvania and Utah have gone a long way to secure and preserve hunting grounds available for the poor man as well as the rich. New York, with its Adirondack and Catskill Parks, has an area twice the size of the state of Rhode Island, which will be free for all time to the public for fishing, shooting and camping.

A similar opportunity is easily available for all states which have areas of rough, non-agricultural land. The problem is much more serious in states possessing chiefly rich, agricultural land, where the price per acre is so high that very little land can be purchased with any reasonable appropriation, but even in such states swamp lands could often be acquired by the state at figures within reason.

It has been suggested that the hunters' money would go farther in purchasing shooting rights than in acquiring the fee of the land itself. This plan is worthy of consideration, but so far as is known it has never been practically worked out in any state.

PUBLIC CAMPING GROUNDS

Ten thousand dollars for the improvement of public camp grounds in California has just been authorized by Court du Bois, District Forester, United States Forest Service.

"Recreational use of the National Forests is as legitimate as is the use of their timber, forage, and other resources, and as such will be fully recognized by the Forest Service," said du Bois recently in discussing the contemplated improvements.

"The motorist and the tourist who prefers camp life in the open to that of the hotel or summer resort will be provided for," he continued. "Comfort stations, fire places, tables and benches, and where necessary, domestic water supply systems will be installed at many camps this spring. Work will start immediately on camp sites in the Laguna area on the Cleveland National Forest, at Huntington Lake on the Sierra, and at various camps on the Colfax-Truckee State road, and on the Lincoln Highway between Placerville and Lake Tahoe in the Tahoe and Eldorado Forests. In addition, we are setting out groves of big tree plantations, so that many of these camps will, as time goes on, have added attractions for the tourist.

"In addition, pastures in which tourists may leave their saddle and pack animals free of charge will be built in the more remote sections of the Sierra, Sequoia, and Inyo Forests, just as soon as the snow has disappeared, so that work can be done economically.

"It is expected that these improvements, together with the roads to be built from the $2,300,000 appropriation recently alloted to the Forest Service in California, will make the National Forests even more popular than they have been in the past."

THE "POOR FISH" AT DEL MONTE

Del Monte, California, May.—You have often heard the expression "You poor fish" used in a derisive sense, but does not hold true with the denizens of the deep in Stillwater Cove on Carmel Bay. The fact is they are pretty fortunate fish and have a pretty merry time of it.

All of this information has been gathered by looking down through glass bottomed boats operated by a famous character of the sea, Captain Teddy. This Captain Teddy hails from the tight British Isles and follows many of the customs of the Old Country such a wearing a one-piece eyeglass and dropping his "h's" and "r's" with regularity.

Captain Teddy takes hundreds of visitors out from Stillwater Cove to view the wonderful marine gardens which grow here. For four years he has pointed out the mystic beauty of submerged Emerald Rock, Sea Urchin Rock, Arch Rock and all the plant and vegetable life on the bottom of the Bay. The Captain is quite an artist and dotes on the beautiful colors of the rocks and shells. Captain Teddy is a bosom friend of the many fish that are plainly seen swimming along the bottom of the bay. He makes a practice of distributing bread crumbs and worms and gets much delight and enjoyment out of seeing his friends feed. Just as horseman always goes among his ponies with a pocketful of lump sugar, Captain Teddy has food for his friends on the bottom of the ocean.

The veteran mariner claims to see the same fish every day and he has nick-named certain old timers. Further out in the bay and in the ocean the fishermen go in launches and row boats to make their catches but Captain Teddy will not permit them to take the fish who find refuge among the marine gardens.

The trip to see the marine gardens and the fish is one of the most interesting to be found any place in the world. The many visitors who take in the sights have marveled at the wonderful plants and vegetables which grow among the shells and rocks and grasses on the bottom of the bay.

So if you want to use a proper slang expression you mustn't say "you poor fish" because these inhabitants who frequent the marine gardens surely have one grand time of it. Captain Teddy, their friend, sees to it that they are not molested in any manner.

BIRD PROTECTION AN ECONOMIC QUESTION

The myriads of migratory birds that fairly astounded the early explorers of this country before its virgin forests had been destroyed, its green fields trodden to dust by the feet of tramping millions, or its silences broken by the din of thousands of cities, have inspired the writing of volumes of literature. These volumes have told of the wanton and thoughtless slaughter of the birds, and have given warning of their certain disappearance with the settlement of the country and the usurpation of the forests, fields, and streams that had furnished shelter, food, and breeding places for these feathered hosts. Other volumes have set forth the steps that should be taken to save the birds from the ultimate extinction threatened by the acts of people ignorant of their real economic value, and have told of the annual destruction of millions of dollars' worth of forests and crops by injurious insects formerly kept under subjection by the birds. Yet all the while the birds were actually being exterminated, in spite of such protection as could be afforded by the laws of various states.

The food value and economic importance of the migratory birds of the United States, amounting to many millions of dollars annually, justify the widespread interest in their preservation. Not less important is the esthetic value of birds—the inspiration and stimulus which they give to the moral sense, and the charm and beauty which they lend to the life of all our people. Researches by the Bureau of Biological Survey into the economic value of insectivorous birds have proved that they insure the farmer against outbreaks of insect pests, a most serious menace to the agricultural wealth of the country. Valuable in other ways are the game birds, which not only furnish delightful and pleasing recreation to the great army of American sportsmen, but add materially to the food supply of millions of people.

THE MISAPPROPRIATION OF THE HUNTER'S LICENSE FUND

Too frequently we hear some state legislature has re-appropriated part of the Hunter's License Fund for a purpose entirely foreign to that for which it was originally intended. Some states do not even have a special fund for this money, but place it in the general fund, or as in the case of Nebraska, all money derived from the sale of hunting and fishing licenses goes into the school fund, and the state game and fish commission has to depend upon a special appropriation from the legislature in order to exist.

This state of affairs is entirely wrong. The sportsmen of every state where such a condition exists should firmly take the stand that the sportsman is entitled to the benefit of every cent of the money paid in by him as license money, whether it be for hunting or for fishing. It is generally the case that where no special fund is created to take care of this money that the state assembly is very loath to appropriate enough money to carry on the work necessary to insure good shooting and fishing for the law-abiding man. The writer has one case in mind where it was formerly impossible to get a sufficient appropriation to protect the sport, although each year the hunters paid their money for a license, well knowing that their money was going into the general fund to be used for road work or whatever else was the then pressing demand.

Each year sees more of the states adopting a fishing license, which is right, especially as in most cases the game and fish departments have previously been supported entirely by the gunner. No true sportsman, whether he be gunner or fisherman, objects to paying to protect and perpetuate his own sport, as long as he knows his money goes for this purpose. In many states, due to lack of good fishing waters, or other conditions, a combined hunting and fishing license has been found to bring good results. Some states by their constitutions prohibit license money from going into a special fund, therefore the first thing for the sportsman to do is to investigate the situation from a legal standpoint. Having found out the necessary steps to be taken, he can then get busy and hammer away until he secures his rights.

BEGINNERS' DAY

"Beginners' day" shoots are to be held in June and July.

"Beginners' day" shoots do away with that alibi, "I would like to shoot, but I do not care to make a show of myself." There is no need of this. At "Beginners' day" shoots everyone is practically on even terms.

"Beginners' day" shoots are arranged to take care of those who would like to know how to shoot and who feel timid about getting into a squad at a club or engaging in competition for fear of someone making remarks about their ability.

These are the days when we should all know how to handle firearms. No better chance to learn was ever afforded than at these "Beginners' days" which will be held by the majority of the gun clubs of the United States and Canada. No red-blooded American should miss this opportunity of learning the art of trapshooting.

"Beginners' day" shoots this year will be conducted alorg the same lines as in 1916 and 1917, when a beginner was rated as one who had not shot at 500 targets up to the opening of the shooting month, which this year will be June 1. To every club holding a beginners' shoot a watchfob will be given for competition among the men and a silver spoon for competition among the women.

It is suggested that the event for beginners be at 25 targets, in strings of 10 and 15, with straightaway targets thrown at a distance of about 35 yards. All the clubs which hold these shoots should make it a point to get all the members out, so that every shooter will have an instructor. For every 10 beginners a club gets out it will be given a bronze statue of a trapshooter. This statue—or statues—can be offered for prizes in club shoots.

Indications at this time are that more than 1000 clubs will hold "Beginners' day" shoots this year.

THE REFEREE'S DECISION IS FINAL

Although it always has been stated in the rules that "His decision, (the referee's), in all cases shall be final," and this was strictly enforced at tournaments under the direct management of the old Interstate Association, it was different at club shoots, registered and non-registered. There, it was the custom for the judge of the targets to reverse his decision when a majority of the members of the squad "saw a piece out of the target."

The American Trapshooting Association desires to have the rule regarding the referee's decision strictly enforced at all shoots, and will take steps to see that it is enforced at registered tournaments. When a referee is negligent or inefficient, the contestants may appeal to the management and he will be removed. This point is covered in the rules. But so long as he remains on the firing line, his judgment must be accepted.

CALIFORNIA SARDINES

For some years two plants have been operated in Monterey, Cal., packing sardines in one-pound ovals, while several plants operated intermittently in Southern California packing sardines in ¼-, ½- and ¾-pound cans. The great reduction in the importation of sardines from Europe, due to the war, caused a heavy demand for domestic goods, and in the fall and winter of 1916 a number of the tuna packers took up the business after the tuna season was over, with the result that 172,125 cases of all sizes were packed, while a still larger pack will be made in 1917; and should the demand warrant it a still larger pack can be made, as the supply of fish is almost limitless. The packers are rapidly introducing the most up-to-date methods of handling and packing the fish and will have a rigid inspection system installed, thus assuring the consumer a choice, sanitary article of food that will compare favorably with the best eastern and imported brands. In 1916 Maine canners packed about 1,600,000 cases of sardines, and there is no physical reason to prevent Pacific Coast packers from equalling this, provided the domestic market can be persuaded to take them, and the experience of our packers with their packs of 1916 and 1917 would seem to indicate that this is not only possible but quite probable.

INTEREST THE BOYS

To interest boys in trapshooting is one of the things that the shooting associations should do. Trapshooting has done little or nothing for boys. Practically everything is done for those who know how to shoot.

O. N. Ford, manager of the Olympic Gun Club of San Francisco, recognized this mistake and the first thing done on the shooting grounds at Lakeside was the formation of juvenile shooting squads, boys ranging from 10 to 16 years. Twenty-five boys between these years are now shooting and a large majority promise to become good shots and among them some "crackerjacks." This number will be increased as the benefits become known.

CALIFORNIA-NEVADA TRAPSHOOTING TOURNAMENT

J. F. Dodds of San Diego won the championship of the California-Nevada Trap Shooting Tournament held at Visalia ending April 27th. His score was 291 out of 300. By winning the championship he will be sent as the association's representative at the national trapshoot contest at Chicago in August.

Frank Mellus, Los Angeles, finished second, with 290; Tony Prior, San Francisco; C. P. Arthur, Lemon Cove; L. A. Slocum, San Francisco, and H. E. Sargent, Pasadena, were tied for third place with 289 each.

C. H. Nash, San Jose, made the longest run with 137 consecutive hits, Orvall Overall, Lemon Cove, was second with a run of 132, while C. P. Arthur was third with 120.

The association's trophy winners were: L. A. Slocum, first; C. A. Darrisau, Lindsay, second; J. F. Dodds, third; Thomas Wilkes, San Francisco, fourth and fifth; Dr. E. V. Falk, Modesto, sixth and Orvall Overall, seventh.

PROGRAM GRAND AMERICAN HANDICAP

All the necessary arrangements have been made for the holding of the Twentieth Grand American Handicap Tournament at the South Shore Country Club, Chicago, on August 11, 12, 13, 14 and 15, 1919. The program for the big shoot, as finally approved, is as follows:

First Day, Monday, August 11

The South Shore Country Club Special, 100 registered targets, 16 yards rise. Shooting begins at 10 a. m.

Second Day, Tuesday, August 12

The American Amateur 18-yard Championship at Clay Targets; 200 single targets, 18-yard rise. 9 o'clock a. m.

The American Professional Championship at Clay Targets, 200 single targets, 18 yards rise.

Third Day, Wednesday, August 13
Championship Day

The American Amateur Championship at double targets, 50 pairs, (100 targets). 10 a. m.

The American Amateur Championship at single targets, 200 targets, 16 yards rise, open only to the winners or runner-up of the American Trapshooting Association State Amateur Championship at the tournaments given by the several state associations, and the two Canadian associations, holding registered tournaments in 1919. This event will start promptly at 2 p. m.

Fourth Day, Thursday, August 14
Classification Day

The American Trapshooting Association Class Shoot, 100 single targets, registered, 16 yards rise. Contestants will be classified according to their official A. T. A. averages and their known ability, as follows:

Class A .....93% and above
Class B .....89% to 93%
Class C .....85% to 89%
Class D .....85% and below

East—West Team Race, the targets shot at in the Classification competition to comprise this event. Each team will be composed of ten men, the members of the teams being decided by the scores made in the American Amateur 18-Yard Championship event shot on Tuesday, August 12.

Army-Navy Championship, the scores made in the Classification event to count in this event. Open to men who were or are in the service of the United States and the Allied countries.

Fifth Day, Friday, August 15

The Grand American Handicap, 100 single targets, unknown angles 16 to 25 yards, shooting begins at 9 a. m.

In order that the Handicap Committee may carefully pass on all contestants in the Grand American Handicap, it will be necessary that all entries for the G. A. H. be filed on or before July 26. It is suggested that entries for the Classification Shoot on the Fourth Day of the tournament be mailed with G. A. H. blanks. Entries for this race will positively close on Monday, August 11, at 5 p. m.

The complete program for the Grand American Handicap Tournament will be issued in the very near future. Sportsmen who want to be certain to receive a copy should address The American Trapshooting Association, 460 Fourth Ave., New York.

The Handicap-Classification Committee for the Twentieth Grand American Handicap Tournament has been selected as follows:

Ben S. Donnelly, Chairman, Chicago, Ill.
George K. Mackie, Lawrence, Kansas.
Guy V. Dering, Columbus, Wisconsin.
Fred Plum, Atlantic City, N. J.
I. J. Andrews, Spartanburg, S. C.
W. H. Gooderham, Toronto, Ontario, Canada.
Fred S. Bair, Eureka, California.

This Committee will meet at the South Shore Country Club on Friday, August 8.

O. N. FORD
Manager Olympic Gun Club, San Francisco

AT THE LAKESIDE TRAPS

The official statement of the standing of the shooters at Lakeside has been compiled by O. N. Ford the popular manager of the Olympic Trap Shooters. It shows that Tom Wilkes has a perfect score to date. The following summaries show the standing of the shooters:

CLASS A

Tom Wilkes	300	Fred Bair	295
Frank Stall	297	Runner Up—	
Jack Nelson	296	C. D. McGettigan	292

CLASS B

Geo. Thomas	292	Dave Goodale	285
Paul Burns	291	Runner Up—	
J. S. Hestater	288	S. B. Gracier	283

CLASS C

J. B. Howell	291	W. A. Magee	270
J. E. Derham	278	Runner Up—	
Dr. Geo. Eaton	277	L. D. Gordon	266

CLASS D

James Talbot	283	H. Mestre	237
E. W. Bosqui	249	Runner Up—	
W. E. Golcher	238	Wm. Ohlandt	230

CLASS N—100 Birds

C. McGettigan	76	N. Pierce	62
B. Pierce, Jr.	73	B. McGettigan	58

The longest straight, Tom Wilkes.....116
The second longest straight, Fred Bair.....108
The most 25 straights, Tom Wilkes..... 15
The second most, Frank Stall..... 9

Manager Ford takes great pride in his boy's division and is confident that he has five boys who are capable of defeating any boys' division of any club in the world. He is contemplating a challenge for a telegraphic match. James Talbot, the boy wonder, in a gale of wind, broke 99 out of 100. L. C. and C. S. Howard are two others of his boys who bid fair to become wonderful shooters. Mr. Ford is now training a score or more of youngsters and takes great delight in their rapid progress.

OLYMPIC CLUB REGISTERED SHOOT

The first registered trapshooting contest to be held in San Francisco in the past 20 years is to be staged at the Lakeside grounds of the Olympic Club June 14-15. The best amateur and professional shots of the Pacific Coast have signified their intention of taking part in the event, which promises to eclipse anything of a like nature held west of the Rockies.

Some of the men of national reputation who will compete will be Fred Bair of Eureka, Dr. A. M. Barker of San Jose, A. G. Flickenger of Vallejo, H. G. Lorenson of Newman, Frank Mellus of Los Angeles, Orval Overall of Lemon Grove, H. R. Everding of Portland, Sam Sherman of Salt Lake, E. L. Ford of Ogden, H. P. De Mund of Phoenix, Tom Wilkes of San Francisco and J. F. Dodds of Los Angeles.

Dodds recently won the California-Nevada championship and will be the league representative at the Grand American shoot in Chicago in August. Lorenson was one of the country's highest shots last season, breaking 2608 targets out of 2700 shot at. He also made the longest run in 1918, scoring 345. This is the best since 1910. Mellus was State champion in 1917, and Bair won the event in 1918.

Among the professional shots who will take part will be Hugh Poston, who is the two-day consecutive tournament record holder, having clipped a total of 1594 targets. Others will be Charles Knight, Fred Willet, Clarence Haight, Len Hawxhurst, Dick Reed, Joe French, Otto Feudner, William Joslyn. Willet and Poston made up a challenge team that toured the entire country, sweeping everything before it and annexing a long list of professional team records.

Special preparations have been made by O. N. Ford, who has charge of the Lakeside grounds for the event, and several new traps have been installed. All scores made in the shoot will be counted in the official averages of the National Trapshooting Association. The event will open with a practice shoot on Friday. The official targets, numbering 150 a day, will be thrown on Saturday and Sunday and the shooters will be divided into classes, according to ability. A special women's event will be featured, and an invitation will be extended to soldiers and sailors to enter the catches. A big list of prizes has been put up. One is donated by Ford for the women.

ELMER E. SHANER RETIRES

For 26 years Elmer E. Shaner managed the affairs of the Interstate Trapshooting Association, taking hold in 1892 when conditions were chaotic and retiring this year after trapshooting had reached the front ranks of sporting pastimes.

Shaner is the man who put the "trap in trapshooting." He brought order out of chaos in the early days through a determination to do right by all at all times. Everyone got a fair deal from Elmer Shaner and the present satisfactory condition of the sport is a tribute to him. Trapshooting never took a backward step under his guidance.

With the retirement of Shaner as manager the Interstate Association ceased to exist and the American Trapshooting Association came into being. It is our belief that Mr. Shaner knows more about trapshooting conditions of the past and present than any other individual, and we therefore asked him to prepare a brief history on trapshooting, which he has done in his masterly way.

Probably there is no one who knows more about trapshooting conditions of the past and present than Mr. Shaner, whose popularity with shotgun enthusiasts extends from the Atlantic to the Pacific, in fact wherever traps are sprung.

UNIFORM LAWS TO PROTECT MIGRATORY BIRDS

(Continued From Page 8)

spring by incessant gunning. At the end of the five years during which this law was in operation, state game commissioners and leading sportsmen were practically unanimous in their expression that wild fowl were more abundant than at any time in the preceding twenty-five years.

The marked improvement under this law instilled a new spirit into the advocates of bird conservation, and showed the wonderful possibilities under a Federal law broad and comprehensive enough not only to protect the birds during the mating and breeding season, but to equalize hunting privileges and opportunities by more uniform state laws.

To protect birds further a treaty affecting birds migrating between this country and Canada was concluded in 1916 between the United States and Great Britain. Altogether 537 species of migratory birds are included in the various families protected by the treaty. It provides for continuous protection for migratory insect-eating birds and certain other migratory non-game birds and protection for five and ten years for certain migratory game birds. The hunting season for other migratory game birds is limited to a period not exceeding three and one-half months between September 1 and March 10 of each year, except shorebirds in certain Northeastern States, where such hunting season must be between August 16 and February 1. Regulations promulgated under the Act of Congress approved July 3, 1918, to give effect to the treaty, established open seasons on shorebirds in such Northeastern States from August 16 to November 30, and with this exception no migratory game birds can be hunted in the United States between February 1 and September 15, inclusive, of each year. The treaty does not, however, include some valuable birds, such a quail, pheasants, grouse, and wild turkeys. These still remain wholly within the jurisdiction of the states. Approximately 220 species of migratory birds are also excluded from the terms of the treaty, because they are not specifically named or do not feed chiefly or entirely on insects.

The Federal laws for the protection of migratory birds are expected to go a long way toward insuring a supply for all time, but the interests of the states are so inseparably related to the interests of the National Government that all efforts to conserve these birds must be co-ordinated for full success, Federal officials point out. Much already has been done along this line. The open seasons for wild fowl in twenty-five states have been made to conform to the Federal seasons, and in many other states game commissioners and sportsmen have manifested a spirit of co-operation in game conservation that indicates a general sentiment favoring uniformity in state and Federal laws.

"A HITCH IN TIME"

So much has been written and said of late about draft horse power that I feel there is not much left to say. However I wish to add my mite of praise to the new development of draft horse efficiency through the medium of the multiple hitch. "I have seen with mine own eyes" and that, in reality, is the only absolute way to become convinced concerning the practical utilization of this unique method of using, to the best advantage, the draft horse power that is or has been up to this period, at least partially, latent on the forms of America. We all know that wherever agriculture is pursued, there must be, of necessity, a certain amount of horse power on hand, no matter how many or how few tractors are in use. We cannot do all our farming, preparing the seed beds, cultivating the growing crops and harvesting the same without some aid from "man's best friend"—the horse.

And now come Wayne Dinsmore and Prof. White showing us the way to utilize our horse power, so that we will not have to consult our banker and arrange our finances to purchase a gas driven, instead of a grass driven, power.

The fact that the horse must be a part of every farmstead is undisputed, and now that we have been shown how we can economically utilize this power to do all our work, heavy or light, without additional expenditure, we are indeed in a fortunate position. The flexibility of the multiple hitch to suit any size field or any size farm is a great item.

When the idea was first broached to me, I was as skeptical as any doubter, but after seeing just what this hitch will do and using it as I have done on my own farm, I am thoroughly convinced as to its practicability, flexibility and economical usage in our everyday farming by everyday farmers.

The other day I stood watching one of my teams in the field, and when I noted the ease with which those six, big Percheron mares pulled that two bottom 14" gang plow, breaking a heavy clover sod, the thought came to my mind as to just what those six mares meant to me in a financial way, to say nothing of the pleasure of seeing and owning those good old brood mares, so I took out my pencil and jotted down a few figures that I can vouch for as being accurate.

The six mares that happened to be hooked that day had an average age of 11½ years, had been owned by me an average of 6 years, and their initial cost to me represented the sum of $3,317.50, or an average of $570.00 each. During my ownership of them they had produced offspring that either have sold for cash, or I have been offered cash for same, and have retained them for my own stud, to the amount of $8,685.00, or an average sale of produce of $1,470.83 per mare. I know that if I offered the six for sale tomorrow morning for $3,000. I would not have one left by nightfall, and I know that these faithful workers have more than earned their keep by their daily toil in the fields, to say nothing of the tons of manure they have produced to fertilize the soil of my farm.

The interest on my investment of $3,317.50 for these six matrons, at 6 per cent for 6 years amounts to $1,196.30, deducting this from the $8,675.00 realized from the sale of their offspring, still shows a net profit of $7,489.70 or OVER $850.00 more THAN DOUBLE THE ORIGINAL COST OF THE MARES. This does not take into account the show yard winnings of these mares or their produce, which amounts to several hundred dollars.

So that, while I have had my "downs" and "ups" in the breeding game, losing foals, the same as other breeders do, from time to time, I cannot help but feel that I made a good investment, and now with the coming of the simplified hitch, I feel much more secure in my investment than if it were tied up in a gas power implement, that could neither produce foals nor fertilizer, while it was doing part of my work on the farm.

W. H. BUTLER.

BIG PRICES TO COME FOR DRAFT HORSES

Harry McNair, of Ellsworth & McNair, Chicago, a firm which has sold over a quarter of a million horses within the past five years, is an acknowledged authority on horse markets. April 29, 1919, he said:

"The farmers who breed their good mares, weighing 1400 pounds or over, to sound draft stallions of ton type, and who feed the colts so that they will make good, sound drafters, weighing 1700 pounds or over at maturity, will get big prices for all such horses before they are five years old. Prices on big, sound drafters will reach record-breaking prices before a half a decade rolls by, and the men who fail to grasp the present opportunity will have only regrets to harvest in the future."

Breed your good draft mares and hold fast to the young drafters you have. Don't let the clamor of the thoughtless disturb you. The draft horse has been relegated to oblivion at least three different times in the last centry alone, but there is more need for good drafters today than at any time in history.

Professor Handschin of the Illinois Experiment Station has but recently made public the results of seven years' cost studies on Illinois farms. His conclusions briefly are that on farms under 260 acres, draft horses furnish the most efficient and most profitable source of farm power, and that on farms over that size, 75 per cent of the work will still be most efficiently done by horses.

Ninety per cent of all farms in the United States are under 260 acres in size. A hint to the wise is sufficient.

WAYNE DINSMORE.

THE TIMERS

(By W. H. Gocher)

Of all racing officials the timers receive the most unfavorable comment. Three are required at each meeting, two of them being expected to time the leading horse and the third the second, so that in the event of the winner being disqualified, they will have the time of the second horse to announce and place in the record. But even with this precaution there are heats when all of them fail to act. In that event no time is announced or recorded, as unofficial time is barred. One of the most prominent cases of this kind occurred in the first heat of a meeting at Glen Falls, N. Y., in 1900 when it was claimed that a horse named Henry S. won a heat below 2:10 but the timers failed to start their watches and no time was given out.

The timers are required to take the time of each heat. They start their watches when the pole horse or the horse selected to score by passes the starting point, two of them stopping when the leader finishes and the third when the second horse passes the wire or winning post. The time so taken is entered on a timer's certificate, signed by the timers, and handed to the judges to be announced and entered in the official record, which each of them is required to sign before the close of the meeting. This is all that the racing association and the spectators expects but if one half of the tales that are told are true there are race meetings at which they fail to do this. In other words, after timing a heat, it is alleged that they add several seconds and by so doing keep the winning horse from taking up the penalty that goes with the victory.

This is also one of the most incomprehensible situations in the racing world, as it must require more than ordinary assurance for three men, all of whom are as a rule well known in the community, to sit in the timers' or judges' stand each afternoon during a race meeting and give out time several seconds slower than their watches register. Also when doing this they are aware of the fact that there are hundreds of people with accurate watches on the grounds and in the grand stand, who know that their announcements are false. The public loses confidence in men who do this kind of work.

Whenever a case of this kind comes up—and fortunately it is almost unknown on the mile tracks and very rare on the eastern half-mile tracks—the memory of an instance related by David Bonner comes to mind. One day while he was officiating as a timer, a New York merchant, who owned a horse that had won a fast heat, came to the stand and requested Mr. Bonner to keep him in a class that was several seconds slower than the time made. As soon as Mr. Bonner understood the situation, he said to the owner, "My dear sir, if I have anything that you want and I can give it to you, take it, but if you expect me to be a party to giving out false time and signing my name to a falsehood in the judges' book, you are not the kind of a man I took you for." The owner apologized and afterward said that he never considered it such a serious matter until he had an opportunity to look at it from the standpoint of a timer.

Each season there are races reported in the Year Book in which the time for each heat of the winner is the same. Also several horses can be found that won all their races in the same time, regardless of the weather or track conditions. There were three timers at each of these races, and each of them certified that the time was correct, while anyone with a grain of racing experience knows that it is almost impossible. These men also went home satisfied that they had done a good day's work. What must they think of it the next day when they pick up a morning paper and read the report of the races, and what would they say if they heard what the owners, drivers, who did not win, and spectators said about them? This kind of work has done more to make the public believe that racing is dishonest than anything connected with it.

When the winrace system was adopted, it was expected that misrepresentation would be stamped out, as only the time of the winner is considered in determining eligibility. It still prevails, however, in the west and south and will, no doubt, continue until the moral fibre of the timers is strengthened to the point where they will refuse to advertise themselves as public frauds at the solicitation of a few drivers and owners.

When the time is announced correctly, horses after a few meetings class themselves and the public has an opportunity to see spirited contests between competitors which are closely matched. A fast winrace never injured a good horse. It is, however, a serious handicap for a counterfeit and the sooner an owner finds it out the better. While its absence might reduce the field a trifle, its presence does not add anything to the attractive side of racing, as a spectator is not interested in a horse that flashes out for a heat and is fighting the flag during the balance of the race.

Racing is a sport in which everyone expects to get an even break, or as an old saying goes, "All are equal on or under the turf." Everyone expects to have a winner some day but that day will never come to a man who is compelled to race week after week against horses that he has forced out of their classes three or four seconds and which are protected by the timers.

All that the rules of racing require of a timer is to be honest. That is all the world expects of a man in every day life. "Do right" is the creed of every faith boiled down to two words, and a timer should see that his backbone as well as his watch is regulated to live up to it before he pins on a badge at a race meeting.

THE PACING QUEEN

Lou Dillon and Miss Harris M. are the only mares that have beaten two minutes, the former trotting in 1:58½ against time while the pacing queen made a record of 1:58¼ in a race at Toledo last season. Alonzo McDonald brought Miss Harris M. out in 1914 as a two-year-old. She was at that time a trotter and in her first and only race at that gait finished second to the Kentucky Todd colt Toddling in 2:26¾ at Dallas. At that time McDonald was on his way to Los Angeles, where he spent the winter of 1914-15. During that period he converted the Peter the Great filly to a pacer. She made her first start at that gait the following June at San Francisco during the Exposition. The race in which she appeared was won by Fleeta Dillon, Miss Harris M. standing third in the summary, while she also finished second in the deciding heat in 2:11¼.

After the close of the June meeting at San Francisco, Miss Harris M. was shipped east with the balance of the McDonald stable to fill a few three-year-old engagements, in three of which Guy Rea defeated her with General Todd. The pair met for the first time at Grand Rapids, where the Todd colt won in 2:06. At Indianapolis she forced him out in 2:04¼, while at Columbus he won again in 2:04¾. In the interval McDonald picked up a class race with Miss Harris M. at Syracuse, and defeated the Bingen filly Sad Thoughts in 2:07¼ at New York. Miss Harris M. was also distanced at Montreal, it being the only race in her career in which she finished behind the money.

As a four-year-old Miss Harris M. served notice on the public that she had aspirations to be a champion by winning the Chamber of Commerce $5,000 Purse at Detroit in 2:01¼, 2:01¾, 2:04½. In this event, she defeated Sadie Densmore, The Savoy, Billy Dale, Ben Earl, Lillian T., Roan Hal and The Problem. She also won all of her other engagements that season except her first race at Cleveland which was won by Goldie C., while Roan Hal defeated her at Syracuse and Columbus, the latter getting a mark of 2:01¾ in his second race.

Miss Harris M. dropped into the Grand Circuit free for alls in 1917 at the Columbus summer meeting, where she finished third to Single G., Russell Boy being between her and the winner. Single G. also topped the summary in 2:00¾ in the race in which she started at Cleveland the following week. From that point, however, the Peter the Great mare had everything her own way, winning at Philadelphia in 2:02½, Indianapolis in 2:03¼, Springfield in 2:05, Columbus in 2:01¾, and Lexington in 2:00¾, with Single G., Ben Earl, Hal Boy and Russell Boy in the field. At Atlanta where she made her last appearance that season, she not only won a race but also reduced her record to two minutes in a special with Hal Boy.

In 1918, when the Grand Circuit opened, Miss Harris M. appeared as a member of Murphy's stable, she having been sold in the interval to Paul Kuhn of Terre Haute. Murphy won his first start with her at Cleveland in 2:02¼ and finished third to Single G. at Kalamazoo. The following week the pair appeared at Toledo with William and Russell Boy in what proved to be the fastest three heat race on record and the only one in which all of the heats were finished below two minutes. Miss Harris M. won the first heat in 1:58¼, her record, and Single G. the next two in 1:59¼ and 1:59¾. Single G. also won from her on her next appearance at North Randall in 2:01¼. From that point she followed the Grand Circuit east and won at Philadelphia and Poughkeepsie. Rain interfered with her engagements at Boston and Hartford, while at Syracuse she paced a mile in two minutes over a heavy track. She was also fortunate in getting easy races at Atlanta and Columbus, while at Lexington, Single G. defeated her in one event and she trimmed him and Lillian T. on her second appearance.

During her four years on the turf Miss Harris M. has started in thirty-seven races of which she won twenty-two, was second in nine, third in four, fourth in one and unplaced in one. In her races she trotted two and paced one hundred and one heats, of which she won fifty-six, while the summaries of her engagements show that the race at Toledo in which she made her record is the only event in which she won a heat and failed to win the race.

As has been stated, Miss Harris M. is by Peter the Great, while on the side of her dam, Mary Allen Stout, she has four standard crosses of trotting blood. This mare was got by Ondale, a son of Onward, out of Maud Macey by Macey, a son of George Wilkes. Rachel Buckner, her third dam, was got by Roseberry, a son of Strathmore, out of Hannah, by Caliban, while her fifth dam, Flora, was got by the old time sire, Edwin Forest, whose name appears in the pedigrees of So So and Geneva.

FOR SALE
SEVEN HEAD OF JACKS

In good condition and ready for service. Will trade for cattle, work horses or mules. Inquire or address: D. A. ALLEN, Race Track, Newman, California.

THE GREAT BULL MATADOR SEGIS WALKER

Carnation Stock Farms have on their farm at Stuart, Washington, about seventy daughters of the great bull Matador Segis Walker and in my trips around the various farms, where Holsteins are produced, I have never seen such a large number of beautiful type dairy animals, all of such a pronounced type, showing such uniform individuality, produced by any one sire, as these seventy daughters of Matador Segis Walker.

Two high test daughters of Matador Segis Walker are:

MATADOR HENGERVELD BESS No. 306081, who freshened at the age of 3 years, 8 months and 9 days, producing 600.5 lbs. milk containing 32.20 lbs. fat in seven consecutive days. With this production she is the 43rd cow to obtain place in list of Holstein-Friesian cows with productions exceeding 32 lbs. fat in seven days, which computed on the 8 per cent basis is equal to 40.25 lbs. butter. This animal was sold by Carnation Stock Farms at the Milwaukee National Sale, held June 6, 7 and 8, 1918, and was purchased by Oliver Cabana, Jr., of the Pine Grove Farms, Elma, N. Y. Mr. Cabana considers this animal to be one of the best he has on his farm and would not consider selling her at a private sale. She will be sold at his dispersal sale, which is to be held the latter part of May, 1919. It is expected that this cow will bring not less than $25,000.

MATADOR SEGIS PAULINE JENNIE No. 306084 freshened at the age of 3 years, 7 months and 19 days and, after nearly dying with milk fever, made the wonderful record of 524.7 lbs. milk containing 29.87 lbs. butter in seven days and for thirty days made 2251.5 lbs. milk containing 117.786 lbs. butter. This animal is now running on semi-official test. For the month of February she gave 2203.0 lbs. milk and for the month of March 2295.3 lbs. milk. This cow is a wonderful individual and of a temperament that proves positively to the Carnation Stock Farms that at her next freshening she is going to materially increase her last record. There is no doubt but that she would have made much better than 30 lbs. this last time, had she not been thrown off her production by nearly dying with milk fever.

The sons of Matador Segis Walker are also of the same pronounced type, that can be readily distinguished from those of other sires. A large number of these sons have been placed in various sections of the West and are all making good.

It would be hard indeed to search the country over and find a sire with such a showing in the short space of time that he has been at the Carnation Stock Farms and in sending this article and the picture of this great bull to the Breeder and Sportsman, I feel that I am doing the dairy interests of the great West a favor, as I believe every intelligent dairyman will read the above with interest.

C. A. HARRISON.

STABILIZED MARKETS FOR LIVESTOCK AND MEATS

To stabilize marketing conditions as far as possible is the purpose of the Bureau of Markets, United States Department of Agriculture, in operating a reporting service on live-stock and animal products. Producers, consumers, and members of the trade are furnished market quotations on live stock and meats based on intelligible uniform classifications. With this information they are able to determine the relative margin existing between the prices of live stock and dressed-meat prices. In addition, the readers of the reports are kept informed as to the various factors affecting the sale of live stock and meats, such as supply, demand, movements, trade preferences, etc.

The market-reporting service was begun in the fall of 1916 and has been developed rapidly. At present there are 17 service centers connected by leased wire, each of which distributes daily, weekly, and monthly reports. These include daily reports on meat-trade conditions and wholesale meat prices in Boston, New York, Philadelphia, Washington, Pittsburgh, San Francisco, and Los Angeles; daily reports on live-stock loadings; daily reports on the estimated receipts and prices of live stock at Chicago and Kansas City; reports of live-stock movements in grazing and feeding sections; monthly reports on stocks of frozen and cured meats and frozen poultry; monthly reports on live-stock receipts, shipments, and local slaughter at the public stock yards of the United States; and monthly estimates on the supply of marketable live stock.

On the leading eastern and Pacific Coast meat markets information is gathered daily by a corps of specialists on the fresh-meat supply, including beef of various grades, veal, pork, lamb, and mutton. The information is assembled and transmitted over the Bureau's leased wires to its various branch offices at market centers, where it is posted on bulletin boards and distributed free of charge by messenger and by mail to everyone who desires it. Such information fortifies the commission man as well as the producer with information which formerly was possessed only by the large meat-packing institutions. As applied to fresh meats, this service offers complete information to the public concerning the supply and the values of all commercial grades. It eliminates secrecy, so that when prices of meats are high it is possible to determine the reasons therefor.

Although at present these facts are utilized principally by those actively engaged in some branch of the meat trade, it is believed that ultimately the general public will utilize this knowledge and use it as a check on those dealers who reduce consumption by an unwarranted margin of profit.

In the past receipts of live stock at the various markets were estimated by unofficial agencies, being based on such information as could be obtained from the transportation companies, but frequently representing only guesswork. Although under Government supervision these data come from the same source, the information obtained is so accurate and complete that nothing is left to guesswork. The superintendents of all railroads carrying live stock wire each night to the Bureau of Markets' Chicago office the number and destinations of all single and double deck cars of each class of live stock loaded in the United States in the preceding 24 hours. At Chicago the information is tabulated and distributed to all points reached by leased wires. The dissemination of this information has operated to stabilize prices. These daily reports show the movement of live stock not only to the large market centers but also to the smaller slaughtering establishments. This information is supplied to the producer concerning the opening up of new channels of trade, and the knowledge of the demand by smaller plants has a tendency to stimulate competition among buyers and creates a wider outlet with better returns to producers. In December, 1917, the Bureau of Markets was able to show that two and a half millions of sheep were on feed west of the ninety-seventh meridian, exclusive of Oklahoma, this information being based on loading reports. With such information available, the amount of live stock normally moving from production areas being known, it is possible to regulate the supply of cars needed and to determine the probability of car shortages for any particular district.

The live-stock loading reports facilitate and make more accurate the determination of receipts. In the past it has been shown frequently that unofficial estimates have been as much as 200 per cent greater or less than the actual receipts. With such wild estimates eliminated, fluctuations are bound to be decreased and markets stabilized in a corresponding degree. The live-stock shipper can obtain information from these reports which will enable him to defer his shipment to any particular market or to forward it to a market that is in no danger of being glutted. The better distribution of live-stock receipts resulting from information obtained from the loading reports enables commission men and buyers to render better service in the handling of live stock after it arrives at the stockyards. Heavy receipts arriving unexpectedly create congestion and confusion, which in turn invariably result in unnecessary shrinkage and in costly delays working to the disadvantage and loss of the producer and thereby discouraging production. A better distribution of live stock not only relieves congestion at live-stock centers, but also effects increased efficiency in handling the live stock in transit. Improving the system of distribution makes fewer cars necessary for the handling of the same number of animals and expedites their delivery to their respective terminals.

Telegraphic bulletins issued from the Chicago and Kansas City live-stock markets constitute an important branch of this live-stock reporting service. These reports are issued from time to time during the market hours of each day and record the actual as well as the estimated arrivals of live stock and the exact condition of the market as developed at the time each message is sent. This information is transmitted over leased wires to other markets where the Bureau of Markets maintains branch offices, and there the information is displayed on bulletin boards and is furnished to all who make request for it. Part of this material is furnished to the commercial news departments of the telegraph companies and in that way is disseminated widely. From similar sources the daily papers get live-stock reports on these two markets. It has been observed that the reports emanating from the bureau at these markets conflict in many cases with those obtained from other sources. It should be remembered that the bureau report gives only the actual facts in the case, while other reports in many instances are based either on conjecture or incomplete information. More and more all markets outside of Chicago and Kansas City are relying upon the official daily reports, and as they are posted conspicuously in all leading markets and delivered by messenger and mail from 17 branch offices the service becomes of unquestioned value to the producer as well as to the buyer. It is a service that helps the commission man to obtain full value for live stock consigned to him, basing those values on prices at the controlling markets of the country.

The Bureau of Markets has been efficient also in collecting and distributing information as to the movements of live stock to and from grazing and feeding districts. Work of this nature provides reliable information concerning the potential meat supply, while it also tends to lessen market congestion and prevent violent price fluctuations. It should be of particular value in regulating the movements of fat stock from these districts to market. The Bureau also issues monthly information on the supplies of frozen beef, frozen lamb and mutton, frozen pork, cured beef, dry salt pork, pickled pork, lard, frozen poultry, and miscellaneous meats in storage, according to the principal geographical divisions of the United States. Furthermore, the Bureau's monthly reports on receipts and shipments of live stock at stockyards at present cover records from 81 stockyards, the classification being such as to show the number of cattle shipped and hogs slaughtered, as well as the number shipped to other markets each month. In addition, valuable data are received from 55 stockyards on the stocker and feeder movement and this information is released in the monthly reports. The producer, by knowing something of the volume of distribution, is in a better position than ever before to determine the length of the feeding period which will afford him the most profitable returns and to direct his shipments to markets that are not congested. The Live Stock and Meat Trade News, a weekly bulletin concerning items relating to the live-stock industry, is also widely distributed and of particular interest to live-stock trade and farmers in general.

All of the reports referred to in this article are furnished free to any who will request them from the Chief, Bureau of Markets, Washington, D. C.

TWO-MONTHS-OLD BULL CALF BRINGS $25,000

A two-months-old Guernsey bull calf was sold at auction at Madison, New Jersey, May 15th for $25,000. A record price for any animal of its breed. Oaks Farms and Hugh Bancroft both of Massachusetts combined to make the purchase. The auction was at Florhams Farms and eighty-three Guernseys including show champions brought a total of $180,275 an average of approximately $2172.

HOLSTEIN COW PRODUCES 51.93 POUNDS BUTTER IN 7 DAYS

Rolo Mercena DeKol 30313 (C.H.B.).

a 5-year-old Holstein-Friesian cow, owned by J. B. Hanmer of Norwich, Ontario, Canada, has just made the startling record of 51.93 lbs. butter in an official 7-day test, and 200 34 lbs. butter in a 30-day test. Her milk production for the 7- and 30-day period was 738.90 lbs. and 2920.50 lbs. In 60 days she showed a production of 337.49 lbs. butter from 5795.10 lbs. milk. These records were made in a test conducted under the direction of Prof. H. H. Dean, of the Ontario Agricultural College, and retests were made by officials of the Holstein-Friesian Association of Canada.

TWO MILLION TONS MORE OF MEAT IN 1918

The report of the United States Bureau of Animal Industry shows that:

"The total number of cattle slaughtered in 1918 is estimated at 15,750,400," says the bureau, "as against 13,723,900 in 1917. Their average weights were practically the same for both years, and the beef produced from them was 6,686,000,000 pounds in 1917 and 7,641,000,000 pounds in 1918. This was a remarkable achievement, as it hardly would have been credited that beef growers could increase their production a billion pounds in one year.

"The hog matures quickly, therefore a much more rapid increase would be looked for than was the case with cattle. Even so, the results for 1918 can be described only as stupendous. The hogs marketed in 1918 numbered 69,854,700, as against 57,483,800 in 1917. Furthermore, the average weight was 9½ pounds more per hog in 1918. Thus when the animals are turned into pork and lard we have a total production of 11,225,664,000 pounds in 1918, as against 8,478,289,000 pounds in 1917, an increase of 2,747,355,000 pounds, or 32.4 per cent, nearly one-third."

Striking increases in exports are also shown by the bureau. Beef shipments abroad in 1918 were 94 per cent more than in 1917, the chief 1918 items being 514,000,000 pounds of fresh beef and 141,000,000 pounds of canned beef. Exports of pork and lard in 1918 amounted to 2,279,287,030, which was 71.7 per cent more than the quantity sent abroad in 1917.

The bureau shows that in the aggregate more meat by far is eaten in the United States than in any other country in the world, although some sparsely settled countries raising much meat have a larger per capita consumption. It also says that there is room in the United States for a great expansion in the use of mutton and lamb.

CALVES FOR BUILDING DAIRY HERD

Young calves from good dairy cows are a satisfactory foundation for starting a dairy herd, in the opinion of United States Department of Agriculture specialists. Ordinarily the method advocated is to grade up common cows with a pure-bred bull, requiring a number of years of patient selection and breeding, a period sometimes discouraging to an energetic dairyman. Frequently this causes farmers who want results too quickly to change breeds.

The Hartford Live Stock Insurance Company through their agency C. A. Harrison at Seattle, has paid the Carnation Stock Farms $5000 insurance on Albina Josie. This cow was illustrated in our issue of last month. The insurance had only been taken out a few days previous to her death. Albino Josie was valued at $15,000.

SAVE-The-HORSE
(Trade Mark Registered)

Over 250,000 Users

Think of it—over a quarter of a million—Satisfied users, Save-The-Horse has demonstrated its unequalled power by consistently curing thousands of so-called incurable, complicated and stubborn cases.

LAME NO MORE

Save-The-Horse Remedy is sold under a Signed GUARANTEE-BOND, to refund money if it fails to permanently cure SPAVIN, Ringbone, Thoropin, or Shoulder, Knee, Ankle, Hoof, or Tendon Disease; Horse Works. In liquid form—more penetrating than paste or blisters. It acts on diseased bone, calcareous deposit and tissue. Our FREE Book—96 pages, Illustrated—tells how to diagnose easily and treat 58 kinds of lameness. Every horse owner should write for this BOOK, Expert Veterinary advice, and copy of Signed Guarantee—ALL FREE.

A "365" Day Liniment

YOU ARE SAYING TO YOURSELF—"If I only knew of something to stop that Backache—help my Rheumatism—cure my Neuralgia, I would send and get it at once."

Get It. Relief. Gombault's Caustic Balsam will give you immediate A Marvelous Human Flesh Healer and a never failing remedy for every known pain that can be relieved or cured by external applications. Thousands testify to the wonderful healing and curing powers of this great French Remedy. A Liniment that will soothe, heal and cure your every day pains, wounds and bruises.

Gombault's Caustic Balsam
The Great French Remedy
Will Do It

It Helps Nature to Heal and Cure. Penetrates, acts quickly, yet is perfectly harmless. Kills all Germs and prevents Blood Poison. Nothing so good known as an application for Sores, Wounds, Felons, Exterior Cancers, Burns, Carbuncles and Swellings.

"I had a bad hand with four running sores on it. The more I doctored the worse it got. I used Caustic Balsam and never needed a doctor after that." —Ed. Rosenburg, St. Ansgat, Ia.

Mrs. James McKenzie, Edina, Mo., says: "Just ten applications of Caustic Balsam relieved me of goitre. My husband also cured eczema with it, and we use it for corns, bunions, colds, sore throat and pain in the chest."

A Safe, Reliable Remedy for Sore Throat, Chest Cold, Backache, Neuralgia, Sprains, Rheumatism and Stiff Joints. Whenever and wherever a Liniment is needed Caustic Balsam has no Equal.

Dr. Higley, Whitewater, Wis., writes: "I have been using Caustic Balsam for ten years for different ailments. It has never failed me yet."

A liniment that not only heals and cures Human Flesh, but for years the accepted Standard veterinary remedy of the world.

The price, $1.75 per bottle, at all Druggists, or sent by us express prepaid. Write for free booklet and read what others say

THE LAWRENCE WILLIAMS CO., Cleveland, Ohio

Expressive Mac
2:25½

A. T. R. 41513. Licensed Pure Bred, Cert. No. 1041.
SIRE OF
Clara Mac 2:04½ Vera Hal 2:05
Madam Mac 2:07¼
Harry Mac 2:07¼

Only stallion offered for service in California to sire two in 2:05, four in 2:10
Also sire of Eddy Mac (3) 2:29½, trial 2:13; Nellie Mac trial 2:09½ trotting, 1915, and others with fast trials.

Son of McKINNEY 2:11¼ (sire of 30 in 2:10) and the great broodmare, EXPRESSIVE (3) 2:12½ (dam of 6 trotters, 2 in 2:10) by ELECTIONEER 125. Ideal in color, size and conformation—seal brown, height 16½ hands, weight 1275 pounds. Permanently in the stud at my ranch three miles south of Selma at $25 the season, usual return privilege, or $35 to insure. Good pasture at $2.50 per month (no barbed wire fences), and best of care given mares but no responsibility assumed for accidents or escapes. Address for all
J. H. NELSON, Selma, Cal., P. O. Box 361.

THE STANDARD TROTTING STALLION

HEALANI 56150

WILL MAKE THE SEASON 1919 AT THE

DIXON RACE TRACK

WITH RETURN PRIVILEGE

FEE, $20 FOR THE SEASON

HEALANI is by Zolock 2:05¼ (McKinney's fastest son), dam Queen Derby 2:06¼, by Charles Derby (sire of Jim Logan 2:01¾, Don Derby 2:04¼, and 8 others in the 2:10 list); second dam Addie Ash, by Indianapolis; third dam Addie H., by Ashland Chief.

HEALANI 56150 is not only highly and fashionably bred, but is a handsome and stylish individual. He has size, style and quality. Without doubt he is one of the fastest speed inheritance stallions (if not the fastest) on the Pacific Coast. He is coal black and absolutely sound, without a spot or blemish, and one of the best mannered horses living, so gentle a lady or child can handle him. Will stand with his head over stall door and pays no attention to mares being cross tied in front of his stable door. This horse was worked some last summer and fall, after 14 months without having a harness on him, and trotted miles in 2:26, halves in 1:09, and has and can now show two minute speed and better for ⅛ of a mile. Has been jogged 5 or 6 miles a day all winter and looks and feels good and, no doubt will trot a mile close to 2:10 or perhaps better this fall. He is a nice going line trotter and can carry his speed. He is only 8 years old.

Best of care taken of mares, with no responsibility assumed for accidents or escapes. Address all correspondence to

The State Agricultural Society is the first to issue a racing program in California this year. The program is published in the advertising columns of this paper. Eighteen harness horse events are listed, and the total amount offered in purses and stakes is $22,000.

The races are all on a three-heat plan, with five per cent to start and five per cent from money winners. Rules of the National Trotting Association govern.

It has been announced that racing will be given at the Fresno District Fair, Riverside and Ventura, but so far nothing definite has been done in regard to classification and purses. If the various associations in this state which have decided to give meetings would announce their programs earlier in the season it would keep a number of horses here that on account of the uncertainty as to whether or not there will be anything to race for in California, are sent East and North, where racing is assured and definite classes decided upon.

GOVERNMENT TO CARRY STOCK EXHIBITS TO FAIRS AT HALF RAIL RATES

Horsemen and stockmen will be gratified to learn that the United States Railroad Administration has issued rules, effective May 15, 1919, governing the handling of exhibits for expositions and fairs, whereby livestock chiefly valuable for breeding, racing, show purposes and other special uses will be granted what amounts to a half rate in making the fair circuit. This applies to horses, cattle, sheep and swine.

The rules stipulate that when exhibited at one exposition or fair and then returned direct to point of origin, said livestock will be carried at full tariff rates going and free returning, if returned within thirty days after the close of the exposition or fair at which they are exhibited. The bill of lading therefor must be accompanied by certificate of the secretary of such exposition that such animals were exhibited and have not changed ownership. This will apply where exhibitors make only one fair.

The rules further provide that when moving over a circuit of expositions or fairs, the animals will be way billed at the regular tariff rate to each point of exhibition, and at the close of each fair, on presentation of a certificate from the secretary of the fair that such animals were exhibited thereat and that no change of ownership has occurred, the inbound charges will be reduced to one-half the tariff rates. When reshipped from the last point of exhibition to the original point of shipment via direct routes, and the bill of lading is accompanied by similar certificate from the secretary of the last fair or exhibition, one-half of the tariff rates will be applied on this final shipment home. This permits all exhibitors of pure-bred livestock to make a single fair or a circuit of fairs at one-half the cost heretofore encountered, for the majority of shippers, particularly horsemen, have had to pay full fare both going and returning in years gone by.

The "joker" in the rules is a stipulation that the animals will be carried at this reduced rating only when carriers' liability is limited to certain specified valuations—$150 on horses, $75 on bulls, etc., down the line. This will make it necessary for shippers to either run their own risk of loss or carry insurance on exhibition stock in some of the regular insurance companies. It will be far cheaper to insure exhibition animals, and thereby take advantage of the reduced rates, than to pay full freight rates going and returning.

All shippers should proceed at once to see that their men in charge of exhibits have copies of the freight tariff giving full details—Boyd's No. 145, showing rules governing the handling of exhibits for expositions and fairs, page 5. Any local railroad agent can obtain this for shippers.

Chief credit for obtaining these concessions must be given to the American Association of Fairs and Expositions, which, with others interested, has been at work to obtain this concession for more than three years past. The rulings apply to all railroads under Federal control.

"EXILE" SAYS CALIFORNIA RACING WITH BETTING OUGHT TO COME BACK

"Exile," the thoroughbred turf writer of the Thoroughbred Record, published at Lexington, Ky., discourses on the resumption of California racing, with the betting adjunct, thus:

"Does the public want racing? The answer must be the record attendance of both the Lexington and Louisville spring meetings. Of course the public wants racing. There is nothing so enjoyable, health-giving or invigorating as an afternoon well spent in a visit to some well appointed race course, where equine giants are striving for the mastery.

"Racing conducted as racing should be, for the improvement of the thoroughbred horse, is the best form of entertainment and sport under the sun. Truly, abuses, in the past, were permitted to creep in, but these abuses here in Kentucky and in the east have been largely eliminated, due in a great measure to the appointment of a state racing commission for Kentucky.

"What has been done in Kentucky can also be done in California. No one could object to race meetings, even with the betting adjunct, of short duration. Race meetings at which the best to be had take their part, and their fortunate owners vie with one another in friendly rivalry.

"Yes, yes, racing's the thing, for racing promotes a feeling of good fellowship all around—men as well as horses must act the part of the thoroughbred. The give and take of the race course broadens any man's views, and for those who wish to wager on the result of the running of a race, surely this is their business, and no concern of others. However, once commercialize the sport of racing, everything is gone and lost forever.

"Blood-stock breeding I know to be carried on even now to a limited extent in the golden state of California. All credit, then, to Messrs. Macomber, Rosseter, Cebrian and others who have not permitted the thoroughbred light to be entirely extinguished, and most of us now feel assured that it won't be long ere racing and consequently blood-stock breeding will again flourish in the state of California.

"In bygone days many the good horse that raced, stood for service and was reared in California. Here it was that the record price son of Lexington, Norfolk, had his abode; here, too, it was that Ten Broeck's conqueror, Mollie McCarthy, was bred; the late James B. Haggin conducted an extensive nursery at Rancho del Paso; Senator Leland Stanford, now, too, past and gone, bred many a grand horse; E. J. Baldwin maintained a wonderful haras down Los Angeles way.

"In the old days the name of the California breeder was legion. Why not, then, bring back those good old days when the thoroughbred horse was a big asset to the state of California—a state which has everything in the way of climate, soil, water, room and herbage, so essential to the best development of the horse? Yes, indeed, many the good horse back yonder that claimed the Pacific coast as its birthplace!

"How had it best be gone about to bring forth in all their glory the splendid and inspiriting days that for the nonce have fled? Easiest thing imaginable. A few honestly run race meetings, run for by honest horses, owned by honest and patriotic men, who really know and appreciate at his true value the thoroughbred. They will soon put a stop to all this insensate clamor of the intolerants and open the eyes of those who do not know—perhaps are not permitted to know—the real value of the thoroughbred horse as an asset to the state, as an improver of all the lighter breeds and as a means to give us work-a-day fellows pleasure and relaxation from the cares and worries of this all too absorbing and strenuous life of today.

"Hooray for California, where the thoroughbred horse is shortly to come into his own once more!"

Will J. Davis, one of the "old guard" of Chicago's trotting horsemen, has "finished the course," dying in Chicago on May 16. Mr. Davis was one of the leading theater managers in Chicago. Both he and his wife, Mrs. Jessie Bartlett Davis, the actress, were well known to old San Franciscans. He was proprietor for many years of Willowdale Farm, at Crown Point, Ind., not far from Chicago. He bred the pacer Will Davis 2:17, Sam McWhorter 2:18½, and others of note. At the time of his death he was a member of the board of directors of the American Trotting Register Association.

Thoroughbred

Von Tromp, the property of Edward Cebrian of the Miramonte Stud, San Jose, is sire of the following winning two-year-olds up to June 6, 1919: Foreclosure (Foul Play), two races, $700; Clear the Way (Directa), one race, $350; Lonely (Isolation), three races, $1,884; Airnat (Gano Belle), two races, $825.

A. K. Macomber, of California, won his first race in France on May 26. His Phillipa, a three-year-old daughter of Cicero and Loveblink, by Velocity, won the Prix Mondaine. Loveblink was the property of Lord Roseberry and was sold by him in the Newmarket sales of 1915, J. E. Widener being the purchaser.

Botafogo, who was recently sold in the Argentine for $50,000, was a chance-bred horse. His dam, Korea, was to have been mated with an English-bred stallion at the same stud in the Argentine, but the latter simply refused to look at her. As it was too late in the season to be particular about another stallion, and Old Man happened to be handiest, he was used with Korea. The result was Botafogo, and the cleverest pedigree student might have puzzled his brains a long time before achieving such a successful mating.

Weight-for-age races have practically become obsolete in America, and with a view to revival, the Jockey Club early this year announced it would give $2500 to any association that would add a similar amount for an event of that class. The offer was accepted by the Westchester Racing Association (New York), which will have a mile and a half w. f. a. race, the Jockey Club Stakes, on its autumn programme.

A novel appointment has been made at a meeting of the Kentucky State Racing Commission. A trainer of high repute, W. L. Lewis, has been chosen by the Commission to be official clocker for the training tracks, and he will time all gallops. The report of these will be made public daily, and no other timers of trials are to be permitted the privileges of the tracks. Lewis is to have two assistants.

Edward Cebrian of the Miramonte Stud, San Jose, will have a consignment at the Fasig-Tipton sales at Saratoga Springs during the August meeting.

When Sir Barton won the Belmont Stakes in easy manner he set a new American record of 2:17 2-5 for the mile and three furlongs. This supplants the mark made by Irish Lad in 1904. Twenty-five thousand persons saw him win at Belmont Park.

The resumption of racing in France on Monday, May 5, was a triumph. For the first time the sun smiled. It is thought the crowd was as large as it used to be on the greatest day. The receipts were imposing: 96,000 francs admission, and 1,603.405 francs at the pari-mutuel, says the Exchange Paris correspondent. It was the fear of the diversion from war loan of such sums as this that prevented an earlier resumption of racing.—London Sporting Life.

Commander J. K. L. Ross, the Canadian, owner of Sir Barton and one of the best racing stables in America, has bought 400 acres between Washington and Baltimore, for the purpose of founding a great haras.

A. Belmont Purdy, one of the founders of the Meadow Brook Club, where the great international polo games were played before the war, died last month at his home in Hempstead, L. I. He was 70 years old, and until three days before his death was in excellent health. From childhood he had been identified with outdoor sport in and about New York, and few if any other men had seen so much of racing, hunting and polo. His grandfather, John F. Purdy, whose grave is in Trinity churchyard, was the amateur jockey who took off his coat when American Eclipse was getting beaten by Sir Henry in the memorable sectional match for $20,000 a side at the Union Course, in 1822.

The Two Thousand Guineas, run for at Newmarket, was won by The Panther, son of Tracery, in an exciting finish, by a neck from Major W. Astor's Buchan, which at the finish was three-quarters of a length ahead of Dominion, since winner of the Newmarket Stakes. Twelve finished behind the three placed horses, among the unplaced lot was Stefan the Great, which finished eighth, time Rowley mile, 1:44 2-5, value of stakes £5,100.

Up to the date of writing, Sir Bartin has won $53,400; Midway, $16.035; Under Fire, $11,027; and Royce Rools, $10,635. The season has just begun at that.

The assertion is made in New York that an offer of $30,000 for Dominique has been turned down for the son of Peter Quince and Berry Maid.

FRESNO FAIR TO HAVE RUNNERS

There will be two running races daily at the Fresno district fair, beginning September 30 and ending October 4. Purses and distances will be announced by Secretary Eberhart later. Officials of the fair have been advised there will be entries from Tia Juana and the state of Nevada.

HARRISON SEES HORSES AT PLEASANTON. WANTS CAPITALISTS TO BUY TRACK FOR RUNNERS

Since becoming a Hartford Livestock Insurance agent in the northwest, with my time fully occupied, I have not had the pleasure of visiting California for three years. Brought to San Francisco by General Agent Drake, by whom I am employed, I have availed myself of the pleasure of calling on some of my horsemen friends and made my trip a combination of business and pleasure.

My old friend, Major Sven Christensen, who has been United States horse buyer for the past two years, has returned to civil life. With the genial Chris I visited the Stadium Driving Club stable. I was pleased to see that every stall in Al Schwartz' speed emporium had in it a good horse, every horse was in good condition and the general surroundings of Mr. Schwartz' big stable were about 100 per cent perfection.

The San Francisco Driving Club, I am also pleased to note, operates at the old stand. I expect to be in San Francisco long enough to enjoy a matinee at the Stadium.

* * *

Mr. Christensen drove me over to Livermore valley one day. After looking over his bunch of twenty-three youngsters in the pasture, I am sure few men in America own twenty-three better looking or better bred animals than these. They are sired by such good horses as Anvil, Vernon McKinney, Rapalo, True Kinney and others, with such dams as the dam of Helen Styles, mares by Directum, Nutwood Wilkes and others in ultra-fashionably bred lines.

I had the pleasure of seeing the Peter the Great mare, now four years old, owned by Mr. Christensen. This mare is a daughter of one of the world's greatest brood mares, Carietta, dam of Suldine, 2:06¼; Senator O'Brien, 2:14½; Silent Brigade, 2:09, and others.

At the Whalen place at Pleasanton I saw over 100 standard bred horses. These animals are all in first class condition. If I were to state the breeding of both their sires and dams I would name horses that stand at the top as the best of the tribe.

* * *

There is no scarcity of first class racing material in California. There is, however, a disease among the owners of harness horses there. I find many have become gophers—or worse than gophers—because they have gone into a hole and pulled the hole in after them. Thus the condition and business of harness racing is much depressed. There is no state in the Union, nor any place in the world, where harness and thoroughbred horses may be raced and trained with such marked success—and I claim with profit as well as pleasure—to owners and lovers of the sport.

* * *

At Pleasanton, the place I called Horse Heaven in one of my articles written some twenty-odd years ago, I visited the great race track, where Salisbury, Count Valensin, C. A. Durfee, Wm. Gamble and many others whose names are written in the great book of harness horses in California had their training stables.

At the Rose Hotel, the famous place where horsemen gathered evenings, I found Southern and Chadbourne operating the hotel. I asked Mr. Chadbourne why he was not training horses. His answer was: "Mr. Harrison, our track is closed. The gates are shut. We have refused to train horses at all, except those we own ourselves. We hope the track will some day be bought from Mr. MacKenzie and re-opened."

* * *

After a very enjoyable dinner at the Rose, we went out to the track. It seemed to me, as we entered the gates of Mr. MacKenzie's track, I was going into a cemetery where many of my dearest friends were buried. I found Charley Mullin in charge of Mr. MacKenzie's horses. After the first greeting of old friend Charley, I was taken on a trip of exploration through the center field, where I saw about thirty head running in the finest kind of pasture. I thought I saw many star performers which I knew in days gone by. These famous ones were Bertha Carey, Zombro Belle and many others. The two-year-olds were by Vernon McKinney.

All which have been sired by him have good size, perfection of type and are highly finished. Vernon McKinney's colts are, to my mind, as good looking a lot of youngsters as may be shown at any place and by any horse in America. Vernon McKinney is in fine condition.

* * *

In the paddock adjoining I found the dam of Helen Styles, owned by Major Christensen. She has been mated with Vernon McKinney. Along with her was Baroness Review. This fast trotter has been mated with Anvil, 2:02¾. In an adjoining paddock I had a visit with Anvil. I surely enjoyed my visit with this gentlemanly equine. This great horse is in fine condition.

In another paddock I saw a three-year-old bay stallion by Vernon McKinney, out of the dam of C. A. Durfee's one-time pacer, Happy Dentist, 2:05¾. I claim to have seen some interesting horses, but I have never seen a better individual than this youngster. He is the best finished standard bred I have ever looked over in the state of California. I do not think there ever was a better one in the world. I understand he was given by Mr. MacKenzie to a friend, Joe Errington, a Canadian sportsman. While I do not envy Mr. Errington or any other man who has a good horse, I would most certainly feel proud if I were the owner of this bay colt.

* * *

After looking over the horses, Charley Mullen said, "Mr. Harrison, I will now show you a yearling by Vernon McKinney, whose dam is Maymack." This filly is not yet quite halter broken, but when Charlie led her out I said, "Hawkins filly." She is one of the classiest looking young ladies a man could imagine.

After viewing this grand filly, Charley took me out in the paddock and there showed me Maymack, 2:04½. By her side was a beautiful bay colt, sired by Vernon McKinney. I never saw anything finer in the horse line on my trip to California. I was amply repaid by having a look at this great mare and her son. The last time I saw her was at the Panama-Pacific Exposition, trotting a quarter in 30 seconds, driven by Charley De Ryder, alongside of a horse driven by Lou McDonald.

We finished our visit with Charley Mullen, and with the horses. I said to Charley, "I will say goodbye, and you know it will be my last visit to this track. But I hope to meet you in the game somewhere else."

Just as we were traveling out of the gate a big car came driving by, and a big man waved his hand at us. The big man was R. J. MacKenzie, owner of the track. We went back and, after a cordial greeting by the master of Pleasanton establishment, we went over the horses again with him.

The first we visited was Vernon McKinney. The meeting between this great stallion and his owner was indeed a beautiful one. The horse went up to Mr. MacKenzie, placed his nose on his hand and as much as said, "Boss, I am glad to meet you." Mr. MacKenzie fondled the great horse with much pleasure as he told us of his many fast races and how much he enjoyed seeing Vernon race. We visited all of them, and with all MacKenzie had a most affectionate meeting.

After seeing everything in the paddocks we went out to the fence beside the center field. Mr. MacKenzie began to whistle; the horses on the farther side of the field raised their heads and cocked their ears; then they came up to the fence and looked at us while their owner told us the name of nearly every one, their breeding, good qualities and the great things he expected from the offspring of the mares which he paid so much money for and selected with so much care.

* * *

The big man turned around and, looking over his plant, said, "I thought the people of California wanted this place and would appreciate it. I gave them what they asked for. They didn't seem to appreciate or enjoy it. I gave a $7,500 stake at this track. They wouldn't enter their horses, nor send them. Well—" and the "Well" came with a sigh, and the big man straightened up and smiled, but behind the smile there was a look of sadness.

I had nothing to say, but I was sorry. I felt the horsemen and business men famous in California are neglecting the breeding of harness horses and thoroughbreds in the best of all the world's climates.

We said good-bye to Mr. MacKenzie, and in doing this at the old track I felt I was saying good-bye to one of the best sportsmen and best men in the world. I am disappointed—I may say disgusted—with the fact the Pleasanton track is closed.

* * *

It occurs to me that racing and raising of race horses will be better from now on, because better men are interested. I hope some of the great owners of thoroughbreds who are citizens of California will grasp the opportunity to buy a plant like the Pleasanton track, because of its wonderful appointments and close proximity to San Francisco, greatest sport-loving city in America. If some of the thoroughbred owners whom I know to be men of big affairs would buy this great track and open it up with a race meeting, the people of San Francisco and adjacent cities would pour into its gates in big numbers. The business would be a success and a pleasure to the owners.

The automobile is no detriment to racing, because with good roads, nearly everybody may go to the races. In the old days they had to go by train or stage. Today nearly everybody who is anybody owns an automobile, and these automobiles hold quite a few people. I have noticed throughout the northwest, instead of the man of the house going to the races alone, he now takes the whole family in an automobile. I know the people love good races.

I do not want to be known as a knocker—instead, I want to be known as a booster. I think the time is ripe for the big men of California who are interested in the breeding of thoroughbreds to buy the Pleasanton track. I have not been asked to sell it, nor did I mention it to Mr. MacKenzie. I am sure he himself will never open its gates to the public. This looks to me like the "golden opportunity." It needs first class men of business judgment to make this great enterprise a success.

* * *

I also believe a racing commission may be had in California if the big business men who are thoroughbred breeders will apply for a bill for a racing commission to be appointed by the Governor. I need not name the men I have in mind, but I shall mention several, for instance, Rudolph Spreckels, J. H. Rosseter, A. K. Macomber, Edward Cebrian, Adolph B. Spreckels, M. H. Tichenor and George W. Wingfield. These men are all real business men of the highest social standing, and all genuine sportsmen.

If a racing commission were asked for and sponsored by them, and they pledged themselves to take charge of the commission, the Legislature would not question their integrity. All over the United States it would be known that the state racing commission of the great state of California was handled by men classed as America's best citizens and known in California and everywhere else as real men and real sportsmen.

* * *

The public never again wants books made by any organization of bookmakers or get-rich-quick artists. I do not wish to close as a reformer, nor do I believe all bookmakers were bad; but their day has gone—gone forever.

I know there are thousands of men of the northwest who love the sport of racing as well, or better, than I. Thousands of men are qualified to speak their mind on this matter, yet perhaps they feel "silence is golden." While I may not have the pleasure of living long in this great old world, I intend to keep hammering away at this subject.

I hope before I cross the great divide I will have seen a racing commission in California, fostered by such men as I have mentioned and have in mind. I will then feel I have at least done a little good for the sport I love so well.

C. A. Harrison.

WINGFIELD MAKES SHIPMENT FROM EAST TO NEVADA STOCK FARM

Mr. George W. Wingfield is shipping from the east to his Nevada Stud the mares Cyllene Cross, by Tasso–St. Victoire, by Cyllene, bred to Ballot; Polistena, by Polymelus–Imola, by St. Hilaire, bred to Sweep; the race filly Menlo Park, by Ormondale–Busy Lass, by Meddler, bred to Dick Welles; and his recent purchase, the winner Bracelet, by All Gold–Dorelet, by Peter Pan.

Accompanying the above is the chestnut yearling filly, the property of Theodore Winters, by Astronomer–Neva W., by Rey del Sierras. M. P. Guilliams has charge of the shipment.

LORD GLANELY'S GRAND PARADE, EPSOM DERBY WINNER, IS OF NO. 5 BRANCH OF HERMIT FAMILY

Lord Glanely's Grand Parade, winner on June 4 of this year's Epsom Derby, is by the Derby winner, Orby, out of Grand Geraldine, by Desmond, and a member of the Hermit branch of the No. 5 family. Orby's dam was Rhoda B., by Hanover. This makes the last named America's best brood mare sire, the only American-bred horse to have three descendants to win the world's greatest race—the other two winners being Grand Parade's sire, Orby, and Durbar II.

Grand Parade was bred by former Tammany Chief Richard Croker at his Glencaird Stud, County Dublin, Ireland. The colt won the Fitzwilliam and Solykoff Stakes, Curragh Biennial, Newmarket, Anglesey Stakes and National Produce Stakes in Ireland. In England he was third to Glammerin and Knight of the Air in the Moulton Stakes, but was not a starter in the Two Thousand. Not since over 100 years ago, in 1813, when Smolensko won the Epsom Derby, has there been a black colt a winner until Grand Parade.

Buchan, owned by Major Astor, his breeder, was second. He is by the Derby winner, Sunstar, out of Hamoaze, granddaughter of Scepter, by Torpoint. Buchan as a two-year-old won the Chesterfield and July Stakes and Spring Two-Year-Old Stakes. This season he was second in the Two Thousand to The Panther, who was a favorite in the books in this year's Derby.

Paper Money, who was third, was sired by Greenback, out of Epping Rose. On his dam's side, Paper Money traces to Queen Mary.

The spectacle of the race course lacked nothing of its pre-war color. King George, Queen Mary, the Prince of Wales, Princess Mary, the Earl of Lonsdale, with bookmakers and nobility and gentry from all parts of the kingdom were present.

MARES OF UNKNOWN BREEDING IN VOL. I, NEW ZEALAND STUD BOOK, ARE ASCENDANTS OF FAMILIES

Mares of unknown breeding, listed in Volume I of the New Zealand Stud Book, have duplicated in New Zealand what Virginia colonial mares of unknown origin in Volume I of the American Stud Book have done in the United States, and descendants of both are winners.

Writing in Volume I of the New Zealand Stud Book, issued under authority of the racing commission, G. C. said:

"There are in New Zealand certain strains of descent from mares of unknown pedigree which have attained various degrees of distinction on the turf. For the convenience of students, the descendants of the most prominent of such mares, viz., Gipsy, Princess, Woodstock, Sharkie, Spray, Moth, Vesta, Rosebud, Yatterina and Slander, are indicated by these names to the several pedigrees. * * * The lines from Miss Rowe and Finesse are usually associated with the above, but run back, it will be noted, to pure Arab mares. * * * The unclassified mares vary from such proved Australian matrons as Sappho and Musidora down to those whose insertion is merely a convenience for the reference of sportsmen."

These colonial families go on producing winners, among which may be noted:

Arabs, six winners: Burrangong, Escaped, Henry Clay, Rienzi, Sacramento, Step.

Cutty Sark, eight: Alteration, Beloved, Eheipa, Plastic, Prince Charleroi, Sheila, Taunaha, Tyne.

Moth, two: Wonder, Eleus.

Princess, one: Elocution.

Rose, one: Penury Rose.

Sharkie, two: Link Up, Silver Link.

Slander, three: Jutland, Lady Middleton, Loyal Arch.

Spray, four: Karo, Naurant, Revocation, Spinifex.

Vesta, one: Bon Spec.

Yatterina, three: All Ready, Black Lace, Radial.

When one looks at the really good ones in these families, stayers as well as sprinters, one feels grateful to the editor who included them in the stud book, and wishful that some day satisfactory evidence may come to light entitling them to a number apiece and a place in the English Stud Book, to which such mares as Bonnie Maid, Silver Link and Karo, if lawfully added, would be a real addition of strength.

AUSTRALIAN PUNTERS WINNERS BY USING BRUCE LOWE BREEDING FIGURES

("Antisthenes" in New Zealand Referee)

Some time ago my present correspondent favored me with the information that he had heard on good authority of punters in England having followed Bruce Lowe's figures with success when betting over a period of twelve months. I abstained from comment upon this system, hoping to see something about it, but nothing came my way.

It seemed to me that those punters must have been uncommonly industrious (I suppose they had to put the figures to every field of runners), and that they must have had a great capital to back all the No. 1 representatives — for that, I suppose, is what they would do.

Tisthenes now reminds me of his earlier letter and says, "I would like to point out to you that I notice a brother scribe of yours (and a good one, too!) in Fife and Drum in 'The Pastoral Review,' has compiled a table showing the respective winnings of the different families at the big spring meetings in Australia this year, and the No. 1 and No. 2 families are first and second, as they were twenty-odd years ago in the English classic races. Not being anything more than a timid punter, I don't intend to take advantage of the system myself, but I think you treated my previous remarks lightly; hence I take the opportunity to point out the result mentioned."

Well, I must admit that, not liking systems at all, I was not disposed to recommend this one to my fellow readers of "The Referee" until I knew a good deal more about it. But I am very happy to reprint Fife and Drum's valuable research. Writing in the December issue of "The Pastoral Review" he says:

"There have been 104 races run for during the busy weeks, and the following are the winners from each female family as disclosed by the Bruce Lowe figures:

Family No.	Races.	Amount.
1	12	£14,820
2	8	7,900
3	6	4,500
4	1	800
5	6	2,100
6	1	150
7	3	1,450
8	6	1,800
9	2	6,250
10	2	1,650
11	1	300
12	1	500
13	4	1,500
14	5	5,000
16	1	1,600
18	4	900
19	1	250
20	4	1,950
22	2	1,000
23	3	2,850
24	2	800
26	3	6.350
28	2	1,000
x	19	7,960

"It is very surprising how the families follow in merit so closely to where Bruce Lowe placed them, with, of course, exceptions cropping up now and again. Thus, the first three families in the winning list are actually the Nos. 1, 2 and 3, according to Lowe's guide.

"No. 6 has sunk to insignificance all the world over, and apparently received its original place under false pretences, although the award was, after all, only according to results. Gloaming it is that has shot No. 26 to that high eminence in which it stands, whilst No. 9 is entirely supported by Nightwatch. But it is good to see this old family, which used to be so very strong in Australia, once more reasserting itself. If there be one female branch in the world through which stamina comes by the distaff side, it is No. 9. Seabound, with the Williamstown Cup, and Stage Girl are mainly responsible for No. 14, a family which is so very strong in New Zealand. The numberless brigade, that legion of lost souls, is as big as ever, mostly on account of the jumpers, and aided by the immortal Sappho. The latter claims three winners of £2,420."

You will note that No. 14 holds a respectable place this season in Australia as well as in New Zealand, whether one considers number of races won or their value.

HANOVER HEADS LIST OF BROOD MARE SIRES IN AMERICA FOR 1919

Hanover, which died in 1899, is again heading the list of winning brood mare sires to date in America, as follows:

	Producing daughters	Races won	Amt.
Hanover	13	23	$79,630
Meddler	23	59	39,436
Sir Dixon	19	37	39,332
Star Shoot	17	46	27,769
Yankee	14	33	21,068
Miller	2	5	18,887
Sain	6	16	18,026
Rock Sand	8	23	17,971
Ben Brush	6	12	14,350
Top Gallant	3	13	14,285
Hastings	12	27	12,981
The Commoner	11	25	12,444
King Eric	2	10	11,585
Pirate of Penzance	3	17	11,350
Kingston	10	22	11,329
Cesarion	6	20	11,312
Solitaire II	4	19	11,237
Hamburg	11	19	11,236
Handsel	6	19	10,859
Peep O'Day	5	13	10,760
Eon	4	6	10,486
Ornament	8	12	10,380

PRICES FOR RACE HORSES ARE SOARING IN GREAT BRITAIN

By cable it is learned the value of thoroughbreds in England is increasing enormously. Furore, a horse by Fugelman—Rappel, was sold last week for 6000 guineas. As a two-year-old he ran seven times for three thirds and a second, each race being a very unpretentious one; at three he was successful twice, second once, and third once in nine starts, the only win of importance being the Irish Derby of 1916. In his next year he was out eight times for one win, and two seconds, his victory being in the Cesarewitch Stakes at Newmarket, with 8.6 up. As his sire, Fugelman, is by Persimmon, no doubt he is expected to be a success at the stud.

Control, a bay colt by Chaucer (sire of Lavendo)—Camlarg, three years, realized 4500 guineas; and Damar, a two-year-old colt by Polymelus—Damage, brought 2200 guineas. These three were the property of Mrs. A. C. Thorneycroft, who has received a small fortune for one horse, with only a modest record and two who have yet to make a name.

Royal Bucks, winner of the first Lincolnshire Handicap which has been run since 1915, and which took place this year on Wednesday, March 28, also won the City and Suburban Handicap on Wednesday, April 30. A few days previous to the former race he was purchased from R. Sevier by the Marchioness of Queensberry for 3000 guineas and was left in Sevier's hands to train.

The success of this horse is nothing especial, seeing that he had only 7.5 in the first race, and 7.9, including a 101-pound penalty in the other; but it emphasizes the luck of the turf in a marked degree. The Lincolnshire Handicap was the first race in which the Marchioness' colors had ever been carried by a horse, and yet she has the satisfaction of immediately seeing those colors borne to victory, and then, a month later, to win another of the most important handicaps associated with the English turf—the City and Suburban.

Lady owners are doing wonderfully well in England since Lady Jane Douglas headed the winning owners' list last season, chiefly through the crack three-year-old of the year Gainsborough. The Grand National Steeplechase winner, Poethlyn, is owned by a lady, Mrs. H. Peel; and Lady Torrington has won two races with the bay colt All Alone, by Royal Realm—Canidia.

The pedigree of Royal Bucks shows him to be somewhat inbred to Galopin. Buckwheat, his sire, is from Sesame, by St. Simon (son of Galopin); and his dam, Teofani, is by Black Buck, by Galopin. As Galopin himself was inbred, this fusion of closely-related blood, while it may result in a speedy animal when lightly weighted, as in the case of Royal Bucks, is altogether detrimental to the best interests of the equine race from a stayer's point of view, and it is doubtful if Royal Bucks will ever be of any use in perpetuating the excellence of the Galopin strain when he retires to the stud.

GET OF TWENTY LEADING AMERICAN SIRES IN 1918 WIN $354,119

The statistics, just available, show the get of the twenty leading sires in America in 1918 won $354,119, as follows:

Star Shoot, ch., 1898, by Isinglass–Astrology, by Hermit. Winners, 19; races won, 38; amount won, $72,487.

Ballot, ch., 1904, by Voter–Cerito, by Lowland Chief. Winners, 18; races won, 35; amount won, $35,684.

McGee, b., 1900, by White Knight–Remorse, by Hermit. Winners, 14; races won, 34; amount won, $22,509.

Sweep, br., 1907, by Ben Brush–Pink Domino, by Domino. Winners, 11; races won, 27; amount won, $20,207.

Trap Rock, ch., 1908, by Rock Sand–Topiary, by Orme. Winners, 19; races won; amount won, $15,669.

Broomstick, b., 1901, by Ben Brush–Elf, by Galliard. Winners, 14; races won, 28; amount won, $15,215.

Bryn Mawr, br., 1901, by Atheling–Maggie Weir, by The Bard. Winners, 12; races won, 18; amount won, $14,363.

King James, b., 1905, by Plaudit–Unsightly, by Pursebearer. Winners, 10; races won, 22; amount won, $14,031.

Uncle, ch., 1905, by Star Shoot–The Niece, by Alarm. Winners, 10; races won, 19; amount won, $13,207.

Ogden, br., 1894, by Kilwarlin–Oriole, by Bend Or. Winners, 9; races won, 15; amount won, $13,094.

Salvation, ch., 1892, by Salvator–Chimera, by Mortemer. Winners, 3; races won, 11; amount won, $13,065.

Dr. Leggo, b., 1902, by Puryear D.–Sevens, by Watercress. Winners, 7; races won, 24; amount won, $12,877.

Fair Play, ch., 1905, by Hastings–Fairy Gold, by Bend Or. Winners, 10; races won, 22; amount won, $12,100.

Plaudit (dead), br., 1895, by Himyar–Cinderella, by Blue Ruin or Tomahawk. Winners, 13; races won, 24; amount won, $12,005.

Ivan the Terrible (dead), ch., 1902, by Pirate of Penzance–Kate Pelletier, by Rapture. Winners, 12; races won, 23; amount won, $11,650.

Hastings (dead), b., 1893, by Spendthrift–Cinderella, by Blue Ruin or Tomahawk. Winners, 9 races won, 18; amount won, $11,321.

Marta Santa, b., 1896, by Martley–Luxette, by Knight of Malta. Winners, 10; races won, 20; amount won, $11,315.

Peep o' Day (dead), b., 1893, by Ayrshire–Sundown, by Springfield. Winners, 11; races won, 17; amount won, $11,278.

Jack Atkin, br., 1904, by Sain–El Salado, by Emperor of Norfolk. Winners, 12; races won, 20; amount won, $11,045.

Sea King, ch., 1905, by Persimmon–Sea Air, by Isonomy. Winners, 10; races won, 21; amount won, $10,998.

THE ST. SIMON LINE IS DOING WELL IN ENGLAND

The male descendants of St. Simon did remarkably well in the first fortnight of the current racing season in England, their victories including the Liverpool Grand National, through the agency of Poethlyn. Referring to this, Vigilant wrote as follows in the London Sportsman in April:

"An ardent admirer of the blood of St. Simon, well known for his devotion to that branch of what Dr. Shorthouse used to term the accursed line of Blacklock, has drawn my attention to the many successes gained since the commencement of the season a fortnight ago by St. Simon's male line descendants. I had myself noticed that they were going strong, but as the advocate of the St. Simon cause, Mr. Sidney Pardon, informed me that up to Thursday or Friday last the family had won something like 20 races since Lincoln opened, under both codes, I have taken the trouble to run through the returns up to and inclusive of Saturday's racing at Windsor and Ayr. All told, St. Simon's male line descendants have carried off no fewer than 28 races in the twelve days, inclusive of three under N. H. Rules. These last, moreover, included such important events as the Grand National and the Liverpool Handicap Hurdle Race. The big steeplechase fell to St. Frusquin's grandson, Poethlyn (who is by Rydal Head), and the big hurdle race to his son, St. Tudwal, who, being an entire horse, should in his turn be valuable for stud purposes. The remaining N. H. race was the steeplechase won at Lingfield by Irish Cheer, who is by St. Simon's grandson, Earla Mor."

CAPITALISTS BUY HAVANA (CUBA) TRACK

Former Congressman George W. Loft, well known to New York sport; Frank Steinhart, retired army officer and street railway and electric lighting magnate of Havana, and A. H. Diaz, Cuban capitalists, who has been racing a few seasons, have purchased the Havana (Cuba) track.

The new owners announce plans have been made for many improvements in the winter racing at the track. It will be under the management of Christopher Fitz Gerald.

THE PANTHER WINS THE TWO THOUSAND IN QUIET FASHION

The great point in favor of The Panther is that he won his race (the Two Thousand Guineas) in such supremely business-like and inexorable fashion. It was easy to see a furlong from home that he had got the others "tacked down," but there was nothing flashy or superfluous about his effort.

He did what was wanted quietly, soberly; just so much and no more, but leaving the impression that a great deal more would have been forthcoming had he been seriously asked to pull it out. In point of fact, Cooper rode a perfect race on him, and never really called on him at all.

I have heard it stated that he once hit the colt, in the Dip; but this was not so. The Panther was running a trifle sluggishly at that point, and Cooper just showed him the whip, but never touched him with it. From that point the race was practically over.

That the colt stays well is, I think, sufficiently obvious, and I long ago pointed out that from his breeding he was almost certain to do so. There is a lot of fresh blood in him through Plaisanterie, and St. Gatien does not figure in many pedigrees. This will add greatly to his value as a stallion later on.

No classic winner has ever shown quite such exquisite style and character since Ladas, whom, in many respects, The Panther resembles. It remains only to hope that all will go well with him until the Derby, when, bar accidents, he is bound to win.

I have seen it stated that The Panther is a smaller horse than his sire, Tracery, but this is not so. He stands 16.2, as measured by his trainer, and I don't think Tracery would measure that, under the standard, even now. The Panther is a far more attractive mover than Tracery was, for the old horse used to go very high in front, though that did not prevent his being a real champion, although in some respects an unlucky one.—Special Commissioner in London Sportsman.

W. K. VANDERBILT WINS HIS FOURTH FRENCH DERBY WITH TCHAD

The French Derby (Prix du Jockey Club), about 1½ miles, was won on Sunday, June 15th, by Mr. W. K. Vanderbilt's Tchad, Hallebardier second, Master Good third, and Mr. Vanderbilt's other starter, McKinley, fourth.

Tchad, which is by Negofol (sire of Hourless) out of Toia, did all of his running in Spain last season, winning Prix du Guadiana, Prix Salvatierra and Prix du Roi, but was as a two-year-old the inferior of his stable companion, McKinley, by which he was more than once beaten.

French Derby honors are no new thing to Mr. Vanderbilt, whose Maintenon carried off the spoils in 1906, Sea Sick winning the race for him in 1908, and Negofol in 1909. Tchad is trained by Wm. Duke.

The Duc de Toledo's (King of Spain's) French bred colt Montmirail, by Bonspiel II (son of St. Frusquin), from Melton Star, by Melton, won the Spanish Derby, run for at Aranjuez, Madrid, on May 20.

The matinees of the San Francisco Driving Club the past month have had good cards. Several thousand people have witnessed the Sunday racing.

Standard Bred

Secretary C. G. Eberhart, of the Fresno District Fair, September 30 to October 4, announces the fair will give six trotting and pacing races, each for a purse of $500. Four are required to enter and the same number to start.

J. Elmo Montgomery has seven head, sired by Jim Logan, in training at Sacramento, preparing them for next year's Grand Circuit.

Mel C. Keefer, former owner of The Proof 2:09¾, owns The Expense 2:13½, sired by the former. Her first dam is Nusta 2:23½, by Nshagak; grandam Anselois, by Prince Ansel. Keefer is thinking of taking her up for training.

King May Day, a two-year-old, owned in Los Angeles, trotted the local track on May 16 in 2:23½, last half in :34. He is by King Lilly Pointer, p, son of Star Pointer, p, 1:59¼.

The Proof 2:05¼, who made seasons at Pleasanton in 1915, and at Santa Rosa in 1916 and 1917, and who was raced in California in the first and last named years, is to be campaigned by his owner, E. J. Moriarity, in Michigan and elsewhere, after having been wintered in Memphis.

C. F. (Farmer) Bunch is working a three-year-old stake colt, Stockton Lad, by Royal McKinney, dam by Bronzo McKinney, at Stockton. He has been miles in 2:18 and is improving all the time.

A. T. Jackson of Stockton owns The Icicle, by the Iceman 2:10, dam California by Sable Wilkes. He has stepped the poor half mile track at Lockeford in 2:08.

James Thompson, formerly of San Francisco, has a trio at Aurora, Ill., viz.: American Man, p, 2:13¾, by The Northern Man; Zom McKlyo, a four-year-old gelding by Peter McKlyo 2:06, and a mare by the same sire. American Man and the McKlyo gelding are owned by Page J. Thibodeaux of Chicago, who was in the sport some years ago, but dropped out.

Peter McKlyo 2:06, formerly owned by L. H. Todhunter of Sacramento, Cal., is now owned in Chicago. Ed Hall is training him at Aurora, Ill.

There is a report that at Omsk, present seat of the anti-Bolsheviki government, a new Russian trotting record of 2:07¼ was established by Sveer. He is by Zamysl 2:11¼, son of the American, Quarter Cousin 2:23¾, my Quartermaster 2:21¼. The previous record was 2:08, held by Prosty, a granddaughter of Patron 2:14¼.

The Austrian Trotting Derby for 1919, trotted at Vienna on May 11 before a crowd of more than 25,000, was won by Rugvica Stud's Baka. The 100,000-crown event at 3,300 m. was trotted in 4:57·8-10, a 2:25¼ gait. The winner was bred at Csergoe, Hungary, by Count Geza Sennyey. His sire is Caid 2:07¼, who was sold for exportation in 1898. Baka's dam is Gava, 4, 2:21, by Gayton 2:08¼, the son of Alerton 2:09¼.

Senator David Tod,capitalist, manufacturers and one of the leading patrons of the light harness horse in Ohio, is dead at Youngstown, that state. In recent seasons, the senator paid large sums for fast and promising trotters, including Ridgemark 2:08¼, W. J. Leyburn 2:14¼, Princess Chloe, 2, 2:15¼, Ruby Watts 2:09¾, Trujolla, 2, 2:20½, and numerous others. He was a grandson of David Tod, "war governor" of Ohio.

CALIFORNIA WILL HAVE THREE STABLES ON GRAND CIRCUIT THIS YEAR

California will be well represented on the Grand Circuit this season, with three stables of class on hand when the bell rings at North Randall, Ohio.

B. F. Townsend arrived at the Ohio plant the first part of May with the pacers J. C. L., 2:05½, and Nellie Mac, and the trotter Lottie Express, the last two sired by Expressive Mac. Nellie Mac was charged with a mile in 2:09½, last half in 1:02½, over a half-mile track last year, while the initial-named horse engaged in three races, winning two and coming second in the other.

Fred Ward left Hemet, Calif, May 15, by express, routed for Canton, Ohio, via Kearney, Neb., where he remained two weeks before proceeding to his destination, Canton, where his campaign opened. After taking in the early half-mile track meetings he will journey down the Grand Circuit.

Ward has eight head in his contingent, including the crack trotting mare Allie Lou, 2:06½, and the pacers O. U. C., 2:02¼, and Harry Mac, 2:07½. That Allie Lou will cut a big figure in the Grand Circuit Stakes no one can doubt who is familiar with her capability. She won all of her starts last season, and was easily the star trotter of the Pacific coast. O. U. C., 2:02¼, is making his second appearance on the Grand Circuit, having been taken across several years ago, and proved a failure. It is said Ward now has the key to him, and that he will do.

The C. F. Silva stable started from Sacramento, Calif., the last of May, in charge of L. B. Daniels. Bondalin, 2:06; Teddy Bear, 2:06½, and Dixie Boy, 2:08¼, comprise the Silva group.

GUY WILKES, WOODNUT AND STAMBOUL BATTLED IN '80S FOR STALLION CHAMPIONSHIP

(By George H. Tinkham)

[Editor's Note.—George H. Tinkham, who writes this series on the history of California trotting and pacing, is a California historian and author of "California Men and Events," "A Half Century of Odd Fellowship" and several works on California local history. He resides in Stockton.]

William Corbett, a wealthy retired grocer from Oregon, whose descendants are still well known among San Francisco society people, was a lover of fast horses. Coming to California in the early '80s, he began the horse business by purchasing 400 acres of land, which is now the present site of Burlingame.

He founded his breeding farm with the stallions Arthurton and Irvington, which he had bought in the east. They were not good breeders. Not discouraged, he again went east and purchased the three-year-old colt Guy Wilkes, by George Wilkes, dam Fanny Bunker.

Mr. Corbett, like his predecessors, Salisbury with Director, Governor Leland Stanford with Electioneer, and his successor, Durfee with McKinney, struck it rich. Guy Wilkes not only produced many good trotters, but was himself the coast champion for several years.

His first race was at San Francisco, August 6, 1884. He lost the first heat in 2:25½, but won out in 2:24½, 2:24¾ and 2:21½. At Oakland, August 26, starting with such trotters as Colonel Hawkins, James H., Kitty Almont and Blanche, he took straight heats, the fastest time being 2:22. At Sacramento he met Adair, by Electioneer, who later on was a strong contestant for first money. It was a free-for-all purse, $1,200, and Adair took only the second heat from Guy; time, 2:23, 2:21, 2:24½, 2:23. At Stockton and San Jose Guy Wilkes started, winning in slow straight heats. He ended the season at San Francisco, October 11, in a match with Adair. Guy won out in 2:20½, 2:21½, 2:19¼.

Adair was a great trotter, and at the Stockton fair, September 25, he took first money from Sister, by Admiral; B. B., Olivette and Trump Wilson, Sister taking the third heat, in 2:21¼, 2:21, 2:23½, 2:24. At San Jose, October 4, Adair contested with Sister, who won the third heat, and with B. B. Adair took the winning heats in 2:27¼, 2:21½, 2:23¾, 2:21½.

The next year, 1885, Guy Wilkes had no walk-overs, for in the field he met Nellie R., Adair, Arab, by Arthurton; and Manon, by Electioneer, all of them trotting better than 2:20. In the opening of the campaign, at Santa Rosa, August 25, Nellie R. defeated Guy Wilkes in 2:21, 2:22½, 2:20¾. On the closing day of the fair at Sacramento, September 19, the directors offered a purse of $1,500 for the 2:20 class. Arab was parred from the pools, because it was believed he had a walk-over. The previous week at Oakland he had beaten Nellie R., she taking the first heat, in 2:19¼, 2:26½, 2:19, 2:22¾. Three days before this trot with Nellie, Arab had defeated Sister and Magdallah in 2:21, 2:21, 2:22.

One beauty of horse racing is that where the contest is nearly equal, you never can tell the result until the final heat. In this warm contest Arab took the first two heats, Nellie R. was drawn, and Guy Wilkes took the last three heats; time, 2:20, 2:19¼, 2:18½, 2:21, 2:19. At Stockton, September 25, Nellie R. was again in splendid form. In fact, they were all on edge, and Guy Wilkes had the race of his life. Nellie R. took the first two heats from Guy by a short length. In the third heat Guy nosed first under the wire, but because he galloped in, with Adair a shade behind, Adair was given the heat. Nellie R. just saved her distance. Guy then went to the front, taking the two next heats, driven out by Adair and Nellie.

It was then nearly dark, and the race was postponed until Monday. Manon was ruled out after the fourth heat, and Adair was drawn. The sixth heat was a dead heat between Nellie and Guy, the mare taking the seventh heat. This was twenty-five years ago, and yet it would have been a good race today, seven heats being inside 2:22. The time was 2:18¼, 2:17½, 2:19, 2:19, 2:20, 2:21, 2:21¾.

In 1886 the big bay had more good contenders: Lot Slocum, by Electioneer; Anteeo and Antevolo. The last-named trotter, bred and driven by Joseph Cairn Simpson, then editor of the Breeder and Sportsman, had made a world's record of 2:19½ the previous year, as a four-year-old. At Santa Rosa, August 28, there was a free-for-all trot and a purse of $1,000 in sight. The starters were Guy Wilkes, Adair and Anteeo. The result was a surprise, and the trotters were driven from start to finish for all there was in them.

In the third heat Guy and Adair were driven from the wire at a very fast clip and passed the quarter almost neck and neck. On the back stretch Adair went up, but Goldsmith, Guy's driver, took no chances, and drove to the half in 1:07. He continued to drive out until near the draw-gate. Then, looking back, he began to pull up, as Adair was far behind, and jogged in, with the crowd yelling, "Come on, Johnny, come on." It was believed that had Goldsmith driven out he would have broken the world's stallion record of Maxey Cobb, by Happy Medium. The time, 2:17½, 2:17½, 2:16½, broke all coast records.

Guy's last race that year was at San Francisco, November 27, in which he was defeated by Harry Wilkes, 2:14½. It was a great event and called out 10,000 people. The purse was $3,000. The entries were Harry Wilkes, Guy Wilkes, Arab, Antevolo and Charles Hilton. Harry easily won out, Guy taking the third heat, because Harry got a bad start. Time, 2:15¼, 2:16½, 2:16¾, 2:15.

Guy was not on the circuit in 1887. At Oakland, August 29, 1889, the trio composed Guy Wilkes, Stamboul and Woodnut, the latter being distanced in the first heat. Stamboul took the second and third heats; time, 2:18, 2:17, 2:19½, 2:24, 2:25. The three again started at the State Fair. Guy took the first, second and fourth heats, the third being a dead heat with Woodnut. Stamboul was third in the race; time, 2:22½, 2:16½, 2:17½, 2:19½.

Woodnut was a notable stallion, and as a three-year-old perhaps the most remarkable colt of his time. Foaled in 1884, by Nutwood, dam Addie Lee, he was raised and driven in all of his races by B. C. Holly. In his three-year-old form he started at Santa Rosa against Longfellow, Marin and Joe Arthurton, and took the race in 2:23¾, 2:24¾, 2:23. At Sacramento he won against a field of Jane L., Longfellow, Maid of Oaks, Bay Rose; and Mt. Vernon, by Nutwood. Bay Rose was distanced in the first heat, Woodnut trotting in 2:21¾, 2:23¼, 2:22½. A few days later, September 28, Woodnut took the first money from a field of six. Conde taking the first heat, in 2:20, 2:27½, 2:19¼, 2:20.

When Woodnut first met Guy Wilkes, at Oakland, August 27, 1888, he was not to all appearances in the race. Stamboul took the second and third heats; Guy Wilkes, the first, fourth and fifth heats; time, 2:18, 2:17, 2:18½, 2:24, 2:25.

At the State Fair things were reversed, for Woodnut not only outfooted Guy Wilkes, but he outclassed Stamboul, who had beaten Arab at Los Angeles in the speedy time of 2:15. In this trot the pool buyers got three heavy jolts—first, when Stamboul was beaten, for they believed his Los Angeles performance stamped Stamboul as the champion of the coast; second, when Guy Wilkes defeated Stamboul; and third, when Woodnut played with both of them. Then they declared that Holly at Oakland had something up his sleeve. He had, for although Guy Wilkes took the first heat, Holly drove out in 2:22½, 2:16½, 2:17½, 2:18½.

Stamboul, although a trotter of no great prominence, was the most sensational trotter of the Pacific coast, because of his rejected time record of 2:07½. Sired by Sultan, dam Fleetwing, raised and owned by L. J. Rose, of San Gabriel, Calif, and driven in most of his races by Walter Maben, he was the first trotter from the south to contest for honors with the classiest trotters of the north.

In his two-year-old form, 1884, he trotted heats in 2:37½. The following year at Oakland, with Voucher, by Nephew, his only opponent, he trotted in 2:22, 2:24, 2:26. In 1887, then five years of age, he was second to Lot Slocum, with Sister and Menlo in the race. Stamboul drove out Slocum in 2:22, 2:19, 2:21. In the 2:22 class at Stockton he defeated Slocum, who took the first two heats, in 2:20, 2:17½, 2:20, 2:20½, 2:22½, 2:25. Starting October 10 at Los Angeles, he won the race, outfooting Thaspin, Black Diamond, Harry Velox and Valentine; time, 2:18¾, 2:21, 2:23½.

In 1888 Stamboul climbed right to the top by defeating Arab at Los Angeles in 2:15, 2:17½, 2:16¾, the coast three heats and stallion records. Again hitting the fast Stockton track on September 21, Stamboul was entered in the free-for-all for a $1,200 purse. The starters were Arab, driven by Hickok; Stamboul, driven by Maben, and Lot Slocum, driven by Gonzales, probably the only Spanish driver on the circuit. Arab took the first, third and fourth heats, and Stamboul the second heat. In that heat Arab and Stamboul almost head and head went to the half in 1:05. They drove out the heats in 2:16, 2:15¾, 2:17½, 2:22¼. Eight days later, at San Jose, Arab took the race, Stamboul winning the third heat; time, 2:15, 2:16, 2:16, 2:16¾.

Stamboul was not again started until 1890. I find it recorded that, being driven against the world's stallion record, he trotted in 2:11½. I have not been able to find either place or date. In view of his later performances, he no doubt made that time. [He was started at Napa, October 11, 1890, against time, for a prize cup, finishing the mile in 2:11½.—Editor.] After making that record he was taken to Stockton, in preparation for the November record meeting, where during the month the world's best trotting and pacing records were broken several times. The meeting was an event unparalleled in the history of the American race track.

Goldsmith was selected by L. J. Rose to drive Stamboul to victory. Unfortunately, however, a few days before the meeting, Goldsmith broke his leg. He was thrown out of a cart at San Mateo while driving a colt. Orrin Hickok drove Stamboul and reduced his record to 2:11. A second November meeting was held in 1892, and Stamboul was again keyed up to record breaks. After four separate weekly trials, he trotted the mile on November 8 in :32¾, 1:05, 1:36, 2:08. On November 17 he went back, trotting in 2:09½, and two days later did a mile in 2:09¼.

Not only his owner, but certain parties were determined that Stamboul should have the world's stallion record. On November 23 it was heralded that Stamboul had trotted a mile in 2:07½, beating Kremlin's record of 2:09¼. I saw every one of Stamboul's trials except that 2:07½ record. There was a slight shower that morning and I did not go to the track, believing that no sane driver would attempt to break a record, with particles of dirt flying from the wheels at every stride of the horse and occasionally striking him, causing him to break. The mud also clogged his feet and flew off in chunks.

But the judges, having in view the reputation of the track, called off 2:07½. After a long series of discussion, pro and con, in which witnesses—very few of whom had seen the race—were sworn, the American Trotting Association rejected the record. The National Trotting Association accepted it. E. H. Harriman, the great railroad builder, then owned Stamboul, having paid $50,000 for him.

VISALIA TRAINER DESCRIBES FAMOUS MIDWAY FARM

Editor Breeder and Sportsman:

It is with much pleasure I look for the coming of the Breeder and Sportsman, bringing the news from home.

Having left the Pacific coast in March, I have gone into the employ of Mr. E. D. Gould as trainer at Midway Farm—so named because it is midway from coast to coast—at Kearny, Neb.

I am astonished at the magnitude of this gigantic breeding establishment. Mr. Gould is a man of large business interests, and while alert and keen of perception, he is seemingly too modest to claim the prestige of being the largest breeder in existence. Famous Walnut Hall equals Midway only in the number of stallions standing for public service. So rapidly is the latter coming to the front that its last catalogue gives but a vague idea of its size. There is enough of interest to write a serial story.

Its collection of mares represent all the great families. Scores of mares with records of extreme speed and daughters and granddaughters of all the famous brood mares are here.

For breeding, individuality and speed, the trio of young stallions at the head of this harem are without superiors, if anywhere equaled. Bingen Silk (3) 2:07¾, is premier. He is the fastest colt trotter of all the Bingen family; that he will prove the greatest sire of all Bingen's sons is fitting. It now looks, judged by his present crop of yearlings, which with one exception is all he has, that the evidence is already here.

His stable companion, Judge Maxey (2) 2:24, is one of the best representatives of his sire, Axworthy. It is said on good authority that never before or since at Lexington, Ky., has any colt shown a greater flight of speed than he did in his early colthood there. He is of a distinctly different type from Bingen Silk, and, to my mind, the best individual I ever saw. His pictures do not reveal his splendid quality. Little idea may be obtained from them of his graceful lines.

Comparing him as a sire to Bingen Silk and judging them by their get, it's a neck and neck race, as yet depending upon one's personal preferences, and at the same time keeping one reversing himself as he sees them work.

Zack Chandler has charge of the yearlings. So common is it to see him coming through the last eighth at a 2:20 gait, we regulars take no notice of it. Some of these colts trot a phenomenal clip. I have seen a ten-months-old Maxey filly trot a 2:08 gait through the stretch. She is the greatest speed marvel I ever saw and stamps her sire as a coming great horse, taking into consideration there are others by him almost as meritorious.

On examining his blood lines, I am not astonished at his prepotency. I find his first four dams are the dams of 26 standard performers, and 40 per cent of them two-year-olds. Former United States Senator Bailey, who bred Judge Maxey, since returning to the breeding ranks, has expressed his regret at not being able to buy him. He has stated he would rather have him than any untried sire.

So much did the late Mr. L. V. Harkness think of the dame of "Maxey," Helen Hale, former champion two-year-old trotter, he made a provision in his will that no filly foal of hers should be sold off Walnut Hall farm. "Maxey's" get which are here already vindicate the judgment of these shrewd breeders.

Much could be said of the third stallion, Gold Bingen, who has forced himself into recognition through his merit—but I have already drawn too heavily on your space.

It is my intention to return to California as soon as I can. I shall try to bring with me the best colt obtainable within my means. With best wishes to the Breeder and Sportsman and friends, I am, respectfully,

JACOB BROLLIAR.

Saddle and Show Horses

TENTATIVE PROGRAMME FOR SACRAMENTO STATE FAIR HORSE SHOW IS ANNOUNCED

A tentative programme for the horse show to be held in conjunction with the California State Fair, August 30 to September 9, has been announced.

E. A. Trowbridge of Columbia, Mo., will act as judge. The committee in charge are: E. J. Delorey, T. H. Dudley and E. F. Mitchell.

The horse show features will be staged at night and the events are as follows:

Saturday, August 30

Saddle horse, three-gaited, mare or gelding, 15:2 and over.
Heavy draft team, four horses.
Saddle horse, five gaited mare, four years old or over.
Novelty harness horse, single rig and equipment.
Hunter class, free for all, four hurdles.
California stock horse.

Monday, September 1

Saddle horse, three-gaited, mare or gelding. Ladies to ride.
Saddle horse, five gaited, four years old and over.
Repeat of class.
Combination class, three gaited mare or gelding, to be driven to four wheeled vehicle; then ridden.

Tuesday, September 2

Saddle horse, five-gaited stallion, four years old or under.
Saddle horse, three-gaited mare or gelding, under 15:2. High stepper.
Novice ponies, suitable for polo, 14:1 or over and not over 15:1. Open only to ponies that have never played in polo games.
Combination class. Five-gaited mare or gelding to be driven to four-wheeled vehicle, then ridden.

Wednesday, September 3

Saddle horses, team work. One horse to be ridden by a lady and one by a gentleman. Both horses to walk, trot or canter.
Heavy draft team, two horses.
Saddle horses, five-gaited mares, three years old or under.
Novelty harness team, rig and equipment.
Ladies' hunters. Over four hurdles.

Thursday, September 4

Saddle horses, three-gaited mare or gelding, 14:2 and not over 15 hands. To be ridden by boy or girl 18 years and under. Phaeton class.
Saddle horses, five-gaited stallions, four years and over.
Light hunters, horses carrying up to 160 pounds over four hurdles.
Heavy draft horses, single.

Friday, September 5

Saddle horses, three-gaited. Performance only to count.
Saddle horses, five-gaited geldings, three years and under.
Combination horses, five-gaited stallions, to be driven to four-wheeled vehicle, then ridden.
Heavy-weight polo ponies, 14:1 and not over 15:1. To be shown with mallet through obstacles.

Saturday, September 6

Saddle horses, five-gaited or gelding, any age.
Novelty harness tandem.
Consolation purse for five-gaited horses, any sex, that have not won a first prize at this year's fair.
Light-weight polo ponies, 14:1 and not over 15:1.
California stock horses over 14:3.

Monday, September 8

Consolation purse for three-gaited mares or geldings that have not won a first prize at this year's fair.
Harness horses, pair to appropriate vehicle.
Saddle horses, five-gaited championship. Stallion, mare or gelding.
Hunters in pairs, ridden abreast over four hurdles.
Polo championship.

Tuesday, September 9

Parade of champions and first-premium winners in all classes.

Since the above was written the chestnut horse Knight of the Air, by Sunstar—Orama, has been sold at the Newmarket sales for 4400gs.

ENTHUSIASTIC PACIFIC COAST ARABIAN BREEDERS MAKE ADVANCES DEVELOPING BREED

There is a revival of interest among the group of Pacific coast registered Arabian breeders. This is in part due to the publication of the new Arabian Stud Book by the Arabian Horse Club of America. The volume has laid the foundation for intelligent breeding.

Dr. W. O. Dutton of The Dalles, Ore., will send his mare Markisa (Arabian Stud Book No. 24) to the embrace of El Jafil 74. Markisa was one of the importations of Homer Davenport, cartoonist and author of "My Quest of the Arabian Horse," from the Crabbet Stud, Sussex, England, of the late Lady Anne Blunt, author of "Bedouin Tribes of the Euphrates." Markisa was formerly owned by Mrs. L. B. Randall of The Dalles. El Jafil, bred by Eleanor Gates Tully, formerly the wife of the playwright, Richard Walton Tully, is now the property of S. C. Thomson, owner of the select stud of Arabians at Concord, Calif.

William Randolph Hearst, the publisher, has the chestnut stallion Mustidirr 118, foaled in 1911, by Imp. Obeyran 2, dam Sheba 19, at the San Simeon Rancho, San Luis Obispo county, California, which in the days of Mr. Hearst's father, United States Senator George Hearst, was the home of many famous thoroughbreds.

S. C. Thomson of Concord, Calif, announces he will exhibit at the California State Fair at Sacramento, El Jafil 74, the three-year-old colt El Sabok 276, the four-year-old colt El Sakab 264, and a two-year-old filly, Leila 275. He will also show a four-year-old by El Jafil 74, out of a standard bred mare, to illustrate the result of such a cross.

Narkeesa 7, the 21-year-old mare bred by the late Randolph Huntington, author of "General Grant's Arabian Horses" and early Arabian breeder, and now owned by S. C. Thomson, is heavy with foal to El Jafil 74.

Harry W. Bishop of Oakland owns Imp. Nejdran 48, a desert-bred, brought to America by Homer Davenport in 1906.

John H. Rosseter, master of the Wikiup Stud, Santa Rosa, Calif, is owner of the seal brown stallion Araby 266, by Imp. Hamrah 28.

Zamil 73, owned by Tetsuma Akahoshi of Santa Rosa, Calif, and exported to Japan in 1917 by Japanese gentlemen who were in California, examining horses, under the patronage of the Japanese government, is a success in the stud in Japan, according to reports received from the Orient. Zamil was bought from Dr. J. W. Henderson of Berkeley, Calif.

Announcement is made that the Interlachen Arabian Stud, maintained for twenty-five years by Colonel Spencer Borden of Fall River, Mass., author of "The Arab Horse," has been merged by purchase with the Maynesboro Farm of Arabians, owned by W. R. Brown of Berlin, N. H. This makes the Maynesboro Farm Stud the largest and most valuable collection of Arabian horses in the world.

The Interlachen Stud includes the winner of the endurance test of 1913, the mare Halcyon, who took second in the broad jump at Madison Square Garden and was the dam of Major Thompkins' Kingfisher, who went farthest into the American desert after Villa; Segario 249, sire of Colonel Vidmer's Scimitar; Rodan 258, the stallion who duplicated Halcyon's performance in the endurance test; the stallion Imp. Jahil 81, a son of Imp. Berk 343, bred by the Crabbet Arabian Stud; and the white mare Ghazala 211, bred by Ali Pasha Sherif, the Khedive of Egypt.

Mr. Brown is president of the Arabian Horse Club of America. Now that the war is closed, he hopes there will be created a national stud and that the Arabian and other breeds will be given fair tests and encouragement.

SANTA BARBARA POLO TEAM WINS FROM MEADOWBROOK AND COOPERSTOWN

The success in the east of the California polo team has been remarkable. The Californians, whose team is called the Santa Barbara team, have won every match they have played to the date of this writing.

The first one was on June 11 at the Meadowbrook Country Club, and the last at the same place, when the Santa Barbara team won with a score of 15 to 3, with Malcolm Stevenson as umpire.

At Meadowbrook the Santa Barbara team won the Wheatley cups in the final match. The victory on that occasion is described as clean cut and marked.

Their team work was excellent throughout, and with their 30 ponies acclimated to Eastern weather, their play in later matches has considerably improved over that of June 11, when they defeated the Meadowbrook Freebooters in the semi-finals for the cups. Messrs. George G. Moore, G. A. Galen, Wm. Tevis, Jr., and E. J. Boeseke, Jr., played for the winners, and Cooperstown lined up with J. A. Stahl, Fred H. Post, F. Ambrose Clark and D. S. Iglehart.

The New York team was given a two-goal handicap and made but two goals and lost one on penalties. The Californians lost a goal on penalties in the second period for foul crosses. This they avoided in later periods. The seventh period was of genuine interest, but the long lead of Santa Barbara precluded Cooperstown from winning. Tevis was again the star performer for Santa Barbara, with Moore and Galen divided for honors. Cooperstown lacked their former spirited play.

SADDLE HORSE BREEDERS ELECT OFFICERS

At the recent twenty-ninth annual meeting of the American Saddle Horse Breeders' Association, at Hotel Henry Watterson, Louisville, Ky., the following officers were elected: President, Claude M. Thomas; first vice-president, I. H. Thurman; second vice-president, John T. Collins; treasurer, P. Wooldridge; secretary, R. H. Lillard, Louisville, Ky.

President Thomas paid a tribute to the late General John B. Castleman, many years executive head of the association. Secretary Lillard declared dealers report they are unable to supply the demand for good saddle horses ready for service and at better prices than ever before.

The horse which was added to Mr. H. C. Ahler's string of show horses is not the pacer San Jacinto, as stated in the May issue of this paper, but the champion five-gaited saddle stallion San Vicente, winner of the championship at the California State Fair in 1917 and 1918. He is by the champion Rex Peavine, $10,000 Kentucky saddle stallion. Good judges declare that Mr. Ahler's recent purchase is one of the handsomest and best bred show horses in the United States.

Draft Horse

LINE-BREEDING FROM THESE FOUNDATION SIRES IS AS SURE AS DEATH

(By "Chester")

Line-breeding in first-class pedigree Shire horse-raising is as sure as death.

Of course I realize that one must not forget what an important part the proper selection of mares plays, and how necessary it is to get a proper "nick" of blood. The best tip I can give American Shire breeders(and I have studied Shire pedigrees till I can recite them backwards) is to combine, by a not too quick return, a fusion of Lockinge Forest King blood (to be provided by the mare), with that of Carbon, or Harold (to be provided by the stallion). You will ask what are the "lines" containing this prepotent blood. I will tell you in lines. The great "common ancestors" of the Shire which flourish in England to-day are' Lincolnshire Lad, Matchless, Major, William the Conqueror, Lincoln and Bar None. They have given us strong successions of sons which breed as true as moulds and daughters which throw offspring which do not deteriorate but rather improve by judicious crossings back to the top root. Direct male lines hailing from these "common ancestors" are as follows:

Lincolnshire Lad.

Lincolnshire Lad 2d	Moors Zealot
Lockinge Manners	Ashby Victor
Harold	Phenomenon 3d
Prince Harold	Eaton Nunsuch
Conquering Harold	Mimm's Champion
Rokeby Friar	Lynn Lion

Carbon	Bridge Sollar's Jupiter
Childwick Majestic	Buscot Trojan
Dunsmore Jameson	Desford Combination
Lockinge Forest King	Dowsby Forest King
Lockinge Harold	Marathon 2d
Markheaton Royal Harold	Norman by Champion
Matchless.	
Calamite	Holker Laureate
Premier	Dunsmore Premier
Major.	
Insurgent	Catthorpe Royal Tom
Lincoln.	
Warton Drayman	Fashion of Hothfield
Burg Victor Chief	Moors Kitchener
William the Conqueror.	
Hitchin Conqueror	Cattlegate Combination
Blythewood Conqueror	John Bull 7th
Prince William	Blythewood Kingmaker
Lockinge Albert	Ivy Jubilee Harold
Menestrel	Holker Mars
Bar None.	
Nyn Hitchin Duke	

There you have a string of virulent bloodlines set out under the title of the "old gentleman" really responsible for such excellent sons. Look up your pedigree charts and if you see any of these names rejoice thereat and set about effecting a fusion of blood with females which you feel sure will return to them sustaining and reciprocal flushes and so keep strong the line of blueblood ancestry. Down the left-hand side of each table is a list of stallions now nearly all passed to the happy hunting grounds of equines. You in America will find them sure enough in your pedigrees if you will go far back enough. They are the real foundation sires of your stallions and mares and are the figures in the background which are now working wonders in the constitution and weight of the breed. Down the right-hand side of the tables figure the names of many stallions still with us in England; still getting rare stock, and still figuring among the lists of leading sires at the London shows. There are others, of course, but they have to establish themselves yet. If any of your pedigrees contain the names of some of these comparatively young sires, you can, with confidence, return your mares, got by the older horses, to the offspring of these younger stallions. Do not keep on doing it, of course, get in an odd outcross of pedigree blood from another stud, but see to it that it is from one of these direct male lines of the "common ancestry" have herein tabulated.

Let us analyze, from the merit of some of those "common ancestors"—I like that phrase, for I found it first in the English Shire Horse Society stud book. Harold was thirteen times the champion sire in London, and got 115 winners in those same shows, at which he was acclaimed at the head of the stallion list; Lockinge Forest King was six times the champion sire and got 113 winners; Dunsmore Jameson was four times a champion sire and got forty-six prize-winners; Childwick Champion, the son of Childwick Majestic, in my list, and still hale and hearty, has been champion sire in London on three occasions when his stock won thirty-one ribbons in the show yard; while Premier, also thrice a London champion sire, got nineteen successful ribbons with his stock in those three exhibitions, but classes in London were fewer in Premier's years, 1886-7-8, than they are today.

Out and beyond the list I have compiled and set out there are other famous foundation stallions which are to be traced in the pedigrees of American-bred Shires. The late James Forshaw always maintained that What's Wanted was the best stallion he ever saw. Honest Tom, a near relative, too, is also spoken of with awe by Lancashire breeders of a hardy type of Shire. His mares were always good. Tom Fowler, now filling and carrying on the Tring stud, has a fine word to say for Royal Albert, as the getter of females of outstanding merit. Therefore any mares possessed of the breeding of What's Wanted, Honest Tom and Royal Albert should be procured and put to any stallions from the Lincolnshire Lad line, if they have not been there already.

Lincolnshire Lad 2d was not remarkable for his excellence of contour, but the blood was there. He has been described as narrow, light in the middle and somewhat deficient in muscles, but at the same time he was well topped, full of courage and fire and had enormous quantities of hair (feather). His most famous son undoubtedly was Harold. Foaled in 1881, Harold was the champion in London in 1887, and in the ten years, 1893 to 1902, he easily headed the list of successful sires of prize-winning stock at the London exhibition. Harold gave us as sons of repute Calwich Blend, Calwich Blaze, Conquering Harold, Harold's Rival, Markheaton Royal Harold, Marmion 2d and Prince Harold. Their sons again include the modern Bearwardcote Blaze, Babingley Nulli Secundus, Tatton Friar, Thrupp Rival, Southgate Honest Tom, Hendre Champion and Hendre Hydrometer. A son of Harold, by name Rokeby Harold, won the London stallion championship at the show of 1893, when he was but a yearling.

Lockinge Forest King has left behind a remarkable list of sons, all doing well, to-wit: Halstead Blue Blood, Halstead Royal Duke, Ansty Forest King, Barn King, Marden Forest King, Ratcliffe Conquering King and Ratcliffe Forest King, and others of his sons which have got some wonderful stock are King of Tandridge, Redlynch Forest King (champion sire in London in 1914), and Catthorpe Cornelian.

A new power as a stallion is rising in England—Norbury Menestrel, a son of Birdsall Menestrel, and so tracing back to the horse Menestrel, to be found under the William the Conqueror list. His dam, however, was by Childwick Majestic, the sire of Childwick Champion, which got the $20,605 yearling colt Champion's Goalkeeper. Norbury Menestrel himself realized $15,750 when sold in the Park situated opposite Box Hill, in Surrey, which gave him his name, and upon the death of Leopold Salomons. This Menestrel blood is very prepotent. It makes an ideal outcross for Lockinge Forest King blood. The way to work it best is to put a Forest King mare to a Menestrel horse. Try it, if you possess the "lines." My advice to Shiremen in the United States is to "corner" all the Harold, Carbon, Premier, Menestrel and Forest King blood they can. In the days to come they can sing of it as they once sang of "Duchess" bulls and other "bits of Bates."

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Sportsmen's Row

There will be a Junior Trapshooting Championship at the twentieth Grand American Handicap Trapshooting Tournament, which will be held in Chicago, Ill., August 11th to 15th, inclusive. The Junior championship will take place on championship day, the 13th. One trap will be used. Boys under 18 years are eligible for the event.

Aviators who have flown over the barren lands of Canada say that there are at least 20,000,000 caribou there. Don't mistake the figures; they must be pretty nearly accurate, because the information comes from more than one flyer. In the spring the herds migrate to the north, returning south in the winter. The country over which the herds range is a wild, desolate region, without timber, and the climate is very severe.

The proposed match between Frank Troeh and Billy Heer at the Northwest Sportsmen's Association shoot fell through because Heer didn't like the conditions. Last year Troeh and Heer shot a 500-target race—a real match race. This time the challenge read that the men would shoot in a squad of five. As this would not be a real match race, Heer declined.

The question of a standard load of three drams of powder and an ounce and an eighth of shot is being discussed by the trapshooters. Four States will send representatives to the A. T. A. meeting in November to vote for such a load. They are California, Nevada, Oregon and Arizona.

O. N. Ford, manager of the Olympic Gun Club, is lamenting the loss of a fine female pointer pup, under aggravating circumstances during the registered shoot of the club. A great favorite with all Olympic Gun Club members and easily recognizable by many people, it will be difficult for the thief to keep her. She was last seen playing with a stranger near the club house by members. She is six months old, fat, brown, and remarkably handsome and intelligent. Mr. Ford will be grateful to anyone who can return her or give information which will lead to her recovery.

The revised trapshooting rules, brought up to meet present-day conditions, have been put in book form by the American Trapshooting Association. These books are now ready for distribution. Sportsmen who desire a copy of the rules can secure same by addressing the American Trapshooting Association, 460 Fourth Avenue, New York City.

PACIFIC COAST TRAPSHOOTERS FAVOR STANDARD TRAP LOAD

The proposed standard trap load, 3 drams of powder and 1⅛ ounces of shot, is meeting with approval among the trapshooters of America. Three state associations have voted on the subject at their annual meetings, and all of them have favored the light load.

C. A. Haight, secretary of the California-Nevada Trapshooters' Association, writes as follows: "At the state shoot we took a vote on the matter of change of load from 1¼ ounces of shot to 1⅛. Forty-eight votes were cast; twenty-three voted 'Yes' to make the change, and fifteen voted against the proposition."

Oregon trapshooters apparently are strong for the light load, as this quotation from the letter of D. C. Bowman, secretary-treasurer of the Oregon State Trapshooters' Association, indicates: "The association voted unanimously to adopt a standard load of 1⅛ ounces of shot."

Arizona also has fallen in line, and in a letter from D. E. Morrell, secretary of the Arizona State Sportsmen's Association, he states: "We want to go on record as absolutely in favor of the 3 dram 1⅛ ounce load."

The amateur trapshooters will have an opportunity to further discuss and vote upon the proposed standard load at the annual meeting of the American Trapshooting Association, to be held in New York in November, 1919. Delegates to this meeting have already been elected from several of the states. Oregon selected A. W. Strowger as delegate, with C. S. Preston as alternate. Arizona will send H. P. DeMund of Phoenix to the national meeting.

Clarence H. Mackay of Harbor Hill Farm, Roslyn, N. Y., son of John W. Mackay, Nevada Comstock miner, has sold for $6,500 the Guernsey cow Nivolette 2d to Anderson T. Herd of Herdlea Farms, New Hope, Pa. This is the second highest price ever paid for a Guernsey cow.

FIRST OLYMPIC CLUB REGISTERED TRAP-SHOOTING TOURNAMENT PROVES BIG SUCCESS

More than fifty shotgun enthusiasts participated in the practice shoot held Friday, June 13, at the Lakeside Olympic Club shooting grounds, San Francisco. They shot at 100 targets, and Frank M. Troeh of Vancouver, Wash., generally considered the champion shot of the United States, broke ninety-nine targets, missing only his first shot. Trophy winners were:

Frank M. Troeh	99
M. S. Lefler, Stockton	97
O. N. Ford, O. C.	96
Fred Bair, Eureka	96
Jim Seavey, Portland	96
Dr. E. F. Topham, O. C.	95

Among the professionals, high scores were as follows:

L. S. Hawxhurst	98
R. C. Reed	96
Hugh Poston	95
Charles Plank	95
C. A. Haight	85

There were three special cups for 25-bird events. The winners were Fred Bair and Dr. Falk of Eureka, and William Eilert of Fresno.

On the first day (Friday, June 14) of the big registered tournament, O. N. Ford, manager of the new grounds, pulled away from the champion, Frank Troeh, beating him out by a score of 146 to 144 on 150 targets. Frank Newbert of the California Fish and Game Commission tied Troeh for second honors. Despite rather a stiff breeze, Ford shattered target after target until his total was far up in the running, when Troeh started to gain and wound up only two targets short. Barney Worthen sprang a surprise by capturing first place in the Miss and Out event, breaking 35 straight. E. McFayden of Salinas won the handicap shoot, breaking 48 out of 50.

The attendance on Sunday far exceeded that of the previous day. The shooting was excellent and the entire tournament was highly successful. There was not a single delay or hitch in the proceedings. The competitors displayed great enthusiasm, and a feeling of good fellowship prevailed. At the conclusion of the tournament Troeh and Ford tied at 290 out of 300. Len S. Hawxhurst was high professional, with 148 out of 150. Here are the scores for the two-day shoot:

First Day

	Total	Handicaps		
O. N. Ford	146	23	19	42

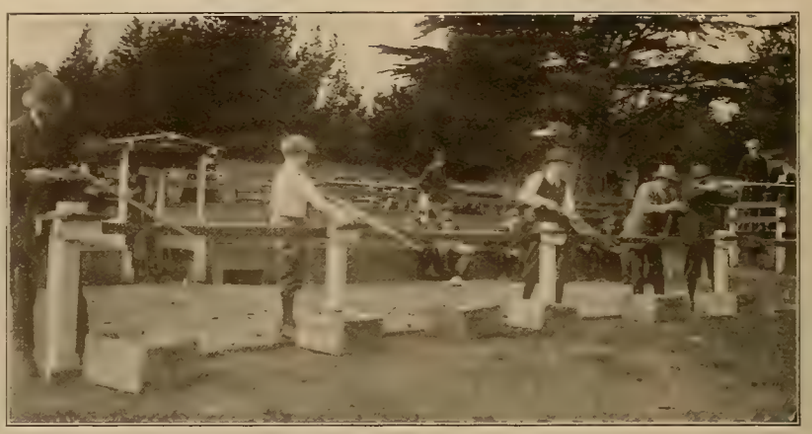
ESTABLISHES SCHOOL FOR GAME BREEDING

The National Association of Audubon Societies has a game farm and experiment station in methods of wild life and game conservation and propagation at Anston, Connecticut. The enterprise is in general charge of Herbert K. Job, the ornithologist and author, with a skilled professional head gamekeeper employed. Summer school sessions will be conducted there, including a special course in commercial and practical game farming, to help fit people for game farm enterprises of their own or for professional work in this line. A prospectus giving details, may be had by addressing Mr. Job at Anston, where he will be for the summer.



Lee Pierson, a Chicago owner who resides in Los Angeles during the winter, has sent Oro Belle, by Copa de Oro, p. 2:01, to join Dr. Gilbert at Aurora, Ill. She was taken there by William Bosworth of Los Angeles, who will drive for him this season. He accompanied Fred Ward.

SAN FRANCISCO SONS SHOOT AS WELL AS THEIR SIRES AT OLYMPIC CLUB

O. N. Ford, genial and energetic manager of the trap shooting division of the Olympic Gun Club at the Lakeside shooting grounds, is proud of his junior classes.

In the 15-year-old class Jas. Talbot, Len Howard, Carroll McGettigan, G. Vonderleith and N. Pierce promise to be experts with a little more practice. They are now breaking from 15 to 25 straight and improving every day, scores that many a man who has shot at the traps for years would be tickled to make.

The snap shot shows trap No. 2, pullers' house, scoring stand with Tom Bunyan, Wm. Mowson, manager of the Olympic Golf Club, and a row of boys awaiting their turn to shoot at the Olympic Club's new shooting grounds. It also shows how the hill has been leveled back to 22 yards where the boarded-up bank makes a seat for the next squad waiting to go to the firing line.

Young Olympians Learning to Shoot

All three sets, arranged as this is, are unexcelled in the United States. The entire arrangement of the club house, shooting grounds and enthusiastic popularity of the Gun Club are due to the energy and experience of Manager Ford.

The 13-year-old class includes Wm. Pierce, Bernard McGettigan, Tom Wilkinson, Buck Moran and Stewart Kerrigan, a remarkably promising bunch of youngsters, who are breaking from 15 to 19 each time they go up to score.

Stewart Kerrigan, a son of Judge Kerrigan, who was a popular member of the Old Bay City wheelmen years ago, is quite a phenomenon. He took his first lesson on June 4th and broke 33 out of 50, a wonderful score for the first time up for a twelve-year-old boy, especially considering that it was his first experience with the shotgun. In the first trial he broke 15 out of 25, shooting 2¾ grams of powder and 1⅛ ounces of shot. Out of the second 25, he broke 18. On the following Friday, notwithstanding a high wind was blowing which made it very difficult for shooting, he broke twelve the first trial and 21 out of the next 25, shooting over 50-yard targets from third position, making 66 out of the first 100 he ever shot at.

The Juvenile Contest of 100 targets, 50 shot at May 24th and 50 June 7th, was won by Len Howard. The following is the score of the high guns in the contest: Len Howard 79, Carroll McGettigan 68, Bernard McGettigan 59, Wm. Pierce 58, N. Pierce 42 and H. McKenna 35.

Len Howard, son of Chas. S. Howard, is going fine, breaking 78 out of the first 100, next time up with 85 and followed with 87.

Jas. Talbot is at the head of Class D in the season's contest where some 20 men are shooting. He scored to date 283 out of 300.

Talbot and Howard may go to Chicago and shoot in the Junior Championship class of the Grand American Handicap. Either one of them is liable to win it.

UNITED STATES NAVY TO STAGE NATIONAL RIFLE MATCHES—EXPENSES OF TWO TEAMS FROM EACH STATE PAID

The national rifle matches this year will be conducted under the auspices of the United States navy. Heretofore the national matches have been conducted by the army and have been held on army or state rifle ranges. This year's competition will be held over the navy range at Caldwell, N. J.—the last rifle range to be erected and the last word in range construction.

The executive officer in charge of the matches is Lieutenant-Colonel William C. Harllee, U. S. M., assigned to the navy department. It was Lieutenant-Colonel Harllee who conceived the idea for the string of navy rifle ranges that are to be found on the east and west coasts, and who is responsible for the high class of marksmanship in the United States marines.

It is the intention of Colonel Harllee to stage the greatest shooting carnival that was ever held in America, and we are quite confident that he will succeed. Most everything he undertakes he puts over, and with the United States navy to back him up he ought to go over good this time.

The Caldwell range was built by jackies last fall, covers nine square miles, will accommodate 100 rifle teams at one time, has every facility for shooter and spectator, and is handy to the greater portion of the population of the United States. One can stand on the hill behind the range and look over the houses that shelter 10,000,000 persons, all within one hour's ride.

New York City is twenty miles away, Newark is twelve miles away, Montclair is but a few minutes away. The range is located four miles from the town of Caldwell, and the thousands who are expected daily will be carried to and fro by automobiles.

While it is the idea to make rifle practice a national sport, Colonel Harllee intends that the program will be of interest to every one who shoots with firearms and those who would like to shoot. Instead of taking two weeks, the tournament and instruction will take two months. Shooting will begin about July 1 and conclude about September 1.

MR. TRAPSHOOTING BEGINNER, PATIENCE IS NECESSARY FOR SUCCESS

(By Captain T. K. Lee)

It all depends upon how young a beginner you are, measured from an experience standpoint, and how deeply you're interested in the art of smashing flying mud pies with a scatter gun, as to how forcefully these expressions strike you.

Be patient, man. Patient with yourself, your gun, ammunition, the trapper boy, referee and the misguided spectator who persists in making remarks back of you loud enough for you to overhear, such as "Who's that long-legged feller with the blue sweater on?" etc., and "Ain't he got big feet?" You'll hear things and see a lot of things that will knock that smooth, velvety edge off until you get a few more years' practice.

If you keep continually at it, I guess from year to year, you'll improve. When you get to breaking 98 per cent as a regular thing it may take you a number of years to get to breaking 99—number indefinite. Some of the old-timers have been shooting clay birds since the sport came into its own, and before that they shot at live birds. That is only a matter of forty years or so, but those same old-timers consider themselves yet young in the game. You won't find any of those wise old fellows who will tell you they know it all—even yet. Things happen very often even they can't explain. Therefore don't you, as a beginner, feel at all embarrassed with yourself because you don't know why when mysterious things happen to your score?

And don't become over-confident. Confidence is one great asset if you possess it in the genuine article, but the idea is, don't get over-confident because you broke that last twenty-five straight, or even that last hundred straight. The match is never won until the last bird is shot or shot at, as the case may be. Some days they just seem to crumble for you when you don't seem to half way try, and again you make up your mind you're going to bust 'em all clear through, and your score in each hundred shows a fair size settin' of goose eggs.

You ought to know more about the whyfore of these misses than the other fellow, speaking of your own individual score, of course. You should make a study of your own little idiosyncracies and watch out for the little devils; they mean goose eggs on the score board unless you learn to know when they're getting ready to slip a blank cartridge in your gun.

And for the love of Mike, as Jeff would put it, don't presume to give some other shooter the benefit of your advice and display your great store of knowledge of the game just because you won a match one time or made a couple of long runs. It's perfectly all right, good and proper to express your opinion, understand, if you're asked to, but always do it with due humbleness, because unless you know to whom you are handing out said knowledge, you might later on feel even big enough to crawl through a half-inch auger hole. Your listener might have some thirty or forty years' more experience than you, and it is just possible that he may have made an average on a million or so birds higher than your best-ever score on a hundred.

Rather place yourself in the attitude of the seeker after advice. It's a better frame of mind somehow, and your score will look more decent after the smell of nitro has blown away.

Of course, you're already supposed to have imbibed the truth that your gun had best be a bit straighter than the one you use in the field. The more you shoot at the trap, the straighter your gun will needs be, up to a certain sensible limit. And don't get the mistaken idea in your head that a big whopper of a load that wallops you like a wild mule's kick will help your score. You may preserve friendly relations with your head for a few events, but in a day's shoot all the Asperin Mr. Bayer ever compounded won't keep your head from aching. If you can break a bird with 3

drams 1¼ ounces, 3¼ drams isn't going to help you at all. Your shoulder is liable to get a flinchy feeling from the heavier load. If you are built a la Willard you can handle the pile-driver loads, but stay off if you're not well padded on the shoulder.

And when the temptation comes to trade your good old pal of a gun and take on a new love, go slowly and examine each inch of the new love with much care. Some of the best shots attribute most of their good records to the fact that they haven't changed guns in a month or so of moons.

And don't forget that it's a pretty nearly standardized fact that any man can shoot a single-barrel gun better. Count 'em at the traps at the big shoots. They have a nice little bridge running from the breech to the muzzle, which gives a straight shot sighting plane and prevents the wiggle tail mirage waves from causing you to see a bunch of sights instead of the one, and likewise causes the mud bat to take on various grotesque shapes, and you sometimes shoot at the wrong end of the shape that no longer appears nice and round.

And right along about here now I believe it's time to refer you to the first few paragraphs and tell you that you've got to practice a whale of a lot before you can hope to lick Troeh or Heer or any of several score others about as good. They didn't begin shooting yesterday and they're all very bashful about telling the real George Washington truth as to the number of shells they have wasted in their day and time. Yes, I meant "wasted." Because they shot at pecks of birds they never even dusted at the beginning, "even as you and I," but they kept on a-plugging and mortgaged the old gray mare and bought still more shells and made peace with the good wife in some way when accused of rank and fervid extravagance.

Oh, when the trap shooting bug bites you, and it "takes" successfully; you'll be keeping part of your guns and things at the office so the trusting better nine-tenths won't know just how really extravagant you are—even as humble I am doing. If your club shoots Saturdays, then the rest of the week will just be a sort of necessary sentence you have to serve to get the reward of pitching chilled 7½s at festive Blue Rocks the seventh day. In the Good Book, somewhere in Genesis (don't ask me how I know) it tells where the Creator worked six days and rested the seventh. The trap bug works, or manages to live through, six days and shoots on the seventh. And occasionally you'll catch him sneaking out to the club grounds for a mid-week seance at an extra hundred. That's likewise kept a dark secret from the "folks at home."

Of course, this mostly applies to us beginners, because after you've been at it ten or fifteen years, your friends (your wife is included) will understand that you're quite harmless and may even condescend to go with you occasionally to the club and see you make weird faces and look searchingly at the stony hearted bird when you miss it and it sails peacefully, majestically, scornfully, disdainfully, gleefully, happily as well as promptly and completely away.

The knowledge, if I may call it that, which we beginners possess, isn't the same good sound knowledge we'll have later on. We think it is now, but we gradually shed the defective ideas like a tree shedding leaves in fall, while at the same time we're acquiring permanent and sound ideas, via experience and observation. Just keep on practicing conscientiously and faithfully and don't shoot carelessly any time. Just make a bet with yourself on a certain score, and if you lose, give the money to your wife and set a mark one bird above what you think you can do at your best.

ENFORCE MIGRATORY BIRD TREATY ACT IN MIDDLE WEST BY ARRESTS

Eighty-three violators of the Migratory Bird Treaty Act have already been convicted under fourteen United States district judges and 241 cases have been filed for prosecution. We have been informed by the Biological Survey of the United States Department of Agriculture that these cases will be presented to the courts and disposed of as rapidly as possible.

Among those in waiting is the Attorney General of Missouri, who is under $1000 bond, pending his trial. The chief law officer of Missouri and several of his friends were arrested at their private club and seventy-six ducks and one goose seized as evidence.

The only place where an organized fight is being made against the law is at Kansas City, Mo. A demurrer was filed, alleging the law is unconstitutional, in the case of De Lapp and Samples, two Kansas City gunners, arrested February 25th for shooting ducks after the Federal season had closed.

This case was hailed as the "test case" by the newspapers of the Middle West, and those favoring spring shooting gathered to the defense of these men. The best of legal talent was furnished them gratis, and the public has been assured that the case will be appealed and a United States Supreme Court decision secured as quickly as possible, no matter which side wins in the District Court.

Shortly after the arrest of the Attorney General on March 6th, he, with his assistants, joined those attacking the law. In the name of the State of Missouri, an injunction was asked for restraining United States game wards from enforcing the law in that State. Kansas also enjoined, through her Attorney General, and this restraining order was argued on April 21st and 22d, at the same time as the demurrer in the so-called test case.

A decision is expected at any time, and those favoring the law feel that if the opposition cannot win with their present array of counsel, there surely is no merit in the claim of the spring shooter that the law is unconstitutional.

IRRIGATION DITCHES DESTROY FISH

Recently the American Game Protective Association received a letter from a member living in a western state, bitterly complaining of the fish killed by agriculturists in irrigating their land.

When the irrigation ditches are opened the fish follow down through the flow of water from their native streams, and when the water is distributed through the laterals and over the fields they necessarily must perish as the water soaks into the ground.

Some states require the mouths of all ditches to be screened to prevent fish from entering. Others should pass similar legislation, and all should see that it is rigidly enforced. Many land-owners are too apt to remove the legal screening as it becomes clogged with drift, in order to get their water quicker and with less labor and attention. Screens can be so made that they can be quickly lifted out and reversed. In this way the water removes the drift that has collected.

Our correspondent tells us that he has known of entire streams being turned from their course for the time being, to furnish water for growing crops. In such cases many fish below the dams must perish, as well as those which run down the ditches.

To anyone who has ever fished for trout in Rocky Mountain waters, this condition is not a pleasant one to think about, and everything possible should be done to safeguard the fish from such a fate.

QUAIL CONDITIONS BAD IN MEXICO

For years we have heard of the bobwhite quail being exterminated in certain sections by cold weather. Occasionally we hear of a flood cleaning out limited districts, but now come the quail trappers of northern Mexico, who claim that the exceedingly dry weather of the last three years has reduced the birds until trapping is unprofitable.

As these men have been supplying both states and individuals with quail, their activities may have some slight bearing on this alarming decrease.

HUNTING AND FISHING BIG FACTORS IN WINNING THE WAR, SAYS GENERAL SCOTT

Free fishing and shooting must not be allowed to disappear, for directly thereon rests not only the health and happiness of thousands of our citizens, but, in a large measure, our national security. No one doubts that as a nation we must always depend upon the virility of our young manhood.

Major-General Hugh L. Scott, that dean of American fighting men, strongly urges that both state and Federal aid be given to every legitimate movement to make attractive and perpetuate our outdoor interests. Hunting and fishing he places in the front rank of outdoor sports, which he believes was one of the greatest factors in making it possible for Uncle Sam to cross the seas with an army capable of standing the strain and acquitting themselves as our boys did.

General Scott knows whereof he speaks. Retired under the age limit, his robust body and keen mind permitted him to spring back into the harness at his country's call. He credits his fitness to the clean outdoor life he has led. How many of our boys, do you suppose, thanked their lucky stars that they knew how to handle a gun before they were called upon to shoulder a military rifle? How many looked back on past experiences and were glad they knew how to roll in a blanket and keep warm? Or that they could maneuver rough ground without wearing themselves out, build a serviceable open fire, or a thousand other things known to the outdoor man that a soldier must do to keep himself fit?

The most important thing to keep in mind is the sensible conserving of the game and fish we have now. No one section of the country must be allowed to overindulge its natural wish to take game or fish to its own detriment or to that of another section. Whether we perpetuate a species by artificial breeding and distribution, or by common-sense restrictive legislation, is not the point. The fact is that each and every American species must be saved and increased to numbers permitting at least some shooting. We cannot afford to delay or quibble over doing a thing that must be done.

The incentive to go afield provided, some place to go must be furnished. The Federal government, the states, associations or philanthropic individuals should set aside at once as many public hunting preserves as possible. This duty is the duty of the state, but the state is an abstract term. It is up to the citizens to start the ball rolling. Marshes are being drained and thickets cleared to provide more grain, and incidentally more dollars to some individual. Now is the time to buy, while much territory can still be purchased at a small figure. Again, the question is not who shall provide, but the fact that some territory for public shooting and fishing must be provided. All interested should put their shoulders to the wheel and help. This does not mean simply the sportsman, but all Americans who wish to see our nation composed of strong, healthy men, not only that they may be prepared for future military service, but that they may be better able to withstand the duties of a successful civil life.

ALASKAN REINDEER, UNDER GOVERNMENT PROTECTION, MULTIPLY TO 120,000 AND ARE U. S. FOOD SUPPLY

About thirty years ago our government began importing reindeer from Siberia and elsewhere for the benefit of the Esquimeaux on the Seward peninsula, in Alaska. In all about a thousand animals were brought in.

The natives and settlers have been eating reindeer meat ever since, and today carloads of cold storage reindeer are being shipped as far east as New York City. The food supply of the country has been sensibly augmented, and all the while the numbers of the living reindeer have increased until there are now, according to Governor Riggs, 120,000 reindeer in Alaska.

This is not the way Americans are accustomed to protect their wild game. When the settlement of the country began, the Wapiti deer or elk, one of the finest game animals in existence, occupied the country virtually from ocean to ocean. Seton estimated their numbers at ten million head.

Today, Graves and Nelson state, there are 70,000 elk in the United States, of which about 40,000 are in or about the Yellowstone National Park, and practically all the balance are existing under similar conditions of protection. If it were not for the refuge afforded the elk by the sanctuary of a Federal or state park, where they cannot be shot, it is safe to say there would be few, if any, alive to-day.

Why is it that the reindeer are more abundant than the elk? Primarily because their owners followed the simple biological practice, which is basic with the stock raiser everywhere, of taking for meat chiefly the surplus males, which were the animals which could best be spared from the herd. Had they killed the bearing animals indiscriminately, as was done for years with the elk, the reindeer in Alaska would have been just as much a minus quantity as are the elk in Michigan and other states of former abundance. And yet nearly half the United States still permits the killing of females of big game animals!

CANADA MAKES FISH SANCTUARIES

Canada applies the sanctuary or reserve idea to fish, as a means of increasing their numbers and promoting better sport.

Upon recommendation of the Victoria Fisheries Protective Association of Baddeck, Nova Scotia, the Canadian minister of marine and fisheries has ordered the setting apart of one brook of each of eleven different rivers in Cape Breton Island, for the natural propagation of trout and salmon, and has prohibited angling in these brooks for a term of three years.

As has been proved in game matters, a small section left fully protected the year round as a haven has always benefited the shooting in the adjacent country. This same plan should improve fishing by allowing many fish to spawn that otherwise would be caught, and by making these reserve brooks serve as nurseries and feeders for the main rivers.

DON'T SHOOT WOOD DUCKS BY MISTAKE

The American Game Protective Association has received several complaints from sportsmen that they fear they may innocently violate the game laws by shooting wood ducks through mistake. They advance the argument that should a wood duck decoy with a flock of mallards, it would be impossible to keep from killing him if he happened to be the easiest bird, after the first shot.

In this connection the question was put to an old, experienced gunner, and his reply may be of interest: "The beginner or the gunner in a section where the wood duck is a rare bird may be excused, but the old-timer, never. I can tell a wood duck just about as far as I can see him. He has a rolling flight, entirely unlike the flight of any other duck. He has a long, square tail that gives him a different outline and appearance, and in all my experience I never have seen one flocking with other ducks, except hooded mergansers and teal, and this only on rare occasions."

WORLD'S RECORD BEATEN AT VERNON ANNUAL REGISTERED TOURNAMENT

Throughout the three days' shoot of the Vernon Gun Club's Fourth Annual Registered Tournament at Los Angeles, which closed on June 8th, high scores were made. The tournament was held on June 6th, 7th and 8th, without a single hitch or delay. The management was excellent, the attendance large, and everybody seemed to enjoy themselves. Fifty shooters made runs of 50 or better. Nine shooters broke 100 straight. Ninety-nines and ninety-eights were common. Four clean sheets for five-men squad shooting was turned in during the shoot and the five-men world's record of 97 10 per cent for squad shooting on 3000 registered targets was beaten. The record now stands 97, 24 per cent.

The scores showed at the conclusion of the tournament the following ten high guns on 600 targets:

F. M. Troeh 589, Fred Bair 588, R. C. Reed 586, L. S. Hawkhurst 585, J. W. Seavey 585, S. H. Sharman 585, R. H. Bungay 584, S. W. Frout 578, O. A. Evans 577 and Guy Halohan 572.

POLO AND TRAPSHOOTING ARE POPULAR SPORTS AT DEL MONTE

Following the series of week-end matches which have been interesting the crowds at Del Monte this summer, the prospects are that play will continue right on through the whole year. It is reported that the Eleventh Cavalry has been ordered to Monterey Presidio, and when these troopers arrive it will provide two squads of poloists. The Eleventh Cavalry has established quite a record in army circles for its polo ability, and the Del Monte followers of the exciting sport on horseback are looking forward to some exciting times at the polo field.

On July 4th, 5th and 6th there will be a tournament which promises to be brilliant. Walter Dillingham and Harold Castle, two prominent players from Honolulu, will be among the contestants, with the possibility of three teams striving for the honors. This coming Sunday the poloists will line up again in contest.

The registered trapshooting tournament will take place on June 27th, 28th and 29th on a knoll overlooking the polo fields and race track. With the ponies tearing around the field and the shooters busting blue rocks in the air, the prospects are that there will be quite a little excitement at Del Monte this week.

Cattle

CALIFORNIA UNIVERSITY BREAKS STATE JERSEY BUTTER-FAT RECORD

A new record of butter-fat production for a California Jersey has been established at the University Farm at Davis, by Interested Jap's Santa making 939.08 pounds of butter-fat in a year.

Two years ago the California state record for a Jersey was 702 pounds, held by Pearl of Venedera, owned by Guy H. Miller of Modesto. Last year this record was passed by three cows: Mermaiden's Fern II, owned by the University of California, making 729.55; Fern's Silver Ray, owned by Frank Vanderpool of the Imperial Valley, making 779.54, and Interested Jap's Santa of the University herd making 805. The state record cow now raises her own record 133.35.

The new record, which is Santa's five-year-old record, beats the six-year-old record of Sophie 19th of Hood Farm (later grand champion of the breed) by 8 pounds. It places the University cow in eleventh place among all the cows of the breed. It is the highest record of butter-fat production made at an agricultural college.

The animal husbandry division of the University has achieved honors during the past year by establishing two new records for agricultural college herds. In April it sold a pure-bred Shorthorn bull of its own breeding at the record price for an agricultural college of $5,500. Now it establishes a new record of butter-fat production by an agricultural college cow.

TILLY ALCARTRA IS SOLD FOR $$11,200 SIR AGGIE MEADE DE KOL, $11,000

At the big Holstein sale at Philadelphia, Tilly Alcartra, world's champion milch cow, was sold by the A. W. Morris Corporation of Woodland for $11,200.

Three others of the Morris herd shipped East, accompanied by A. W. Morris, Sr., sold as follows:

Sir Aggie Meade De Kol, bull, $11,000; two granddaughters of Tilly Alcartra, $3,800. The four brought a total of $26,000, an average of $6,500.

Tilly Alcartra's production for 1918 amounts to 33,424.8 pounds milk, from which the butter-fat is equal to 1,322.25 pounds butter. She averaged over 42 quarts of milk per day for the whole year, and her total production if sold at 9 cents per quart would bring a return of $1,400. For four years she has an average of 27,629.4 pounds milk, 1,185.92 pounds butter, and for six years her average is 26,129 pounds milk and 1,023.18 pounds butter; while the total production for the six years is 156,776.2 pounds milk, 6,141.36 pounds butter. By this demonstration she has proven beyond all doubt that she is the greatest and most wonderful milch cow the world has ever known.

She was bred by McKay Brothers of Buckingham, Iowa, and purchased as a two-year-old by the Morris Corporation. She is ten years nine months old.

JERSEY VIVE LA FRANCE TAKES WORLD'S RECORD IN OREGON

Vive La France, a Jersey owned by Pickard Bros. of Oregon, at four years seven months old has produced 14,926 pounds of milk and over 1,000 pounds of fat—the highest record ever made by a Jersey cow of any age.

Old Man's Darling 2d just completed the championship junior four-year-old Jersey record with 14,631 pounds of milk and 983 pounds of fat. Lady Silken Glow produced 13,305 pounds of milk and 882 pounds of fat as a senior three-year-old.

This shows what Jerseys will produce when a man owns, tests and cares for his own cows. These tests were authenticated by the Oregon Agricultural College, Corwallis, Ore.

VALLEYS OF BRITISH LAKELAND ARE THE SHORTHORN'S OWN COUNTRY

If California be God's own country, British lakeland is the Shorthorn's own country. In the valleys are to be seen milky matrons, which under fleshy, symmetrical bodies, carry uberous udders that would excite the cupidity of an Edinburgh dairyman, while a pistol shot away, on the rocks that wall the narrow dales, the hardy, coarse-wool Herdwicks hustle for a living.

Why lakeland should possess some of the best dual-purpose cattle in the world and some of the smallest goat-like sheep is to be explained in one word—the land. The hungry granites and barren slates starve the grass on the hills, and the starved grass stunts the sheep, albeit their mutton is excellent. The rainstorms of a million years have robbed the mountains to enrich the meadows below, and much of what is called the "infield" land is fairly fertile. Here the Shorthorn thrives.

A moist and genial climate suits the Shorthorns, and Cumberland and Westmoreland are two emerald counties where the grass grows as green and fadeless as anywhere in the world. There is a somewhat heavy rainfall, but the land is hilly, the natural drainage good, the pastures dry quickly, and on succulent pasture in summer and autumn, and hay, roots and straw in winter, the Shorthorn in Cumberland and Westmoreland develops size and scale, constitution and vitality.

In lakeland proper the red, white and roan milker is queen of the meadows. Her sons are sold soon after birth, but her daughters are retained to follow in their mother's footsteps and replenish the herd. But fringing the land of mountain and mere, where, in the happy days before the war, touring Americans trod in the footsteps of Wordsworth, Southey, Coleridge and Ruskin, is a region of mountain limestone as favorable to the quick growth and profitable development of all classes of stock as the bluegrass region of Kentucky; while farther afield still are undulating areas of fertile loams, much of which overlie red sandstone.

Here may be seen on the same farm "the milkiest cow and the squarest-shouldered ox," the son being fattened for the butcher, while his mother supplies butter for market, separated milk for calf rearing and the production of pork and an excellent calf every year.

It is on these mixed arable pasture farms of the uplands, and the plains, outside the mountain area, that the dual-purpose cow may be seen fulfilling her useful role with most advantage to her owner and the state. The tenant farmer finds that his "milkiest cow" may give him his "squarest-shouldered" steer, and from the one herd milk, meat and manure are produced on the most economical lines. The advocates of specialized dairy and beef breeds may challenge this assertion. Nevertheless it cannot be denied that there is waste in asking a cow to do no more than suckle a calf in the year, waste in the slaughter of the unwanted bull calves in the pure dairy herds—a waste which is avoided with dual-purpose cattle, the bulls of which are reared to supply beef, and to confer a greater benefit on the country as producers of manure, enhancing the crop yield. No breed can compare with the dual-purpose Shorthorn in supplying the three "m's" of successful agriculture, of national food production—milk, meat and manure.

The idea that you must divorce milk from meat, that you cannot combine dairy and grazing qualities, that to get milk in abundance you must have a razor-backed, bony, fleshless, wedge-shaped milking machine, is moonshine. Shorthorn history furnishes not a shadow of support for the wedge theory. The early Shorthorns were not only great milkers, but furnished great carcasses of beef. All Shorthorns being descended from the Colling herds, and the deep-milking Teeswaters from which they came, milk is latent in the beefiest of beef strains, and only needs development by early calving and hand milking and a stoppage of the pernicious system of allowing heifers to suck their dams, with the result that they become pig-fat, and have their breeding and milking qualities impaired.

Lakeland Shorthorns may be described as beef cattle whose milking qualities have not been allowed to degenerate, but developed. Primrose Gift, a Cumberland-bred 1,000-gallon cow, a great Royal winner, and one of the handsomest cows in Christendom, is a daughter of Good Gift, one of the heaviest-fleshed Scotch bulls ever sold at Birmingham.

Molly Millicent, another Cumberland dual-purpose animal, the best cow seen in the showyard in the latter half of the nineteenth century, was by the massive Booth bull, Beau Benedict, from a dam carrying Bates blood. The aim of the average lakeland farmer is 8,000 pounds of milk and a good calf in the year from a cow that, fattened, will furnish an excellent body of beef.

But there are others who, with an eye to the profitable Argentine trade, care nothing for milk, concentrate on beef, and favor the fashionable Scotch strains. These also do well in these days of the golden Shorthorns. In the past lakeland Shorthorns have suffered from the fashionable craze for buying "paper." The cry in those days was all for "straight-bred Bates," and although it was not in England as in America carried to the imbecile length of demanding a red bull, an all-red bull and nothing but a red bull, yet in the northwestern counties inbreeding was pursued by such misdirected enthusiasm that constitution was lost, the cattle became shy breeders and the calves too delicate to rear.

This was the time when a witty Cumberland breeder, having paid $7,625 for a bull (a high price in those days), to lose him by death a day or two afterwards, chalked up on the shed door:

"Here lies Baron Oxford, quiet and cool,
Bred by a duke and bought by a fool."

The mention of the one-time popularity of the Bates lines recalls the fact that, among the numerous families that have originated in Cumberland, the Gwynns were notable as rivaling in symmetry and courage, style and milk the best of the Bates families. It is not surprising that this should be so, for through Nell Gwynn they descended from Princess, the best of Robert Colling's cows.

Penrith, near the heart of lakeland, where sales are held spring and fall, is becoming the metropolis of the Shorthorn world, the Mecca of all Shorthorn breeders. —Skiddane, Cumberland, England.

FOUNDATION OF AYRSHIRE WAS MADE TWO HUNDRED YEARS AGO

Now that hostilities have ceased, soldiers from the British dominions and elsewhere are occupying their spare time in visiting some of the leading herds and studs in Scotland. One lot of colonials is making a tour of the Ayrshire herds in the west country.

They made a start at Dunlop Place, Dunlop. James Dunlop of the Board of Agriculture for Scotland, who acted as demonstrator, told the visitors that it was fitting that they should begin their tour there, where an ancestor of the proprietor, Mrs. Houlson-Crawford, John Dunlop of Dunlop, more than 200 years ago had laid the foundation of the Ayrshire breed of cattle.

The breed was founded on Dutch blood which Mr. Dunlop brought from Holderness, in Lincolnshire, and by a system of crossing with the native breed of the country and by selection he founded the Ayrshire. For more than a century the Dunlop herd remained the fountain-head of the breed.

At the dispersion sale of Robert Burns, our national bard, at Ellisland, a cow from the Dunlop herd made the record price of $90, which was much commented on at the time. The average price of an Ayrshire cow at that period was from $10 to $15. But there has been a big advance since then.

Proof of this was found in the bull Howie's Hot Stuff, upon which Mr. Dunlop demonstrated in making manifest the essential points in a first class Ayrshire sire. The price paid for him at the recent sale at Hillhouse, Kilmarnock, was $8,925.—Alexander Mowat, Lanark, Scotland.

Sole Importers & Proprietors for the U.S.& CANADAS. } CLEVELAND, O

NOTHING BUT GOOD RESULTS.
Have used GOMBAULT'S CAUSTIC BALSAM for more than 20 years. It is the best blister I have ever tried. I have used it in hundreds of cases with best results. It is perfectly safe for the most inexperienced person to use. This is to be best bred and best blister often.—W. H. PAYMOND, Prop. Belmont Park Stock Farm, Belmont Park, Mont.

USED 10 YEARS SUCCESSFULLY.
I have used GOMBAULT'S CAUSTIC BALSAM for ten years; have been very successful in curing curb, ringbone, capped hock and knee, bad ankles, rheumatism, and almost every cause of lameness in horses. Have a stable of forty head, mostly track and speedway horses, and certainly can recommend it.—C. C. CRANES, Training Stables, 990 Jennings Street, New York City.

18. 3-year-old Pacers 800

Entrance and payments on these stakes will be due and payable as follows: 3 per cent July 15th, 1 per cent August 1st, and 1 per cent on or before five o'clock the night before the race.

ALL RACES THREE HEATS. Money divided 30 per cent to the first heat, 30 per cent to the second heat, 30 per cent to the third heat, and 10 per cent to the race according to the rank in the summary. Money in each division 50, 25, 15, and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat, and money divided according to rank in the summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary.

Nominators have the right of entering two or more horses in any race by payment of 2 per cent additional on each horse, but only one of the horses so entered to be started in the race, and the starter is to be named by 5 o'clock P. M. the day before the race is to take place.

All purse races 5 per cent to enter and 5 per cent from money winners, except the Futurity and Stanford-Occident Stakes. All purse races must have ten or more entries and four starters.

Money must be sent with nomination.

The Society reserves the right to declare two starters a walkover. When only two start they may contest for the entrance money paid in, divided 66 2-3 per cent to the first and 33 1-3 per cent to the second horse.

The Society reserves the right to change the hour and day of any race, except when it becomes necessary to antedate a race, in which instance the nominators will receive three days' notice by mail to address of entry; also, for any unforeseen cause beyond the control of this Society, we reserve the right to declare this meeting off, after due notice and entrance money will be returned.

The right reserved to reject any or all entries and declare off or postpone any or all races on account of weather or other sufficient cause. All races shall be called promptly at one o'clock P. M.

All entries not declared out by 5 o'clock P. M. the day preceding the race shall be required to start and declarations must be in writing and made at the office of the Secretary at the track.

The Society reserves the right to start any heat after the fourth score, regardless of the position of the horses.

Unless otherwise specified, rules of National Trotting Association to govern.

Address all communications to the Secretary.

GEO. C. ROEDING, President CHAS. W. PAINE, Secretary.

You Will Meet Him

At the

Grand American Handicap Trapshooting Tournament

It is worth the trip to Chicago to watch the top-notchers of the Clay Target Game in the Championship Contests—to know personally the men you have read about.

And then you may win the Big Handicap with its guaranteed purse of $500 and a trophy valued at $100—or you may finish high in your class on Classification Day, and take home money and a prize—or you may land on top in the 18-Yard Championship, or the South Shore Country Club Special, or the Doubles Race.

THE TWENTIETH GRAND AMERICAN HANDICAP TOURNAMENT will be held at the South Shore Country Club, Chicago, Ill., August 11, 12, 13, 14 and 15, 1919. Write for a program. Address

The American Trapshooting Association

460 Fourth Avenue, New York

THE

Parker Single Barrel Trapgun

Price $150

The **Gun With a Pedigree**

The Greatest Scores Ever Recorded Were Made With

Parker Guns

Mr. L. S. German made the highest official yearly average ever recorded with his Parker Gun, scoring 6137x6285=97.64%.

At San Jose, Cal., May 19th, Mr. Orval Overall won **THE CHAMPIONSHIP OF CALIFORNIA-NEVADA**, scoring 44x50 targets with his double Parker Gun.

At same place, May 22d, Mr. Harry Ogilvie won the **INTERSTATE CALIFORNIA-NEVADA HANDICAP**, scoring 97x100 at 20 yards with his single barrel Parker, and Mr. Len. Hawxhurst won the Professional Championship, scoring 94x100 with same kind of gun.

At Los Angeles, Cal., May 28th and 29th, Mr. Ed. Garrett made the highest aggregate score on the **Preliminary and Pacific Coast Handicaps**, scoring 187x200 at 18 and 19 yards, with his single barrel Parker, and Mr. Len. Hawxhurst at same place won Second Professional Average, scoring 381x400 targets with same make and kind of gun.

The Grand American Handicap has been won nine times with Parkers.

If interested in small bore double shot guns, please write for New booklet which will be sent free, giving valuable information on this subject.
